DEDICATION

To the soldiers and sailors of the United States and Canada; to the men of the armies and navies of nations allied with us; to the splendid courage and devotion of American, French, British and Belgian women, who have endured in silence the pain of losses worse than death, and never faltered in works of mercy for which no thanks can ever pay; to all the agencies of good that have helped save civilization and the world from the most dreadful menace of all time, this volume is dedicated.

PREFACE

With the signing of an armistice November 11, 1918, by the plenipotentiaries of the nations at war, active hostilities were halted while the sweeping terms of the truce were being complied with by Germany. The collapse of the Teutonic forces came with a suddenness that was surprising, and the collapse was complete. The German army and navy ceased to be a menace to the civilized world—and all civilization rejoiced with an exceeding great joy.

Remarkable events in the world's history followed with amazing rapidity, and are duly recorded in all their interesting details in these pages. The flight and abdication of the Kaiser; the abject surrender of the German high seas fleet and submarines to the British Grand Fleet and its American associates; the withdrawal of the defeated German armies from Belgium and France; the return of the French flag to Alsace and Lorraine; the occupation of Metz, Strassburg, Cologne, and Coblenz by Allied and American forces, and the memorable entry of Belgian troops as conquerors into Aix-la-Chapelle (Aachen); the sailing of the President of the United States to take part in the Peace Conference—all these events and many others form part of the marvelous record of the recent past, furnishing material that has never been equaled for the use of the historian.

Now the eyes of all America are turned to the eastern horizon, and would fain scan the wide waters of the Atlantic, on the watch for the home-coming heroes of the great conflict. A million young Americans are coming home—but a million more will stay abroad awhile, to safeguard the fruits of victory and insure the safety of the world. Truly the story of their achievements, in permanent form, should find a place in every American home, for in the words of General Pershing, their great commander:

“Their deeds are immortal and they have earned the eternal gratitude of their country.”

T. H. R.

TO the honor of those nations upon whom the laurel of victory has descended. To those who have vouchsafed for us the permanence of the higher ideals of humanity and civilization.

To those who have sheltered posterity from the dominance of barbarity, brutality, serfdom, bigotry and degradation.

To those who have striven against the Teuton and the Turk that God-given and God-ordained freedom may triumph.

To those noble stoics of Belgium, of France, of Serbia, of Roumania, of Poland and all other peoples who have felt the mailed fist of the ruthless oppressor; who have looked upon their devastated fields, their dismantled cathedrals, their violated hearth-stones and the desecrated graves of their kindred, and that peace, tranquillity, contentment and prosperity may again be restored to them in bounteous meed.

To those heroes who by their valor, their vigor and their inspired devotion to right and patriotism have so nobly fought and conquered.

To those martyrs whom God in his immutable manifestations has chosen for the ultimate sacrifice of their lives upon the altar of freedom and humanity's cause.

In honor to these who have attained this glorious victory. In honor to the commingling flags of the allied nations reflecting in their rainbow hues a covenant of everlasting peace in this their hour of triumph, may we all consecrate our purposes and our lives to a brotherhood of mankind, a spirit of broadest humanity and universal peace on earth.

—I. J. Robinson.

INTRODUCTION

PRESIDENT WILSON'S EPOCHAL ADDRESS

CALLING FOR ACTION AGAINST GERMANY, DELIVERED BY HIM TO THE CONGRESS IN
EXTRAORDINARY SESSION, APRIL 3, 1917

"Gentlemen of the Congress: I have called the congress into extraordinary session because there are serious, very serious, choices of policy to be made, and made immediately, which it was neither right nor constitutionally permissible that I should assume the responsibility of making.

"On the 3d of February last I officially laid before you the extraordinary announcement of the imperial German government that on and after the first day of February it was its purpose to put aside all restraints of law or of humanity and use its submarines to sink every vessel that sought to approach either the ports of Great Britain and Ireland or the western coast of Europe or any of the ports controlled by the enemies of Germany within the Mediterranean.

HOPED FOR MODIFIED WARFARE

"That had seemed to be the object of the German submarine warfare earlier in the war, but since April of last year the imperial government had somewhat restrained the commanders of its undersea craft in conformity with its promise then given to us that passenger boats should not be sunk and that due warning would be given to all other vessels which its submarines might seek to destroy, when no resistance was offered or escape attempted, and care taken that their crews were given at least a fair chance to save their lives in their open boats.

"The precautions taken were meager and haphazard enough, as was proved in distressing instance after instance in the progress of the cruel and unmanly business, but a certain degree of restraint was observed.

"The new policy has swept every restriction aside. Vessels of every kind, whatever their flag, their character, their cargo, their destination, their errand, have been ruthlessly sent to the bottom without warning and without thought of help or mercy for those on board, the vessels of friendly neutrals along with those of belligerents.

"Even hospital ships and ships carrying relief to the sorely bereaved and stricken people of Belgium, though the latter were provided with safe conduct through the proscribed area by the German government itself and were distinguished by unmistakable marks of identity, have been sunk with the same reckless lack of compassion or of principle.

RELIED ON LAW OF NATIONS

"I was for a little while unable to believe that such things would be in fact done by any government that had hitherto subscribed to the humane practices of civilized nations.

"International law had its origin in the attempt to set up some law which would be respected and observed upon the seas, where no nation had right of dominion and where lay the free highways of the world. By painful stage after stage has that law been built up, with meager enough results, indeed, after all was accomplished that could be accomplished, but always with a clear view, at least, of what the heart and conscience of mankind demanded.

"This minimum of right the German government has swept aside under the plea of retaliation and necessity and because it had no weapons which it could use at sea except these which it is impossible to employ as it is employing them without throwing to the winds all scruples of humanity or of respect for the understandings that were supposed to underlie the intercourse of the world.

PRESIDENT WILSON'S WAR ADDRESS

CHALLENGE TO ALL MANKIND

"I am not now thinking of the loss of property involved, immense and serious as that is, but only of the wanton and wholesale destruction of the lives of noncombatants, men, women and children, engaged in pursuits which have always, even in the darkest periods of modern history, been deemed innocent and legitimate. Property can be paid for; the lives of peaceful and innocent people cannot be. The present German submarine warfare against commerce is a warfare against mankind.

"It is a war against all nations. American ships have been sunk, American lives taken, in ways which it has stirred us very deeply to learn of, but the ships and people of other neutral and friendly nations have been sunk and overwhelmed in the waters in the same way.

"There has been no discrimination. The challenge is to all mankind. Each nation must decide for itself how it will meet it. The choice we make for ourselves must be made with a moderation of counsel and a temperateness of judgment befitting our character and our motives as a nation. We must put excited feelings away. Our motive will not be revenge or the victorious assertion of the physical might of the nation, but only the vindication of right—of human right—of which we are only a single champion.

"When I addressed the congress on the 26th of February last I thought that it would suffice to assert our neutral rights with arms, our right to use the seas against unlawful interference, our right to keep our people safe against unlawful violence.

"But armed neutrality, it now appears, is impracticable. Because submarines are in effect outlaws when used as the German submarines have been used against merchant shipping, it is impossible to defend ships against their attacks, as the law of nations has assumed that merchantmen would defend themselves against privateers or cruisers, visible craft giving chase upon the open sea.

"It is common prudence in such circumstances, grim necessity, indeed, to endeavor to destroy them before they have shown their own intentions. They must be dealt with upon sight if dealt with at all.

"The German government denies the right of neutrals to use arms at all within the areas of the sea which it has proscribed, even in the defense of rights which no modern publicist has ever before questioned their right to defend.

"The intimation is conveyed that the armed guards which we have placed on our merchant ships will be treated as beyond the pale of law and subject to be dealt with as pirates would be. Armed neutrality is ineffectual enough at best. In such circumstances and in the face of such pretensions it is worse than ineffectual; it is likely only to produce what it was meant to prevent; it is practically certain to draw us into the war without either the rights or the effectiveness of belligerents.

"There is one choice we cannot make, we are incapable of making: We will not choose the path of submission and suffer the most sacred rights of our nation and our people to be ignored or violated. The wrongs against which we now array ourselves are no common wrongs. They cut to the very roots of human life.

MUST ACCEPT RESPONSIBILITY

"With a profound sense of the solemn and even tragical character of the step I am taking and of the grave responsibilities which it involves, but in unhesitating obedience to what I deem my constitutional duty, I advise that the congress declare the recent course of the imperial German government to be in fact nothing less than war against the government and people of the United States; that it formally accept the status of belligerent which has thus been thrust upon it; and that it take immediate steps not only to put the

PRESIDENT WILSON'S WAR ADDRESS

country in a more thorough state of defense but also to exert all its power and employ all its resources to bring the government of the German empire to terms and end the war.

COURSE WE MUST PURSUE

"What this will involve is clear. It will involve the utmost practicable co-operation in counsel and action with the governments now at war with Germany and, as incident to that, the extension to those governments of the most liberal financial credits, in order that our resources may so far as possible be added to theirs.

"It will involve the organization and mobilization of all the material resources of the country to supply the materials of war and serve the incidental needs of the nation in the most abundant and yet the most economical and efficient way possible.

"It will involve the immediate full equipment of the navy in all respects, but particularly in supplying it with the best means of dealing with the enemy's submarines.

ARMY OF 500,000 MEN

"It will involve the immediate addition to the armed force of the United States already provided for by law in case of war at least 500,000 men, who should, in my opinion, be chosen upon the principal of universal liability to service, and also the authorization of subsequent additional increments of equal force so soon as they may be needed and can be handled in training.

"It will involve also, of course, the granting of adequate credits to the government, sustained, I hope, so far as they can equitably be sustained by the present generation, by well conceived taxation.

"I say sustained so far as may be equitable by taxation because it seems to me that it would be most unwise to base the credits which will now be necessary entirely on money borrowed. It is our duty, I most respectfully urge, to protect our people, so far as we may, against the very serious hardships and evils which would be likely to arise out of the inflation which would be produced by vast loans.

MUST SUPPLY THE ALLIES

"In carrying out the measures by which these things are to be accomplished we should keep constantly in mind the wisdom of interfering as little as possible in our own preparation and in the equipment of our own military forces with the duty—for it will be a very practical duty—of supplying the nations already at war with Germany with the materials which they can obtain only from us or by our assistance. They are in the field, and we should help them in every way to be effective there.

"I shall take the liberty of suggesting, through the several executive departments of the government, for the consideration of your committees, measures for the accomplishment of the several objects I have mentioned. I hope that it will be your pleasure to deal with them as having been framed after very careful thought by the branch of the government upon which the responsibility of conducting the war and safeguarding the nation will most directly fall.

SEEKS FREEDOM OF WORLD

"While we do these things, these deeply momentous things, let us be very clear, and make very clear to all the world, what our motives and our objects are. My own thought has not been driven from its habitual and normal course by the unhappy events of the last months, and I do not believe that the thought of the nation has been altered or clouded by them.

"I have exactly the same things in mind now that I had in mind when I addressed the senate on the twenty-second of January last; the same that I had in mind when I addressed the congress on the third of February and on the twenty-sixth of February.

PRESIDENT WILSON'S WAR ADDRESS

"Our object now, as then, is to vindicate the principles of peace and justice in the life of the world as against selfish and autocratic power and to set up amongst the really free and self-governed peoples of the world such a concert of purpose and of action as will henceforth insure the observance of those principles.

"Neutrality is no longer feasible or desirable where the peace of the world is involved and the freedom of its peoples, and the menace to that peace and freedom lies in the existence of autocratic governments backed by organized force which is controlled wholly by their will—not by the will of their people.

"We have seen the last of neutrality in such circumstances. We are at the beginning of an age in which it will be insisted that the same standards of conduct and of responsibility for wrong done shall be observed among nations and their governments that are observed among the individual citizens of civilized states.

NO QUARREL WITH GERMANS

"We have no quarrel with the German people. We have no feeling towards them but one of sympathy and friendship. It was not upon their impulse that their government acted in entering this war. It was not with their previous knowledge or approval. It was a war determined upon as wars used to be determined upon in the old, unhappy days when peoples were nowhere consulted by their rulers and wars were provoked and waged in the interest of dynasties or of little groups of ambitious men who were accustomed to use their fellow-men as pawns and tools.

"Self-governed nations do not fill their neighbor states with spies or set the course of intrigue to bring about some critical posture of affairs which will give them an opportunity to strike and make conquest.

"Such designs can be successfully worked out only under cover and where no one has the right to ask questions. Cunningly contrived plans of deception or aggression, carried, it may be, from generation to generation, can be worked out and kept from the light only within the privacy of courts or behind the carefully guarded confidences of a narrow and privileged class. They are happily impossible where public opinion commands and insists upon full information concerning all the nation's affairs.

MENACE OF INTRIGUES

"A steadfast concert for peace can never be maintained except by a partnership of democratic nations. No autocratic government could be trusted to keep faith within or observe its covenants. It must be a league of honor, a partnership of opinion.

"Intrigue would eat its vitals away; the plottings of inner circles who could plan what they would and give account to no one, would be a corruption seated at its very heart.

"Only free peoples can hold their purpose and their honor steady to a common end and prefer the interest of mankind to any narrow interest of their own.

WELCOME TO FREE RUSSIA

"Does not every American feel that assurance has been added to our hope for the future peace of the world by the wonderful and heartening things that have been happening within the last few weeks in Russia?

"Russia was known by those who knew it best to have been always in fact democratic at heart in all the vital habits of her thought, in all the intimate relationships of her people that spoke their natural instinct, their habitual attitude toward life. The autocracy that crowned the summit of her political structure, as long as it had stood and terrible as was the reality of its power, was not in fact Russian in origin, character or purpose; and now it has been

PRESIDENT WILSON'S WAR ADDRESS

shaken off and the great, generous Russian people have added in all their native majesty and might to the forces that are fighting for freedom in the world, for justice, and for peace. Here is a fit partner for a league of honor.

"One of the things that has served to convince us that the Prussian autocracy was not and could never be our friend is that from the very outset of the present war it has filled our unsuspecting communities and even our offices of government with spies and set criminal intrigues everywhere afoot against our national unity of counsel, our peace within and without, our industries, and our commerce.

"Indeed, it is now evident that its spies were here even before the war began, and it is unhappily not a matter of conjecture, but a fact proved in our courts of justice, that the intrigues which have more than once come perilously near to disturbing the peace and dislocating the industries of the country have been carried on at the instigation, with the support, and even under the personal direction of official agents of the imperial government accredited to the government of the United States.

SOUGHT TO IGNORE PLOTS

"Even in checking these things and trying to extirpate them we have sought to put the most generous interpretation possible upon them because we knew that their source lay not in any hostile feeling or purpose of the German people towards us (who were, no doubt, as ignorant of them as we ourselves were) but only in the selfish designs of a government that did what it pleased and told its people nothing.

"But they played their part in serving to convince us at last that that government entertains no real friendship for us and means to act against our peace and security at its convenience. That it means to stir up enemies against us at our very doors the intercepted note to the German minister at Mexico City is eloquent evidence.

FIGHT FOR HUMAN RIGHTS

"We are accepting this challenge of hostile purpose because we know that in such a government, following such methods, we can never have a friend, and that in the presence of its organized power, always lying in wait to accomplish we know not what purpose, there can be no assured security for the democratic governments of the world.

"We are now about to accept gage of battle with this natural foe to liberty and shall, if necessary, spend the whole force of the nation to check and nullify its pretensions and its power. We are glad, now that we see the facts with no veil of false pretense about them, to fight thus for the ultimate peace of the world and for the liberation of its people, the German people included; for the rights of nations, great and small; the privilege of men everywhere to choose their way of life and of obedience.

SEEK NO SELFISH ENDS

"The world must be made safe for democracy. Its peace must be planted upon the tested foundations of political liberty. We have no selfish ends to serve. We desire no conquest, no dominion. We seek no indemnities for ourselves, no material compensation for the sacrifices we shall freely make. We are but one of the champions of the right of mankind. We shall be satisfied when those rights have been made as secure as the faith and the freedom of nations can make them.

"Just because we fight without rancor and without selfish object, seeking nothing for ourselves but what we shall wish to share with all free peoples, we shall, I feel confident, conduct our operations as belligerents without passion and ourselves observe with proud punctilio the principles of right and of fair play we profess to be fighting for.

PRESIDENT WILSON'S WAR ADDRESS

SILENT AS TO AUSTRIA

"I have said nothing of the governments allied with the imperial German government because they have not made war upon us or challenged us to defend our right and our honor.

"The Austro-Hungarian government has, indeed, avowed its unqualified indorsement and acceptance of the reckless and lawless submarine warfare adopted now without disguise by the imperial German government, and it has therefore not been possible for this government to receive Count Tarnowski, the ambassador recently accredited to this government by the imperial and royal government of Austria-Hungary; but that government has not actually engaged in warfare against citizens of the United States on the seas.

"On these premises I take the liberty, for the present at least, of postponing a discussion of our relations with the authorities at Vienna. We enter this war only where we are clearly forced into it because there are no other means of defending our rights.

"It will be all the easier for us to conduct ourselves as belligerents in a high spirit of right and fairness because we act without animus, not in enmity towards a people or with the desire to bring any injury or disadvantage upon them, but only in armed opposition to an irresponsible government which has thrown aside all considerations of humanity and of right and is running amuck.

GERMANS IN AMERICA

"We are, let me say again, the sincere friends of the German people, and shall desire nothing so much as the early reestablishment of intimate relations of mutual advantage between us, however hard it may be for them, for the time being, to believe that this is spoken from our hearts.

"We have borne with their present government through all these bitter months because of that friendship, exercising a patience and forbearance which would otherwise have been impossible.

"We shall, happily, still have an opportunity to prove that friendship in our daily attitude and actions towards the millions of men and women of German birth and native sympathy who live amongst us and share our life, and we shall be proud to prove it towards all who are in fact loyal to their neighbors and to the government in the hour of test. They are, most of them, as true and loyal Americans as if they had never known any other fealty or allegiance. They will be prompt to stand with us in rebuking and restraining the few who may be of a different mind and purpose. If there should be disloyalty it will be dealt with with a firm hand of stern repression; but if it lifts its head at all it will lift it only here and there and without countenance except from a lawless and malignant few.

CIVILIZATION IN BALANCE

"It is a distressing and oppressive duty, gentlemen of the congress, which I have performed in thus addressing you. There are, it may be, many months of fiery trial and sacrifice ahead of us. It is a fearful thing to lead this great peaceful people into war, into the most terrible and disastrous of all wars, civilization itself seeming to be in the balance.

"But the right is more precious than peace, and we shall fight for the things which we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own governments, for the rights and liberties of small nations, for a universal dominion of right by such a concert of free peoples as shall bring peace and safety to all nations and make the world itself at last free.

"To such a task we can dedicate our lives and our fortunes, everything that we are and everything that we have, with the pride of those who know that the day has come when America is privileged to spend her blood and her might for the principles that gave her birth and happiness and the peace which she has treasured. God helping her, she can do no other."

CHAPTER I
WHY WE WENT TO WAR
MEMORIES OF BEAUTIFUL FRANCE—WHY I WAS NOT ACCEPTED
AS CONSUL TO GERMANY
BY HON. JAMES MARTIN MILLER
FORMER UNITED STATES CONSUL IN FRANCE

To have lived on the principal battle ground of the world war was a privilege the author did not appreciate at the time. As representative of the United States Government in the Consular district of France that includes the departments of the Aisne, Ardennes, Marne, Aube, Meuse, Vosges, Haute-Marne and Meurthe-et-Moselle, he lived and had his headquarters at Reims, some years before the war. Reims is (or rather was) a beautiful city of 112,000 people. The story of the city goes back to the days of the Roman empire, and bears the mark of many Gallic insurrections. In comparatively later times Joan of Arc caused Charles VII to be crowned in the great Cathedral there—one of the most glorious and stately in all Europe, now a ruin. A history of the eight departments (or small states) mentioned above would include a history of the Franco-Prussian war of 1870-71, and of the greatest and most desperate of all wars, the one just brought to a close.

My Consular district bordered on Belgium, Luxemburg and Alsace-Lorraine. The Marne, the Aisne, the Vesle, and other streams whose names adorn with sad pride so many of America's battleflags, flow through it. After 1914 Belgium saw very little fighting; but this district saw almost four years of continuous and enormous battle. It was overrun time and again. Neither Belgium nor any other country suffered such devastation, nor such material destruction. Today it is a vast graveyard. Hundreds of thousands of men dyed its soil with their lifeblood. All America and all the world knows about Chateau Thierry and St. Mihiel, and the gallantry of American troops in those two brilliant and significant actions. It is difficult to realize the stupendous tragedy that through all those years hung over that beautiful country, whose fields were once as familiar to me as any fields of home. I look back to that time with affection, in the glow of happy memories.

Americans before this war had held the Monroe Doctrine in high reverence. Presidents had strengthened it in their messages. Candidates for office for more than half a century had argued as a campaign issue that the United States must never be drawn into foreign entanglements; that no European nation ever would be allowed to interfere in the affairs of the American continents. This doctrine was so deeply rooted that objectors everywhere rose up when we began to talk of "preparedness" against the ultimate day when we could no

MEMORIES OF BEAUTIFUL FRANCE

longer keep out of the fight. Many declared it would be "unconstitutional" for the United States to send troops to Europe. The war lords of Germany took advantage of this traditional sentiment among our people and felt sure that the United States never would come in, no matter how many American lives nor how much American property Germany might destroy, nor how many of our ships German pirates might sink at sea, without warning. The German government had built up a propaganda in this country that at one time threatened to poison the minds of all our people. There were some among us who hated England, and wanted to see Germany win for no other reason than that. Others hated Russia, and so desired Germany to win. Germany's secret intrigues in Mexico came near to getting us into a war with that country. In the face of all these things there was a strong sentiment among our people and even in Congress favorable to Germany. It is easy now to say that we should have gone to war when the Lusitania was sunk, but pro-German feeling was so noisy and so strong, even though it was held by a minority, that the Congress itself was affected and withheld its hand.

Public sentiment had to be crystalized so that it would stand back of the administration. With our lack of a secret service capable of coping with the German agents who were busy everywhere and all the time, we were at a disadvantage in gathering evidence to convince our people that the Germans were menacing our very existence. Even after the secret service was built up it took many months of hard work and several thousand government men to uncover and stamp out their organizations and their ruthless plots. The slimy tracks of the German ambassador at Washington had to be followed through devious underground channels that no one had suspected. The embassy had filled the country with German poison gas, and backed the German campaign of wholesale arson. Germans living here, many of them American born, were busily counteracting public opinion as the evidences accumulated.

Democracies are always at a disadvantage in dealing with monarchies; in the initial stages of war at least. We have seen it demonstrated that a democracy must become autocratic if it is to carry on a war successfully. But an American autocracy takes the shape of a temporary delegation of unusual power in conditions that cannot wait for the slow action of ordinary times; and those who exercise it are put in power by the people themselves, to do the people's will. It was necessary to consolidate not only the direction of the nation itself, but of our military affairs abroad. We soon got the home situation in hand, and then the President of the United States threw his influence, backed by all the American people, toward bringing the allied armies and those of the United States under one head in the person of General Foch as Field Marshal. This was not accomplished until after the

GENERAL JOHN J. PERSHING, Commander American Expeditionary Forces in France, in August, 1918, had an army of 1,500,000 Americans in France, doing glorious service with their allies against the common enemy. His selection for command was approved by all Americans; he is the idol of his men. (Copyright, U. & U.)

Scene at Gen. Sir E. H. Allenby's historic entry on foot into Jerusalem, December 11, 1917, after its capture by the British from the Turks, who had held the Holy City under Moslem domination for centuries. All Christendom hailed the event with rejoicing. Every sacred building, shrine, and traditional holy spot will in future be scrupulously maintained and protected. The Holy City was not bombarded by the British, but was evacuated by the Turks and surrendered by the leading inhabitants when Gen. Allenby's forces, after defeating the Turkish troops repeatedly in the field, reached Gazara, three miles from Jerusalem. Subsequently the entire Turkish army in Palestine was captured or dispersed in disorder. (Copyright, U. & U.)

Top—How British fighting men advance to attack after going over the top, spread out in thin columns. Very different from mass formations of the enemy and less costly in human life. (*British Official Photo, from I. F. S.*)

MEMORIES OF BEAUTIFUL FRANCE

great Italian disaster, when it looked as though the Austro-Hungarian armies would crush Italy. The same may be said of the threatened disaster to the British army early in 1918, when von Hindenburg began his great drive toward Calais and Paris. Here were Germany, Austria-Hungary, Turkey and Bulgaria, four monarchies dominated by the German government, fighting nearly all the democracies of the world, not considering Russia, which dropped out shortly before the United States effectively entered the war.

We will not consider Japan's position as a nominal member of the entente, except for her action at the beginning of the war in capturing Kiauchau, China, the German fortified port and naval base in the Orient, and sweeping Germany out of the Pacific by taking the Marshall islands. Beyond this, Japan sent soldiers to Eastern Siberia to help in police duty, and in guarding the great stores of supplies accumulated by the Russians at Vladivostok. These stores had been bought largely upon the credit extended to Russia by the United States.

With Russia, Germany and Austria-Hungary gone as monarchies, Japan is the greatest of the remaining imperial states. We have seen more than a dozen kings, emperors, princes and grand dukes pass into the discard as a result of a war which they themselves brought on.

France tried to discard kings and princes in 1798. The sovereignty of the people was proclaimed in that war, but the governments which have ruled France since have been many, and presented wide differences. In this present age, no doubt it will be much easier to establish a stable democracy upon the wreck of a monarchy than it could have been a century ago. Still, the construction of a democracy is a difficult ordeal for people who have always been imperialists. The several monarchies, big and little, that have fallen in this war, present most perplexing problems. There are boundary and racial disputes of the most bitter kind between some of their peoples. But the great democracies of the world that won this war are taking the part of "big brothers" to these, and are seeing to it that their petty quarrels and internal differences are held in check. Each of these countries, even though they establish democracies, will have strong royalist parties that will constitute a standing threat. France even to this day has a royalist group of considerable strength. Their persistent claim is that France will again be a monarchy. The United States is really the only democracy without such a party. It is the only republic that was not founded on the ruin of a monarchy.

WHY I WAS NOT ACCEPTED AS CONSUL TO GERMANY

I have had some personal experience with the late German Imperial Government. As a war correspondent it was my duty to give to the world an account of the forcible deportation of King Mataafa

MEMORIES OF BEAUTIFUL FRANCE

from Samoa to the Marshall Islands, where he was kept in exile six years. The Germans had shoved him aside to make room for Malieto, an imbecile and a German figurehead. I was there again when Mataafa, at the end of those six years, returned to Samoa, to the great joy of his people.

A few years later I discovered that Germany's policy was to "mark" any individual who wrote or spoke in criticism of anything German.

I was appointed United States Consul to Aix la Chapelle, Germany, four years after those articles appeared. My appointment came from President Roosevelt, and was confirmed by the United States Senate. When I arrived in Germany I found I was United States Consul so far as the United States Government was concerned, but I was put off in the matter of my exequatur (certificate of authority) from the government to which I was accredited; and without an exequatur, I could not act. I was kept cooling my heels in the consulate several months before I found out what was the matter. My newspaper articles describing what the Germans had done in Samoa, published four years earlier, were being held against me. My presence in Germany was not desired.

I had crossed the Atlantic with Prince Henry, the Kaiser's brother and Admiral of the German Navy, in February, 1901, when the Prince brought his party of a dozen or so militarists to this country to "further cement the amity and good will" existing between the great republic and the great empire. It later developed that this was a well planned operation in German propaganda. As a representative of the Associated Press, I had written of it. That was just after I had written the Samoan articles.

Speck von Sternberg was the German Ambassador to Washington. He was in Paris. I went there to see him and ascertain, if I could, why my exequatur was withheld. The Government at Washington could get no information on the subject. The whole affair was clothed in mystery.

After some conversation I suggested to Ambassador von Sternberg that perhaps the foreign office at Berlin was withholding the document because of my writings on German colonial matters. Then it came out—my guess was true. Some underlings in the foreign office had the case in charge. The Ambassador suggested that as I knew Prince Henry, I would better write him at Kiel. I did this, with the result that the obstacle was removed and the exequatur issued.

It arrived too late, for President Roosevelt the day before had promoted me to the Consul-Generalship at the important seaport of Auckland, New Zealand. My family being in France at that time, I applied for and immediately received a transfer to the consular dis-

UNITED STATES IN THE WAR

trict in France, mentioned elsewhere in this chapter. My exequatur came the day following my arrival in France.

My experience in Germany had been widely published in American and other newspapers. Some of our more sensational papers had accounts of my being "expelled" from Germany, which were not true. I left Germany wholly upon my own volition.

WHY WE WENT TO WAR

During two years preceding our entrance upon war, Germany had been carrying on open warfare against us, within our own borders. For more than thirty years Germany's policy of preparatory penetration had been in course. As we know now, every country, all round the globe, but especially the United States in North America and Brazil and Venezuela in South America, had been filled with Germans, ostensibly settlers, business men and followers of the higher professions, but for the greater part agents of Germany, in continuous contact with Potsdam and under Potsdam direction. It was the business of these imported Germans to foster the German idea, exalt Germany's leadership in military power and in science and the arts, impress their language, their literature, music and customs upon our people, and to do all those things which might work for the day when Germany, having faked a partnership with Almighty God, should reach out for world dominion.

The processes were pressed with that strange blend of industry, stupidity, mendacity and cunning which characterize the Prussian and all his acts. Under our noses a German solidarity was attempted here, and in part achieved. Organizations having Prussian ends in view were numerous, large, popular and unsuspected. Threading them through and through was a spy system unbelievably thorough and amazingly adroit. Potsdam had us marked as a nation of easy-going money getters, to be bled white, crammed with her muddy kultur and taught the goose-step, at her imperial leisure, after France and England had fallen to her guns.

But her blend of qualities, no matter how strong in itself, was nullified by just one lack: the total inability of the Prussian mind to understand the mind of the world exterior to Germany. In the day of test it failed.

Because of that inability, and knowing full well how readily the German mind could be terrorized, the outbreak of war in Europe brought an outbreak of blind German violence in the United States. We were to be impressed by the German power to strike. Our soil was chosen as a garden of domestic sedition, and of foreign conspiracy against powers with which we were at peace. To keep us busy with troubles of our own, German propaganda and German money in Mexico raised on our southern border a threatening spectre of war.

WHY WE WENT TO WAR

We were to have been rushed into conflict with Mexico and kept employed there while being terrorized by wholesale arson and sabotage at home, so that by no chance could any friendly European power look to us for help. The scheme came near to succeeding, for our people were aroused by Mexican aggression, and the flaunting insults of Mexican authority, prompted by German agents. The policy of our Government saved us from falling into a trap that might have held us fast while Germany overran the whole of Europe and made ready to come a-plundering here at her own time and convenience.

If the truth had been known by the people then as clearly as it was known at Washington, nothing could have held us back. We would not have bothered with Mexico at all. We would have joined the free nations of Europe, and nobody may guess what would have happened. Certainly we could not have assembled the men and the resources we actually and swiftly did assemble later, when the real hour sounded. We would have cut a sorry figure and gone into the mess confusedly. Washington knew. The President knew so well that through 1915 and 1916 he and others in high places never ceased crying a warning to "prepare." The President himself toured the country and told the people everywhere that with a world on fire we could not hope to escape unsinged.

He said openly as much as he dared. Under the surface the Government did much more. The rapid movement of events once we were declared a combatant would have been impossible otherwise. That rapidity of effective action surprised the world only because it had all been planned before a word was said.

In the years of our neutrality our course as a nation was surely shaping itself for war, without an outward sign or act. Ruthless destruction of property and of life became too open, too frequent, too outrageous, for the patience of even a long-suffering, tolerant people such as we. The first impulse of genuine resentment was given when the *Lusitania* went down with its neutral passengers, a defenseless ship on a peaceful errand, drowning more than a hundred Americans of both sexes and all ages without the slightest notice, or the faintest chance of escape.

Any nation other than ours would have gone to war in a moment over such a blow in the face. We did not. Farther, we endured a sudden and flagrant increase of German propaganda in high quarters and low, and of German insolence openly and defiantly parading itself. The catalogue of provocations grew daily, and daily bred anger, but our temper held until in February of 1917, when Germany proclaimed unrestricted piracy by submarines, and under the thin pretext of starving out the British Isles, American and other ships were destroyed with all on board, wholesale.

Even then our hand was withheld until Germany advised us that

WHY WE WENT TO WAR

we might send just one ship a week to Europe, one ship and no more, provided that solitary ship were painted in a manner prescribed in the permission, and then held strictly to a course laid down by the German admiralty. Germany, a third rate naval power, had arbitrarily forbidden us the freedom of the seas.

Then our patience broke. For this and all the other causes Germany had given us, and for our own safety and the rescue of a world that without us would have perished, the United States went to war.

WORK OR FIGHT

Back of every American soldier about fifty men and women were needed in order that he be supplied with everything his physical, moral and military well being might require. They were put there. The result was a sweeping change, an immense expansion of energy in the United States itself. The draft took care of the army. No time or trouble had to be given to filling the ranks and keeping them full. The enormous sums of money necessary to finance our allies as well as ourselves were promptly oversubscribed in a series of loans, the first and least of which ran into three billion dollars, the fourth into six billions, a sum larger than any single loan ever floated by any other nation. Idleness was abolished. The order to "work or fight" was strictly enforced upon all the people, rich and poor alike, for any attempt to except any one or any class would have been blown away in a gale of laughter. In a space incredibly brief the United States became a nation of actual workers, in which every individual did his or her share, submitting meanwhile, with good grace and no murmuring, to being rationed. Interstate utilities were taken over and operated by the government, including the railway, telegraph and telephone lines; and government fixed prices on the necessities of life. Everything was subordinated to the one and only purpose of winning the war. All that we were and all that we had was thoroughly mobilized behind the fighting arms, the army and the navy.

RATIONING THE NATIONS

Almost immediately after the first military and naval preparations had been set in operation the United States Government, taking no chance as against the future, began to regulate the lives and living of Americans at home. A policy of conservation, so well devised that it went into effect without the slightest disturbance of daily living and daily routine, was at once adopted.

England, France and Belgium had to be fed. Belgium had to be clothed and housed as well as fed. Out of our abundance had to come the means to those ends, as well as to equip and maintain vast armies of our own, from bases three thousand miles away in Europe and twice as far in Asia. The whole nation was mobilized for war.

Britain and France had come through more than three years of

WHY WE WENT TO WAR

close-lipped but bone-cracking effort, in which every aspect of domestic life was changed, the final ounce of strength exerted, privations unheard of endured in grim silence. America saved them, and not alone by force of arms against the common enemy.

CHAPTER II.

UNITED STATES ENTERS THE WAR.

*The President Proclaims War—Interned Ships Are Seized—
Congress Votes \$7,000,000,000 for War—Raising an
American Army—War to Victory Wilson Pledge—British
and French Commission Reaches America.*

On April 2, 1917, Congress having been called in special session, President Wilson appeared before a joint session of both houses and in an address worthy of its historical importance asked for a formal declaration that a state of war existed with Germany, owing to the ruthless and unrestricted submarine campaign. He recommended the utmost practical co-operation with the Entente Allies in counsel and action; the extension of liberal financial credit to them, the mobilization of all the material resources of the United States for the purpose of providing adequate munitions of war, the full equipment of the Navy, especially in supplying it with means for dealing with submarines, and the immediate enrollment of an army of 500,000 men, preferably by a system of universal service, to be increased later by an additional army of equal size. The President took pains to point out that in taking these measures against the German government, the United States had no quarrel with the German people, who were innocent, because kept in ignorance of the lawless acts of their autocratic government, which had become a menace not only to the peace of the world, but to the cause of fundamental human liberty. The object of the United States, said the President, was to vindicate the principles of peace and justice as against selfish and autocratic power, and to insure the future observance of these principles.

After due debate the following joint resolution, declaring war with Germany was adopted by the Senate and House of Representatives and signed by the President on April 6, 1917:

"Whereas, the imperial German government has committed repeated acts of war against the government and the people of the United States of America; therefore, be it

"Resolved, by the Senate and House of Representatives of the United States of America in Congress assembled, That the state of war between the United States and the imperial German government which has thus been thrust upon the United States is hereby formally declared; and that the President be, and he is, hereby authorized and directed to employ the entire naval and military forces of the United

UNITED STATES ENTERS WAR

States and the resources of the government to carry on war against the imperial German government; and to bring the conflict to a successful termination, all of the resources of the country are hereby pledged by the Congress of the United States."

THE PRESIDENT PROCLAIMS WAR.

Immediately after signing the resolution of Congress, President Wilson issued a formal proclamation of war, embodying in it an earnest appeal to all American citizens "that they, in loyal devotion to their country, dedicated from its foundation to the principles of liberty and justice, uphold the laws of the land and give undivided and willing support to those measures which may be adopted by the constitutional authorities in prosecuting the war to a successful issue and in obtaining a secure and just peace."

The President further enjoined all alien enemies within the United States to preserve the peace and refrain from crime against the public safety, and from giving information, aid, or comfort to the enemy, assuring them of protection so long as they conducted themselves in accordance with law and with regulations which might be promulgated from time to time for their guidance. The great mass of German-American citizens promptly avowed the utmost loyalty to the United States, but numerous arrests of suspected spies followed all over the country.

INTERNEED SHIPS ARE SEIZED.

Following the declaration of war all the German merchant vessels interned in ports of the United States were seized by representatives of the Federal authority, their crews removed and interned, and guardians placed aboard. These ships in American waters numbered 99, of an aggregate value of about \$100,000,000, and included some of the finest vessels of the German merchant marine; for instance, the Vaterland, of 54,283 tons, valued at \$8,000,000, and numerous other Atlantic liners. The disposition to be made of the German ships was left to the future for decision, with great probability, however, that they would be used to transport munitions and supplies to the Allies in Europe through the German submarine blockade.

CONGRESS VOTES \$7,000,000,000 FOR WAR.

Prompt action was taken by Congress to furnish the sinews of war. By April 14 a bond and certificate issue of \$7,000,000,000 had been unanimously voted by both houses, and preparations were made to float a popular subscription for the bonds. Three billions of the amount was intended for loans to the Allies, and the remainder for active prosecution of the war by the United States. The debates in Congress indicated that the country stood solidly behind the President in a determination to bring the military autocracy of Germany to a realizing sense of its responsibility to civilization.

UNITED STATES ENTERS WAR

RAISING AN AMERICAN ARMY.

Legislation was immediately presented by the War Department to the military committees of the Senate and House of Representatives, to provide for raising an army for active participation in the war. This legislation was described by President Wilson as follows:

"It proposes to raise the forces necessary to meet the present emergency by bringing the regular army and the National Guard to war strength and by adding the additional forces which will now be needed, so that the national army will comprise three elements--the regular army, the National Guard and the so-called additional forces, of which at first 500,000 are to be authorized immediately and later increments of the same size as they may be needed.

"In order that all these forces may comprise a single army, the term of enlistment in the three is equalized and will be for the period of the emergency.

"The necessary men will be secured for the regular army and the National Guard by volunteering, as at present, until, in the judgment of the President, a resort to a selective draft is desirable. The additional forces, however, are to be raised by selective draft from men ranging in age from 19 to 25 years. The quotas of the several states in all of these forces will be in proportion to their population."

Recruiting for the army and navy became active as soon as war was declared. On April 15 President Wilson issued an address to the nation, calling on all citizens to enroll themselves in a vast "army of service," military or industrial, and stating that the hour of supreme test for the nation had come. The United States prepared to rise to its full measure of duty, confident in the patent justice of its cause, and echoing the sentiment of its President when he said:

"The hope of the world is that when the European war is over arrangements will have been made composing many of the questions which have hitherto seemed to require the arming of the nations, and that in some ordered and just way the peace of the world may be maintained by such co-operations of force among the great nations as may be necessary to maintain peace and freedom throughout the world."

ENGLAND WELCOMES U. S. AS AN ALLY.

The news of the President's proclamation of war, following the action of Congress, was received in England and France, Russia and Italy, with enthusiasm. A great service of thanksgiving was held in St. Paul's Cathedral, London, attended by the King and Queen, ministers of state, and an enormous congregation that joined in singing "The Star-Spangled Banner" and the national anthem, while the Stars and Stripes by official order was flown for the first time in history from the tower of the Parliament buildings at Westminster and on public buildings throughout the British empire. A high commission was

UNITED STATES ENTERS WAR

appointed to visit the United States for a series of war conferences, and Premier Lloyd George expressed the national satisfaction in glowing terms of welcome to the United States as an ally against Germany, paying at the same time an eloquent tribute to the masterly address of President Wilson to Congress, which stated the case for humanity against military autocracy in such an unanswerable manner, the British premier said, that it placed the seal of humanity's approval on the Allied cause and furnished final justification of the British attitude toward Germany in the war.

POPULAR DEMONSTRATION IN PARIS.

In France, the Stars and Stripes were flung to the breeze from the Eiffel Tower on April 22, and saluted by twenty-one guns. This marked the opening of the ceremonies of "United States day" in Paris.

The French tricolor and the star-spangled banner were at the same hour unfurled together from the residence of William G. Sharp, the American ambassador, in the Avenue d'Eylau, from the American Embassy, from the city hall, and from other municipal government buildings.

It was a great day for the red, white and blue, 40,000 American flags being handed out gratis by the committee and waved by the people who thronged the vicinity of the manifestations, which included the decoration of the statues of Washington and Lafayette.

Members of the American Lafayette flying corps, a delegation from the American Ambulance at Neuilly and the American Field Ambulances were the guard of honor before the Lafayette statue.

Ambassador Sharp and his escort were received at the city hall by the members of the municipal council and other distinguished persons. Adrien Mithouard, president of the municipal council, welcomed Ambassador Sharp, who was greeted with great applause when addressing the people of Paris. He said:

"Citizens of Paris: May I say to you, on this day you have with such fine sentiment set apart to honor my country, that America remains no longer content to express to France merely her sympathy. In a cause which she believes as verily as you believe to be a sacred one, she will consecrate all her power and the blood of her patriotic sons, if necessary, to achieve a victory that shall for all time to come insure the domination of right over wrong, freedom over oppression, and the blessings of peace over the brutality of war."

The French Government also appointed a war commission to visit the United States forthwith for conference.

Resolutions expressing the great satisfaction of the Allied nations at the action of the United States were adopted by the British House of Commons, the French Chamber of Deputies, the Russian Duma, and the Italian Parliament.

UNITED STATES ENTERS WAR

ENTHUSIASM IN THE UNITED STATES.

War being declared, the people of the United States were not slow in letting the President know that they stood solidly behind him. From all parts of the country came assurances that the action of the Government was approved. Organizations of every conceivable kind passed resolutions pledging their support to all war measures decided to be necessary to carry the war to a successful issue. Recruiting was at once started for both the Army and the Navy. The recruiting depots were thronged daily and thousands were enrolled for active service while Congress was debating the respective merits of the volunteer system and the "selective draft" advocated by the general staff of the Army and approved by the President and his cabinet.

The full quota of men desired for the Navy, to place the ships already in commission in a high state of efficiency, was soon secured. More men offered themselves for naval service, indeed, than could be accepted pending the action of Congress. Volunteers for the aviation corps, the marines, the field artillery, the engineer corps, and all the various branches of the military establishments came forward freely, and a general desire was expressed to send an American force to the trenches in Europe at the earliest possible moment consistent with proper training for the field.

As the reports of American diplomats from the war zone, freed from German censorship, were given to the public, the martial spirit of America grew apace. Ambassador Gerard's corroboration of German atrocities in the occupied territory of France, and Minister Brand Whitlock's report on the situation in Belgium and the illegal and atrocious deportation of Belgian citizens for hard labor, ill treatment, and starvation in Germany, added fuel to the flame of national indignation, already running high as the result of continued destruction of American merchant vessels and the loss of American lives by submarine piracy and murder, continued almost without cessation since the infamous sinking of the *Lusitania*, one of the never-to-be-forgotten crimes of German ruthlessness.

One hundred million free-born people were at length aroused to action. The Navy was ready for immediate service where it could do most good, and promptly took over patrol duty in the western Atlantic, relieving British and French men-of-war for service elsewhere. The raising of an army of a million or more men for active participation in the war waited only on the action of Congress.

American women responded nobly to the President's call for universal service, flocking to the Red Cross headquarters in every city and setting to work immediately in the preparation of comforts for the great army gathering on the horizon. They were promptly organized, so that their efforts might count to the best advantage.

UNITED STATES ENTERS WAR

In August, 1916, the United States Navy included 356 war craft of all kinds, as against 693 credited to Great Britain, 404 to France, and 309 to Germany. The latter figure does not include an unknown number of submarines of recent construction.

THE BRITISH COMMISSION ARRIVES.

On Sunday, April 22, the British war commission reached Washington, headed by the Right Hon. Arthur James Balfour, secretary of state for foreign affairs and former premier. The commission included Rear Admiral Sir Dudley R. S. De Chair, naval adviser to the foreign office; Major-General G. T. M. Bridges, representing the British army; Lord Cunliffe of Headley, governor of the Bank of England; and a number of other distinguished officials and naval and military officers, with clerical assistants. The party met with an enthusiastic welcome in Washington. Mr. Balfour was received by the President in private conference next day, and after a round of receptions and social functions of various kinds, arrangements were made for the business meetings affecting war policies, which were the object of the visit.

Mr. Balfour informed the President that the British commission had come to Washington not to ask favors, concessions, or agreements from the United States, but to offer their services for the organization of the stupendous undertaking of fighting Germany. He said that if the United States was confronted by the same problems that confronted England at the outset of the war, the British commission could be of service in pointing out many grievous mistakes of policy and organization that proved costly to the British cause. He was, in turn, assured by the President that the United States would fight in conjunction with the Allies until the Prussian autoocracy was crushed and Americans at home and abroad were safe from the ruthlessness of the Berlin government.

MARSHAL JOFFRE IN WASHINGTON

The French war commission soon followed the British envoys, arriving in Washington on Wednesday, April 25, on board the presidential yacht *Mayflower* from Hampton Roads. Headed by M. Rene Viviani, minister of justice and former premier of France, the commission included the famous hero of the Marne and idol of the French army and people, Marshal Joffre; also Admiral Chocheprat, representing the French navy; the Marquis de Chambrun (Lafayette's grandson), and other distinguished Frenchmen. The fame of Marshal Joffre and the traditional friendship for France secured for the party an enthusiastic popular greeting. Its members were accorded similar official receptions to those of the British commissioners, and they similarly expressed their desire to be of service to the American people by giving the Washington government the benefit of their costly experience in three years of war.

UNITED STATES ENTERS WAR

ALLIES CONTINUE THEIR WESTERN DRIVE

Following the spring drive of the Allies on the western front and the retirement of the Germans to the so-called Hindenburg line, the British and French continued their offensive during the months of May, June and July, 1917, which concluded the third year of the great struggle. Great battles in the Champagne and along the Aisne were fought by the French, who in April had captured Auberive, and they advanced their forces from one to five miles along a fifty-mile front, inflicting great and continual losses on the enemy. At the end of the third year, the French line ran from northwest of Soissons, through Rheims, to Auberive. French troops also appeared in Flanders during this period and co-operated with the British on the left of Field Marshal Haig's forces. The chief command of the French armies was in the hands of General Petain, the gallant defender of Verdun, who was appointed chief of staff after the battle of Craonne.

The continuation of the British offensive northeast of Arras, following the bloody battle of Vimy Ridge, which was firmly held by the Canadians against desperate counter-attacks, placed the British astride the Hindenburg line, and the Germans retired to positions a mile or two west of the Drocourt-Queant line. These they held as the third year closed at the end of July.

In June, 1917, the British began an attack on Messines and Wytschaete, in an effort to straighten out the Ypres salient. By this time their flyers dominated the air, and they had gained the immense advantage of artillery superiority. By way of preparation, the British sappers and miners had spent an entire year in mining the earth beneath the German positions, and the offensive was begun with an explosion so terrific, when the mines were sprung, that it was heard in London. Following immediately with the attack, the British won and consolidated the objective ground, capturing more than 7,500 German prisoners and great stores of artillery. This victory placed them astride the Ypres-Commines canal, having advanced three miles on an eight-mile front. Portuguese and Belgian troops assisted in this offensive, which resulted in the greatest gain the Allies had made in Belgium since the German invasion. Fighting in this terrain had been confined for many months to trench-raiding operations.

GERMAN LOSSES TO JULY, 1917

It is estimated that during April, May, and June the Germans suffered 350,000 casualties on the western front. The totals of the German official lists of losses for the entire war to July 19, 1917, were as follows: Killed or died of wounds, 1,032,800; died of sickness, 72,960; prisoners and missing, 591,966; wounded, 2,825,581; making a grand total of casualties of 4,523,307. The German naval and colonial casualties were not included in this total.

UNITED STATES ENTERS WAR

FURTHER GAINS IN FLANDERS

Fighting continued almost steadily in Flanders during the month of August, although the Allies were greatly hampered in their operations by heavy rains and mud. On a nine-mile front east and north of Ypres, a long drawn-out battle carried the advancing French and British troops more than a mile into the intricate hostile trench system on August 16, after successive advances on previous days. From Dreigrachten southward the French surged across the River Steenbeke, capturing all objectives, while at the same time the British occupied considerable territory in the region of St. Julien and Langemark, captured the latter town, and carried the fighting beyond Langemark. The main difficulty encountered was the mud in the approaches to the town, the infantry plunging deep into the bog at every step. Not infrequently the soldiers had to rescue a comrade who had sunk to the waist in the morass, but they continued to push forward steadily, facing machine-gun fire from hidden redoubts and battling their way past with bombs and rifle fire. There were concrete gunpits about the positions in front of the town, which was flooded from the Steenbeke River, but the infantry divided and bombed their way about on either side until they had encircled the town and passed beyond, where the Germans could be seen running away. Little resistance was offered in the town itself, but the Germans suffered severely from the preliminary bombardment, which worked havoc in their ranks, according to the prisoners taken in the Langemark region. The contact between the French and British forces was excellent throughout the fight; in fact, the perfect co-operation of the two armies continued to be one of the minor wonders of the war.

CANADIAN VICTORIES AT LENS

Canadian troops added to their laurels by the storming and capture of Hill 70, dominating the important mining center of Lens, in northern France, August 15, following up their victory by the occupation of the fortified suburbs of the city and apparently insuring its redemption from German hands, after a struggle that had lasted for two years.

The men of the Dominion swept the Germans from the famous hill, defeated all counter-attacks, and thus gained command of the entire Loos salient. It was on this hill that the British forces under Sir John French were badly broken in their efforts to reach Lens in the first battle of Loos, in September, 1915. Hill 70 was the last high ground held by the Germans in the region of the Artois, and its fall menaced their whole line south to Queant and north to La Bassee.

The Canadian attack began at 4:25 o'clock, just as the first hint of dawn was appearing. All night the British big guns had been pouring a steady stream of high explosive shells into the German positions, great detonations overlapping one another like the rapid

UNITED STATES ENTERS WAR

crackling of machine-gun fire and swelling into a mighty volume of thunder that shook the earth and stunned the senses. Then, a short time before the hour set for the attack arrived, the batteries ceased abruptly and a strange, almost oppressive stillness crept over the terrain which until then had been an inferno of crashing noise and death. It had been raining and gray clouds still hung over the trenches where crouched the Canadian infantrymen, waiting eagerly for the arrival of the moment which would summon them to attack.

Suddenly, ten minutes before the time set for the advance, every British gun within range broke out with a hurricane of shelling, and solid lines of crimson lightning belched from the German trenches as the explosives broke about them. To this lurid picture was added the spectacle of burning oil, which the British threw on the enemy lines. Great clouds of pinkish colored smoke rolled across the country from the flaming liquid and the murky sky threw back myriad colors from the conflagration below.

The moment of attack arrived, and as the British guns dropped their protecting barrage fire in front of the Canadian trenches, the clouds parted and the yellow crescent moon appeared. Under the light of this beacon the Canadians leaped over the parapets and began their methodical advance behind their barrage fire.

The British barrage was without a flaw, says an eyewitness. Behind it the Canadians mounted Hill 70 and swept along the rest of the line. On the crest of the hill, where so much blood had been spilled before, heavy fighting might have been expected, for the position was well manned with machine guns. The resistance here, however, was not strong, and it was not until the dwellings in the outskirts of the suburbs were reached that vigorous fighting occurred. The ground over which the infantry advanced was honeycombed with British shell holes and the barbed wire defenses had been leveled, so that they gave little trouble.

FIGHT IN CELLARS AND DUGOUTS

The first serious resistance from the Germans was met at a point where the enemy was strongly entrenched in connecting cellars and there sanguinary fighting occurred. The place was a sample of many other suburbs about Lens. The city is surrounded by colliery communities which are so close together and so near the city proper that they really form part of the town. Lens, before the war, had a population of 30,000, but had become a mass of ruins.

Following their usual tactics, the Germans had carried out systematic destruction of the houses and had constructed strong underground defenses. The whole city was undermined with tunnels and dugouts, which had been reinforced with concrete, and most of the ruined buildings had been turned into machine-gun emplacements.

The effect of the preliminary British bombardment was most demoralizing to the enemy. The first German prisoners taken were in a completely dazed state as a result of the terrific bombardment

UNITED STATES ENTERS WAR

they had undergone, and other Germans were seen to flee to the rear, deserting their posts as the attack began.

The result of this preliminary fire was shown in the speed of the Canadian infantry's advance. The extreme depth reached in the first stage was 1,500 yards, and this was achieved in ninety-three minutes. This new front, taken into conjunction with positions secured previously in the southwestern outskirts of Lens, established an angular line like a pair of shears whose points reached out to the north and south of the city.

As the Canadians pushed in on the northwest, a simultaneous advance was started by the troops on the lower blade of the shears, and close fighting began, with the Germans intrenched in their concreted cellars, which were linked up with barbed wire and filled with hundreds of machine guns. The capture of the entire city of Lens was then only a matter of time, as Hill 70 insured the holding of the ground won by the Canadians, German reinforcements being placed under the range of irresistible fire from that dominating height. Among the prisoners taken in the attack were many German lads apparently not more than 17 years of age.

The German commander, Prince Rupprecht of Bavaria, made frantic efforts to recapture the lost positions around Lens. The taking of Hill 70 stirred the German high command as nothing else had done on the western front for many months, and a grim battle was waged for several days. On August 16 the enemy came on ten separate times, but they seldom got close enough to the Canadians for fighting with bayonet or bomb. The Prussian Guards participated in the counter-attacks and were subjected to a terrible concentrated fire from the British artillery and Canadian machine guns. Their losses were frightful and all German efforts to retake Hill 70 came to naught, while their hold on the central portion of the mining city became most precarious, as the Canadians consolidated the advantageous positions their valor had finally won.

RUSSIAN VICTORIES AND COLLAPSE

After the Russian revolution in March, 1917, the military affairs of the new nation entered upon a curious phase. At first the Russian army made a feint to advance on Pinsk, to cover the actual operations resumed in the month of July against Lemberg. This latter front extended for eighteen and a half miles and was held by troops known as "Regiments July First." These troops, reinvigorated by the consciousness of political liberty, confounded German military prophets by the magnitude and extent of the offensive which they began. Led by Alexander Kerensky, the revolutionary minister of war, and observed by American army officers, they forced the Teutons to evacuate Brzezany, and then captured many important positions, including terrain west and south of Halicz and strongly-defended positions northwest of Stanislaw. On July 11 Halicz was taken, thus

UNITED STATES ENTERS WAR

smashing the Austro-German front between Brzezany and the Carpathians.

This Russian operation broadened by mid-July, so that it extended from the Gulf of Riga to the Roumanian front, a distance of 800 miles. The Germans were reported to be rushing troops from the Italian and French fronts. Widespread enthusiasm was created throughout Russia, and the moral effect on the other entente powers was tremendous.

Before the third year closed, at the end of July, however, Russia's offensive suffered a collapse. German spies, anarchists, peace fanatics, and other agitators succeeded in destroying the morale of some of the Russian troops in Galicia, where a retreat became necessary when unit after unit refused to obey orders. Brzezany, Halicz, Tarnopol, Stanislaw and Kaloma were lost, together with all the remaining ground gained during the offensive. The Russians surrendered many prisoners, heavy guns, and an abundance of supplies and ammunition.

The death penalty was invoked as a check to further insubordinations and the provisional government introduced a policy of "blood and iron" in an effort to avert disaster.

South of the Carpathians and in the Vilna region there was little disaffection among the Russian troops, and Russia had not yet thrown up her hands, although the situation on the eastern front was disappointing to the Allies. Alexander Kerensky, a popular hero, became the strong man of Russia. A counter-revolution was promptly and forcibly crushed in Petrograd and an "extraordinary national council," meeting at Moscow, August 25, took steps to end the crisis. All loyal Russians, conservative and radical, were called to the aid of Kerensky, who ignored factional and party lines and succeeded in bringing something like order out of the political chaos in the new republic. Every effort was made to restore the power as well as the will of Russia to gain ultimate victory, and Elihu Root, head of a United States commission to Russia, assured the American people on his return from Petrograd that the ill effects of the revolution would soon pass away, leaving Russia once more united for action against the Teuton foe.

On August 15, Nicholas Romanoff, the deposed czar of Russia, and his entire family were removed from the palace at Tsarskoe-Selo, near Petrograd, and transported to Tobolsk in Siberia. Fifty servants who were devoted to him accompanied the ex-emperor into exile. Instead of the gorgeous imperial train in which he was wont to travel, an ordinary train composed of three sleeping cars, a dining car, and several third-class coaches was used for the transportation of Nicholas and his party, which included the former Empress Alexandra, whose pro-German attitude was a prime cause of his downfall. On arrival at Tobolsk the ex-czar and his entourage were received as political prisoners.

UNITED STATES ENTERS WAR

GERMAN SUBMARINE CAMPAIGN FAILS

The campaign of unrestricted submarine warfare, which was relied upon by Germany to win the war by the extinction of the British mercantile marine and the stoppage of transatlantic supplies, had proved a failure by August, 1917, after six months' duration. While the tonnage destroyed by the undersea instruments of frightfulness was sufficiently serious to cause grave alarm on both sides of the Atlantic, it formed but a small percentage of the ships actively and continually engaged in the transportation of munitions and supplies, while it was practically counterbalanced by the activities of Allied shipbuilders and by the seizure for Allied service of interned German ships in the countries that entered the war subsequent to February 1, 1917, when the campaign of unrestricted destruction began. Determined efforts were made by the British, French and United States navies to cope with the undersea enemy, and these were increasingly successful. Many merchant ships and transports were convoyed to safety by the destroyers of the three great naval Allies, and by August the fear that Britain could be starved out by means of German submarines had practically disappeared. The record of sinkings of British vessels for the first twenty-four weeks after the "unrestricted" warfare began was as follows:

Week	Over Under			Week	Over Under		
	1,600 tons.	1,600 tons.	Smaller craft.		1,600 tons.	1,600 tons.	Smaller craft.
First	14	9	3	Fifteenth	22	10	6

KING OF GREECE DEPOSED

King Constantine I of Greece was forced by the Allies to abdicate his throne on June 12, 1917, in favor of his second son, Prince Alexander. The kingdom remained, but not a pro-German one as before. In order to block the designs of the King and court, who were doing their best to deliver Greece to the Germans, the Entente powers were obliged to make a succession of demands upon the Greek government, including the demobilization of most of the army, the surrender of the fleet, and the withdrawal of Greek troops from Thessaly. In an effort to enforce their demands the Entente allies landed marines in Athens

UNITED STATES ENTERS WAR

—who were fired upon—and finally declared an embargo on imports into Greece. Turmoil and intrigue continued, and pressure was brought to bear upon Constantine which compelled him to abdicate the throne. Venizelos returned as premier and Greece was announced as a belligerent on the side of the Entente.

THE ITALIAN CAMPAIGN

In the Trentino the Italians took the offensive in June and after terrible fighting captured the Austrian positions on Monte Ortigara and Agnello Pass. These they were forced to relinquish, however, in the face of Austrian counter-attacks.

The Italian campaign on the Isonzo and in the Trentino, continued throughout the summer, was perhaps the most scientific of all the campaigns, involving tremendous technical difficulties, which were solved with amazing ingenuity and skill. The campaign was largely an engineers' and an artilleryman's war, waged in the mountains, much of it in regions of perpetual snow—highly picturesque and spectacular. Finally, it was as little destructive as war well can be, because the Italians were fighting in territories which they hoped to hold after the conflict, and they spared the towns and villages to the greatest extent possible.

BRITISH CAMPAIGN IN THE EAST

The capture of Bagdad by the British in March, 1917, after a brilliant campaign in Mesopotamia, had a deep moral effect in the Orient, particularly in Arabia, where the natives revolted against Turkish rule and established an independent government in Mecca.

In the Holy Land the British in 1917 opened a new era in the history of the East. Their advance by August 1 had carried them nearly to Gaza. Their objective was Jerusalem, which the Turks partly evacuated at their approach, after doing untold damage in the holy city and inflicting many atrocities upon the inhabitants.

WAR MISSIONS OF THE ALLIES

In cementing America's association with the nations which had become her allies, numerous exchanges of missions were arranged. France, Great Britain, Italy, Belgium, Russia, Japan and other entente belligerents sent delegations to the United States as a step toward unification, military, financial and otherwise. The United States sent missions to Russia and other countries.

AERIAL ATTACKS ON LONDON

Cities from Bagdad to London were subject to aerial raids by the Germans during the summer, notable attacks being those by Zeppelins and aeroplanes on London and the eastern coast cities of England. In five attacks on England in May, June and July, 298

UNITED STATES ENTERS WAR

persons were killed and 863 injured. Insistent demands were then made by the English people for reprisals in kind.

AN ESTIMATE OF CASUALTIES

An estimate of the total war losses, made near the close of the third year of the war and voiced by Arthur Henderson of the British War Council, placed the number of men killed at 7,000,000 since August, 1914. French general headquarters on August 1 estimated that 1,500,000 Germans had been killed up to March 1. Mr. Henderson estimated the total casualties of the war at more than 45,000,000.

WHEN THE THIRD YEAR CLOSED

The third year of the world war closed in July, 1917, with the fortunes of conflict favoring the Entente, except for uncertainty as to the outcome of the Russian situation. On the western front in Europe the Teutons found themselves on the defensive at the advent of the fourth year. They were fighting on lines newly established after forced retirement from terrain which they had won in earlier days at a tremendous sacrifice.

Following the declaration of war by the United States, Cuba and Liberia declared themselves on the side of the Allies. Panama pledged the United States her aid in defending the Panama Canal. Costa Rica put her naval bases at its disposal. China, Bolivia, Guatemala and Brazil severed diplomatic relations with Germany. Uruguay expressed her sympathy with the United States. Late in July Siam entered the war against the central powers, and on August 14 China formally declared war against Germany and Austria. This made a total of seventeen nations arrayed against the central powers.

As to the prospects for the fourth year of the war, which opened in August, 1917, American sentiment was expressed by the *New York Sun*, which said editorially: "We expect today as at first that the end will be catastrophic overthrow for the Kaiser and the military party of Germany, and a dreary expiation by the German people of their sin in allowing themselves to be dragooned into the most immoral enterprise of the ages."

UNITED STATES WAR ACTIVITIES

The Army bill providing for raising a new national army by selective draft duly passed the House of Representatives and the United States Senate and was signed by President Wilson on May 18, 1917. The President forthwith issued a proclamation calling on all male inhabitants of the United States between the ages of 21 and 30 to register for the draft on the following June 5. At the same time he formally declined the offer of Col. Roosevelt to raise a volunteer army for immediate service in France.

On June 5, the day of registration, 9,700,000 young men of all classes registered in their home districts throughout the country. It

UNITED STATES ENTERS WAR

was then decided to call approximately 650,000 men to the colors as the first national army. The formal drawing of the serial numbers allotted to registrants occurred in Washington late in July. District boards were appointed to examine the men drafted and receive applications for exemption, also appeal boards in every State. The month of August was largely occupied in preparing the quotas from each district and meanwhile cantonments were made ready for the training of the new army, while thousands of prospective officers received intensive training in special camps at various points, east and west, and were commissioned in due course. Orders were then issued for the men selected to report at the cantonments in three divisions of 200,000 men each, at intervals of fifteen days, beginning September 5. The National Guards of the various States were also mobilized August 9, mustered into the Federal service, and ordered to special training camps, mostly situated in the South. The work of assembling equipment and supplies for the new army was rushed and the whole country hummed with the task of preparation.

AMERICAN TROOPS IN FRANCE

France and Great Britain having joined in a request for the dispatch of an American expeditionary force to France at the earliest possible moment, the United States government on May 18 ordered 25,000 troops to France under the command of Major-General John J. Pershing. A large force of marines was subsequently ordered to join them, bringing the strength of the expedition up to approximately 40,000 men. General Pershing and his staff preceded the troops to Europe, reaching London June 8 and Paris June 13, and being enthusiastically welcomed in both the Allied capitals.

Convoyed by American warships, the first and second contingents of American troops crossed the Atlantic in safety, despite two submarine attacks on the transports in which at least one U-boat was sunk. Without the loss of a ship or a man the troops were landed in France on June 26 and 27, to be received with outbursts of joy by the French populace, who saw in their coming the assurance of final delivery from the German invaders. Training camps awaited their coming and there, behind the French lines they spent the months of July and August in active preparation for service under the Stars and Stripes against the German enemy on the western front.

U. S. WARSHIPS BUSY

America's destroyer flotilla arrived in British waters in May and immediately co-operated with the British fleet in the patrol of its home waters and the hunt for German submarines. The flotilla

UNITED STATES ENTERS WAR

was commanded by Vice-Admiral Sims and did effective work from the very start.

On August 11 it was announced in Washington that Admiral Sims had sent to the Navy Department a series of reports detailing the work of the American ships and men under his command. These were said to present a thrilling story of accomplishment, telling of many encounters with U-boats and also of the rescue of numerous crews of ships which had been destroyed by submarines off the coasts of England and Ireland.

Soon after war was declared by the United States, American warships took over from British and French vessels the patrol of American coasts, while Brazil added her navy to that of the United States for the protection of South American waters against the common enemy.

THE FIRST "LIBERTY LOAN"

On May 2, a few weeks after the United States entered the war, subscriptions were opened for the first block of \$2,000,000,000 of the "Liberty loan" of \$7,000,000,000 authorized by Congress in April. Great popular interest was evinced and all classes of the American people hastened to subscribe for the 3½-per cent bonds, so that when the books were closed on June 15 it was found that the loan had been oversubscribed by \$1,035,226,850 and the list of subscribers contained no fewer than 4,000,000 names. Most of the amount raised was used for loans to the Allies, to be expended in the United States for war munitions and supplies.

A war budget appropriating \$3,340,000,000 for current expenses of the war was passed by Congress and signed by the President June 15; also an Espionage bill which among other important provisions gave the President power to place an embargo on all exports. On July 14 the House of Representatives passed an Aviation bill appropriating the sum of \$640,000,000 for the construction and maintenance of an aerial fleet for home and foreign service.

FOOD CONTROL BILL PASSED

On August 10 President Wilson signed the Food Control bill adopted by Congress after prolonged debate, and he at once announced the formal appointment of Mr. Herbert C. Hoover as United States food administrator. Mr. Hoover, whose work as chief of the Belgian Relief Commission had made him world famous, stated the threefold objects of the food administration under the bill as follows:

"First, to so guide the trade in the fundamental food commodities as to eliminate vicious speculation, extortion, and wasteful practices, and to stabilize prices in the essential staples. Second, to guard our exports so that against the world's shortage we retain sufficient supplies for our own people, and to cooperate with the

UNITED STATES ENTERS WAR

Allies to prevent inflation of prices; and, third, that we stimulate in every manner within our power the saving of our food in order that we may increase exports to our Allies to a point which will enable them to properly provision their armies and to feed their peoples during the coming winter."

INTERNAL HANDICAPS IN AMERICA

While the United States was busily engaged in raising its new national army, innumerable difficulties arose to be contended with by the Federal and State governments and local authorities. Not the least of these was caused by enemy propaganda of various kinds, designed to interfere with the success of the selective draft. Active opposition to the draft developed in many districts, especially in the Western states where the organization calling itself the "Industrial Workers of the World," notorious as the "I. W. W.," had a considerable following, including many aliens, and gave the State and municipal authorities much trouble. Attacks on munition plants, strikes, and incipient riots were frequent, until the Federal government declared its determination to meet all such demonstrations with the strong arm of the law. Pacifists and pro-Germans of various stripes did their utmost to retard war preparations, and caused much annoyance, without, however, preventing the steady march of the selected men to the training cantonments, where the first divisions of the national army gradually assembled. The presence in the country of so many aliens of enemy birth constituted a difficulty, but this had been foreseen and partly provided against, and the true American spirit of patriotism steadily prevailed over all obstacles to the successful prosecution of the war for humanity. Uncle Sam prepared to strike—and strike hard.

INTERNAL TROUBLES IN GERMANY

Meanwhile, internal troubles developed in the German empire. Weary of the war, with hopes of final victory dwindling month by month, a strong peace party arose in the Reichstag, committing itself to the policy of a peace without annexations or indemnities, and for a brief time the Reichstag refused to vote a war credit. This brought the Kaiser, Von Hindenburg, and Von Ludendorff in hot haste to Berlin, to exert the utmost possible pressure of the military party on the recalcitrants. For the time being their power prevailed, but the German Chancellor, Von Bethmann Hollweg, was sacrificed, together with the Foreign Minister and other leading officials of the empire. The Chancellor was succeeded by Dr. Georg Michaelis, a statesman of colorless and practically unknown quality, suspected of being a mere mouthpiece of the Kaiser, appointed to register his decrees and continue the policy of the autocracy in the conduct of the war. But many peace proposals came out of Germany during the summer and every possible German effort was made to break the solidarity of the Allies.

UNITED STATES ENTERS WAR

THE POPE PROPOSES PEACE

On August 14 Pope Benedict addressed to all the belligerent nations a proposal for a peace agreement, stating the general terms which he believed might be found acceptable as a basis for the cessation of hostilities. These included disarmament of the nations, mutual condonation of damages, the establishment of the principle of arbitration for the future, the evacuation of Belgian and French territory by the Germans, reciprocal restoration of the German colonies, and a peace-table agreement as to Alsace-Lorraine, Poland, the Trentino, Armenia and the Balkan states.

Nothing being said as to the causes of the war and the criminal responsibility attaching to the authors of the great conflict, and all the nations at issue being classed as equally entitled to the benefits of the condonation proposed, the message from the Vatican met with a cool reception from the Allied nations, including the United States, especially as they entertained grave suspicions that it was inspired from Berlin, by way of Vienna. The answers of President Wilson and the British and French governments were therefore awaited with little expectation that the hour for peace had struck.

The British attitude toward peace proposals was expressed July 20 by Sir Edward Carson, member of the war cabinet, who said:

"If the Germans want peace we are prepared tomorrow to treat not with Prussianism, but with the best of the German nation, and as a preliminary to such a treaty and as an earnest of their sincerity that they don't want to acquire any territory or show violence towards others, we tell them to come forward and offer to enter negotiations. We make as the first condition of such a parley that they shall withdraw their troops behind the Rhine.

"When they have shown something like contrition for the wrongs and outrages against humanity which they have committed on poor little Belgium, in northern France, in Serbia, and in those other regions which they needlessly drenched with blood, we will be willing to enter into negotiations to see what can be done for release of the world from the terror of arms."

CANADIANS HOLD THEIR GAINS

On August 21 Canadian troops smashed their way with bombs and cold steel farther into the German defenses of the ruins of Lens, and defeated a desperate simultaneous attack by the enemy, which developed into one of the most sanguinary hand-to-hand conflicts on this battle-scarred front. The attack began at dawn with the capture of 2,000 yards of German positions on the outskirts of the shell-torn mining center, the Canadians driving their lines closer about the heart of the city and gaining possession of many railway embankments and colliery sidings in the northwest and southwest suburbs which had been strongly fortified for defense with a series of shell-

UNITED STATES ENTERS WAR

hole nests of machine guns. The battle raged fiercely for twenty-four hours.

When the Canadians went "over the top" in the thick haze of early dawn of the 21st, they saw masses of shadowy gray figures advancing toward them. The Germans had planned an attack to be delivered at the same moment, and sent in wave after wave of infantry in desperate efforts to regain their lost positions. In the words of an eyewitness, the Germans fought like cornered rats among the shell holes and wire incumbrances of "No man's Land," where the struggle raged, bomb and bayonet being the principal weapons. As the Canadian bayonet did its deadly work, in some of the bitterest fighting of the war, the German officers tried in vain to rally their men and the enemy infantry gradually fell back to the trenches they had left. The Canadians followed closely and, leaping on the parapets, hurled masses of bombs down among great numbers of troops which had been collected for the attack. The Germans tried to flee through the communication trenches, but the Canadians leaped among them with bayonets and bombs, killing many and sparing few as prisoners. Throughout the day the entire line was a seething caldron, but the new Canadian positions were firmly held as night fell.

Field Marshal Sir Douglas Haig after the battle sent a message of congratulation to Lieutenant-General Sir Arthur Currie, commanding the Canadian forces, and refuted the German claim that the Canadians had attacked with four instead of two divisions when Hill 70 was captured by the gallant fellows from the Dominion. The commander-in-chief also gave the Canadians credit for having reached all their objectives in the battles of the previous week.

Eight heavy assaults were delivered against the Canadians at Lens by the Germans during the night of the 21st, but in each case the enemy was thrown back at the point of the bayonet and by afternoon of August 22 the Canadians had consolidated all the new positions gained. During the battle of Lens up to this time (from August 15 to 22) the Canadians took 1,378 prisoners, 34 machine guns and 21 trench mortars. The number of prisoners taken bore only a small ratio to the losses inflicted on the Germans, who appeared exhausted when the assaults ceased.

On August 22 the British launched another fierce attack on the enemy in the Langemarek sector of the front and forced their way to a considerable depth in the neighborhood of the ridge known as Hill 35, strongly defended by Irish troops against Prince Rupprecht's Bavarians. At the same time a new battle at Verdun was in progress, but the French held all their gains against reserves massed by the Germans for desperate counter-attacks.

ITALIANS IN A GREAT OFFENSIVE

On the Isonzo front the Italian commander, General Cadorna, launched a great offensive while the British were active in Flanders.

UNITED STATES ENTERS WAR

and by August 23 had broken through the whole Austrian line, capturing the town of Selo, which was the pivot of the Austrian defense, and considered impregnable, and inflicting upon the enemy, in this eleventh battle of the Isonzo, the greatest losses he had sustained since the capture of Goritz. More than 13,000 Austro-Hungarian prisoners were captured during the battle, with thirty guns, and all counter-attacks were repulsed with heavy losses. The whole Selo line fell before the heroic onslaught of the Italians, and the loss of this important position was a serious blow to the Austrians. On August 22 Italian warships were showering shells on Trieste, the big Austrian port on the Adriatic which was the objective of the Italian campaign.

HOW ARE THE MIGHTY FALLEN!

"In the welter of the conflict an emperor of Austria-Hungary has died, full of years and of sorrow, a czar of Russia has stepped from his throne, and a king of Greece has lost his crown," said a well-known publicist, reviewing the war up to this time.

"Not one of the prime ministers or ministers of foreign affairs who conducted the diplomatic maneuvers preceding or immediately following the beginning of the war in the six most important countries of Europe is still in power. In Russia, Goremykin and Sazonoff are forgotten behind a line of successors, equally unstable. In France, Delcassé left the foreign office and Viviani ceased to head the cabinet, following the collapse of Serbia in the second autumn of the war.

"The tragedy of Roumania a year later contributed to the overthrow of Asquith and his foreign secretary, Sir Edward Grey, in Great Britain. San Giuliano of the Italian foreign office and Salandra, the prime minister, have passed. Count Berchtold, foreign minister of Austria-Hungary in 1914 (the empire has no prime minister), has passed into oblivion, while Von Jagow gave up the management of Germany's foreign affairs last autumn. Von Bethmann-Hollweg, the last of the group to lose his grip, has just gone down, despite the fact that he was not responsible to any elective body.

"Ministers of war in the belligerent countries have not been more stable. Kerensky follows a long procession in Russia. France has had four war ministers from Millerand to Painlevé, inclusive, while Lord Kitchener, organizer of Great Britain's most marvelous war achievement, a volunteer army of some 4,000,000 men, sleeps below the waters of the North Sea.

"History has as ruthlessly brushed aside most of the army commanders of the early days. Von Kluck, who led the Germans on Paris, is retired. Rennenkampf, with whom the Russians meanwhile swarmed into East Prussia, is a memory only. Sir John French has been recalled to England. That little group of generals who saved France and Europe at the Marne is decimated. Foch and Castelnau,

UNITED STATES ENTERS WAR

and Manoury are no longer in command, while Galliéni, worn out in the service of his country, was borne on his last journey through the streets of Paris on a sunny spring day in 1916.

"Even Joffre has been superseded in a military sense, though not as an idol of the nation. France still holds him as close to her heart as Germany possibly could hold Von Hindenburg—almost the only one of the war's early commanders to retain his military power."

RUSSIAN CAPITAL IN PERIL

On August 23, Riga, the Russian seaport which is the gateway to Petrograd, was reported in peril from the Germans, who were conducting a determined advance on the north of the eastern front under the immediate direction of Field Marshal Von Hindenburg. With a Japanese mission in Washington, headed by Viscount Ishii, it was expected that steps might be taken to send Japanese troops to the aid of the Russians.

Russia's critical internal situation, aggravated by the new German drive against Riga, was watched by officials in Washington with the gravest concern. While the taking of Riga would not necessarily be a decisive blow, it would make the Baltic more than ever a German lake, leaving the Russian fleet in the position of the mouse in the rathole to the German cat, just as the Kaiser's fleet was the mouse to the English fleet outside.

The outcome of the forthcoming extraordinary national council to be held at Moscow was therefore awaited in Washington with the keenest interest, scarcely less keen than in Russia itself. The immediate fate of Russia, it was felt, depended upon the action of the council in its efforts to throw off the demoralizing socialistic control of the Russian army and workmen. German intrigues in Russia were known to be exerting powerful influence to bring about anarchy within the new democracy.

CLOSING IN ON LENS

An advance by the Canadians in the neighborhood of the Green Grassier on the southern edge of Lens added greatly to the strength of the British line, which continued to tighten steadily about the heart of the city.

The Grassier is a great slag heap, and lies only about 300 yards south of the central railway station of Lens, and overlooks it.

The Canadians made their assault before dawn this time, and the attack was preceded by a protracted and exceedingly intense bombardment of the German positions. The Germans, exhausted by the long strain of constant counter-attacks, found the Canadians in their midst with little warning. But the defenders did not give up without a struggle, and there was fierce bayonet fighting.

The Grassier was an important buffer between the Canadians and the defenses of the city proper, and the Germans reached it through

UNITED STATES ENTERS WAR

tunnels connected with the network of passages and dugouts beneath Lens.

Part of the ground about the Grassier was inundated, due to the waterway near by having broken its banks, and this, in conjunction with the great number of machine-gun emplacements on the elevation, made it a particularly difficult position for attack.

An advance upon two German colliery positions adjoining the Grassier to the northwest, earlier in the night, also involved stiff hand-to-hand fighting. About the Grassier were numerous shell-shattered buildings, many of which had been strongly fortified by the Germans. The Canadians bombed their way systematically through these defenses, silencing the machine guns and clearing out the defenders.

The fighting on August 23 was on the edge of the city proper, rather than in the suburbs. Notwithstanding the tremendous strain upon the Canadians during the previous week, there was no diminution in the strength of their attacks. They worked steadily and methodically, gradually weaving a net about the Germans, who were living miserably in their underground positions within the great coal center.

MANY GERMANS CAPTURED

In the three days' fighting on the western front from August 21 to 23, the Entente Allies captured 25,000 German prisoners and by September 1 the total for August had reached more than 40,000, according to Major-General Frederick B. Maurice, chief director of the British war intelligence office. This topped the figure of prisoners which the Germans claimed to have taken in a single month on the Russian front, although their total undoubtedly was composed by at least half of mere stragglers from the mutinous and disorganized Russian units.

On September 1, 1917, the positions recaptured by the French around Verdun were safely consolidated in their possession, every German effort being thrown back in disorder. The fighting had developed into a big-gun duel, in which the French continued to maintain undoubted mastery, and they were firmly established once more on the left bank of the Meuse, which the Germans had intended to hold at all costs. Thus ended the last hope of the Crown Prince of Germany, who apparently was obsessed with the desire to conquer Verdun, in the neighborhood of which thousands of the flower of the German army found only a burial place, without any laurels of victory.

UNITED STATES ENTERS WAR

ALLIED GAINS IN THE WEST

The early autumn of 1917 witnessed steady gains by the British and French forces co-operating in Flanders and to the South of the Belgian border along the western front. The artillery on both sides was constantly active, but with evident superiority on the part of the Allies. Repeated German attacks were repulsed in the Champagne and along the Meuse, while in the Ypres region the Allied troops made frequent gains in spite of the concrete defenses established by the enemy to strengthen their entrenched positions.

Repeated successes of the Allies along the Chemin des Dames finally forced a German retreat along a fifteen-mile front which the Crown Prince had made strenuous efforts to hold. The Germans were compelled to retire because French victories on October 21-23 enabled French guns to enfilade the Ailette Valley behind the German positions, exposing the enemy to a series of disastrous flanking attacks and hampering the German communications. On October 30-31 the French bombarded the German lines vigorously. The enemy had already moved their artillery across the Ailette to a ridge north of the river. On the night of November 1 they completed their preparations for retreat and withdrew their infantry. French patrols approaching the German lines on the morning of November 2 were fired upon at first, but on renewing their reconnoissance soon after dawn found the German trenches empty.

It was impossible for the Germans to keep their front line supplied with ammunition or food, the carriers of which were obliged to pass through a tornado of shells and machine gun bullets while crossing the Valley of the Ailette, where their every movement could be observed by the French. Eventually the position became untenable and the Germans retired during the night to the Northern side of the Ailette Valley. The best elements of the Crown Prince's army had sustained severe losses and were compelled to go to the rear to reconstitute their diminished ranks. The evacuated territory North of the crest of Chemin des Dames included several towns that had been pulverized by bombardment, and the retreat brought the important city of Laon within range of the French guns.

The captures by the French in this sector from September 23 to November 1 included 12,000 prisoners, 200 heavy field guns, 220 trench mortars, and 720 machine guns. In ten days, from September 21 to 30, twenty-three German airplanes were destroyed and twenty-eight forced to descend badly damaged.

THE FIRST AMERICAN CASUALTIES

The first list of Americans killed and wounded in combat with the enemy reached Washington on October 17, in an official report

UNITED STATES ENTERS WAR

from Rear Admiral Sims of an encounter between a German submarine and an American destroyer. One American sailor was killed and five sailors were wounded when the submarine torpedoed the destroyer Cassin on patrol duty in European waters. The destroyer was not sunk and after making a gallant fight reached a British port.

Two days later Rear Admiral Sims reported that the American troop transport Antilles, homeward bound from France, was torpedoed and sunk by a German submarine on October 17. Seventy men of the 237 aboard lost their lives, including four naval enlisted men, sixteen army enlisted men, three ship's officers, and 47 members of the ship's crew. The Antilles was under convoy of American patrol vessels at the time it was sunk.

FRENCH TRIBUTE TO U. S. DEAD

At the burial on November 7 of the first three American soldiers killed in the trenches in France by a raiding party of Germans, a guard of French infantrymen, in their picturesque uniforms of red and horizon blue, stood on one side and a detachment of American soldiers on the other while the flag-wrapped coffins were lowered into the grave, as a bugler blew taps and the batteries nearby fired minute guns. The French officer commanding in the sector paid an eloquent tribute to the fallen Americans, his words being punctuated by the roar of the guns and the whistle of shells. In conclusion he said:

"In the name of the French army and in the name of France, I bid farewell to Private Enright, Private Gresham and Private Hay of the American army.

"Of their own free will they had left a prosperous and happy country to come over here. They knew war was continuing in Europe; they knew that the forces fighting for honor, love of justice and civilization were still checked by the long-prepared forces serving the powers of brutal domination, oppression and barbarity. They knew that efforts were still necessary. They wished to give up their generous hearts and they had not forgotten old historical memories while others forgot more recent ones.

"They ignored nothing of the circumstances and nothing had been concealed from them—neither the length and hardships of war nor the violence of battle, nor the dreadfulness of new weapons, nor the perfidy of the foe. Nothing stopped them. They accepted the hard and strenuous life; they crossed the ocean at great peril; they took their places on the front by our side and they have fallen facing the foe in a hard and desperate hand-to-hand fight. Honor to them! Their families, friends and fellow-citizens will be proud when they learn of their deaths.

"Men! These graves, the first to be dug in our national soil and only a short distance from the enemy, are as a mark of the

UNITED STATES ENTERS WAR

The Germans encountered stubborn resistance on the Bainsizza Plateau and heaps of enemy dead marked the lines of their advance. In one of the mountain passes a small village, commanding the pass, was taken and retaken eight times during desperate artillery, infantry and hand-to-hand fighting.

Goritz was shelled heavily and what remained of the city was further reduced to a mass of debris. One of the main bridges from Goritz across the Isonzo was blown up by the Italians and the enemy movement thus was further impeded.

West of Goritz the town of Cormons also was shelled heavily. The great German guns opened enormous craters and literally tore the towns to pieces.

The heaviest pressure began to be felt on the Carso front on Friday, October 26. The Teutons then increased their bombardment to deafening intensity and supplemented this with huge volumes of poison gas and tear-shells. The humid air and light winds permitted great waves of the deadly gases to creep low toward the Italian lines, the rear guards protecting themselves with gas masks and by hiding in caverns.

Amid the onslaught of overwhelming masses of the enemy, the Italians fell back slowly. The retreat, as in other instances of the war, was the most terrible for the civilian inhabitants. There was an enormous movement Westward. All the roads were packed with dense traffic, with four or five lines abreast of teams, automobiles, motor trucks, pack mules, artillery wagons, and ox carts. The soldiers marched or rode, singly, in groups, in regiments, in brigades, or in divisions.

"It was such a time as the world has seldom witnessed," said a Red Cross spectator. "Even fields and by-roads were utilized for the colossal migration. The only wonder was that the great army was able to withdraw at all and establish itself along the new line of defense.

"Many heartrending scenes were witnessed along the route, as the torrential rain and the vast zone of mud increased the misery of the moving multitude. Food was scarce and many went without it for days, while sleep was impossible as the throng trudged westward. The military hospitals were evacuated, with all other establishments, and pale and wounded patients obliged to join in the rear-guard march or fall into the hands of the enemy. The roads were strewn with dead horses.

"Families with eight or ten children, the youngest clinging tightly to the grandfather, trudged amid ranks of soldiers of many descriptions."

UNITED STATES ENTERS WAR

mighty land we and our Allies firmly cling to in the common task, confirming the will of the people and the army of the United States to fight with us to a finish, ready to sacrifice as long as is necessary until final victory for the most noble of causes, that of the liberty of nations, the weak as well as the mighty. Thus the deaths of these humble soldiers appeal to us with extraordinary grandeur.

"We will therefore ask that the mortal remains of these young men be left here, left with us forever. We inscribe on the tombs, 'Here lie the first soldiers of the republic of the United States to fall on the soil of France for liberty and justice.' The passer-by will stop and uncover his head. Travelers and men of heart will go out of their way to come here to pay their respective tributes.

"Private Enright! Private Gresham! Private Hay! In the name of France, I thank you. God receive your souls! Farewell!"

ITALY INVADED BY TEUTONS

In the first week of October Austrian forces, heavily reinforced by Germans, opened a gigantic drive in an effort to crush Italy. It soon resulted in wiping out all the gains made by the Italians under General Cadorna on the Isonzo and in the Trentino, and in a determined invasion of Northern Italy by the enemy, with the city of Venice as its immediate objective.

The Teuton attack began on the morning of October 24, after an intensive artillery fire in which specially constructed gas shells were thrown at various places. The offensive covered a 23-mile front, from Monte Rombon Southeast through Flitsch and Tolmino and thence Southward to the Bainsizza Plateau, about ten miles Northeast of Goritz, the scene of desperate fighting in the drive by the Italians which wrested important mountain positions from the Austrians.

The greatest shock came from the North, where the Isonzo was first crossed by the enemy. At this point there occurred a weakening of certain troops of the second Italian army, which gave the overwhelming German contingents an opportunity to pass forward between a portion of the army on the North and that on a line farther South. Then began the double exposure of the Southern force to fire in the front and on the flank which required a steady falling back until the entire Italian army was moving towards newly-established positions farther West. The commanding height of Monte Nero, which the Italians had occupied after deeds of great valor, was defended against onslaughts from three sides which gradually resulted in envelopment and the capture of many thousands of Italian troops and hundreds of guns.

A general retreat of the Italian forces was then carried out, with shielding operations by rear guards, and the main body of General Cadorna's army retired to the Tagliamento.

UNITED STATES ENTERS WAR

The safe retirement of the Tagliamento was due to the unexampled heroism of large bodies of Italians, of such spirit as the Alpine troops on Monte Nero, who refused to surrender, and the regiments of Bersaglieri at Monte Maggiore, the members of which perished to the last man rather than yield ground. It was by such resistance in the face of overwhelming forces of the enemy that the civil population was able to retire. And it was owing to the valor of Italian aviators, combating the Austro-German army of the air, that the fleeing women, children and old men, who crowded the roads, were not struck down by bursting bombs.

By November 1 General Cadorna's forces had effected their retirement behind the Tagliamento River line, but at the cost of tremendous losses, aggregating 180,000 prisoners and 1,500 guns. It was soon seen, however, that the Tagliamento line could not be successfully held against the enemy and a further retirement was carried out, Southward through the mountainous country to a shorter line along the Piave River East of Venice and Northwesterly to the Trentino boundary. This gave French and British reinforcements the opportunity to arrive in sufficient numbers to aid in checking the invaders.

As one result of the Italian reverses, General Cadorna was relieved of the chief command, though he was credited with a masterly retreat. He was succeeded by General Diaz.

The Austro-German offensive continued steadily for three weeks and on November 21 was being pressed on three main fronts: First, along the Piave River; second, from the Piave to the Brenta; third, from the Brenta across the Asiago Plateau. The Italian troops were holding firm and inflicting heavy losses on the enemy. The spirit of the Italian people was calm and public opinion strongly supported the most stubborn resistance to the invader. Although all the fruits of Italy's two years of strife had been swept away in a single month and a dread enemy was reaching ever forward, seeking her most treasured possessions of art and industry, the internal dissensions which Germany probably hoped to start had not appeared. The population of Venice, however, had been reduced from 160,000 to 20,000.

ANARCHY RAMPANT IN RUSSIA

The Imperial government of Russia, headed by Premier Kerensky, was ousted on November 7, when a period of practical anarchy set in. On the evening of that day a congress of workmen's and soldiers' delegates assembled in Petrograd, with 560 delegates in attendance. Without preliminary discussion the congress elected officers pledged to make "a democratic peace." They included fourteen so-called Maximalists or members of the Bolsheviks (majority), the radical Socialist party suspected of pro-German tendencies, headed by Nikolai

UNITED STATES ENTERS WAR

Lenine and Leon Trotzky; also seven revolutionary Socialists. These leaders at once sent an ultimatum to the Kerensky government, demanding their surrender within 20 minutes. The government replied indirectly, refusing to recognize the Bolsheviki committee. Rioting then broke out and the Winter Palace, headquarters of the provisional government, was besieged by troops favorable to the rebels. The cruiser Aurora, firing from the Neva River, and the guns of the St. Peter and St. Paul fortress bombarded the palace and early next morning compelled the surrender of the government forces defending it. Women of the "Battalion of Death," armed with machine guns and rifles, were among the defenders, who held out for four hours. Soon the Bolsheviki were in complete control of the city, Kerensky was in flight, several members of his cabinet were arrested by the rebels, and the provisional government was no more.

Several weeks of political and industrial chaos in Russia followed the Lenine coup d'etat, which was a triumph, probably temporary, of extremists. A number of the commissioners appointed by the Lenine-Trotzky faction to carry on the government, gave up their posts within a few days, characterizing the Bolsheviki regime as "impossible" and as inevitably involving "the destruction of the revolution and the country."

On November 23, Leon Trotzky, styling himself "National Commissioner for foreign affairs," addressed to the embassies of the Allies in Petrograd a note proposing "an immediate armistice on all fronts and the immediate opening of peace negotiations." An official announcement was also made that the Bolsheviki government had decided to undertake without delay the reduction of the Russian armies, beginning with the release from their military duties of all citizen soldiers conscripted in 1899.

SECOND "LIBERTY LOAN" OVERSUBSCRIBED

The second "Liberty Loan" of the United States war bond issues was largely oversubscribed by the patriotic citizens of the country. When the books closed on October 27 it was announced that the subscriptions received from approximately 9,000,000 persons amounted to over \$5,000,000,000, the amount of the bond issue being \$3,000,000,000.

BRITISH SMASH HINDENBURG LINE

By a series of attacks on the morning of November 21 that took the German enemy completely by surprise, the British Third army, under command of Lieut.-Gen. Sir Julian Byng, broke through the Hindenburg line on a front of 32 miles between St. Quentin and the Scarpe. The following day, when they consolidated the new positions gained, 10,000 German prisoners were sent to the rear, with a large number of guns and quantities of material abandoned

UNITED STATES ENTERS WAR

by the astonished enemy, while at one point the victorious troops were $6\frac{1}{2}$ miles in advance of their former positions and the city of Cambrai was brought within easy range of their guns.

It was the greatest and most successful surprise of the war. There was no preliminary bombardment to warn the enemy, and the advance continued steadily for two days, when the towns of Masnieres, Marcoing, Ribecourt, Havrincourt, Graincourt, and Flesquieres, long occupied by the enemy, all were behind the British lines.

Just before dawn on the 20th there was absolute quiet along the whole line. A few minutes later British tanks were rumbling along over "No Man's Land" flanked and followed by the infantry. The tanks smashed down the barbed wire entanglements and were atop the trenches and dugouts before their German defenders were aware of their peril.

The German artillery could lay down no barrage, and line after line of trenches had been captured before they got into action. Then the British guns opened, but not for barrage purposes. They were shelling and silencing the enemy artillery.

Following through the gaps made by the tanks, English, Scottish, and Irish regiments swept over the enemy's outposts and stormed the first defensive system of the Hindenburg line on the whole front.

The infantry and tanks then swept on in accordance with the program and captured the German second system of defense, more than a mile beyond. This latter was known as the Hindenburg support line.

English rifle regiments and light infantry captured La Vacquerie and the formidable defense on the spur known as Welsh ridge. Other English county troops stormed the village of Ribecourt and fought their way through Coillet wood.

In severe hand-to-hand fighting at Flesquieres, near Cambrai, on the 21st, British troops, preceded by tanks, stormed the town. The Germans fired on the tanks with seven big guns at short range. The British infantry charged the guns, captured them, and killed the crews. Three other big guns were captured in a similar manner at Premy Chapelle. British cavalry captured a battery at Rumilly, sabering the crews.

Highland territorial battalions crossed the Grand ravine and entered Flesquieres, where fighting took place. West Riding territorials captured Havrincourt and the German trench systems north of the village, while the Ulster battalions, covering the latter's left flank, moved Northward up the West bank of the Canal du Nord.

Later in the day the advance was continued and rapid progress was made at all points. English, Scottish, Irish, and Welsh battalions secured the crossings on the canal at Masnieres and captured Marcoing and Neuf Wood.

UNITED STATES ENTERS WAR

On the following day, Wednesday, November 21, reinforcements which the enemy hurried up to the battlefield to oppose the British advance were driven out of a further series of villages and other fortified positions.

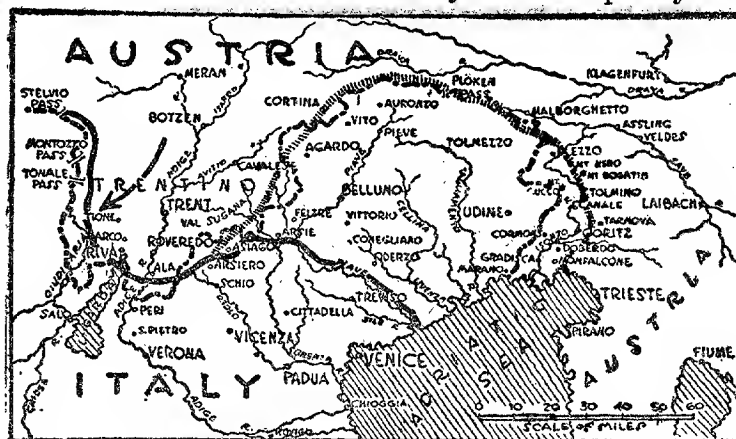

Thousands of cavalry co-operated with the great army of tanks and infantry in continuing the successful assault begun on November 20. Open fighting went on at many places and the mounted troops, who long had waited for a chance to vindicate their existence in this war, rendered invaluable services in "mopping up"

AMERICAN COMMISSION IN EUROPE

A special American Commission, headed by Colonel Edward M. House, personal friend and trusted adviser of President Wilson, arrived in London on November 8, on its way to attend the Allies' conference which met in Paris November 22, to perfect a system of co-ordination among the nations at war with Germany and secure a better understanding of their respective needs.

BRITISH NEAR JERUSALEM

On November 24 the British forces contending against the Turks in Palestine had advanced to the suburbs of Jerusalem, after inflicting a severe defeat upon the enemy at Askelon, with Turkish casualties of 10,000. More than seventy guns were captured at Askelon, and the British subsequently occupied the ancient port of Jaffa (Poppa). The fall of Jerusalem was then considered imminent and the end of Turkish dominion in the Holy Land was plainly in sight.

ITALIAN BATTLE FRONT, MAY 4, 1918.

The Heavy Line Shows the Position of the Hostile Armies, When the Austrians Threatened a New Drive in 1918. The Shaded Line Shows the Italian Positions Before the Austro-German Offensive, in the Fall of 1917.

UNITED STATES ENTERS WAR

WIN AND LOSE AT CAMBRAI

For the first time since the war began England celebrated on November 23 the victory of Field Marshal Haig and General Byng at Cambrai, in the old-fashioned way, by the ringing of bells in London and other cities. Heavy fighting continued for several days at the apex of the wedge driven into the German line, especially at Bourlon Wood and the village of Fontaine, where attacks and counter-attacks followed in rapid succession.

Up to November 30 the British held their gains near Cambrai and that city lay under their guns. Then the Germans in a determined attack surprised the British in their turn, and forced them back from their new positions for a distance of about two miles, nearly to the Bapaume-Cambrai road.

Next day, by fierce fighting, the British recaptured Gouzeaucourt. The battle then raged over a fifteen-mile front, desperate efforts being made by the Germans to regain all the ground taken by the British west and south of Cambrai. The British had had no chance to dig themselves in and consolidate their positions in the ground won, and on December 1 and 2 the struggle was in the open, a fierce hand-to-hand conflict unlike anything previously seen in the war. The British lost guns, for the first time in more than thirty months. They also lost many men, taken prisoner by the enemy, but soon succeeded in checking the counter-offensive.

In their attempt to deliver a great simultaneous encircling attack, to surround the victorious British in their new Cambrai salient, the Germans sent forward great forces of infantry, supported by a terrific bombardment. The British met the shock brilliantly, finally held their own, and the German drive was declared to have missed its end, at enormous sacrifice of life.

On the night of December 5 the British strengthened their line by abandoning certain untenable positions near Cambrai, falling back deliberately and successfully, unknown to the enemy, upon a well-chosen line which ruled out the dangerous salient made by Bourlon Wood. Here they prepared to maintain their hold upon the captured length of the Hindenburg line against any pressure.

The German casualties in the battle of Cambrai were estimated at 100,000 men, greatly exceeding those of the British in consequence of the nature of the massed attacks made by infantry in the counter-offensive.

As the year 1917 closed there was a succession of German attacks and counter-attacks by the British in the Cambrai sector, the British lines holding firmly at all points and continuing to hold during the winter.

UNITED STATES ENTERS WAR

SOME RESULTS OF THE YEAR 1917

The British War Office issued the following statement of captures and losses during 1917: Captures—prisoners on all fronts, 114,544; guns, 781. Losses—prisoners, 28,379; guns, 166.

The following figures, obtained from reliable sources, tell the real story of Germany's "ruthless" submarine campaign against British shipping. Tonnage of British ships of more than 1,600 tons in August, 1914—16,841,519; loss by enemy action in 3½ years, less new construction, purchase, and captures, 2,750,000; remaining tonnage January 1, 1918—14,091,519.

On December 3, 1917, it was announced officially in London that East Africa had been completely cleared of the enemy. Every German colony was then occupied by Allied forces.

DISASTER AT HALIFAX

As the result of a collision in the harbor of Halifax, Nova Scotia, between the French munition ship "Mont Blanc" and the Belgian relief ship "Imo" on December 6, thousands of tons of high explosives blew up, killing more than 1,260 persons, injuring thousands, and destroying millions of dollars in property in the city.

JERUSALEM CAPTURED BY BRITISH

Advancing steadily upon Jerusalem in the Palestine campaign against the Turks, the British forces under General Allenby finally, on December 10, captured the Holy City and restored it to Christendom. The Turks were driven to the north, with heavy losses, the port of Joppa was occupied, and Palestine was slowly but surely freed from Mussulman dominion. General Allenby formally entered and took possession of Jerusalem on December 11 with a small representative force of British and colonial troops, being received and welcomed with impressive ceremonies by the inhabitants.

WAR DECLARED AGAINST AUSTRIA

The United States Congress on December 7, 1917, passed a resolution declaring a state of war to exist with Austria-Hungary. Austrian aliens, however, were permitted free movement in the United States, only Germans being classed as alien enemies and subjected to restrictions as such.

It was announced by the Secretary of War during the winter that 500,000 American troops would be on the fighting line in France in the spring of 1918 and that a total of 1,500,000 men would be available for the front during the year.

A portion of the French front was taken over by the United States troops under General Pershing early in 1918 and in a number of trench raids and patrol engagements in the last weeks of winter they gave a good account of themselves, receiving their baptism of enemy fire and gas with the utmost gallantry and winning several

UNITED STATES ENTERS WAR

minor engagements. A small number of Americans were captured in German raids up to March 10, but the losses inflicted upon the enemy more than counterbalanced those sustained.

RUSSIA FORCED INTO "PEACE"

On November 28, a few days after German emissaries had been sent to Petrograd to parley with the peace faction in disorganized Russia, the Bolshevik *de facto* government under Nicolai Lenine and Leon Trotzky began negotiations for an armistice with Germany; and on December 3 an armistice was arranged. The Cossacks under General Kaledines and General Korniloff began a revolt against the Bolsheviks, who organized their forces as Red Guards, and a virtual reign of terror was inaugurated in Russia while negotiations for a separate peace with Germany proceeded with numerous interruptions. The administration of Lenine and Trotzky became an absolutely despotic regime, all forms of opposition being summarily dealt with while crime was rampant and blood flowed freely in Petrograd and Moscow. The Ukrainian provinces formed a separate republic and proceeded to make peace with Germany and Austria.

Formal announcement of the armistice with the Petrograd government was made at Berlin December 16, with the statement that peace negotiations would begin immediately at Brest-Litovsk on the Eastern front. Russia thus violated her pledge to the Allies not to make a separate peace.

The peace delegates of Russia and Germany began their sessions December 23. On Christmas Day Ensign Krylenko, the Bolshevik commander-in-chief, reported that the Germans were transferring large numbers of troops to the Western front against the Allies, contrary to one of the Russian conditions of the armistice. Early in the new year, January 2, 1918, the negotiations at Brest-Litovsk were suspended for several days, owing to the nature of the German terms of peace, which demanded that Russia surrender to Germany the territory including Poland, Courland, Esthonia and Lithuania. Foreign Minister Trotzky declared that the Russian workers would not accept the German terms.

Germany, however, stood pat and on January 10 negotiations were resumed, continuing at intervals for several weeks. In the middle of February the Bolshevik government announced that it had withdrawn Russia from the war with the Central Empires and had ordered the demobilization of the Russian armies, but refused to sign a formal treaty of peace with Germany. Premature rejoicing ensued in Germany, and on February 17 Berlin announced a resumption of war with Russia. Two days later the German armies began an advance into Russia along the whole front from Riga south to Lutsk, occupying the latter city without fighting.

A complete surrender to Germany followed, Lenine and Trotzky

UNITED STATES ENTERS WAR

stating that they would sign the peace treaty on the German terms, which included all the territory claimed by Germany along the eastern coast of the Baltic Sea, comprising the western part of Esthonia, Courland with the Moon Islands in the Gulf of Riga, most of the provinces of Kovno and Grodno, and nearly all of Vilna, with a huge indemnity. Despite the surrender, the Germans continued their invasion of Russia, with an eye to booty, and captured without organized resistance of any kind thousands of guns and vast quantities of rolling stock, motor trucks, automobiles, and munitions of war. The invasion continued well into the month of March in the general direction of Petrograd, while to the south Austria, at first seemingly reluctant to join the German incursion into helpless territory, also invaded the Ukraine on the pretense of "restoring order."

SINKING OF THE "TUSCANIA"

The first serious disaster to American troops on the voyage to France occurred on February 5, when the steamship "Tuscania," a British transport with 2,179 United States troops on board, was torpedoed and sunk by a German submarine off the north coast of Ireland. The close proximity of British convoy and patrol boats enabled most of those on board to be rescued, 1912 survivors being landed within a few hours at Buncrana and Larne in Ireland. The lives lost included 267 American soldiers besides a number of the crew. The attacking submarine is believed to have been destroyed by the British patrol before the "Tuscania" sank.

LONG-DISTANCE PEACE TALK

Early in 1918, while the Russian debacle complicated the war situation in Europe and the United States hummed with war activities, a series of speeches by statesmen of the powers at war resulted in demonstrating the futility of all hopes of a general peace.

In an address to Congress on January 8 President Wilson, following and indorsing a notable speech by the English premier, Mr. Lloyd-George, laid down fourteen definite peace and war aims of the United States, closely agreeing with the expressed aims of the European Allies; "and for these," said Mr. Wilson, "we will fight to the death." Subsequently, in February, Mr. Wilson stated four general principles on which the nations at war should agree in seeking a satisfactory peace. The German chancellor, Von Hertling, addressing the Reichstag, declared that Germany could agree to Mr. Wilson's basic principles of peace, but British and French statesmen promptly pointed out that the German practices in Russia, and elsewhere as opportunity offered, failed to agree with Von Hertling's profession of the Wilson principles. German suggestions of an informal discussion of peace terms were therefore declined by the allied powers, and in March, 1918, all eyes were turned toward the Western front in anticipation of a long-threatened German drive.

UNITED STATES ENTERS WAR

THE WORLD'S GREATEST BATTLE

All previous battles of the Great War paled into comparative insignificance when the German offensive of 1918 opened on the Western front, March 21, with a desperate and partially successful attempt of a million men to break through the British line, attacking fiercely from the Ailette to the Scarpe, along a front of sixty miles. For weeks the battle raged over the territory of the Somme, and when a second German drive occurred farther north, from Givenchy to Ypres, fully 3,000,000 men were engaged on both sides, and all records of human combat were broken.

The loss of life was appalling, but in the absence of official reports while the fighting was in progress, could only be guessed at, though the world knew that the rivers of France and Flanders ran with blood. The Germans attacked in masses and successive waves, and paid the penalty of their desperate strategy. For though the British, and later the French, lines were bent backward for miles, and gaps were occasionally torn in them by the foe's furious attack, the Allied defensive withstood the onslaught and after a month of the most terrific struggle the world has ever seen, both British and French forces presented an unbroken front to the disappointed enemy.

The city of Amiens, one of the keys to Paris, had been a chief objective of the German drive, but all efforts to capture that important railroad center failed. True, Noyon, Peronne, Bapaume, Albert and Montdidier, on the south, and Festubert, Neuve Chappelle, Armentieres, and Paaschendaale, to the north, were successively captured from the Allies, in spite of the most gallant and heroic resistance. But then the lines held firmly, and all the Germans had to show for an awful sacrifice of life and morale was a few miles of advance into territory already devastated by war.

On April 21, when the Hun offensive had lasted a full month, not only were the armies of the Allies intact, and better still, their spirit and morale unbroken, but the utmost confidence prevailed among them. All the Allied forces, British, French, Canadian, and American, on the Western front, had been by this time placed under the supreme command of the eminent French strategist, General Ferdinand Foch, an important step in the co-ordination of effort that met with universal approval among the Allied nations.

GENERAL PERSHING OFFERS AID

A magnanimous offer by General Pershing, approved by President Wilson, to brigade the United States troops in France with the British and French forces, was gratefully accepted by General Foch. While the Americans bore only a minor part in the big battles, or rather the continuous battle of March and April on the Somme, and

UNITED STATES ENTERS WAR

had no part at all in the fighting in Flanders, they held splendidly to their section of the front-line trenches in the vicinity of Toul, and gave the enemy a taste of their quality in many a trench raid. Several attacks by German storm troops were also beaten off, the most important of these occurring late in April, when the Americans defeated a force of some 1,200 picked Hun troops, driving them back to their own lines with a loss of 400, while the total losses of the Americans was about 200.

GERMANY PREPARES TO STRIKE

The great German drive had been in course of preparation for months before it began. The Russian situation had been settled, and large bodies of troops were thereby released for service on the Western front. The Kaiser and his general staff then determined upon a final effort to win a decisive victory in the west. Their plan was to vanquish the British and French, if possible, before the United States could transport a sufficient number of men to France to turn the tide of numbers in favor of the Allies, and enable them to take the offensive with good prospects of success.

German troops were therefore concentrated near the points chosen for attack, and this was done with the utmost secrecy, the troop trains running unlighted at night, so as to escape the observation of Allied aviators. Two hundred divisions in all were gathered for the German drive, and fully half of them were assembled near the British front on the Somme. March 21 was set as the date for the attack and every precaution was taken to render it a surprise to the British. The German troops were led to believe that they would be irresistible, and that Paris, their long-looked-for goal, would soon be won.

Meanwhile the Allies had not been idle. Expecting the drive, but not knowing where it would strike first, preparations had been made all along the line, not merely for strenuous defense of the positions held, but also for eventualities in case of enforced retreat. New positions back of the lines were prepared, reserves were distributed at strategic points, and full co-operation between the Allied armies was arranged for. The British took over the section of the French front between St. Quentin and Chauny, in addition to their former front, and by so doing relieved the strain on the far-flung French line.

The Germans counted for victory upon their concentration of vast bodies of troops and the element of surprise, hoping to break through between the British and French armies before Allied reserves could be brought up in sufficient numbers to halt them.

OPENING DAYS OF THE BATTLE

On the day set, Thursday, March 21, the great battle opened, after a six-hour bombardment, the British 3rd and 5th armies being

UNITED STATES ENTERS WAR

attacked simultaneously. The German infantry advanced in waves, of which there seemed no end, and these were followed by batteries of trench mortars, until the front line of German trenches had been reached. Then, wave after wave, the advance was continued, in the face of a furious British fire, until the defenders were compelled to draw back through sheer force and weight of numbers. The German waves moved forward at the calculated rate of 200 yards every four minutes, wherever it was found possible to do so. Each wave, on reaching its objective point, dropped to the ground and opened fire with rifles and machine guns, placing a barrage 2,000 yards ahead of them, under cover of which the succeeding wave advanced. Thus each wave passed over the one ahead of it, and fresh troops were constantly coming to the front. With such tactics, against a spirited and determined foe, the losses of the attackers were naturally enormous. In fact, it was estimated that the casualties suffered by the Germans during the first few days of such fighting amounted to 250,000 men. But, driven on by ruthless commanders, they continued to advance in masses, though mowed down by the British at every successive step.

"All the German storm troops, including the guards, were in brand-new uniforms," said the correspondent of the New York Times. "They advanced in dense masses and never faltered until shattered by the machine-gun fire. The supporting waves advanced over the bodies of the dead and wounded. The German commanders were ruthless in the sacrifice of life, in the hope of overwhelming the defense by the sheer weight of numbers. * * * Still they came on, with most fanatical courage of sacrifice. When the first lines fell, their places were filled by others, and the British guns and machine-guns could not kill them fast enough." Two batteries of field artillery at Epehy, it is said, "fired steadily with open sights (that is, pointblank) at four hundred yards for four hours, into the German masses swarming over No Man's Land."

On the first day, some field batteries aided the Germans, but these were soon left behind in the advance over difficult and shell-torn ground, and the battle became one of rifle and machine-gun fire and hand-to-hand combat.

On the north the British 3rd army made a splendid resistance and held its ground well, but the 5th army farther south, which bore the principal brunt of the attack, under General Gough, was gradually forced to retreat, though in good order, in a northwesterly direction, towards Amiens. French troops were ordered from the southwest to reinforce the British in the vicinity of Noyon. There the French stemmed the tide of Germans, and the drive was soon turned northward, with Amiens as its evident objective.

UNITED STATES ENTERS WAR

ALLIED LINES BEGIN TO HOLD FIRM

The battle continued along these lines, with the British still slowly retiring, with their faces to the foe, until the 26th of March, the French stretching their lines farther and farther to the left to keep in touch with the British, and never failing to maintain connection between the two armies. The Germans' fond hope of cutting them apart was doomed to disappointment. French and British cavalry aided in keeping the line intact, and for the second time since the early days of the war the horsemen came into their own, doing valiant service in covering the retreat of the British and impeding the enemy's advance at many points where their aid proved invaluable.

On March 27 and 28, the situation began to improve. British reinforcements arrived at the points of greatest danger, and the defense stiffened, then held the lines firmly before Amiens, and at a distance from that threatened city sufficiently great to prevent its successful bombardment by all but the heaviest artillery of the enemy. The devastated and shell-torn condition of the terrain taken over by the Germans was unfavorable for bringing up the great guns to within striking distance. From that time on, the Allies were supremely confident of their ability to cope with any forces.

While the Allied armies, especially the British, lost heavily in men and guns during the Hun advance, many of the German divisions engaged in the drive were literally cut to pieces. The 88th division was reported by prisoners to be practically annihilated. The same prisoners, taken in counter-attacks, expressed the utmost surprise at the relatively small number of dead whom they had found in the British and French trenches as they advanced. They had been informed by their officers that the offensive would be over in eight days, and that a complete victory over the Allies would be won within three or four weeks.

GERMAN DRIVE IS HALTED

The eighth day of the German offensive, far from finding the Huns victorious, resulted in tremendous attacks by the Germans being stopped by the unbeatable British, while the French won a brilliant victory at the south of the line. Meanwhile the Germans had begun another attack in the Flanders sector, with the object of wresting from the British the control of Messines Ridge, which dominated the lowlands of Flanders and had been so gallantly won by the Canadians in the previous year. They gained a partial footing on the ridge, but the greater part of it was grimly held, and all efforts of the enemy to advance through Ypres towards the Channel ports were frustrated.

Another sector was added to the north end of the battle line on the eighth day, March 28, when the Germans attacked heavily on

UNITED STATES ENTERS WAR

both sides of the River Scarpe toward Arras. Here some of the fiercest fighting of the offensive soon developed, but the ground gained by the Germans was insignificant. Daily, however, they claimed to have captured thousands of Allied troops and hundreds of guns; while, on the other hand, enormously long ambulance trains were reported passing through Belgium with the German wounded, the hospitals in northern France not having sufficient accommodation for the sufferers. On every battlefield of the 100-mile front—for the fighting now covered that enormous stretch of territory, in two sections, north of La Bassee and south of Arras—the German dead lay literally in heaps.

On March 29, the ninth day of the great battle in France, the German drive was practically halted, and both British and French reports noted a decrease of the fighting, enemy activity being manifested only by local attacks all along the front, which was being strengthened each day by the arrival of Allied reinforcements.

PARIS BOMBARDED AT LONG RANGE

Soon after the great offensive opened, the city of Paris was surprised by being bombarded from a distance of approximately 70 miles by a new German long-range gun, which was discovered by French airmen to be concealed in a concrete tunnel in a wood behind the German lines. A number of persons were killed and wounded by the nine-inch shells from this new weapon, 54 women being killed when a shell struck a church in the suburbs of the city on Good Friday. The Allied commanders refused to regard the long-range gun as of any great military importance except as a means of spreading terror among the civilian population,—and the population of Paris refused to be terrorized by such a method, exhibiting the same spirit as that of the people of England with regard to the futile aerial raids.

French estimates of the German losses for the first eleven days of the offensive placed them at between 275,000 and 300,000 men. The Germans claimed that during the same period they had captured 70,000 prisoners and 1,000 field guns.

ANOTHER ATTACK ON AMIENS

Having been foiled in an attempt on March 31 to break through the valley of the Oise, Paris ceased to be the German objective, and another offensive against Amiens was undertaken on April 4. By this time a French army had repaired the ragged line between the French on the south and the remainder of the British army of General Gough, whose enforced retirement had been conducted in good order. Though outnumbered two to one, the British and French repulsed the attack on Amiens with heavy losses to the Germans, who were effectually stopped at a distance of fifteen kilometers (nine miles) from that city. This ended the first phase of the great battle.

UNITED STATES ENTERS WAR

BATTLE RENEWED IN THE NORTH

The second phase of the battle which was expected to prove decisive began April 9 with an attack on the British, aided by Portuguese troops, on a front of fifteen miles, from La Bassée to Ypres. The center, held by three Portuguese divisions, was broken through, and on April 12 the situation seemed critical. Determined counter-attacks by the British, however, and reinforcements by the French, stopped the Germans in the next few days, and this offensive, like that farther south in the valley of the Somme, gradually died out, leaving the Germans with gains of only a few square miles of devastated territory to show for their continued heavy losses. And the reserve forces of the Allies were still intact, the strategy of General Foch in this respect being universally applauded as correct under the circumstances.

SHELLS FIRED BY THE MILLION

In the beginning of the offensive which thus failed to accomplish its object, the most desperate means were employed by the Germans to break down resistance. In the first six hours of bombardment on March 21, when three great German armies were massed for the attack, under Generals Von Bulow, Von Marwitz, and Von Hutier, commanding from the north to south in the order named, it is estimated that at least 1,500,000 shells were fired by one single army—that opposed to General Gough's forces on the south, while the British 3rd army, under General Byng, to the north, was similarly assailed. Most of the shells contained gas and were designed to destroy the occupants of the trenches about to be stormed. Only the utmost individual valor and persistency of the thin British line, as it retired still fighting, prevented the desperate and over-confident foe from turning the gradual retreat into a decisive defeat. As it was, the Germans paid dearly for every yard of ground they gained, as their successive waves of troops swept over the zone of trenches and then engaged the groups of Allied forces in the open beyond.

All the German units were under orders to advance as far and as fast as possible, being provided with three days' rations and two days' water. After the first few days, the difficulty of bringing up supplies, with the expected objectives far from being gained, aided in slowing up and then halting their advance. Behind the German storm troops great numbers of reserves were assembled, to fill up the gaps torn in the ranks and restore the divisions to their normal strength as fast as they were depleted by the defense. The German tactics took no account of human life, but expended it in the most reckless manner, with appalling results throughout the drive. The Allies, on the other hand, sought at all times to conserve their forces by intrenching as fast as possible at every point during the period

UNITED STATES ENTERS WAR

of their retirement. Their artillery was constantly in action, and aided greatly in checking the German advance.

ALLIES CONTROL IN THE AIR

German aeroplanes played no great part in the advance, although they bombed the British and French rear nightly, and the air service of the Allies proved superior throughout the battle. For the first time in a great battle British and French airmen attacked the enemy infantry from low altitudes with their machine guns and bombs, and rendered invaluable assistance in damming the swelling tide of the Hun hordes. Having gained the mastery of the air, as they did prior to the British drive on the Somme in 1916, they retained it until the foe was halted. To a considerable extent they replaced the heavy guns of the Allies by their constant bombing and gun fire.

Between March 21 and March 31, the French and British pilots shot down more than 100 German planes, losing about one-third of that number in the air battles. After the first few days there were practically no German machines in the air over the fighting front, as was the case on the Somme in 1916, but at the end of March the Hun planes began to reappear in mass formation patrols, sometimes consisting of as many as fifty planes in a group of patrols. Then followed a period of intense air fighting, of which a single day's record of the French may be cited as an example. On April 12, the Allied aviation report shows that French fighting scouts made 250 flights, fought 120 combats in the sky, shot down eight Germans and damaged 23 others, burned five enemy balloons, damaged five more, and bombarded German troops with 45 tons of explosives.

GERMANS FAIL IN THEIR OBJECT

The last part of the month of April was marked by a succession of minor attacks by the Germans along the entire front of the halted offensive, and by the development of counter-attacks by the Allies at various points where it was deemed necessary or advisable to strengthen their defensive positions, but up to May 1 the Germans were as far as ever from their main objectives in the west. Judged from the standpoint of their confident expectations, and the promises of success held out as an encouragement to their troops, the long-heralded and long-prepared spring offensive of 1918 was a failure. Their much-vaunted strength of numbers and of organization failed as completely to gain a decisive result as their initial drive on Paris in 1914. Though they threw into the fighting in March and April about 125 divisions, they failed to separate the French and British armies, which was a prime object of their strategy, and they sustained losses which, while not irreparable, must have greatly affected the morale of their men. "Remember Verdun!" said a famous French

UNITED STATES ENTERS WAR

commander, commenting on the drive. "The Boche is making this tremendous effort and sustaining these losses to effect a complete rupture of our front, and if he does not do that he has failed."

BRITISH LOSSES MADE GOOD

On April 25 the British minister of munitions announced in the House of Commons that the losses of guns and ammunition sustained by Field Marshal Haig's forces in France and Flanders during the big German drive had been more than replaced. The losses were placed by Mr. Winston Spencer Churchill at nearly 1,000 guns, between 4,000 and 5,000 machine guns, and a quantity of ammunition "requiring from one to three weeks to manufacture." More than twice the number of guns lost or destroyed had been placed at the disposal of the British air and ground services, said the minister.

GERMANS START ANOTHER ATTACK

Another determined attack in the Somme region was begun by the Germans on April 24, after three weeks' further preparation. The enemy evidently had not abandoned hope of capturing Amiens, and he again began hammering at the gateway to that city. The first onslaught was repulsed by the British, but on the following day, April 25, the enemy succeeded in gaining about a mile of ground. The combined British and French armies were covering the roads to Amiens, with reserves close at hand, and part of General Pershing's American forces were co-operating with the French. The utmost confidence prevailed that the united forces under General Foch, who was called by Marshal Joffre "the greatest strategist in Europe," would not only meet and defeat this renewed drive by the enemy, but that before long the tide of battle would turn strongly in favor of the Allies, whose reserve armies were held in leash by their supreme commander, awaiting the strategic hour to strike.

BOTTLING UP U-BOAT BASES

One of the most thrilling exploits of the war occurred on the night of April 22, 1918, when British naval forces performed an almost incredible feat, by entering the harbors of Ostend and Zeebrugge, German submarine bases, and practically bottling them up. French destroyers co-operated with the British in the daring undertaking.

At midnight, under cover of a remarkably developed smoke screen, furnished by the raiders themselves, five old British cruisers were run aground in the harbor channels, blown up, and abandoned by their crews. The ships were loaded with concrete. An old submarine, loaded with explosives, was also run under a bridge connecting the mole, or breakwater, at Zeebrugge with the shore, and there blown up, so as to prevent interruption of the raiders while they were doing their work alongside the mole.

UNITED STATES ENTERS WAR

Facing dangerous and unknown conditions of navigation, the harbor was rushed by British monitors and destroyers, under heavy fire from the shore batteries. A storming party of volunteers, sailors and marines, was landed under extreme difficulties from the cruiser *Vindictive*. This party boarded a German destroyer lying alongside the mole, defeated her crew, and sank the ship. The concrete-laden vessels were duly sunk with a view to blocking both harbors, and every gun on the mole at Zeebrugge was destroyed. The effects of the raid were not easily ascertainable. It was soon learned that the submarine base at Zeebrugge at least had been put out of business for a while. The gallantry and daring of the deed were generally recognized as fully in keeping with the best traditions of the British navy. The loss of life was quite heavy, but the British lost only one destroyer and two coastal motor boats, many of the raiders returning safely to the other side of the Channel. Even the men on the exploded submarine succeeded in escaping. The officer who planned the raid, however, was among the killed.

GERMAN ATTACK ON YPRES FAILS

On Monday, April 29, the German 4th army under General von Arnim, having gained possession of Mount Kemmel, a dominating position, began a general assault on the British hill positions on the Kemmel front, southwest of Ypres. The intention was to capture Ypres forthwith, by the overwhelming power of numbers, and the day's fighting was a crucial test of the holding power of the Allies in the Ypres salient. The result of the attack was a stunning defeat for the enemy, who was repulsed all along the line and suffered frightful losses.

In the words of a French general, "It was a great day for the Allies!" The repulse of the German attack was a real defeat, for it upset all the confident calculations of the enemy, who from the height of Mount Kemmel had seen, first Ypres, and then channel ports, within his grasp. It brought disappointment and disillusion to his troops, who had been urged on to their disastrous massed attacks by flamboyant promises of success. The effect was seen in a renewal of German peace propaganda, which all the Allies had learned by this time to disregard as unworthy of the slightest serious attention.

"Extraordinary nervousness and depression prevail in Germany, owing to the losses in the western offensive," said Reuter's correspondent at Amsterdam on April 29, quoting a German military writer, Capt. von Salzmänn, who said: "Our losses have been enormous. The offensive in the west has arrived at a deadlock. The enemy is much stronger than our supreme command assumed. The region before Ypres is a great lake, and therefore impassable. The whole country between our Amiens front and Paris is mined and will be blown up should we attempt to pass."

UNITED STATES ENTERS WAR

The preliminary bombardment southwest of Ypres April 29 started in the early morning and took in the ten-mile front from Meteren, west of Bailleul, to Voormezele, two miles south of Ypres. Infantry attacks in this area followed with great fury, and sanguinary fighting continued all day. The Germans at the outset advanced with fixed bayonets, but they came under such an intense machine-gun fire that most of them were never able to employ the steel. The French at Locre and the British at Voormezele repulsed every attack, thrusting the enemy back whenever he gained a footing in advanced positions, and firmly holding every point around Ypres at the end of the day.

General von Arnim's losses were particularly staggering at Locre, where he used battalion after battalion in a vain attempt to hold the village, a key to Mount Rouge. The previous German capture of Mount Kemmel did the enemy little good, for the Allied artillery kept the crest of the hill so smothered with shell fire that it was impossible for the Huns to occupy it in force.

The attack, which was the fourth great battle of Ypres, was the biggest effort the Germans had made in the Flanders offensive, the enemy employing thirty fresh battalions of reserves, in addition to the large number of divisions in position at the beginning of the battle. The net result was a tremendous setback for the Germans, who paid an awful price. Next morning the battlefield in front of the defenders' positions was covered with the bodies of gray-uniformed men.

AMERICAN TROOPS IN ACTION

American units were in action in Picardy, east of Amiens, on April 28, having reinforced the British and French in that sector, to aid in keeping the foe from Amiens and Paris. Their baptism of fire in the direct line of the German offensive made their previous experiences pale into the insignificance of skirmishes. During the various engagements in which they participated in the last days of April and the first week of May they acquitted themselves with great credit.

After a preliminary bombardment of two hours, a heavy German attack was launched against the Americans in the afternoon of April 30 in the vicinity of Villers-Bretonneux, and was repulsed with heavy losses to the enemy, who left dead and wounded on the field, while the American losses were reported as "rather severe." There was hand-to-hand fighting all along the line, and the violent struggle lasted for a considerable time before the enemy was finally thrust back, leaving prisoners in the American hands. Their French comrades were full of praise for the marked bravery displayed throughout by the American troops, who were fighting at one of the most difficult points on the whole battle front.

UNITED STATES ENTERS WAR

U. S. TROOPS RUSHED TO FRANCE

As a result of the great German offensive movements and territorial gains in the spring of 1918, there was a tremendous increase in the military activities of the United States, particularly in rushing troops to Europe. After the selection of General Foch as generalissimo of the Allied forces, the American troops in the war zone were brigaded with the French and British all the way from the North Sea to Switzerland, and their numbers steadily increased.

In the United States the training of the new National Army, national guards, and officers in the numerous cantonments and training camps was intensified and hurried. As fast as the men were brought into condition they were shipped to France. At first much of the space on the transports was devoted to supplies and materials for the camps and depots in France, but as the situation became critical owing to successful enemy offensives, fewer supplies and more men were sent. Great Britain lent her ships and the number of transports was largely increased, so that each month of 1918 showed a greater movement of troops across the Atlantic.

The troop movement record for the spring and summer months of 1918 was a wonderful one, in view of the submarine menace. In April, 117,212 American troops were successfully transported; in May, 244,345; in June, 276,382, and in July 300,000. The month of August found more than 1,500,000 Americans in France, England and Italy. This immense number of men were carried over without the loss of a single eastbound American transport.

AN ARMY OF 5,000,000 PLANNED

On August 5, 1918, plans were announced for increasing the effective strength of the United States army to 5,000,000 forthwith, by an extension of the draft age limits and rapid intensive training. Official statements showed that the armed forces of the United States already amounted to a total of 3,074,572 men, including 2,570,780 in the army and 503,792 in the navy. The national army at this date contained 1,400,000 men, the regular army 525,741, the national guard 434,511 and the reserve corps 210,528. The regular navy had 219,158 men, the marine corps 58,463, the coast guard 6,605, and the reserve 219,566. On June 5 of this year 744,865 men reaching the age of 21 since June 5, 1917, were registered for selective draft purposes.

DEFEATING THE SUBMARINE DANGER

Meanwhile giant strides were taken in the American program of shipbuilding to offset the ravages of submarine warfare. The U. S. Shipping Board was reorganized and galvanized into a high state of efficiency. Under the leadership of Charles M. Schwab, director-general of the Emergency Fleet Corporation, and Edward M. Hurley,

UNITED STATES ENTERS WAR

chairman of the board, the work in the shipyards on the Atlantic and Pacific Coasts, and on the Great Lakes, was speeded up until ships were being built at the rate of 5,000,000 tons a year. In the first three weeks of July, 1918, twenty-three ships of 122,721 deadweight tons were completed, making a total of 223 new vessels built under the direction of the board up to that time, the aggregate tonnage being 1,415,022 tons. On July 4 alone eighty-two vessels were launched, their splash being "heard around the world."

With the increased tonnage being put out by the British, French, and Italian shipyards, and the output of neutral countries friendly to the Allies, this practically put an end to the submarine peril. In addition the United States requisitioned seventy-seven Dutch ships with an aggregate tonnage of about 600,000, while arrangements were made with Sweden for about 400,000 tons of shipping and contracts were let for the building of a considerable number of ships in Japanese shipyards.

The knowledge that there were over a million American troops facing the enemy on the battle fronts in Europe came as a decided shock to the German army and people, who were forced to realize the failure of their submarine campaign.

AMERICANS PROVE THEIR METTLE

After the American forces in France had their first serious encounter with the Germans on April 20 at Seicheprey, a village near Renners forest, which they recovered from the enemy in a gallant counter-attack, the fighting was of a more or less local character throughout the rest of the month and in May, with varying fortunes.

On May 27 the Germans began another great offensive, taking the Chemin des Dames from the French and crossing the Aisne. On the following day they crossed the Vesle river at Fismes. But on this day also the Americans won their first notable victory, by capturing the village of Cantigny and taking 200 prisoners. The United States marines added to their laurels in this fight and held the position firmly against many subsequent counter-attacks.

Continuing their drive toward Paris, the Germans occupied Soissons on May 29, Fère-en-Tardenois May 30, and next day reached Chateau Thierry and other points on the Marne, where they were halted by the French.

In the early days of June several towns and villages fell to the Germans, but the French by counter-attacks recaptured Longpont, Corcy, and some other places. On June 6 American marines by a spirited attack gained two miles on a two and a half mile front, taking Hill 142 near Torcy and entering Torcy itself. The following day, with French aid, they completed the capture of Vilny, Belleau, and important heights nearby. In another battle northwest of

UNITED STATES ENTERS WAR

Chateau Thierry the Americans advanced nearly two and a half miles on a six-mile front, taking about 300 prisoners.

These battles confirmed the impression that the American troops as fighters were equal to their allies.

ANOTHER ENEMY OFFENSIVE

On June 9 the Germans began the fourth phase of their offensive, planned by their high command to enforce peace. They attacked between Montdidier and the Oise, advancing about four miles and taking several villages. On the next day they claimed the capture of 8,000 French. The same day the American marines took the greater part of Belleau Wood. On June 11 they completed the capture of Belleau Wood, taking 300 prisoners, machine guns and mortars. The French at the same time defeated the Germans between Rubescourt and St. Maur, taking 1,000 prisoners. Other battles followed on the 12th and 13th, but on the 14th the latest German offensive was pronounced a costly failure.

From this time to the end of the month the fighting was of a less serious character, though the Americans in the Belleau and Vaux region gave the Germans no rest, attacking them continually and taking prisoners at will.

JULY 4 CELEBRATED ABROAD

America's Independence day, 1918, was officially celebrated in England, France, and Italy, as well as in the United States, making it a truly historic occasion. On that day Americans assisted the Australians in taking Hamel with many prisoners. On the 8th and 9th the French advanced in the region of Longpont and northwest of Compiègne, taking Castel and other strong points near the west bank of the Ayre river. July 14, the French national holiday, was generally observed in America and by the American soldiers in France. Then, on July 15, the Germans began the fifth and disastrous last phase of the offensive which they started in the spring, on March 21.

STINGING DEFEAT FOR AUSTRIA

But Italy meanwhile had scored a great success against the Austrians. French and British regiments, with some Americans, were helping to hold the Italian line when, on June 15, the Austrians, driven by their German masters, began an offensive along a 100-mile front, crossing the Piave river in several places. For two days they continued violent attacks, penetrating to within 20 miles of Venice, at Capo Silo. Then the Italians, British, and French counter-attacked with great vigor and soon turned the Austrian offensive into a great rout, killing thousands, taking other thousands prisoner, and capturing a vast amount of war material, including many of the Austrian heavy-caliber guns. The entire Austrian plan to advance into the

UNITED STATES ENTERS WAR

rich Italian plains, where they hoped to find great stores of food for their hungry soldiers, resulted in miserable failure.

The defeat increased the discontent in Austria-Hungary and added to the bad feeling entertained towards Germany. Peace feelers were thrown out by Austrian statesmen, but the continued influence of German militarism prevented them from receiving serious attention by the Allies.

A WATERLOO FOR THE CROWN PRINCE

When the German divisions of the Crown Prince of Prussia began their last desperate offensive on July 15, they attacked from Chateau Thierry on the west to Massiges, along a 65-mile front, crossing the Marne at several places.

East and west of Reims the battle raged, with the Allies holding strongly everywhere and the Germans suffering heavy losses. The enemy aimed at Chalons and Epernay and hoped by turning the French flank at Reims to capture the cathedral city without a direct assault upon its formidable defenses. General Gouraud, the hero of Gallipoli, was in command of the French forces on the right, while General Mangin and General de Goutte held the left. Most of the Americans taking part in the battle were under the command of these noted generals, and strong Italian and British forces were with General Gouraud's army. The French constituted about 70 per cent of the Allies engaged.

GENERAL FOCH STRIKES

In a single day the German offensive was effectually blocked at the Marne. Despite the enemy's utmost efforts he could make no further advance.

Then Foch, the great French strategist and Allied generalissimo, struck the blow for which he had patiently bided his time!

Apparently having advance information of the German plans, or perhaps surmising them, General Foch had been preparing a surprise for the Crown Prince. In the forest of Villers-Cotterets on the German right flank, he had quietly massed large forces, including some of the best French regiments, together with the foreign legion, Moroccan and other crack troops, and many Americans. Everything possible had been done to keep these troop movements secret from the enemy.

On Thursday morning, July 18, 1918, a heavy attack was launched in force at the Germans under General von Boehm all along the line from Chateau Thierry on the Marne to the Aisne river northwest of Soissons.

The Germans were taken completely by surprise, and town after town was captured from them with comparatively slight resistance. When the first shock of surprise was over, their resistance stiffened,

UNITED STATES ENTERS WAR

but the Allies continued to advance. Mounted cavalry were once more used to assist the infantry in the open, while tanks in large numbers were used to clear out enemy machine-gun nests.

The American troops, fighting side by side with the French, did their work in a manner to excite the admiration of their allies, and acquitted themselves like veterans. Thousands of prisoners were taken, with large numbers of heavy guns and great stores of ammunition, besides thousands of machine guns, many of which were turned against the enemy. The strategy of General Foch received world-wide applause. His master stroke met with immediate success.

By the 20th of July Soissons was threatened by the Allies. The Germans, finding themselves caught in a dangerous salient and attacked fiercely on both flanks, hurriedly retreated to the north bank of the Marne and were rapidly pressed back farther. Their condition was critical and the German Crown Prince was obliged to call for assistance from Crown Prince Rupprecht of Bavaria, commanding in the north. Taking advantage of this, the British and French in the north made frequent attacks, gaining ground and taking prisoners at numerous points.

For ten days the Allies continued their victorious progress on both sides of the Soissons-Reims salient, the Germans continuing to retire under strong pressure. They were forced back to the Ourcq river, then to the Vesle, where they made a determined stand. Fère-en-Tardenois and Fismes fell into the hands of the victorious French and Americans, the latter gaining a notable victory in the occupation of Fismes over the vaunted Prussian guards, who had been brought up to endeavor to stay their progress. The first week of August saw most of the Reims salient wiped out by the German retreat, while rear-guard actions were being fought along the Vesle as the Germans sought defensive positions farther in the rear.

The prisoners captured by the Allies in their drive up to that time numbered more than 35,000 and more than 700 heavy guns also fell into their possession, with immense quantities of ammunition and stores. The Germans, however, succeeded in destroying many of the ammunition dumps and vast supplies which had been stored in the salient for their expected drive on Paris.

As they retired the Germans burned many of the occupied French villages, pursuing their usual policy. As many as forty fires were observed on the horizon at one time as the Allies advanced.

Soissons was retaken on August 2, and the valley of the Crise was crossed by the Allies, who dominated the plains in the German rear with their big guns.

The German losses in the great battle and retreat from the Marne were variously estimated at from 120,000 to 200,000. General von

UNITED STATES ENTERS WAR

Boehm avoided a first-class disaster, but his defeat was a serious one and had far-reaching moral consequences among the enemy.

It was estimated that from the beginning of their offensive in March, the German armies lost more than 1,000,000 men in killed, wounded and prisoners. The Austrians in their ill-fated offensive of 1918 lost more than 250,000 men.

FOCH A MARSHAL OF FRANCE

On August 6 General Ferdinand Foch, commander-in-chief of the Allied forces, was elevated by the French council of ministers to the rank of a Marshal of France. In presenting his name Premier Clemenceau said:

"At the hour when the enemy, by a formidable offensive, counted on snatching the decision and imposing a German peace upon us, General Foch and his admirable troops vanquished him. Paris is not in danger, Soissons and Chateau Thierry have been reconquered, and more than 200 villages have been delivered. The glorious Allied armies have thrown the enemy from the banks of the Marne to the Aisne."

AMERICANS AT FISMES

The American troops covered themselves with glory at many points in the Allied drive, notably in the hand-to-hand fighting in the streets of Fismes on August 4, when they captured that German base. The fighting was said to have been the bitterest of the whole war, the Prussian guards asking no quarter and being bayoneted or clubbed to death as they stood by their machine guns.

BRITISH VICTORY IN THE NORTH

On the Amiens front, in Picardy, the British Fourth Army, under General Rawlinson, and the French First Army, under General Debentry, stormed the German positions on August 8 on a front of over 20 miles, capturing 14,000 prisoners and 150 guns, and making an advance of over seven miles.

ALLIED GAINS IN PICARDY

Before the Germans had time to recover from the surprise of Marshal Foch's attack on the Marne, and while they were still retreating to the Vesle, the Allies delivered another heavy blow, this time on the Albert-Montdidier front in Picardy. Here the British and French suddenly attacked in force on the morning of August 8, stormed the enemy positions along a thirty-mile front and on the first day of the attack penetrated to a depth of seven miles.

For several days the enemy retreated, closely pursued by allied cavalry and tanks, which for the first time fought in a combination that proved irresistible. The tanks used were of a new small variety, known as "whippets," which rapidly wiped out the machine-gun

UNITED STATES ENTERS WAR

nesses with which the enemy sought to stem the tide of the victorious onrush. Some American troops fought with the British in their advance and gained high praise from the Allied commanders.

By August 15 the total number of prisoners captured by the British Fourth Army, under General Rawlinson, was 21,844. In the same period of one week the prisoners taken by the French First Army amounted to 8,500, making a total of 30,344 Germans captured in the operations of the Allied armies on the Montdidier-Albert front, besides 700 heavy guns, quantities of machine guns, and other important spoils of war.

North of the Somme, between Albert and Arras, the Germans continued to fall back to the old Hindenburg line, where there were strong defensive positions, with the British and French keeping in close touch with their retreat. On August 15 they had definitely given up the towns of Beaumont-Hamel, Serre, Bucquoy, and Puisieux-au-Mont, and at several points had crossed the Ancre river.

Field Marshal Haig announced that the proportion of German losses to those of the Allies in the Picardy offensive were greater than at any other period of the war. The total Allied casualties were not as large as the number of Germans taken prisoner.

JOY IN AMIENS AND PARIS

One important result of the British drive was that Amiens, the "dead city of Picardy," began to come to life again. Its population of 150,000, including 40,000 refugees, had fled before the German offensive in March, 1918, but the former inhabitants began to return when the menace of the invader disappeared, as the invader himself was chased back toward the Somme. A service of thanks to the Allied arms was held in the Great Cathedral of Notre Dame in Amiens, August 15. Despite the damage from German guns and bombs, the cathedral retained the title of the most beautiful in all France.

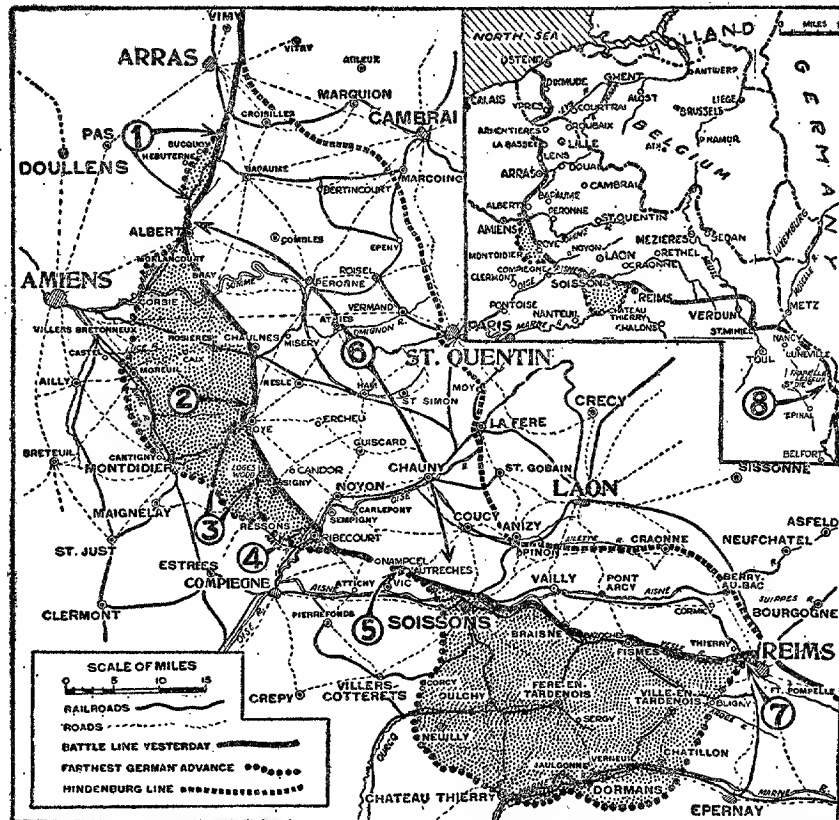

The city of Paris, at the same time, quietly celebrated the great change in the situation wrought in one short month. Just four weeks before, on July 18, the residents of Paris had been awakened by the sounds of such a cannonade as they never had heard before. It was General Mangin's counter-preparation against the great German attack which the enemy believed was to bring him to the gates of Paris. In the meantime the Germans, who were at the gates of Amiens, Reims, and Compiègne, had been soundly beaten and outgeneraled at every point, and the initiative had been forced from them by the military genius of Marshal Foch. The effect upon the Germans was apparent from the fact that General Hans von Boehm, the German "retreat specialist" had been appointed to the supreme command on the Somme front. The German withdrawal north of Albert

UNITED STATES ENTERS WAR

was looked upon as the first application of his tactics. It was General von Boehm and his former command, the German Eighth Army, that stood the brunt of the Allied pressure in the Marne salient previous to the retreat of the Huns to the north of the Vesle river, where they were still standing in the middle of August.

BOLSHEVIKI EXECUTE EX-CZAR

Former Czar Nicholas of Russia was executed by the Bolsheviki in July, 1918, having been held as a prisoner since his dethronement.

BATTLE LINE ON THE WESTERN FRONT AUGUST 21, 1918
 Shaded portions of map show territory gained by American and Allied troops during July and August, 1918. Most of the territory gained by the Germans in their 1918 offensive was recaptured by the Allies before September 1, 1918.

CHAPTER III.

AMERICANS AT CHATEAU THIERRY

Personal Accounts of Battle—Gas and Shell Shock—Marines Under Fire—Americans Can Fight and Yell—Getting to the Front Under Difficulties—The Big Day Dawns—The Shells Come Fast—A Funeral at the Front—Impression of a French Lieutenant—Keeping the Germans on the Run.

The name of Chateau Thierry will be long remembered in the United States, for it was there the American fighting quality was for the first time clearly impressed upon the Germans, to their immense astonishment, and with far-reaching effect. The German people and the German army had been told that the United States had no army, navy, or fighting quality; that the talk of an American army in Europe was "Yankee bluff," and nothing more; that even if we could raise an army we could not send it across the ocean, first because we had no ships, second because if we had ships the submarines of Germany would surely sink them. Yet here at Chateau Thierry they were confronted by United States troops and soundly beaten.

That effect upon the Germans was in itself of tremendous significance; but the historic effect was greater, and will grow in importance with the passage of time, for it is a fact, unperceived by onlooking nations at the moment, that it was the turning point of the war; and that the turning was accomplished by troops of a nation that hated war and was supposed to be incapable of military development; and that these troops had met and whipped the choicest troops of a power that above all things was military, that had assumed proprietary rights in the art of war, and believed itself invincible.

Late in February, 1918, General Ludendorff had told a Berlin newspaper correspondent that on the first of April he would be in Paris. It was inconceivable to the Germans that with the thorough preparation of a mighty army for an offensive that by sheer weight of numbers should drive through an opposition twenty times as strong as that which then confronted them, they could not with ease push in between the French and British forces, thrust straight through to Paris (as a spectacular performance rather than a vital military operation), and then walk over to the channel ports of France and bring both France and England to a plea for mercy.

From the 21st of March until along in May, 1918, it looked as though they might succeed. That is, to anyone unaware of the strategy of Marshal Foch, who sold terrain by the foot for awful prices in German lives, and held an unbroken front until such time

AMERICANS AT CHATEAU THIERRY

as American forces could be brought into action, instead of wearing out his reserves and weakening his power for an offensive.

Unity of command had been accomplished by that time at the urgent demand of the United States Government. Foch had saved France and the world at the first battle of the Marne. Being given supreme authority over all the allied forces, as soon as the arrival of American troops in great numbers had been thoroughly established, he was ready; and the offensive passed from German to allied hands.

The tremendous German drive, which Ludendorff had confidently promised the German people would bring a smashing and decisive victory, was stopped. Retrocession began. On the Marne again, in July, 1918, in the sector held by Americans an action began at Chateau Thierry which forced the German retreat that in a few weeks was to shake the heart of Germany, scare out Bulgaria, Austria and Turkey, in the early autumn bring Germany to a plea for peace, send Ludendorff himself into retirement, dethrone the Kaiser, do away with the imperial form of government, set up a republic, and create conditions that would quash for all time the power of Prussia to disturb a decent world.

Floyd Gibbons, correspondent of the Chicago Tribune, a non-combatant who wanted to see the combat he was there to report, was in that memorable action. He lost his left eye there, and was otherwise severely shattered, but he got his story through. His home paper some months afterward gave Gibbons well earned credit for that contribution to current history. It said he "helped to put the Marines where they belong in the war's history, for he was with them in their early exploits and fell in one of their battles. Six thousand out of 8,000 engaged was their toll. They fought with the French through Belleau Wood, heartening the brave, tired, discouraged poilus, and after they came out upon the other side the name of the battlefield was changed to the 'Wood of the American Marines.' Mr. Gibbons says that when Marshal Foch began his great offensive, which in cosmic importance is second only to creation, he selected the units in which he had the most faith. These units were chosen not because they were braver nor more sacrificial, but because they knew. They were the Foreign Legion of France, two divisions of American Regulars, and the United States Marines."

From that day there was no change in the favorable fortunes of war on the western front.

AMERICANS CAN FIGHT AND YELL

An eyewitness of the first days of the Chateau Thierry battle thus describes the capture of the Belleau wood:

"The Americans moved stealthily with fixed bayonet until they got into the edge of the woods and atop of the German machine gun-

AMERICANS AT CHATEAU THIERRY

ners. Then the farm boys cheered, and the lumberjacks shouted, and the Indians yelled. They were where they could mix it at close range with the Boche, and that was what they wanted.

"Their yells could be heard a mile away. They were up against two of the Kaiser's redoubtable divisions, the Two Hundredth Jaegers and the Two Hundred and Sixteenth reserve division. They fought with vim and joy.

"They had lost comrades at the hands of the Germans and now were to avenge them. No quarter was asked or expected. The Germans had orders to fight to the death and the Americans needed no such order.

"Without much artillery on either side and without gas, the Americans fought the Germans through that woods, four kilometers (nearly three miles) long, for six hours. At last we got through and took up a position across the northern end of the woods.

"Perhaps the most sensational part of the fight was when about 200 Germans got around behind our men. They were chased into a clearing, where the Americans went at them from all sides with the bayonet, and I am told that three prisoners were all that were left of the Germans."

"How did you do it?" inquired a dazed Prussian officer, taken prisoner at Chateau Thierry by an American soldier. "We are storm troops."

"Storm eh!" said the American. "I come from Kansas, where we have cyclones."

That was and is the idea. This spirit enabled American soldiers to go wherever they wanted to go. A European officer on observation duty with the United States force at Chateau Thierry wanted to know how our soldiers got through as they did.

"They seem to have been trained somewhere," he said, "for they fight all right. But that doesn't explain to me the way they keep going."

The American officer with whom he was talking gave this explanation:

"They were thoroughly trained in our camps at home in all but one thing. They were not trained to stop going."

It was a splendid exhibition, the first of many of its kind.

A PERSONAL ACCOUNT

The following is one of hundreds of thrilling experience stories that could be told by officers and men who fought at that front.

Details of the participation of the United States Marines in the counter-attack of the allies against German forces on the Marne, July 18, are given in a letter written shortly afterward by Major Robert L. Denig, of the United States Marines, to his wife, in Phila-

AMERICANS AT CHATEAU THIERRY

delphia, and which had been forwarded to Washington for the historical files of the Marine Corps.

It is the best and truest form of war history, and important in that it gives details of action during those July days when American troops stopped the German drive.

It also establishes the fact that the Marines who helped stop the German drive on Paris at Belleau wood early in June were honored by being brought from this wood to Vierzy and Tigny, near Soissons, for participation with a crack French division in the great counter-attack which started the disintegration of the German front in the west.

Names that became familiar through the fighting in Belleau wood are mentioned in Major Denig's letter as being prominent in the allied counter-attack—Lieut. Col. Thomas Holcomb, Lieut. Col. Benton W. Sibley, Lieut. Col. John A. Hughes, Capt. Pere Wilmer and others who took a prominent part in the fighting. The letter in substance follows:

"We took our positions at various places to wait for camions that were to take us somewhere in France, when or for what purpose we did not know. Our turn to enbus came near midnight.

GETTING TO THE FRONT UNDER DIFFICULTIES

"We at last got under way after a few big 'sea bags' had hit near by. We went at a good clip and nearly got ditched in a couple of new shell holes. Shells were falling fast by now and as the tenth truck went under the bridge a big one landed near with a crash and wounded the two drivers, killed two Marines and wounded five more.

"We did not know it at the time and did not notice anything wrong till we came to a crossroad, when we found we had only eleven ears all told. We found the rest of the convoy after a hunt, but even then were not told of the loss, and did not find it out till the next day.

"After twelve hours' ride we were dumped in a big field, and after a few hours' rest started our march. It was hot as hades and we had had nothing to eat since the day before. We at last entered a forest; troops seemed to converge on it from all points. We marched some six miles in the forest. A finer one I have never seen—deer would scamper ahead and we could have eaten one raw.

"At 10 that night, without food, we lay down in a pouring rain to sleep. Troops of all kinds passed us in the night—a shadowy stream, more than a half-million men. Some French officers told us that they had never seen such concentration since Verdun, if then.

THE BIG DAY DAWNS

"The next day, July 18, we marched ahead through a jam of troops, trucks, etc., and came at last to a ration dump, where we fell to and ate our heads off for the first time in nearly two days. When

AMERICANS AT CHATEAU THIERRY

we left there the men had bread stuck on their bayonets. I lugged a ham. All were loaded down.

"We finally stopped at the far end of the forest, nearing a dressing station. This station had been a big, fine stone farmhouse, but was now a complete ruin—wounded and dead lay all about. Joe Murray came by with his head all done up—his helmet had saved him. The lines had gone on ahead, so we were quite safe.

"Late in the afternoon we advanced again. Our route lay over an open field covered with dead.

"We lay down on a hillside for the night near some captured German guns, and until dark I watched the cavalry, some 4,000, come up and take positions.

"At 3:30 the next morning the regiment was soon under way to attack. We picked our way under cover of a gas infected valley to a town where we got our final instructions and left our packs.

GAS AND SHELL SHOCK

"We formed up in a sunken road on two sides of a valley that was perpendicular to the enemy's front. We now began to get a few wounded; one man with ashen face came charging to the rear with shell shock. He shook all over, foamed at the mouth, could not speak. I put him under a tent and he acted as if he had a fit.

MARINES ADVANCE UNDER FIRE

"At 8:30 we jumped off with a line of tanks in the lead. For two 'kilos' the four lines of Marines were as straight as a die, and their advance over the open plain in the bright sunlight was a picture I shall never forget. The fire got hotter and hotter, men fell, bullets sung, shells whizzed-banged and the dust of battle got thick.

"Lieut. Overton was hit by a big piece of shell and fell. Afterwards I heard he was hit in the heart. He was buried that night and the pin found, which he had asked to have sent to his wife.

"A man near me was cut in two. Others when hit would stand, it seemed, an hour, then fall in a heap. I yelled to Wilmer that each gun in the barrage worked from right to left, then a rabbit ran ahead and I watched him, wondering if he would get hit. Good rabbit—it took my mind off the carnage.

"About sixty Germans jumped up out of a trench and tried to surrender, but their machine guns opened up, we fired back, they ran and our left company after them. That made a gap that had to be filled, so Sibley advanced one of his to do the job, then a shell lit in a machine gun crew of ours and cleaned it out completely.

DIGGING IN

"At 10:30 we dug in—the attack just died out. I found a hole or old trench and when I was flat on my back I got some protection.

AMERICANS AT CHATEAU THIERRY

Holecomb was next me; Wilmer some way off. We then tried to get reports. Two companies we never could get in touch with. Lloyd came in and reported he was holding some trenches near a mill with six men.

"Cates, with his trousers blown off, said he had sixteen men of various companies; another officer on the right reported he had and could see some forty men, all told. That, with the headquarters, was all we could find out about the battalion of nearly 800. Of the twenty company officers who went in, three came out, and one, Cates, was slightly wounded.

THE SHELLS COME FAST

"From then on to about 8 p. m. life was a chance and mighty uncomfortable. It was hot as a furnace, no water, and they had our range to a 'T.' Three men lying in a shallow trench near me were blown to bits.

"You could hear men calling for help in the wheat fields. Their cries would get weaker and weaker and die out. The German planes were thick in the air; they were in groups of from three to twenty. They would look us over and then we would get a pounding.

"We had a machine gun officer with us, and at 6 o'clock a runner came up and reported that Sumner was killed. He commanded the machine gun company with us. He was hit early in the fight, by a bullet, I hear. At the start he remarked: 'This looks easy; they do not seem to have much art.'

"Well, we just lay there all through the hot afternoon.

"It was great—a shell would land near by and you would bounce in your hole.

"As twilight came we sent out water parties for the relief of the wounded. At 9 o'clock we got a message congratulating us, and saying the Algerians would take us over at midnight. We then began to collect our wounded. Some had been evacuated during the day, but at that, we soon had about twenty on the field near us.

"A man who had been blinded wanted me to hold his hand. Another, wounded in the back, wanted his head patted; and so it went; one man got up on his hands and knees; I asked him what he wanted. He said: 'Look at the full moon,' then fell dead. I had him buried, and all the rest I could find.

"The Algerians came up at midnight and we pushed out. They went over at daybreak and got all shot up. We made the relief under German flares and the light from a burning town.

"We went out as we came, through the gulley and town, the latter by now all in ruins. The place was full of gas. We pushed on to the forest and fell down in our tracks and slept all day.

AMERICANS AT CHATEAU THIERRY

A FUNERAL AT THE FRONT

"That night the Germans shelled us and got three killed and seventeen wounded. We move a bit farther back to the cross road and after burying a few Germans, some of whom showed signs of having been wounded before, we settled down to a short stay.

"It looked like rain, and so Wilmer and I went to an old dressing station to salvage some cover. We were about to go when we stopped to look at a new grave. A rude cross made of two slats from a box had written on it:

"Lester S. Wass, Captain U. S. Marines. July 18, 1918."

"The old crowd at St. Nazaire and Bordeaux—Wass and Sumner killed, Baston and Capt. LeRoy T. Hunt wounded. We then moved further to the rear and camped for the night. Dunlap came to look us over. A carrier pigeon perched on a tree with a message. We decided to shoot him. It was then quite dark, so the shot missed. I then heard the following remarks as I tried to sleep: 'Hell! he only turned around!' 'Send up a flare!' 'Call for a barrage!' etc.

"The next day we were back in a town for some rest and to lick our wounds."

IMPRESSION OF A FRENCH LIEUTENANT

A French lieutenant thus describes the American fighting quality:

"The finest thing in the combat was the dash of the Americans. It was splendid to see those grand fellows, with their tunics thrown off and their shirt sleeves rolled up above their elbows, wading the rivers with the water to their shoulders and throwing themselves on the Boche like bulldogs.

"Any one who has seen such a sight knows what the American army is good for henceforth and to the end of the war. At the sight of these men, magnificent in their youth, physical force, good temper and dash, the Germans fled 'with every leg' or surrendered without awaiting the order to throw away their arms and take off their suspenders, which is the first thing a prisoner is told to do, in order that he may be compelled to keep his hands employed and out of mischief.

"The Germans hurried toward our lines gripping their trousers, haggard and mad with terror.

"Would that every mother in France who has lost a son in the war could have seen that epic sight. They would have seen themselves revenged, and it would have been some consolation to them in their sorrow."

KEEPING THE GERMANS ON THE RUN

The trench deadlock in northern France and Belgium was broken by Ludendorff's fatuous drive in March, 1918. After the allies had stopped it and inaugurated their counter-offensive all Europe made a

AMERICANS AT CHATEAU THIERRY

startling discovery. The Germans were tenacious enough in trench warfare; in open fighting, known as war of manoeuvre, they could not stand before American and the allied troops. Incessant attacks, rapidly delivered at the same time at many points on the long line between the North Sea and the Swiss border, were more than they could withstand. The mechanically trained troops of the central empires were futile before armies of men who did their own thinking and delighted in fighting an enemy they could see from the feet up. German armies had twice been almost at the gates of Paris. The first time they were driven back they dug themselves in. That was in 1915. The second time, in the spring of 1918, they were allowed no time for digging in. From the July days of 1918, when American soldiers at Chateau Thierry beat the best troops that ever were trained in Prussia, they were kept going. How industriously may be inferred from the story of the young corporal who was sitting on the roadside trying to tie the soles of his shoes to the uppers, in a hurry. Somebody asked him what was the matter.

"O, nothing much," said he. "Only I came over here to kill Germans, but they never told me I'd have to run 'em to death."

A STRANGER TO HIS OWN CHILD

There never was a war so prolific of personal incident in every shade of experience possible to human life. The devastated provinces of France offer perhaps more of these happenings than any other part of the steel-swept, shell-wrecked fronts of all Europe. An Associated Press correspondent tells one that is especially touching.

He was motoring toward Denaen, one of the cities the Germans had occupied through four hard years, when a French officer going in the same direction asked him for a lift, explaining that he had lived there but had neither seen nor heard from his wife during all that time.

Entering the city and turning into his street the officer saw the first house was in ruins. He gave a nervous start. A few doors farther on was his home. The officer climbed out with an effort, his eyes fixed on the place.

There was no sign of life. The windows were shuttered and on the door was a sign showing German officers had been living there. The officer pulled the bell with shaking hand. No one answered. He backed away like a man in a trance and leaned against the car, trembling.

Suddenly the door opened and an aged servant appeared, leading a beautiful baby girl with a wealth of golden curls. The officer took one step toward the child and halted. He was a stranger to his own flesh and blood. The child hid behind the nurse, peering out in fright.

The half blind eyes of the old nurse had recognized her master

AMERICANS AT CHATEAU THIERRY

and she held out her hands, repeating, "Monsieur! Monsieur!" in ecstasy. He crossed the road and grasped her hands, but the baby drew back.

A door opened and a comely young matron came to see what was going on. She caught sight of her husband, then stopped. Her hands flew to her breast. She swayed for a second. With a sob of joy she hurled herself into his arms.

The correspondent moved away. And thus they were left, the nurse beaming on the happy couple and the curly headed youngster looking with troubled eyes at this strong man who had appropriated her mother so completely without a word.

WHAT PERSHING THOUGHT OF HIS YANKS

An American newspaper man who returned from Europe about the time hostilities ceased was informed that General Pershing suggested to Marshal Foch in June 1918, that he thought it bad policy to stick around waiting for the boche and that he felt the time had come to jump in and attack—"But" he was told, "we have not got the troops."

"Whats the matter with the Americans?" Pershing asked.

"They are not yet trained" was Foch's reply.

"Try them and see" said General Pershing. "They will go, anywhere you send them, and I will bet my life on it."

Pershing took the initiative in urging the offensive, supplied the troops that gave Foch his mobile reserve enabling him to strike his blow, and those American troops "delivered the goods."

HEALTH OF ARMY SURPRISING

Official reports to the war department show that the general health of the American army during the war had been surprisingly good. The death rate for all forces at home and abroad up to August 30th, 1918, was 5.9 per 1,000 men per year, or little more than the civilian death rate for men of the same age groups.

There were 316,000 cases of influenza among the troops in the United States during the late summer and fall of 1918 and of 20,500 deaths, between September 14th and November 8th, 19,800 were ascribed to the epidemic.

ARMY REACHED TOTAL OF 3,664,000

An official report shows that on the day the Armistice was signed more than twenty-five per cent of the male population of the United States between the ages of 19 and 31 years, were in military service, the army having reached a total of 3,664,000, with more than 2,000,000 of this number in Europe. As compared with an army strength of 189,674 in March 1917, one week before war was declared by the United States.

CHAPTER IV.

AMERICAN VICTORY AT ST. MIHIEL

First Major Action by All American Army—Stories to Folks at Home—Huns Carry Off Captive Women—Hell Has Cut Loose—Major Tells His Story—Enormous Numbers of Guns and Tanks—Over the Top at 5:30 A. M.—Texas and Oklahoma Troops Fight in True Ranger Style—Our Colored Boys Win Credit.

The first major action by an all American army was that which began before the St. Mihiel salient September 11, 1918. The Germans had occupied that salient almost four years, and had built it into what they believed to be an impregnable position. The Americans, under direct command of General Pershing, reduced it in a three days' advance.

The salient was a huge bulge, almost twenty miles in depth, turning southwest from Combres at the north base and Hattonville at the south and looping down around the towns of St. Mihiel and Ailly. It was powerfully held by masses of enemy troops.

General Pershing's army attacked from the west, south and east all the way from Bonzee to Norroy, and by September 13th had pushed it back to a straight line drawn from Combres to Hattonville. The French attacked at Ailly, the apex of the salient as it was on September 11.

The entire operation was conducted with rapidity and with irresistible energy. The dash and enthusiasm of the American soldiers astonished and delighted the French and British as completely as it staggered the Germans.

By September 13th the Americans had taken forty-seven towns and villages, reduced the German front from forty miles to twenty, captured the railway that connects Verdun with Commercy, opened the cities of Nancy and Toul to the allies, and with the French and British on the east, created a new battle front on a line running from Hattonville on the west to Pagny on the east—Pagny being a town on the Moselle river, at the German border.

The importance of this victory could hardly be overestimated. It opened the way to and was followed up by the demolition of the whole German line from the Swiss border to the North Sea, and hastened the great German retreat. In the action itself, September 11 to 13, about 15,000 Germans were taken prisoner by the Americans.

STORIES TO THE FOLKS BACK HOME

Sidelight stories of what happened in the St. Mihiel fight, mostly in letters written home by men who were in it, go far toward showing

AMERICAN VICTORY AT ST. MIHIEL

how completely the Germans were taken off their guard. Corp. Ray Fick of the 103d Infantry wrote home in this wise:

"We got into the woods and then kept on going until we reached a big city where there was a brewery, but they had set fire to the whole city before they left. We got some beer and wine just the same. It was a little stale, but it was fine. The Huns' warehouses were all fixed for the winter and the boys got cigars and cigarettes, but I was a little too late to get in on it.

"The whole thing was very interesting all the way through. The Huns sure did make themselves scarce in a hurry, but they kept many prisoners, a troop train and an ammunition train.

"Cigarettes are scarce and we look for smokes all the time. The Red Cross and the Salvation Army are the ones who look to our comforts. If any one wants to give, tell them the Red Cross and the Salvation Army are the ones to get it."

HUNS CARRY OFF CAPTIVE WOMEN

But Corporal Fick uncovers another Hun procedure that has no fun in it. While the Huns lost no time in getting away from there, they took care to carry off their captured women slaves.

"The women they have held captives for the last four years," he writes, "were driven ahead of them, but they were brought back by the Americans. Truckload after truckload passed us on the way, and they sure were happy to be free again."

"HELL HAS CUT LOOSE"

Another soldier wrote to his father telling about the first day of attack as he saw it:

"Hell has let loose. The woods are a mass of whistling shell and shrapnel. Every time the big twelves go off the flash lights up the entire camp like a flashlight picture, then the ground heaves and tumbles like old Lake Michigan does on a stormy day.

"The infantry have cleared the top and have gone on far in advance, almost outside of the range of fire. Our big objective has been wiped off the map and our men are preparing to keep right on going after them and backing up the doughboys who are doing such great work.

"I went up to the front last night on an ammunition caisson (which is the only way to get up there) and saw the thing commence. It started with one solitary gun of ours (a big one, too). Then the others joined in on the chorus, and it has been steady ever since.

"When the doughboys were told that they were going over the top at the zero hour, you never heard shouting to equal it; the Board of Trade on a Monday morning was just a whisper in comparison.

"Dad, that is the general feeling of our boys over here—always

AMERICAN VICTORY AT ST. MIHIEL

waiting to move up. I told a lad in one of the outfits that the artillery was right back of them and would blow them through to the objective if they did not make it, and he laughed and said, 'Hoboken by Christmas.' They were all in the best of mood and roaring to go."

These letters are good specimens of the thousands that have come over the sea. They not only give good sidelights on an event that will loom large in history, but they show the indomitable cheer and high spirit of our soldiers.

MAJOR TELLS HIS STORY

Concurrently with the action that originated at St. Mihiel on September 11, 1918, another great battle developed northwest of Verdun. It lasted about three weeks, and is graphically described by Lt. Col. B. M. Chipperfield (then a major) of the 23d Division. Lt. Col. Chipperfield was a participant in as well as an eyewitness of the whole engagement. Under date of September 29, 1918, he described it substantially as follows, in a letter to a friend at home:

"For several days preparations had been in progress for the action that began on Thursday, September 26th. The American troops were moved up by night, jamming the roads with their advancing columns and transport trains.

"Thousands and thousands of them," wrote Major Chipperfield, "trudged along without a light and in almost quiet.

ENORMOUS NUMBERS OF GUNS

"Tanks and cannon and guns of all sorts, every kind of vehicle, ambulance wagon, and transport passed in this continuous procession. It seemed that there was no end to it, and one could not help but admire the wonderful resources that had been gathered together by the United States to help perform its part in this great struggle for freedom.

"I think the greatest collection of guns that has ever been gathered together for participation in any conflict of the world was taken to the front where the attack was about to be made. It is estimated there were 6,000 of these guns, and the soldiers that were gathered together numbered hundreds of thousands.

"These guns and soldiers were conducted to their places so secretly and quietly that, although they marched many miles, the enemy did not even know a small part of the strength and could only speculate what it all meant.

UNDER ENFILADING FIRE

"In the arrangement of the plan of battle our division was on the extreme right. Across the river was a German stronghold. Here there were located a large quantity of artillery and many machine

AMERICAN VICTORY AT ST. MIHIEL

guns. Our officers understood that it was going to be a difficult advance, for a bridge had to be built across a creek, but everything in our division went like clockwork. It had all been planned in advance, and the plan was carried out exactly as made.

"It was arranged that at 11:30 o'clock on Thursday night the battle was to begin. Before that time I had reached my destination at the headquarters of the other division, and together with the rest of the headquarters staff we were in a favorable place to watch the commencement.

"At 11:25 it was silent as the grave, and the night was beautiful. Precisely at 11:30 from every conceivable direction the great bombardment commenced. In an instant the whole night was filled with a roar and thunder and reverberation of the cannon from every quarter. The shriek and whistle and whine and clamor of the shells made a fearful chorus as they were hurled in the direction of the field occupied by our adversaries.

"From every quarter came the flash of the explosions, until the night was lighted as bright as day. Signal rockets rose from every portion and part of our lines and also from the enemy lines. It looked as though the heavens were ablaze and raining fire. It was a scene which has probably never been seen before upon any battlefield and may never be witnessed again.

"Apparently this fierce bombardment took the enemy entirely by surprise because our fire was so deadly and the extent so great that they could only make uncertain reply. They seemed to be stupefied.

"For six hours this terrific bombardment continued. It is estimated that each of the guns fired an average of three shots a minute and that 1,000,000 projectiles and charges of ammunition were used.

OVER THE TOP AT 5:30 A. M.

"As 5:30 approached the bombardment increased. The machine guns joined in the chorus and a curtain of steel and fire was placed in front of our troops and rained upon the guns and cannon of the enemy.

"After a brief period of this fire our men started over the top, and as they did so they swept the enemy before them in their irresistible rush. They advanced kilometer after kilometer. They could not be resisted or stayed at any stage of the attack.

"Soon the prisoners commenced to come in, and they told of the terrific effect that the great bombardment had upon the Germans. They said the bombardment was so terrible that it disrupted their plans so that they could not be carried out and that they could not resist the attack.

"Several times during the night I went out to witness the scene and as long as life lasts it will be remembered.

AMERICAN VICTORY AT ST. MIHIEL

ON DEAD MAN'S HILL

"Once when two of our regiments came over a hill and saw the valley that lay before them being terrifically shelled by the cannon and assailed by hail from the machine guns, the whole column was seen to pause and a look of worry came over the faces of these men that for just an instant was pitiful. They knew that ahead of them lay death for many and it is not strange that for several seconds the lines were held up, but then a look of fierce determination and of courage took the place of the former expression and with a great resolve and courage, dash, and daring, the lines shot forward at a redoubled step and the determination to do or die was manifested in every action.

"These machine guns were speedily put out of business, and then the attack would go on. That portion of the lines that the division of which I am a member was given for the purpose of the attack, it was thought would take the entire day, but our division was on its objective by early afternoon and had commenced to dig in, from which position they could defy the Germans with impunity.

"While the attack was going on I went up to Dead Man's Hill. This hill is the last word in the destructiveness of war.

"It is literally rent to atoms. Dugouts have been blown to pieces. Hundreds of thousands of men had been killed in the earlier battles before Verdun, and many of the bodies could not be reached for burial, the place was so torn up."

OTHER PERSONAL GLIMPSES

Many other personal glimpses of the fighting come from officers and men. One division was made up largely of Illinois regiments, among others the 3d Illinois Infantry, commanded by Col. John V. Clinnin. The position held by these troops was vital to the entire advance, and it required rapid action on the first day to reach the objective at the same time as the other units.

Menomme creek is a little stream which is not shown on maps. It runs eastward from the village of Septsarges to the Meuse. The stream holds vivid memories for the Illinois infantry. It was there that it met the most severe resistance, the Germans catching our men just as they were relieving other young soldiers. The men fought their way down to the creek. On the other side along the highway between Septsarge and Dannevoux the Germans had entrenched themselves and were shelling the road which the Americans had crossed. They were also using intrenched machine guns at the edge of the woods.

"I heard bullets whistling overhead," said a wounded soldier in a hospital. "We were lying near the edge of the creek at the time

AMERICAN VICTORY AT ST. MIHIEL

and knew that a machine gun was shooting at us, so I just started out and got it."

"Our colonel was right up there with us getting into line," said Private Hiram E. Burnett. "One night when the shells were bursting all around and several men were wounded the colonel went over the top just like any of us."

The Bois des Forges has been a battle ground since the war began, with trenches in front and miles of barbed wire, machine gun nests and concrete pillboxes inside. A frontal attack on such a stronghold apparently meant suicide, but the Illinois men, led by Col. Sanborn and Col. Abel Davis, took it so neatly and quickly that they bagged nearly 1,000 soldiers, fifteen officers, twenty-six guns ranging from 105s down, 126 machine guns, twenty-one flatcars, two rolling kitchens, and an ambulance and thousands of rounds of ammunition.

"We were looking for you in front," said a captured German officer. "We did not expect that you would come through the swamp and outflank us. We did not think that any Yankee outfit was so foxy."

"A GREAT SHOW"

"It was a great show when we crossed that river and rushed on through the woods, cleaning up machine gun nests," said Private Gray McKindy of Woodstock. "The machine guns in the woods started throwing bullets as soon as we reached the river. They thought they could stop us from going up the opposite hill, but we did it and got every gun there."

Private Kenneth W. Steiger was one of those who went in on the second night when his captain called for volunteers to make up a patrol. Steiger became separated from the others in the darkness and ran into a party of three Germans. Quickly covering them with his rifle he brought all three back.

Private Bernard Snyder returned with prisoners before dark on the first day. Making use of his ability to speak German, he induced a dozen Germans to lay down their arms, pick up stretchers and carry American wounded back five kilometers (three miles) to where ambulances were waiting.

A FIGHTING CHAPLAIN

Lieut. Jorgen R. Enger, the chaplain of a Kansas-Missouri outfit, carried the wounded for three days from the Montfaucon woods two miles to the ambulance. Searching in the woods in the darkness one night with shells bursting and bullets whistling he found a husky sergeant wounded in the foot and growing weaker and weaker from loss of blood. The chaplain shouldered the man and carried him back to a dressing station, saving his life.

"I didn't think a chaplain would do a thing like that," said the

AMERICAN VICTORY AT ST. MIHIEL

sergeant. "I would rather save you than save a general," replied the chaplain.

When not searching for wounded hidden in the tangle of underbrush the chaplain was busy helping the surgeons at a first aid dressing station.

"I never thought any clergyman would have the opportunities for doing good such as I am having," he said when I saw him.

Col. Eugene Houghton, Wisconsin, who was a British major until America entered the war, distinguished himself by personally leading a unit of New York men. According to them he escaped death repeatedly as by a miracle.

"DESERT? NO, WANTED TO FIGHT"

Capt. Carl F. Laurer while assisting in the examination of German prisoners, was surprised when an American prisoner was brought before him. "Where do you belong?" asked the captain. "I am with an aerial squadron in the south of France" replied the prisoner. "I walked fourteen days to get here." "Did you desert?" asked Captain Laurer. "No," the man replied, "I want to fight. That is what I came to France for. When I get home the folks will ask what I did in the war and when I answer 'worked' they will say 'Why the devil didn't you fight?'" The boy's wish was gratified and he was sent forward.

"We have everything good and plenty—rations, ammunition and other things. It looks like a regular Sunday."

TEXAS AND OKLAHOMA TROOPS SHOW GREAT FIGHTING FORM

In this district, the 36th Division, made up of troops from Texas and Oklahoma, veterans and raw recruits together, showed splendid fighting form. They were under terrific shell fire day after day, but they met several murderous attacks firmly, and drove the boches back in brilliant counter attack, chasing them in true Ranger style. All these men showed the same spirit that animated Roosevelt's renowned Rough Riders in the war with Spain, so many of whom were Texas and Oklahoma men.

Reporting this fight, General Naulin, commanding the Corps of which the 2d and 36th Divisions were parts, said "the 36th Division, a recent formation not yet completely organized, was ordered into line on the night of October 6-7 to relieve, under conditions particularly delicate, the 2d Division, and to dislodge the enemy from the crest north of St. Etienne and throw him back to the Aisne. Although being under fire for the first time, the young soldiers of Maj. Gen. W. R. Smith, rivaling in combative spirit and tenacity the old and valiant regiment of General LeJeune, accomplished all the tasks set for them."

AMERICAN VICTORY AT ST. MIHIEL

Every American knows full well the bright record of the 2d Division of Infantry, the regulars of which were composed of the 5th and 6th Marines and the 9th and 23rd Infantry. These are the boys who stopped the Germans up in Belleau Wood when the boches were headed for Paris and cocksure of getting there, blandly unaware that they were goose-stepping toward an American knock-out.

OUR COLORED TROOPS WIN CREDIT

American negro troops had a considerable share in the last few months of fighting, and acquitted themselves in a highly creditable manner. They were great trench diggers and trench fighters, and their endurance on the march was a marvel to the allied armies. They were very popular with the French people, who were delighted with their good nature and their never-ceasing songs. Regular negro melodies these songs were, nearly all of them of the camp-meeting variety—and sung with that choral beauty which especially distinguishes all of their musical performances. The negro notion of war and indifference to death was instanced in the case where a white officer overheard one of them at the zero hour call out, "Good night, ol' world!"

"The colored boys," said Charles N. Wheeler, a distinguished correspondent with the American armies, "are great fighters, and are no better and no worse than any other group of American soldiers in France, whatever the blood strain. They do take pardonable pride in the fact that 'Mistah' Johnson, a colored boy, was the first American soldier in France to be decorated for extraordinary bravery under fire.

THEY CAN FIGHT AND SING

"The color line has about died out in the American army—in France. They play together, sing their songs together—the blacks and the white—and they go over the top together. They come back together, too, the wounded, and there is no thought of the color of a man's skin. They mix together on the convoy trains going up to the front, and all sing together, sharing each other's dangers and their joys. It is not an uncommon sight to see a crowd of white doughboys around a piano in some 'Y' or Red Cross hut, singing to beat the band, with a colored jass expert pounding the stuffing out of the piano. The white boys enjoy immensely the wit of the colored comrades, and many a bleak and drab day of privation and suffering is made a bit brighter by the humor that comes spontaneously to the lips of the 'bronze boys.'

"The children of France love them. I suppose that is because they wear American soldiers' uniforms. I have seen scores of white children holding the hands of colored boys and trudging along on the march with them or romping into their tents and sitting on their knees and just exuding the affection that all the children of France have for anything and everybody from the United States."

THE WAR IN THE AIR

AIR CRAFT

The Hughes report on air craft, submitted in October, 1918, contained a full account of the difficulties, drawbacks and questionable management that had held back the manufacture and shipment of airplanes to Europe. In September there were on the French-Belgian front between 300 and 400 machines, all of which were in the scout and observation classes, with no regulation combat planes of American build; but American airmen had conducted many successful actions against German battle planes, and a good many Americans were operating French and British battle planes in action back of the German lines. The combined American, British, French and Canadian planes had before that time cleared the air of German observation and other machines in front of the allied lines, thereby preventing hostile observation of allied camps and artillery positions and movements of troops preparatory to attack.

The efficiency of this combined air service is credited with having contributed in an important degree, first to retarding the movement of supplies from the enemy rear to the enemy fighting line, and next to disturbance of the enemy in retreat. The Americans especially distinguished themselves by flying at high speed along the last of the enemy trenches and clearing up the German troops therein by continuous streams of machine gun fire. American flyers also made successful raids across the German border, blowing up munitions works, railway centers, and German troops at concentration points. Between early September and late October, 1918, they dropped thousands of tons of high explosives inside of Germany. At the same time, in association with British and Canadian aviators, they put a definite end to German air raids upon the British Isles and interior France. The Canadian air service during the summer and early autumn of 1918 increased at the rate of 300 planes per month, all manufactured in Canada.

LIBERTY MOTORS AND AIR SERVICE

After July, 1918, the output of Liberty motors for the Government caught up with the immediate demand. It increased until in October it reached a rate of about 5,000 a month. The Ford factory at Detroit alone reported at the end of October an established monthly rate of increase of over 1,500.

AMERICAN FLYERS DOWN 473 PLANES IN TWO MONTHS

Except for Sunday and one or two other days, the American aviators had unfavorable flying weather during the week previous to the signing of the armistice.

American flyers made a great record in the closing days of war. In the period from September 12 to 11:00 o'clock on the morning of November 11, American aviators claim they brought down 473

THE WAR IN THE AIR

German machines, making a grand total of 845 enemy planes. Day bombing groups from the time they began operations dropped a total of 116,818 kilograms of bombs within the German lines.

THE WAR IN THE AIR

Aviation is the most perilous of all services, calling for young bodies, high spirit, quick wit, personal initiative, and unshakable nerve. Thus it has drawn in the best and brightest of America's sons—brilliant, clear-eyed, steady youths, who take the air and its perils with joyous ardor.

The danger, the romance, the thrill of air fighting, are things that never were known in war until this one called into being vast aerial navies that grappled in the sky and rained upon the earth below "a ghastly dew" of blood.

There are no tales of this war more fascinating than those that have been told by these men. Courage and modesty being inseparable, our aviators avoid print and cannot be interviewed with any satisfaction. But sometimes they write home to a mother, a sweetheart or a pal, and these letters now and then come to light.

CHANCE OF LIVING NOW

"I cannot describe my feelings, right off the bat," said Eddie Rickenbacker, the ace of American aces, the day following the signing of the armistice. "But I can say I feel ninety-nine per cent better. There is a chance of living now and the gang is glad." Rickenbacker became a captain during the last phase of the war and has twenty-six victories over enemy airmen to his credit. To Rickenbacker, whose home is in Columbus, Ohio, the allied command gave the honor of making the last flight over the German front and firing the last shot from the air on the morning of November 11, 1918.

AIR PLANE'S TAIL SHOT OFF

In reporting this most remarkable occurrence Edward Price Bell, an American correspondent, wrote as follows from the front:

A British observer, flying a powerful machine at 16,000 feet over Ostend, had the machine's tail shot off by the direct hit of a shell—a very unusual occurrence. The machine turned upside down, out of control, and the pilot was thrown out of his seat. By some inexplicable maneuver he managed to clamber on to the bottom of the fuselage of the machine, astride of which he sat as if he was riding a horse.

Though the machine was out of control, owing to the loss of its tail planes, yet by moving forward and backward he so managed to balance it that it glided fairly steadily downward, although upside down.

He successfully brought it across the German lines, and came

THE WAR IN THE AIR

safely to within a few hundred feet of the ground. Then he crashed and was injured, but is now recovering in a hospital.

When it is considered that this incident occurred at a height of 16,000 feet, over hostile territory, and that during the airman's terribly precarious ride he was subject to antiaircraft fire, and liable to the attack of hostile scouts, it is not too much to say that his was a record achievement.

Recently, another airman was shot down, out of control, from 13,000 feet, and fell fluttering like a leaf, toward the ground. At a height of 9,000 feet he fainted. Shortly afterward he came to and found himself in the machine upside down, in a marsh, absolutely unhurt. Many airmen, of course, have been through several "crashes" without sustaining so much as a broken collar bone.

JOINS THE SKY FIGHTERS

This story of Lieut. Manderson Lehr, who refused a transfer home and shortly after died in combat, is taken (by permission) from his personal letters written to a friend in this country. It is typical of many that might be told by or about brilliant young Americans who would not wait for America's participation in the war, but went voluntarily, with high hearts and eager hands, to help those other boys of France and the British Empire to whom had fallen so large and so momentous a part in the world's salvation.

Nearly all of these American lads, the choicest spirits of our nation, took up whatever work they could find—anything, so long as it was useful, or contributed in any way to winning out against the German hordes, or stem the flood of German crime that was sweeping over Europe, that would later, if it were not stopped, cover our continent with an inundation of blood and desolation. Most of them, like Lieutenant Lehr, went into ambulance service; and afterward when the air planes were ready and needed men to fly them, took to the air. These were the men who "put out the eyes" of the German armies and piloted the allies to many a victory. And alas! Many of them, like Lehr, gave up their lives—though not in vain, nor without having sent down to crashing death, each one, his share of the flyers of the foe.

LEHR'S STORY

Lieutenant Lehr's story begins with a letter from France just after his arrival in Paris on May 15, 1917, when he joined the Ambulance Corps—later entering the air service. It covered a period of more than a year's experiences at the front.

The last letter from Lieut. Lehr was dated June 14th, 1918, when the big German drive was about at its climax. According to news

THE WAR IN THE AIR

reports from the front Lehr had a period of intense activity up to July 15th, when he was reported missing. "Bud" was regarded as one of the most adept of American fliers.

One of the last news reports from the front told of him still flying under French colors and having twice returned from raids with his passenger killed by enemy attacks and of his being awarded the war cross. The same report told of a 150 mile raid into Germany with eight other French Machines—when a patrol of twelve German planes were attacked and three of them sent down in flames, while all the nine French machines returned safely.

The following are a few of Lehr's later letters from the front:

FLYING AT THE FRONT

Sector — at the Front, Oct. 12, 1917.—It's blowing terrifically, wind and rain. You can't imagine how I picture you people at home, warm, happy and safe. I've been out here a week now. Three days of it has been flying weather. Up 25,000 feet and ten miles into Germany is my record so far and I've actually had one combat with a boche. He was below me, at first, far in the distance. I was supposed to be protecting a bombing expedition of ten machines. I saw this spot, started away from the rest and through excitement, anticipation and the goodness knows what, I climbed, went faster and faster until I had the sun between us and the German below me. Then I dived; he heard me and "banked"; we both looped and then came head on, firing incessantly.

My machine gun was empty and the boche had more, for he got in behind me and "Putt! Putt! Putt!" past my ear he came, so I dove, went into a "vrille" with him on top, came out and squared off, and he let me have it again. All I could do was to maneuver, for I had no shells left and I did not want to beat it, so I stuck. We both came head on again and I said a little prayer, but the next time I looked Mr. Boche was going home. I "peaked" straight down, made my escadrille, accompanied them home and when I got out of my furs I was wringing wet in spite of the fact it was cold as ice where I had done my fighting.

CONSIDERS HIS OWN TACTICS

I looked my machine over and found five holes in it, but nothing serious. Tomorrow is going to be bad and no one will fly unless they call for volunteers, and then I think most of us will go. I'd like to figure out what I did wrong. First of all, I was so excited that I fired all my shots at the German and he maneuvered out of my way and then came at me as I was helpless. My captain gave me "harkey" for staying when out of bullets, so I guess the rest was O. K., but I'd hate to run from any boche.

THE WAR IN THE AIR

MEN DIE IN FAULTY PLANES

The machine I've been flying has been condemned, so I expect to be sent back to get another one, a brand new one that has never been on the front. Twenty-five pilots in the last month have been killed by wings dropping off. I've seen twelve go and it surely takes the old pep out of you. I was above one and saw his wing crumple, then fall. A man is so utterly helpless he must merely sit there and wait to be killed, and when you're flying the same type of machine it doesn't help your confidence any. I was glad they condemned mine, for I've put my old "cuckoo" through some awful tests and it's about ready to fall apart.

We expect to change soon and go up to a new offensive in F—. If I get through that I'm going to change over to the American army. They have offered me a commission and I think I'll take it. My fingers are cramped and my feet have long since been numb. Now I'm going to wrap up in my fur leathers and go to bed. This is war.

FIGHTS WITH FLYING CIRCUS

Feb. 1, 1918.—Had a great time this last week, and made six long bombardments. For the first three times we had no trouble getting across whatsoever. Coming out the last three times we got some real competition. It was in the form of the flying circus or "tangoes," which consists of fifteen of the best pilots in Germany, commanded by Baron von Richthofen, who seems a good sort, for when you fight him and you both miss he waves and we wave back. We had been at it consistently for four days, and so they sent these birds down opposite us to stop us. We had been in Germany for some distance and had reached our objective and bombed it. There was a heavy fog below us, so I took a couple of turns to make sure we could see our objective. We dropped our bombs and then I turned to the right to see the damage. I had to take a large turn, for the "archies" were shooting pretty close. I looked for my escadrille, and saw these machines way off in the distance. I started for them and soon caught up with them. Then I swerved and dipped up to them, for I thought them a little strange. I got up closer, and, wow! all three dived at me like a rock and bullets flew by me, cutting my plane, so I pulled up at them, fired, swerved so my gunner could let them have it also and then saw the iron cross flash by, so I knew it was the Huns. I started getting altitude and went up high and then the boches got the sun between them and my plane and came again, but I thought this would happen and "peaked." They went under me and that left me on top, so I gave them about 120 bullets, and one went for home. The other two came by again and I went into a tight spiral so my gunner could pump at them—but nothing doing. They beat it home and so did I, for it had been three to one.

Above—Red Cross men tenderly caring for the wounded. The services of the American Red Cross were invaluable to the army in France and won the admiration of all the Allies.

Below—Wounded man making his way painfully back to the rear, with grim determination to keep going and all the grit of the typical American soldier. (Official Photos by Signal Corps, U. S. A.)

1. French Cuirassier being fed by Belgian woman. 2. Major Richardson of the British Army and two of his bloodhounds used to find wounded soldiers on Belgian battlefields. (*International News Service.*)

THE WAR IN THE AIR

When I landed I had five holes in my machine. One of the wires had been shot away and gave me some trouble in landing.

Feb. 10, 1918.—We have been pretty busy and had some exciting times. I almost got mine day before yesterday and feel pretty lucky to be here. We started out on a long trip into Germany and all the way over we had no trouble at all. After we bombed, my observer and I dived down on some villages and used our own guns on them. We got so low that the anti-aircraft guns were popping too close, so we beat it. We soon saw a bunch of hangars below us and we dived down on them and shot at them. In a few minutes a bunch of Huns came up from the hangars after us and we beat it to catch up with the others. We got up with them and looked behind us and there were a number of Germans sneaking down on us.

Then the battle commenced and for forty minutes we had a hot fight. We picked off (censored) of them and they went plunging down in flames. Then the others went back and we all returned safely, but I noticed that my machine worked queerly, and when I landed I had a hard time, and barely got to the ground without smashing to pieces.

I looked the machine over, and you should have seen it. From top to bottom it was one mass of holes. One bullet passed through my combination and hit a can of tobacco. Another cut a main spar on one of my wings, and another hit my stabilizer, tearing it half in two. One other hit my gas tank and put a hole clear through it. Luckily my gas was low and it did not explode, but, believe me, I was lucky.

IN THE BIG GERMAN DRIVE

April 20, 1918.—The orderly has just tapped on my window to put down my shade, which means the Gothas are on their way. The guns are starting. This attack has been frightful—day after day long lines of ambulances roll by our camp carrying large numbers of wounded. Tomorrow we shall continue our work of knocking down their batteries and bombing their railroads. To-night, now, they are trying to get us.

I started on a "permission" about three weeks ago and had beautiful visions of peace and content for a week, but was called back immediately at the beginning of this horrible attack. Things look bad, and in a few days we are moving farther up.

Our work here has been hard and exciting and always working in any kind of weather. While our loss has been heavy we have accomplished wonders. Going over on cloudy days when the heavy black clouds hang down to within fifty meters of the ground, spotting a group of trucks, a line of cars, or a battery of troops, then bombing them, shooting them up with your machine guns and shooting back up into the clouds midst a rain of luminous machine gun bullets

THE WAR IN THE AIR

from the ground is interesting work. But the terror of those on the ground, poor devils! Yet it's got to be brought home. Out of twenty-four trips we lost eight machines. Poor Chuck Kerwood was among them. Chuck is an American boy from Philadelphia, and he has been with us for five months.

I had a chance to go back to the states as an instructor, and almost took it, but when the time came around to leave this band of men who have been in it for almost four years, I couldn't do it. They are men, and have pulled me out of tight holes when I was green at this game, and they did it at the risk of their lives. Now I've seen them drop off one at a time, fine young Frenchmen, and I guess the least I can do is to stay right by them and I feel my work is here.

In Hospital, May 3, 1918.—Well, here I am at last, but I fooled them for six months. Finally one slipped up behind me. I never saw him, but felt him. Only got it in the leg, so it isn't very serious, except that the bullet was incendiary. They have oodles of sulphur on them and I'm afraid of complications. This is a nice hospital in a nice location; only thing that I hate about it is that I may not be able to get back to my escadrille for fifteen or twenty days.

SEVERE BOMBING BY GERMANS

May 16, 1918—Going to have another operation tomorrow and then I think I'll be well. And, believe me, if I am I am going back and get somebody for this. We are now on the Somme, near Rouen. I suppose you know Baron von Richthofen has been brought down. I'm sorry, for he was a game, clean scrapper, and I know, for I've had several brushes with him. The Huns came over here last night and dropped sixty bombs, killing 125 people and wounding I don't know how many. Several of the bombs hit about 300 meters from here and our beds shook like the dickens.

COMMENTS ON HIS WAR CROSS

At the Front, June 14, 1918.—I've been back here from the hospital for several days and we are having beautiful weather, doing lots of work and losing lots of men, but getting results. I think by now you have all my letters explaining the change into the American army and the croix de guerre, which doesn't signify a great deal. Things look pretty bad now, but the French are holding strong with the constant arrival of Americans and I think the Hun advance is stopped. We have been working at very low altitudes and while we have lost men heavily the work was extremely effective. We have been shifted from one part of the front to another so that one hardly has time to unpack before we go to a new attack. Our car has a broken piston, so we have had to walk more than usual and my leg gets so worn out in a short time that it is slow going.

THE WAR IN THE AIR

GREAT FRENCH FLYER BRINGS DOWN 115

At the beginning of the year, Lieut. Rene Fonck, the great French flyer and ace of aces of all the belligerent forces, had only nineteen successes to his credit, but during the last days of fighting the wily Lieutenant scored many victories bringing his totals up to seventy five enemy airplanes officially destroyed, with forty more probable successes awaiting official verification. The final list of Lieut. Fonck is all the more astonishing when it is considered that he made flights only when he thought himself in the fittest condition, and every time he flew he triumphed over the German Aviators. His wonderful success is accredited to his incomparable tactics, keen eyesight and most remarkable skill.

OTHER CHAMPIONS OF THE AIR

Among other champion flyers of the allied forces Col. W. A. Bishop of the British is credited with seventy-two victories; Lieutenant Coppens of Belgium, wounded during the late fighting, and with a leg amputated, holds the record of thirty-six victories; Lieutenant Baracchini the Italian flyer has thirty victories to his credit; Eddie Rickenbacker, the American ace, is responsible for twenty-six enemy victims, and Edward Parsons, another American flyer is credited with eight official victories and seven more unconfirmed. Captain Kosakoff the Russian ace held seventeen successes to his credit at the close of Russias fighting.

ENEMY ACES ALSO SCORE

Lieutenant Udet of Germany is the ace of enemy aces and holds the record of sixty victories; Captain Brunnwsky of the Austrian forces is next with thirty-four to his credit; Sergeant Fiselier the German flyer serving for Bulgaria is credited with seven victims, and Captain Schults also a German serving for Turkey had eleven victories.

QUENTIN ROOSEVELT LOSES HIS LIFE

On Sunday July 14th, 1918, a violent encounter took place between German battleplanes and American Air forces trying to break through the German defense over the Marne. In this engagement Lieut. Quentin Roosevelt was brought down and killed near Chambry, then behind the German lines. He was buried with military honors by German airmen, at the spot where he fell. His grave was located later by one of his fellow air scouts.

AMERICAN AVIATOR GETS IRON CROSS

One of the remarkable feats performed by Yankee air men, was that of Lieut. Wm. T. Webb Jr. of Buffalo, a member of an American squadron which encountered a German battleplane while flying over the German lines. The American flyers surrounded the German Fokker like a flock of birds, and instead of shooting it down, which

THE WAR IN THE AIR

would have been easy, they maneuvered their planes so the boche machine was forced toward the American lines. The German airmen fought desperately, but in vain, to break through, and was forced lower and lower to the ground. Upon reaching the ground he refused to stop his motor until, after bumping over two fields, a bullet was fired through his gas tank setting it afire. The two Germans jumped from the machine to the ground uninjured. Both wore iron crosses. Lieut. Webb landed his machine, jumped out, grabbed an iron cross from one of the terrified Germans, and rose again to join his companions.

EYES OF THE ARMY ALWAYS OPEN

Few civilians have any idea of the intense, close watch that was kept upon the enemy throughout the struggle. Soldiers on "listening post" would crawl out every night to and sometimes into the enemy lines and on their return report what they had heard. By day, aviators came back from flights over enemy positions and gave details of what they had seen. Every hill, tree-top, church spire, tall building and captive balloon watched every move of the enemy and reported it. These reports by the ears and eyes of the armies enabled American and allied commanders to plan their infantry and artillery attacks.

AMERICAN INFORMATION SERVICE CHART

Knowledge of conditions in Germany during the war was so accurate that the American general staff had computed many weeks in advance almost the exact date on which the breaking point would be reached. A chart in Secretary Baker's office shows the fluctuations in the "morale of the German nation" from August, 1914, to the month of November, 1918.

The chart shows how German morale fell and rose under the influence of the military situation, the results of the submarine campaign, the unanimity of purpose evidenced by the different groups in the reichstag, and the economic condition of the country. So accurate was the information that the "morale line" reached the zero point between Nov. 10 and 15.

The chart indicates clearly that practically every major operation of the German military forces was inaugurated when the morale line showed dangerous slumps.

A big map in the war office locates not only every allied unit but the composition of the opposition forces, their commanders, and, in most cases, their headquarters.

The war supplement to this book contains a full account of American aviation, list of our sixty-three "aces," honor roll and names of American aviators who received decorations for bravery.

CHAPTER VI.

CAUSES OF THE WAR

National and Race Prejudices—The Triple Alliance—The Triple Entente—Teuton vs. Slav—Influence of Russian Diplomacy—Russia vs. Austria—Control of Balkan Seaports—England's Commercial Supremacy Challenged by Germany—Assassination of Archduke Francis Ferdinand of Austria by a Serb.

WITHIN the space of less than a week from August 1, 1914, five of the six "great powers" of Europe became involved in a war that quickly developed into the greatest and most sanguinary struggle of all time. The European conflagration, long foreseen by statesmen and diplomats, and dreaded of all alike, had broken out.

Beginning with the thunder of Austrian guns at Belgrade, the reverberations of war were heard in every capital of the Old World. Austria's declaration of war against Serbia was followed by the alignment of Germany with its Teuton neighbor against the forces of Russia, France and England. Italy alone, of the six great powers, declined to align itself with its formal allies and made a determined effort at the outset to maintain its neutrality.

Soon the highways of Europe resounded with the hoofbeats and the tramp of marching hosts, with the rattle of arms and the rumble of artillery. Of such a war, once begun, no man could predict the end. But the world realized that it was a catastrophe of unparalleled proportions, a failure of civilization in its stronghold, a disaster to humanity.

For more than forty years the great powers of Europe had been at peace with one another. Though war had threatened now and then, diplomacy had avoided the actual outbreak. But that the dreaded conflict was inevitable had long been

recognized. For its coming immense armaments had been prepared, until the burdens of taxation laid upon the people had become in themselves a source of danger. But behind it all lay the sinister influence of the "junker" element of Germany—the military party, swollen with pride in the development of the German army by more than forty years of preparation for conflict, and the naval party, eager for "der Tag" which should bring a trial of the new German navy against the battle fleets of an enemy. Fostering and encouraging these militaristic sentiments was the growing desire of Germany for "a place in the sun," which was translatable only as a desire for world domination. Greater and wider markets for German commerce were urgently demanded, and visions of Germany as mistress of the seas, with a great colonial empire, and of the Kaiser as the undisputed military overlord of Europe, already filled and fired the Teuton imagination.

The political alignment of the great powers prior to the war was as follows: On the one side was the Triple Alliance, including Germany, Austria-Hungary, and Italy; while on the other was the Triple Entente, comprising Great Britain, France and Russia. As the event proved, the uncertain element in this line-up was Italy, which had a real grievance against Austria in the latter's possession of the former Italian territory known as the Trentino, and which was not consulted by Germany and Austria prior to the outbreak of hostilities. She therefore declined to enter the war as a member of the Triple Alliance, but was later found in the field against Austria, and thenceforth rendered powerful aid to the cause of "the Allies," as the members of the Triple Entente and their supporters soon came to be known.

It was in the Balkans, long regarded as the zone of danger to European peace, that the war-clouds gathered and darkened rapidly. For generations Austria and Russia had struggled diplomatically for the control of Balkan seaports, with the Balkan states acting as buffers in the diplomatic strife. Servia acted as a bar to Austria's commercial route to the *Ægean*, by way of the Sanjak of Novi Bazar to Saloniki, while Russia was Servia's great ally and stood stoutly behind the little Slav kingdom in its opposition to Austrian aggression.

AMBITIONS OF SERBIA

Then came the recent Balkan Wars, and their outcome was viewed with alarm. Austria uneasily watched the approach of Serbia to the Adriatic and the Aegean. The formation of the new new autonomous state of Albania, between Serbia and the Adriatic, was all that prevented Austria from attacking Serbia during that crisis. The terms of peace left the situation, as it concerned Austria and Russia, practically as it had been. Austria made no further progress toward the sea, and Russia remained the ally of Serbia. Bulgaria had failed in its efforts to reach Salonica.

At this stage another element exerted its influence. Serbia awoke to the possibility of a Greater Serbia. An Empire of the Slavs had long been dreamed of. In Austria-Hungary itself millions of Slavs were dreaming of it and awaiting the disruption of Austria-Hungary, held together now, as they argue, only by the indomitable will of the old Emperor, Franz Joseph. The hatred between the Slavs and the Teutonic Austrians is intense. The annexation by Austria of Bosnia and Herzegovina, in which Servians predominate, increased the Servian hatred and the indignation of the whole Slav world to the point of violence. A conflict was avoided with difficulty. These principalities had hoped to form part of a Greater Serbia. Had not Russia been exhausted by the war with Japan, Serbia would have called upon her ally and the crisis would have come then. As it was, the Balkans teemed with plots and counterplots against the Austrians, culminating in the assassination of the Arch-Duke and heir-apparent to the Austrian throne, Francis Ferdinand, known for his anti-Slav principles, and therefore feared and hated as the king to be. The assassination occurred at Serajevo in Bosnia, where Servian disaffection was seething. Austria immediately laid the crime on the Servian government.

AUSTRIA DECLARES WAR

Failing in her peremptory demands for satisfaction, Austria declared war, July 28, 1914, apparently for revenge, but behind her righteous indignation she still held in view her

traditional ambition, a port on the Mediterranean, to be secured by the complete control of the Novi Bazar route to Salonica, a route which, besides its commercial importance, is of tremendous strategic value to the nation which commands it. The treaty of Berlin of 1878, after the Russo-Turkish War, had given Austria the military, political, and commercial control of the route within the Sanjak of Novi Bazar, then a part of Turkey.

But now, in the division of spoils following the Balkan Wars, Serbia gained control of Novi Bazar, Pristina, Uskub, and Istip, or practically the entire route to a short distance north of Salonica, where the new boundaries of Greece had been extended. This meant that Austria saw herself shut out from the Sanjak, and only by the destruction and subsequent occupation of Serbia could Austria regain her ascendancy over the route. Victory would mean a long step by Austria toward the sea.

PLOTS AND COUNTERPLOTS

The "balance of power" among European nations has hitherto been maintained because the formation of a single nation out of the Balkan States has not been possible. Although the people of these states have similar pursuits, and live much alike in all regions, they have preserved their original racial differences. A village of Albanians may be within a few miles of a village of Greeks. Yet through centuries both have remained racially distinct. Here and there the barriers have given way somewhat, but in general the races persist side by side, sometimes peaceably, more often in mutual distrust or open feud. Such division has been fostered by the great nations, and new states have been created, as recently Albania, since the formation of a great state in the Balkans by the union of all or the absorbing greatness of one, would overthrow the balance of power, and besides interpose an insurmountable obstacle between Austria and Russia, and the sea.

Thus the states have been played against each other. Sometimes the game has been one of diplomacy, or one of force, hurling the states at each other's throats.

HOW WAR WAS DECLARED

*Ultimatum by Austria to Serbia—War Declared by Austria—
Russia Mobilizes—Germany Declares War on Russia
August 1—France and England Involved—Germans
Enter Belgium—Scenes in European Capitals.*

ON SUNDAY, June 28, 1914, a Servian student named Prinzep shot and killed the Archduke Francis Ferdinand, heir to the thrones of Austria-Hungary, and his morganatic wife, the Duchess of Hohenberg, in the streets of Serajevo, a town in Bosnia which the royal couple were visiting.

Nearly four weeks later, on July 23, the Austro-Hungarian government, fixing responsibility for the assassination upon Servian intrigues, presented to Servia a number of demands which formed a very drastic ultimatum, requiring compliance within forty-eight hours, with the alternative of war. Servia was required to condemn "the propaganda directed against Austria" and to take proceedings against all accessories to the plot against the Archduke Francis Ferdinand who were in Servia. Austrian delegates were to supervise the proceedings, and Servia was also to arrest certain Servian officials whose guilt was alleged. These exorbitant conditions made it quite obvious that no concessions on Servia's part would be accepted. It was a plain prelude to war.

Nevertheless, a virtual acceptance by Servia followed. Acting on the advice of Russia, Servia acceded to all that was required of her, making only two reservations of the most reasonable character. These reservations were found enough to serve as an excuse for war. Austria at once declared herself dissatisfied and though the actual declaration of war was

delayed for a brief period, a state of war practically existed between the two countries from Saturday evening, July 25.

EFFORTS TO LOCALIZE THE WAR

Then began efforts on the part of Great Britain to localize the war. Sir Edward Grey, the able foreign secretary in Mr. Asquith's cabinet, repeated solemn warnings in every chancellery of Europe. According to the English "white book," the very day that he was notified of the violent tone of Austria's note to Serbia—the day it was presented—he warned the Austrian Ambassador in London that if as many as four of the Great Powers of Europe were to engage in war, it would involve the expenditure of such a vast sum of money and such interference with trade, that a complete collapse of European credit and industry would follow. The reply of Russia to this warning was quite conciliatory. The Russian foreign minister, M. Sazonoff, assured the British minister that Russia had no aggressive intentions, and would take no action unless forced. Austria's action, M. Sazonoff added, in reality aimed at overthrowing Russia's influence in the Balkans.

Thus, on Monday, July 27, Sir Edward Grey was able to state in the House of Commons that his suggestion of a joint conference, composed of the Ambassadors of Germany, France and Italy, and himself, with a view to mediation between Austria and Russia, had been accepted by all except Germany, which power had expressed its concurrence with the plan in principle, but opposed the details on the ground that there was a prospect of direct "conversations" (diplomatic exchanges) between Austria and Russia. This statement was believed in England to lack sincerity. On that Monday afternoon the Russian Ambassador at Vienna warned Austria that Russia would not give way and expressed his hope that some arrangement might be arrived at before Serbia was invaded.

Austria's reply came next day in the shape of a formal declaration of war against Serbia.

GERMANY'S ATTITUDE PRO-AUSTRIAN

On July 30 Sir M. de Bunsen, British Ambassador at Vienna, made the following statement to Sir Edward Grey regarding the attitude of Germany in the crisis:

"Although I am not able to verify it, I have private information that the German Ambassador (at Vienna) knew the text of the Austrian ultimatum to Serbia before it was dispatched, and telegraphed it to the German Emperor. I know from the German Ambassador himself that he endorses every line of it."

Naturally enough the Russian foreign minister complained that "conversations" with Austria were useless in the face of such facts. Russia then declared that her forces would be mobilized the day that Austria crossed the Servian frontier. The attitude of Germany at once stiffened and it became evident that Germany meant to regard even the partial mobilization of Russia as a ground for war, not only against Russia, but also against the latter's ally, France.

In vain Russia protested that her partial mobilization was merely a precaution. In vain did the Czar himself offer to give his word that no use would be made of any of his forces. Germany was aware, as subsequent facts have proved, that her own state of mobilization was very much further advanced than that of Russia.

GERMAN ULTIMATUM TO RUSSIA

By Friday, July 31, Germany was ready for the fray and a final ultimatum to St. Petersburg was launched. On the same day Russia declared war against Austria. By six o'clock on Saturday evening, August 1, war between Germany and Russia began, when Germany dismissed the Russian Ambassador, and by Sunday morning Germany was invading France. The next day, August 3, the German Ambassador left Paris and the French Ambassador at Berlin was ordered to demand his passports.

At this point Great Britain passed from the position of general peacemaker to that of a principal. In the House of Commons on Monday, August 3, Sir Edward Grey stated that the question whether Austria or Russia should dominate the Southern Slav races was no concern of England, nor was she bound by any secret alliance to France. She was absolutely free to choose her course with regard to the crisis which had overtaken her. But there were two cardinal points in the situa-

tion which had arisen which ultimately concerned Great Britain. The first essential feature of British diplomacy, said Sir Edward, was that France should not be brought into such a condition in Europe that she became a species of vassal state to Germany. On the morning of July 31, therefore, he had informed the German Ambassador that if the efforts to maintain peace failed and France became involved Great Britain would be drawn into the conflict.

In his speech of August 3 the British foreign minister also stated that he had given France on the previous day the written assurance that if the German fleet came into the English Channel or through the North Sea to assail her, the British fleet would protect her to the uttermost.

TO PROTECT BELGIAN AUTONOMY

On the same afternoon, in the same place, Sir Edward Grey reiterated the other dominant principle of British foreign policy—that England can never look with indifference on the seizure by a great continental power of any portion of Belgium and Holland. More than a hundred years ago it was declared by Napoleon, who was a master of political geography, that Antwerp was “a pistol leveled at the head of London.”

When on July 31 the British foreign minister inquired by telegraph both at Paris and Berlin whether the two governments would engage to respect the neutrality of Belgium, France replied with an assurance that she was resolved to do so unless compelled to act otherwise by reason of the violation of Belgium's neutrality at the hands of another power. The German secretary of state, Herr von Jagow, replied that he could give no such assurance until he had consulted the Emperor and Chancellor, and doubted whether he could give any answer without revealing the German plan of campaign. He furthermore alleged the commission of hostile acts by Belgium.

Developments quickly followed. The German government proposed that Belgium should grant its armies free passage through Belgian territory. The proposal was accompanied by an intimation that Belgium would be crushed out of existence if it refused to comply. In fact, it was an ultimatum presented

at 7 o'clock on Sunday evening, August 2, to expire within twelve hours.

Then came Sir Edward Grey's speech in parliament on August 3, when it was fully realized that Germany and England were on the verge of war. What followed was related in the House of Commons next day.

SCENES IN PARLIAMENT

Germany's reply to the speech by Sir Edward Grey, the British foreign secretary, indicating the attitude of Great Britain in regard to the contemplated violation of Belgian territory by Germany was a second ultimatum from Berlin to Brussels, saying Germany was prepared to carry through her plans by force of arms if necessary.

The British government was officially informed by Belgium on August 4 that German troops had invaded Belgium and that the violation of that country's neutrality, which the British foreign secretary had intimated must be followed by action on the part of the British, had become an accomplished fact.

Definite announcement of Great Britain's intentions under these circumstances was expected in the house of commons that afternoon.

TELEGRAM SENT TO BERLIN

On the assembly of the house the premier, Mr. Asquith, said that a telegram had been sent early in the morning to Sir Edward Goschen, British ambassador in Berlin, to the following effect:

"The king of the Belgians has appealed to His Britannic Majesty's government for diplomatic intervention on behalf of Belgium. The British government is also informed that the German government has delivered to the Belgian government a note proposing friendly neutrality pending a free passage of German troops through Belgium and promising to maintain the independence and integrity of the kingdom and its possessions on the conclusion of peace, threatening in case of refusal to treat Belgium as an enemy."

Sir Edward Grey, the British foreign secretary, had requested an answer within twelve hours.

Premier Asquith then read a telegram from the German foreign minister, which the German ambassador in London had sent to Sir Edward Grey. It was as follows:

"Please dispel any distrust that may subsist on the part of the British government with regard to our intentions by repeating most positively the formal assurance that even in case of armed conflict with Belgium, Germany will under no pretensions whatever annex Belgian territory."

The reading of this telegram was greeted with derisive laughter by the members of the house.

Premier Asquith continued:

"We understand that Belgium categorically refused to assent to a flagrant violation of the law of nations.

"His majesty's government was bound to protest against this violation of a treaty to which Germany was a party in common with England and must request an assurance that the demand made upon Belgium by Germany be not proceeded with and that Belgium's neutrality be respected by Germany and we have asked for an immediate reply.

"We received this morning from our minister in Brussels the following telegram:

"The German minister has this morning addressed a note to the Belgian minister for foreign affairs stating that as the Belgian government has declined a well intentioned proposal submitted to it by the imperial German government the latter, deeply to its regret, will be compelled to carry out, if necessary by force of arms, the measures considered indispensable in view of the French menace.'"

ENGLAND AND GERMANY AT WAR

By 11 o'clock that evening England and Germany were at war. Their respective ambassadors were handed their passports and Great Britain braced herself for a conflict that was felt to threaten her very existence as a nation.

CHAPTER VII.

THE INVASION OF BELGIUM

*Belgians Rush to Defense of Their Frontier—Towns Bombarded and Burned—Defense of Liege—Fall of Liege—
—Fall of Namur—Peasants and Townspeople Flee—
Destruction of Louvain.*

AT 10 o'clock on the night of August 2 German troops crossed the Belgian frontier, coming from Aix-la-Chapelle, or Aachen, temporary headquarters of the general staff, and the bloody invasion of Belgium, involving the violation of its neutral treaty rights, began. Simultaneously the German forces entered the independent duchy of Luxemburg to the south, en route to the French border, and also came in touch with French outposts in the provinces of Alsace and Lorraine.

The events that followed in Belgium furnished a genuine surprise to the world. Instead of finding the Belgian people indifferent to the violation of their territory and the Belgian army only a slight obstacle in the road to Paris, as was probably expected by the German general staff, a most gallant and determined resistance was offered to the progress of the German hosts. The army of the little State was quickly mobilized for defense and its operations, while ineffectual in stopping the Kaiser's irresistible force, delayed its advance for three invaluable weeks, giving time for the complete mobilization of the French and for the landing of a British expeditionary force to co-operate with the latter in resisting the German approach to Paris.

Just across the Belgian border lay the little towns of Visé and Verviers, and these were the first objects of German attack and Belgian defense. Both were occupied after desperate resistance by the Belgians and Visé was partly demolished by

fire in reprisal, it was claimed, for the firing by civilians on the German invaders. The subsequent bombardment and burning of towns and villages by the Germans were explained in every case as measures of revenge for hostile acts on the part of non-combatants and intended to prevent their occurrence elsewhere by striking terror into the hearts of the Belgian populace. Whatever the pretext or the excuse, the historical fact remains that the result of the German progress

—From the Literary Digest—Copyright, 1914, by Funk & Wagnalls Company.

BELGIUM—THE FIRST BATTLEFIELD OF THE WAR

The map shows the more important railroad lines connecting the cities of Brussels, Antwerp and Namur and those of Northern France. Paris is 200 miles by rail from Brussels and 190 from Namur.

toward the Franco-Belgian frontier constituted a martyrdom for Belgium and gained for the plucky little kingdom the fullest sympathy of the civilized world.

THE ATTACK ON LIEGE

The ancient city of Liège was attacked by the German artillery on August 4. The town itself was occupied five days later, but the modern forts surrounding it continued for some time longer to hold out against the fierce German attack. It became necessary to bring up the heaviest modern Krupp siege guns in order to reduce them.

Amidst all the plethora of events which crowded themselves into the first few days following the outbreak of the war, none was more remarkable than the Belgian stand at Liège against the German advance.

The struggle round Liège bids fair to become historic, and the garrisons of the Liège forts when they looked out fearlessly from the banks of the Meuse on the vanguard of the German host, and took decision to block its further progress, proved their claim once again to Julius Caesar's description of their ancestors, "The Belgians are the bravest of the Gauls."

THE FALL OF LIEGE

News of the fall of Liège and the occupation of the city by German troops was received with great rejoicing in Berlin on August 8th. Dispatches received at Amsterdam from the German capital said:

The news of the fall of Liège spread with lightning rapidity throughout Berlin and created boundless enthusiasm. The Emperor sent an aide-de-camp to announce the capture of the city to crowds that assembled outside the palace.

Policemen on bicycles dashed along Unter den Linden proclaiming the joyful tidings. Imperial Chancellor Bethmann-Hollweg drove to the castle to congratulate the Emperor on the victory and was enthusiastically cheered along the way.

PEASANTS AND TOWNSPEOPLE FLEE

Following the fall of Liège came a number of sanguinary engagements in northern Belgium; the unopposed occupation

of Brussels on August 20, and a four days' battle beginning on August 23, in which the Germans forced back the French and British allies to the line of Noyon-LaFère across the northern frontier of France. In the northern engagements the Belgians gave a good account of themselves, but were everywhere forced to give way before the innumerable hosts of the Kaiser, though not without inflicting tremendous losses on the invaders.

The retirement of the civilian population before the advancing masses of the German army was a pathetic spectacle. It was a flight in terror and distress.

On Tuesday, August 18, the German troops surged down upon Tirlemont, a town twenty miles southeast of Louvain, around which they had been massing for some days, presumably by rail and motor cars. The stories which had reached the inhabitants of Tirlemont of the happenings at surrounding towns and villages had not added to their peace of mind, and soon the moment for flight arrived. All kinds of civilians set out towards Brussels and Ghent for refuge. At times the road was full of carts bearing entire families, with pots and pans swaying and banging against the sides as the vehicles bumped over the roadway. The younger women, boys and menfolk who had been left in the towns and villages fled on foot. Priests, officials and Red Cross helpers mingled with the crowd. This stream of unfortunates uprooted from their homes was thus described by an eyewitness:

"These masses of broken-hearted people moved silently along, many weeping, few talking. With them they brought a few of their possessions, as pathetically miscellaneous as the effects one might seize in the panic haste of a hotel fire. Ox wagons, bundles and babies on dog-drawn carts or on men's backs, bicycles and handcarts laden with kitchen utensils, all mingled with the human stream. Here were to be seen sewing machines, beds, bedding, food, and there a little girl or boy with some toy clasped uncomprehendingly in a dirty hand; they also knew that danger threatened and that they must save what they held most dear. And even among these unhappy people there were some more unfortunate than the others—men and women who had no bundle, children who had no doll. All the way to Louvain there flowed this human

stream of misery. Back along the Tirlemont road rifle firing could be heard and entrenchments were to be seen in the town itself."

These scenes between Tirlemont and Louvain were typical of those on every road leading to the larger cities of Belgium as the inhabitants fled before the approach of the dreaded Uhlands.

FALL OF NAMUR

On the afternoon of Sunday, August 23, the fortress of Namur was evacuated by the Belgians, and the town was later occupied by the Germans.

The fortress was said to be as strong as Liège and it owed its importance in the present war to the fact that it was the apex of the two French flanks. One ran from Namur to Charleroi and the other by Givet to Mezieres.

Warned by their experiences at Liège, the Germans made most determined efforts against Namur. From the north, south and east they were able to bring up their big guns unhindered, and by assaults at Charleroi and Dinant they endeavored to break the sides of the French triangle. Namur finally collapsed but clever strategy enabled the French to fall back upon their main lines.

The fall of Namur, nevertheless, was a decided blow to the allies. This was admitted by the French minister of war, who said at midnight Monday, August 24, of the failure of the "Namur triangle":

"It is, of course, regrettable that owing to difficulties of execution which could not have been foreseen our plan of attack has not achieved its object. Had it done so it would have shortened the war, but in any case our defense remains intact in the face of an already weakened enemy. Our losses are severe. It will be premature to estimate them or to estimate those of the German army, which, however, has suffered so severely as to be compelled to halt in its counter-attack and establish itself in new positions."

The object of the French triangle, having its apex at Namur, was to break the German army in two. The British troops, as related in another chapter, were cooperating with the French at Mons.

When the Belgians evacuated Namur the Germans had knocked to pieces three of the forts to the northeast of the town with howitzer fire. Between these forts they advanced and bombarded the town, which was defended by the Belgian Fourth Division. Namur was evacuated when the defenders found themselves unable to support a heavy artillery fire.

The Germans attacked in a formation three ranks deep, the front rank lying down, the second kneeling, and the third standing. They afforded a target which was fully used by the men behind the Belgian machine guns. Some fifty or sixty howitzers were brought into action by the Germans, who concentrated several guns simultaneously on each fort and smothered it with fire.

DESTRUCTION OF LOUVAIN

At this stage of the war in Belgium an event occurred that riveted universal attention upon the German operations. On Tuesday, August 25, the beautiful, historic, scholastic city of Louvain, containing 42,000 inhabitants, was bombarded by the Germans and later put to the torch. The fire, which burned for several days, devastated the city. Many artistic and historical treasures, including the priceless library of Louvain University and several magnificent churches, centuries old, were totally destroyed. Only the Hotel de Ville (City Hall), one of the finest examples of Gothic architecture in Europe, was spared and left standing in the midst of ruins.

The Rotterdam Telegraf, a neutral newspaper, declared that in the devastation of Louvain "a wound that can never be healed" was inflicted "on the whole of civilized humanity." Frank Jewett Mather, the well-known American art critic, bitterly denounced the act as one of wanton destruction, saying that Louvain "contained more beautiful works of art than the Prussian nation has produced in its entire history."

Thus when the first month of war ended, the Germans had made good with their plan of seizing Belgium as a base of operations against France and had arrived in full force at the first line of French defenses, well on the way to the coveted goal, Paris.

But poor little Belgium, the "cockpit of Europe," ran red with blood.

SURRENDER OF BRUSSELS

Belgian Capital Occupied by the Germans Without Bloodshed—Important Part Played by American Minister Brand Whitlock—Belgian Forces Retreat to Antwerp—Dinant and Termonde Fall.

AFTER the usual reconnoissances by Uhlans and motorcycle scouts, the van of the German army arrived at Brussels, the capital city of Belgium, on August 20. The seat of government had been removed three days before to Antwerp. The French and Russian ministers also moved to Antwerp, leaving the affairs of their respective countries in the hands of the Spanish legation. Brand Whitlock, United States minister to Belgium, remained at Brussels and played an important part in negotiations which led to the unresisted occupation and march through the city by the Germans in force on August 21 and the consequent escape of Brussels from bombardment and probable ruin.

At the approach of the German army the inhabitants of the capital were stricken with fear of the outcome. When the Belgian civic guards and refugees began pouring into the city from the direction of Louvain, they brought stories of unspeakable German atrocities, maltreatment of old men and children, and the violation of women.

"The Belgian capital reeled with apprehension," said an American resident. "Within an hour the gaiety, the vivacity, and brilliancy of the city went out like a broken arclight. The radiance of the cafés was exchanged for darkness; whispering groups of residents broke up hurriedly and locked themselves into their homes, where they put up the shutters and drew in their tricolored Belgian flags.

"The historic Belgian city went through a state of morbid consternation, remarkably like that from which it suffered on June 18, 1815, when it trembled with the fear of a French victory at Waterloo.

"In less than twenty-four hours the Belgian citizens were chatting comfortably with the German invaders and the allegations of German brutality and demoniacal torture dissolved into one of the myths which have accompanied all wars.

"Neither in Brussels nor in its environs was a single offensive act, so far as I know, committed by a German soldier. In a city of over half a million people, invaded by a hostile army of perhaps a quarter of a million soldiers, no act, sufficiently flagrant to demand punishment or to awaken protest came to my attention."

SURRENDER OF CITY DEMANDED

Prior to the occupation the German commander had sent forward a flag of truce demanding the surrender of the city. This was at midnight of Wednesday, August 19. The Belgian commandant replied that he was bound in honor to defend the town.

Brand Whitlock, the United States minister, then came to the fore. He recommended to the commandant and to Burgo-master Max the unconditional surrender of the city, pointing out how resistance might bring increased misfortune on the citizens. But the military commander remained adamant until orders arrived from King Albert consenting to the surrender of the city.

Mr. Whitlock was later congratulated officially by the king for his action. Undoubtedly he had a great deal to do with saving Brussels.

HISTORIC TREASURES OF BRUSSELS

The city of Brussels, thus occupied by the Germans, contains art treasures that are priceless. The museum and public galleries are filled with masterpieces of the Flemish and old Dutch school, while the royal library comprises 600,000 volumes, 100,000 manuscripts and 50,000 rare coins. Unquestionably the Brussels Museum is one of the most complete on the Continent.

A prominent historic landmark of Brussels is the King's House (also called the Dreadhouse), an ancient structure, recently renovated. Within its walls both the Counts Egmont and Hoorn spent the last night before their execution, in 1567, by the hirelings of the Duke of Alva, the Spanish Philip II's tyrannical governor of the Netherlands, who, by means of the sword and the Inquisition, sought to establish the Catholic religion in those countries. Brussels boasts another historic relic known the world over—the equestrian statue of Godfrey of Bouillon, who led the Crusaders to the Holy Land. It stands upon the Place Royale, and was unveiled in 1848.

The magnificent Town Hall of Brussels would probably have suffered destruction, together with the city's other beautiful buildings, had not the government yielded without a struggle.

HEAVY WAR TAX LEVIED

General von der Goltz, appointed by the Kaiser military governor of Belgium, levied a war tax of \$40,000,000 on the capture of the capital. Other cities occupied by the Germans were also assessed for large sums, which in several instances had to be paid immediately on pain of bombardment. It was announced September 1 that the four richest men in Belgium had guaranteed the payment to Germany of the war tax. The four men were Ernest Solvay, the alkali king; Baron Lambert, the Belgian representative of the Rothschilds; Raoul Warocque, the mine owner, and Baron Empain, the railway magnate.

BELGIANS RETREAT TO ANTWERP

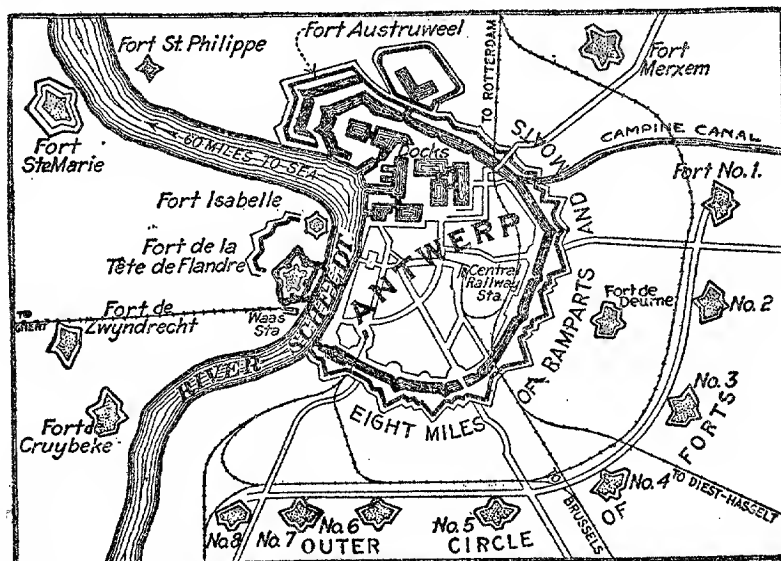

After the German occupation almost normal conditions were soon restored in Brussels, so far as civic life was concerned. It was speedily announced that the Germans intended to regard the whole of Belgium as a German province and to administer it as such, at least during the continuance of the war. The Belgian army retired to the north within the fortifications of Antwerp, where they were joined by French troops, but desultory fighting against the German invader continued at many points and the Franco-British allies soon came into contact with the advancing German army.

THE CITY AND PORT OF ANTWERP

Antwerp is one of the largest, most modernly equipped and efficient ports in Europe. It is only a short distance across the English Channel, and is the head of 1,200 miles of canals in Belgium which connect with the canal systems of Holland, France and Germany. On the harbor alone over \$100,000,000 has been spent and extensions are in progress which will cost \$15,000,000 more.

For the prosperity of Belgium, Antwerp is many times more important than Brussels, the capital. While the country has an enormous amount of coal and many factories and other industries, these would be of little value without the imports which enter through Antwerp.

The city has about 360,000 inhabitants. Although located fifty-three miles inland on the Scheldt River, it has natural advantages for harbor purposes which have been recognized since the seventh century. Napoleon looked over the spot and started large harbor construction.

ANTWERP AND ITS FORTIFICATIONS

Ever since that time, according to popular belief, Antwerp has encouraged commerce. Over eighty different steamboat lines use the docks and quays. The passenger lines include boats to New York and Boston, New Orleans, London, Liverpool, Manchester, Grimsby, South American ports, Cuba, the Congo, East and South Africa and the far East.

In 1912 a total of 6,973 ocean-going vessels entered the port, and 41,000 other vessels.

Antwerp in 1870 ranked fifth in the ports of the world. Today it is believed to be second or third. Ten years ago the freight received from the inland was principally by the canals. Approximately 2,300,000 tons were received by rail and 5,500,000 tons by canal boats.

This ratio has not been maintained, but the canal traffic now is much larger than the rail tonnage. This gives an idea of the extensive use to which the European countries put their canals, and the reader may guess the value of the city at the head of the canal system to the Germans.

BLOODLESS CAPITULATION OF GHENT

Historic Ghent, with its quarter of a million inhabitants, was also surrendered peaceably to the Germans, and again the energy and initiative of an American, United States Vice-Consul J. A. Van Hee, had much to do with the avoidance of tragedy and destruction.

Learning that the advance guard of the German army was only a few miles outside the city, the burgomaster went out on the morning of September 8 to parley with Gen. von Boehn—in the hope of arranging for the German forces not to enter. An agreement finally was reached whereby the Germans should go around Ghent on condition that all Belgian troops should evacuate the city, the civic guard be disarmed, their weapons surrendered, and the municipal authorities should supply the Germans with specified quantities of provisions and other supplies.

The burgomaster was not back an hour when a motor car driven by two armed German soldiers appeared in the streets.

At almost the same moment that the German car entered

the city from the south a Belgian armored car, armed with a machine gun, with a crew of three men, entered from the east on a scouting expedition.

The two cars, both speeding, encountered each other at the head of the Rue Agneau, directly in front of the American consulate. Vice-consul Van Hee, standing in the doorway, was an eyewitness to what followed.

The Germans, taken completely by surprise at the sight of the foe's grim war car in its coat of elephant gray, bearing down upon them, attempted to escape, firing with their carbines as they fled. Notwithstanding the fact that the sidewalks were lined with onlookers, the Belgians opened on the fleeing Germans with their machine guns, which spurted lead as a garden hose spurts water.

The driver, fearing the Germans might escape, swerved his powerful car against the German motor precisely as a polo player "rides off" his opponent. The machine gun never ceased its angry snarl.

The Germans surrendered, both being wounded.

Appreciating that Ghent stood in imminent danger of meeting the terrible fate of its sister cities, Aerschot and Louvain, sacked and burned for far less cause, Mr. Van Hee hurriedly found the burgomaster and urged him to go along instantly to German headquarters.

They found General von Boehn and his staff at a chateau a few miles outside the city. The German commander at first was furious with anger and threatened Ghent with the same punishment he had meted out to the other places where Germans were fired on. Van Hee took a very firm stand, however. He told the general the burning of Ghent would do more than anything else to lose the Germans all American sympathy. He reminded him that Americans have a great sentimental interest in Ghent because the treaty of peace between England and the United States was signed there just a century ago.

The general finally said: "If you will give me your word that there will be no further attacks upon Germans in Ghent, and that the wounded soldiers will be taken under American protection and returned to Brussels by the consular authori-

ties when they have recovered, I will agree to spare Ghent and will not even demand a money indemnity."

The news that Mr. Van Hee had succeeded in his mission spread through the city like fire in dry grass and when he returned he was acclaimed by cheering crowds as the saviour of Ghent.

THE BURGOMASTER'S APPEAL

Blazoned on the front of the Town Hall suddenly appeared a great black-lettered document. It was a manly and inspiring proclamation by the burgomaster, similar to the splendid proclamation issued by M. Adolphe Max, burgomaster of Brussels, just before the German entry. He assured the inhabitants that he and all the town officials were remaining in their places, and that so long as life and liberty remained to him he would do all in his power to protect their honor and their interests. He reminded them that under the laws of war they had the right to refuse all information and help to the invaders; and called upon each citizen, or his wife, to refuse such information and help. Finally, he urged the citizens to remain calm, and stay in their homes.

"Vive la Belgique! Vive Ghent!" The proclamation ended in great capitals with this patriotic cry.

DINANT AND TERMONDE FALL

But other cities and towns of Belgium were not as fortunate as Brussels and Ghent in escaping damage and destruction.

Dinant, a town of 8,000 inhabitants, fifteen miles south of Namur, and dating back to the sixth century, was partially destroyed by the Germans in their advance on September 3 and 4. Early reports stated that a number of the most prominent citizens had been executed, including Mr. Humbert, owner of a large factory, who was slain in the presence of his wife and children.

The Germans alleged that citizens had fired on them from the heights about the city. They then drove all of the inhabitants out, shot some of the men as examples, took the gold from the branch of the National Bank and burned the business section.

On September 4 the town of Termonde met a similar fate. This town, 16 miles from Ghent, was fired in several places before the Kaiser's troops passed on. They also blew up a bridge over the River Escaut to the north, seeming to renounce for the moment their intrusion into the country of the Waes district. Afterward they directed an attack against the southwest front position of the Antwerp army and were repulsed with great losses.

Describing the burning of Termonde by the Germans, a Ghent correspondent said:

"By midday Sunday the blaze had assumed gigantic proportions and by Sunday evening not a house stood upright. This was verified at Zele, where there were thousands of refugees from Termonde. The Germans also pillaged Zele. The suburb of St. Giles also suffered from bombardment and fire."

A courier who knew Termonde as a flourishing town with fine shops, an ancient town hall of singular beauty and a number of churches of historic interest, found the place on September 11 a smoldering ruin, except for the town hall and one church, on a stone of which he saw the inscription "1311." These two structures were left intact, without so much as a broken window.

Termonde was burned for much the same reason as Louvain. On September 4 a German force came back from the field after having been severely handled by the Belgians, and the German commander, it is said, exclaimed:

"It is our duty to burn them down!"

The inhabitants were given two hours' grace, and German soldiers filed through the town, breaking windows with their rifles. They were followed by other files of troops, who sprayed kerosene into the houses, others applied lighted fuses and the town was systematically destroyed.

BOMBARDMENT OF MALINES

On Thursday night, August 27, the German artillery bombarded the ancient Belgian town of Malines. During the bombardment many of the monuments in the town were hit by shells and destroyed. When the artillery had ceased firing the inhabitants of Malines were advised to leave the town.

CHAPTER VIII

BRITAIN RAISES AN ARMY

Earl Kitchener Appointed Secretary for War—A New Volunteer Army—Expeditionary Force Landed in France—Field Marshal Sir John French in Command—Colonies Rally to Britain's Aid—The Canadian Contingent—Indian Troops Called For—Native Princes Offer Aid.

AFTER the declaration of war by Great Britain against Germany on August 4, the first important development in England was the appointment of Earl Kitchener of Khartoum as secretary of state for war. This portfolio had been previously held by the Rt. Hon. H. H. Asquith, premier and first lord of the treasury. Lord Kitchener being the idol of the British army and most highly esteemed by the nation generally for his powers of organization and administration, as well as for his military fame, the appointment increased the confidence of the British people in the Liberal Government and awakened their enthusiasm for war. Parliament unanimously passed a vote of credit for \$500,000,000 on August 6.

Lord Kitchener immediately realized the serious nature of the task confronting his country as an ally of France against the military power of Germany. His first step was to increase the regular army. The first call was for 100,000 additional men. This was soon increased to 500,000. Within a month there were 439,000 voluntary enlistments and then a further call was made for 500,000 more, bringing the strength of the British army up to 1,854,000 men, a figure unprecedented for Great Britain.

The war fever grew apace in England. All classes of society furnished their quota to the colors for service in Belgium and France. The period of enlistment was "for the war" and a wave of patriotic fervor swept over the British Isles and over

all the colonies of Britain beyond the seas. Political differences were forgotten and the empire presented a united front, as never before. If Germany had counted on internal dissension keeping England out of the fray, the expectation proved unfounded. Englishmen, Irishmen and Scotsmen stood shoulder to shoulder. The Irish Home Rule controversy was dropped by common consent. The men of Ulster and the Irish Nationalists struck hands and agreed to forget their differences in the presence of national danger.

Trade resumed normal conditions and the Bank of England rate, which earlier in the week had mounted to 10 per cent, was reduced on August 8 to 5 per cent.

There were some panicky conditions and a disquieting collapse on the London Stock Exchange during the last days of feverish diplomacy, and it was due to the financial solidity of the British nation, no less than to its level-headedness and the promptness of government measures, that the declaration of war, instead of precipitating worse conditions, cleared the atmosphere.

BRITISH TROOPS LAND IN FRANCE

While the British army was being mobilized, the utmost secrecy was observed regarding all movements of troops. The newspapers refrained from publishing even the little they knew and an expeditionary force, composed of the flower of the British army and numbering approximately 94,000 men of all arms of the service, was assembled, transported across the English Channel and landed at Boulogne and other French ports behind a veil of deepest mystery, so far as the British public and the world at large were concerned.

The old town of Plymouth, on the Channel, was the chief port of embarkation for the troops and the main concentration point in England, but troops embarked also at Dublin, Ireland; Liverpool; Eastbourne; Southampton, and other cities. Not a mention of the midnight sailings of transports carrying troops, horses, automobiles, artillery, hospital and commissary equipment and supplies was allowed to be printed in the newspapers,

nor was it known how many troops were being sent across the Channel.

The landing in France was effected between the 10th and the 20th of August without the loss of a single man, and on the 23d, having joined forces with the French army under General Joffre, commander-in-chief, the British found themselves in touch with the German enemy at Mons in Belgium.

FIELD-MARSHAL FRENCH IN COMMAND

The expeditionary force was in supreme command of Field Marshal Sir John D. P. French, a veteran officer of high military repute, with Maj.-Gen. Sir A. Murray as chief of staff. Other noted officers were Lieut.-Gen. Sir Douglas Haig, commander of the First Corps; Lieut.-Gen. Sir James Grierson, commander of the Second Corps; Maj.-Gen. W. P. Pulteney, commander of the Third Corps, and Maj.-Gen. Edmund Allenby, in command of the Cavalry Division. The home army was left in command of Gen. Sir Ian Hamilton.

Hardly had the expedition landed in France when the death was reported of the commander of the Second Corps, Sir James Grierson, who succumbed to heart disease while on his way to the front, dropping dead on a train. He was given a notable military funeral in London. Gen. Sir H. L. Smith-Dorrien was appointed to succeed him in command of the Second Corps.

The British troops were received in France with loud acclaim and Field Marshal French, on visiting Paris for a conference at the French war office before proceeding to the front, was greeted by a popular demonstration that showed how welcome British aid was to the French in their critical hour.

The British field force was composed of three army corps, each comprising two divisions, and there was also an extra cavalry division.

Each army corps consists of twenty-four infantry battalions of about one thousand men each on a war footing; six cavalry regiments, eight batteries of horse artillery of six guns each, eighteen batteries of field artillery, two howitzer batteries, and troops of engineers, signal corps, army service corps and other details.

The number of men in each army corps was therefore approximately as follows:

Infantry	24,000
Cavalry	3,600
Horse artillery	800
Field artillery	1,800
Howitzer batteries	250
Signal, army service, commissary, etc.....	900

Thus the first British field force landed in France aggregated about 94,000 men, including the extra cavalry division. These were added to almost daily during the following weeks, until by September 20 the British had probably 200,000 men co-operating with the French army north and east of Paris.

COLONIES RALLY TO BRITAIN

At the prospect of war with Germany the dominions of the British Empire overseas eagerly offered their aid. Canada, Australia, New Zealand, India, all came forward with offers of men, money, ships and supplies. The Australian premier issued a statement to the people in which he said: "We owe it to those who have gone before to preserve the great fabric of British freedom and hand it on to our children. Our duty is quite clear. Remember we are Britons."

CANADA OFFERS MEN

A formal offer of military contingents was cabled to England by the Canadian government August 1. A meeting of the cabinet was presided over by Premier Borden. It was called to deal with the situation in which Canada found herself as the result of the European war.

The government unanimously decided to make England an offer of men. Infantry, cavalry and artillery would be included in any force sent forward and it would number 20,000 men if transportation could be obtained for that number. It was estimated that within two weeks it would be possible to dispatch 10,000 efficient soldiers, and within three months this number could be increased to 50,000.

Many offers for foreign service arrived from the commandants of militia corps throughout the dominion.

In all 40,000 Canadian troops were tendered to and accepted by the British Government in the early days of the war; also 20,000 men from Australia and 8,000 from New Zealand, a total of 68,000 men.

By the request of the Dominions in each case, the cost of the equipment, maintenance and pay of the forces was defrayed by the three governments—in itself a generous and patriotic additional offer. The Dominions at the same time declared their readiness to send additional contingents if required, as well as drafts from time to time to maintain their field forces at full strength.

TROOPSHIPS SAIL UNDER CONVOY

The first intimation that Canadian troops had been dispatched to the front from Valcartier Camp came on September 24, when the Hon. T. W. Crothers, the Dominion minister of labor, announced in a speech before the Canadian Trades and Labor Congress, assembled in convention at St. John, New Brunswick, that 32,000 Canadian volunteers "left for the front a day or two ago." It was understood that the troops had sailed from Quebec in twenty armed transports, convoyed by a fleet of British warships, which had been collected at convenient ports for the purpose.

There were two army divisions in the force that sailed, each comprising three brigades of infantry (12,000 men), 27 guns, 500 cavalry, and 2,000 staff, signallers, medical corps and supernumeraries.

THE FINAL REVIEW AT VALCARTIER

Before they sailed away the Canadian army marched past the reviewing stand at the Valcartier Camp, Quebec, under the eyes of 10,000 civilians. There were 32,000 soldiers equipped for active service and everyone was impressed with the serious scene.

The Duke and Duchess of Connaught, the Princess Patricia, Col. Sam Hughes, the Canadian minister of militia, and Col. V. H. C. Williams, commandant of the camp, looked on with pride as the great parade, almost a full army corps, passed the royal standard. They marched in column of half battalions, and took a full hour to go by.

Officers commanding the four infantry brigades: Lieut.-Col. R. E. W. Turner, V. C., D. S. O., of Quebec, a veteran of the South African war, mentioned in dispatches for especially gallant service; Lieut.-Col. S. M. Mercer, Toronto, Commanding Officer of the Queen's Own Rifles; Lieut.-Col. A. W. Currie of Victoria, Commanding Officer of the 50th Fusiliers; Lieut.-Col. J. E. Cohoe of St. Catharines, Commanding Officer of the 5th Militia Infantry Brigade.

The officer appointed to command the artillery brigade was Lieut.-Col. H. E. Burstall of Quebec, of the Artillery Headquarters Staff.

Officer in command of the Strathcona Horse, Lieut.-Col. A. C. Macdonnell, D. S. O., of Winnipeg, a South African veteran.

Officer in command of the Royal Canadian Dragoons, Lieut.-Col. C. M. Nelles of Toronto, Inspector of Cavalry for Militia Headquarters.

The commanding officer of the whole army division was an English general selected by the British War Office.

It was understood that the Canadian troops would land in the south of England and march through London to training quarters at Aldershot and Salisbury Plains, the infantry going to Aldershot and the artillery to Salisbury Plains, for several weeks' training under active service conditions before going to the firing line.

CANADA FIGHTS AGAINST AUTOCRACY

"Canada will spend its last dollar and shed its last drop of blood fighting for the principle of democracy, against that of autocracy, as exemplified in the present European conflict."

This was the emphatic statement made by Sir Douglas Cameron, lieutenant-governor—chief executive—of the province of Manitoba, passing through Chicago on September 28.

"Great Britain is not fighting for empire," he said. "It is not fighting for greater commercial gains. We are fighting for the annihilation of autocracy and it is the sentiment of the people of Canada that they will fight against Germany's domination to the bitter end."

"England does not want more commerce, except as it can be gained through the paths of peace. We would not draw

the sword to increase it, but we will fight to the last drop of blood to protect it.

"The men of Canada have responded nobly to the call to arms. We have sent about 31,800 provincial troops, every one a volunteer, and we have that many more already enlisted if they are needed. Our trouble is to equip them as fast as they enlist.

"In Canada we are turning our attention to agricultural pursuits. Wheat is at a premium; a farmer can get from \$1 to \$1.10 per bushel in cash for wheat on his wagon. All Europe will be in dire need of foodstuffs next year and for some years to come and we in Canada hope to profit by the opportunity.

"Economic conditions in the dominion received a terrible blow when the war came; we were shocked, staggered, and business has received a hard setback; finances are depressed. The government has offered help to the banks, but they do not need it yet.

"We want immigrants in our country—Germans or any other good, strong, virile nationality. We have no quarrel with the German people. We like them; they are used to a high standard of living and are the finest kind of citizens.

"To my mind, this war cannot be of long duration. Germany, with all its preparedness, could not lay by stores enough to support 65,000,000 people for any great length of time when there is no raw material coming in. The country will be starved out, if not beaten in the field, for I do not believe Germany can gain control of the high seas and cover the world with its merchantmen."

INDIAN TROOPS CALLED FOR

The announcement by Lord Kitchener in the House of Commons late in August that native troops from India were to be summoned to the aid of the British army in France "came like a crash of thunder and revealed a grim determination to fight the struggle out to a successful finish."

There was some talk in England of increasing the army by temporary conscription, but Premier Asquith declined to consider any such proposal.

In the House of Commons on September 9 a message was

read from the Viceroy of India, which said that the rulers of the Indian native states, nearly 700 in number, had with one accord rallied to the defense of the empire with personal offers of services as well as the resources of their states.

Many of the native rulers of India also sent cables to King George offering him their entire military and financial resources, while the people of India by thousands offered to volunteer.

Conditions in India were indeed so satisfactory, from the British standpoint, that Premier Asquith was able to announce that two divisions (40,000) of British (white) soldiers were to be removed from India.

The aid that India could offer was not lightly to be considered. The soldiery retained by the British and the rajahs, constituting India's standing army, amount to about 400,000, not taking into consideration the reserves and the volunteers. The rajahs maintain about 23,000 soldiers, who are named Imperial Service Troops, expressly for purposes of Imperial defense, and these have served in many wars. They served with British, German, French, and United States troops in China from September, 1900, to August, 1901, and gained the highest laurels for efficiency and good conduct.

The first Indian troops called for by Lord Kitchener included two divisions of infantry and a brigade of cavalry, adding about 70,000 combatants to the allied armies in France, with approximately 130 pieces of artillery, both light and heavy, and howitzers.

Twelve Indian potentates were selected to accompany this expeditionary force. These included the veteran Sir Pertab Singh, regent of Jodhpur; Sir Ganga Bahadur, Maharajah of Bikanir, and Sir Bhupindra Singh, Maharajah of Patiala.

The expeditionary force contained units of the regular army and contingents of the Imperial Service Troops in India. From twelve states the viceroy accepted contingents of cavalry, infantry, sappers and transport, besides a camel corps from Bikanir.

The Maharajah of Mysore placed \$1,600,000 at the disposal of the Government in connection with the expenditure for the expeditionary force. In addition to this gift, the Maharajahs of Gwalior and Bhopal contributed large sums of

money and provided thousands of horses as remounts. Maharajah Repa offered his troops and treasure, even his privately-owned jewelry, for the service of the British King and Emperor of India. Maharajah Holkar of Indore made a gift of all the horses in the army of his state.

A similar desire to help the British Government was shown by committees representing religious, political, and social associations of all classes and creeds in India.

In the House of Lords on August 28 Earl Kitchener announced that the first division of the troops from India was already on the way to the front in France. At the same time the Marquis of Crewe, secretary of state for India, said: "It has been deeply impressed upon us by what we have heard from India that the wonderful wave of enthusiasm and loyalty now passing over that country is to a great extent based upon the desire of the Indian people that Indian soldiers should stand side by side with their comrades of the British army in repelling the invasion of our friends' territory and the attack made upon Belgium. We shall find our army there reinforced by native Indian soldiers—high-souled men of first-rate training and representing an ancient civilization; and we feel certain that if they are called upon they will give the best possible account of themselves side by side with our British troops in encountering the enemy."

KING GEORGE PRAISES COLONIES

On September 9 a message from King George to the British colonies, thanking them for their aid in Britain's emergency, was published as follows:

"During the last few weeks the peoples of my whole empire at home and overseas have moved with one mind and purpose to confront and overthrow an unparalleled assault upon the continuity of civilization and the peace of mankind.

"The calamitous conflict is not of my seeking. My voice has been cast throughout on the side of peace. My ministers earnestly strove to allay the causes of the strife and to appease differences with which my empire was not concerned. Had I stood aside when in defiance of pledges to which my kingdom was a party, the soil of Belgium was violated and her cities made desolate, when the very life of the French nation was

threatened with extinction, I should have sacrificed my honor and given to destruction the liberties of my empire and of mankind.

"I rejoice that every part of the empire is with me in this decision.

"Paramount regard for a treaty of faith and the pledged word of rulers and peoples is the common heritage of Great Britain and of the empire. My peoples in the self-governing dominions have shown beyond all doubt that they whole-heartedly indorse the grave decision it was necessary to take, and I am proud to be able to show to the world that my peoples oversea are as determined as the people of the United Kingdom to prosecute a just cause to a successful end.

"The Dominion of Canada, the Commonwealth of Australia and the Dominion of New Zealand have placed at my disposal their naval forces, which have already rendered good service for the empire. Strong expeditionary forces are being prepared in Canada, Australia and New Zealand for service at the front, and the Union of South Africa has released all British troops and undertaken other important military responsibilities.

"Newfoundland has doubled the number of its branch of the royal naval reserve, and is sending a body of men to take part in the operations at the front. From the Dominion and Provincial governments of Canada, large and welcome gifts of supplies are on their way for use both by my naval and military forces.

"All parts of my oversea dominions have thus demonstrated in the most unmistakable manner the fundamental unity of the empire amidst all its diversity of situation and circumstance."

A message similar to the foregoing was addressed by King George to the princes and the people of India.

The King's eldest son, the young Prince of Wales, volunteered for active service at the outset of the war and was gazetted as a second lieutenant in the First Battalion, Grenadier Guards. He also inaugurated and acted as treasurer of a national fund for the relief of sufferers by the war. This fund soon grew to \$10,000,000 and steadily climbed beyond that amount.

CHAPTER IX

EARLY BATTLES OF THE WAR

Belgian Resistance to the German Advance—The Fighting at Vise, Haelen, Diest, Aerschot and Tirlemont—Mons and Charleroi the First Great Battles of the War—Allies Make a Gallant Stand, but Forced to Retire Across the French Border.

FROM the first day of the German entry into Belgium brief and hazy reports of battles between the patriotic Belgians and the invaders came across the Atlantic. Many absurd and mischievous reports of repeated Belgian "victories" were received throughout the month of August. These were for the most part rendered ridiculous by the steady advance of the German troops. The resistance of the Belgians was gallant and persistent, but availed only to hinder and delay the German advance which it was powerless to stop. Up to August 23, there were no "victories" possible for either side, because never until then were the opposing armies definitely pitted against each other in an engagement in which one or the other must be broken.

All the time these Belgian "victories," which were no more than resistances to German reconnoissances, were being reported, the German line was not touched, and behind that line the Germans were methodically massing.

When they were ready they came on. The Belgian army retired from the Diest-Tirlemont line, from Aerschot and Louvain, from Brussels, because to have held these positions against the overwhelming force opposed to them would have meant certain destruction. The rearguards held each of these

points with the greatest heroism so long as that was necessary, and then retired in good order on the main force.

VISÉ ATTACKED AND FIRED

The first fighting of any severity in Belgium occurred at Visé, near the frontier, early in the German advance. German troops crossed the frontier in motors, followed by large bodies of cavalry, but the Belgians put up a stubborn resistance. The chiefs of the Belgian staff had foreseen the invasion and had blown up the bridges of the River Meuse outside the town, as well as the railway tunnels. Time after time the Belgians foiled with their heavy fire the attempts of the Germans to cross by means of pontoons. Visé itself was stubbornly defended. Only after a protracted struggle did the Germans master the town, which they fired in several places on entering.

BATTLES OF HAELEN-DIEST

At the end of the first week of the Belgian invasion it was estimated that the Germans had concentrated most of their field troops, probably about 900,000 combatants, along a 75-mile line running from Liege to the entrance into Luxemburg at Treves. With this immense army it was said there were no less than 5,894 pieces of artillery. This was only the first-line strength of the Germans, the reserves being massed in the rear. Part of the right wing was swung northward and westward in the direction of Antwerp, and swept the whole of northern Belgium to the Dutch frontier.

On August 10 the Belgian defenders fought a heavy engagement with the Germans at Haelen, which was described in the dispatches as the first battle of the war. A Belgian victory was claimed as the result, the German losses, it was said, being very heavy, especially in cavalry, while the Belgian casualties were reported relatively small. But the German advance was merely checked. The covering troops were speedily reinforced from the main body of the army and the advance swept on.

The result of the Haelen engagement was thus described in the dispatches of August 13:

"The battle centered around Haelen, in the Belgian

province of Limbourg, extending to Diest, in the north of the province of Brabant, after passing round Zeelhem.

"At 7 o'clock last evening all the country between the three towns mentioned had been cleared of German troops, except the dead and wounded, who were thickly strewn about the fire zone. Upward of 200 dead German soldiers were counted in a space of fifty yards square.

"A church, a brewery and some houses in Haelen were set afire, and two bridges over the Demer were destroyed by Belgian engineers.

"Great quantities of booty were collected on the battle-field, and this has been stacked in front of the town hall of Diest. Many horses also were captured.

"The strength of the German column was about 5,000 men."

Another report said of the encounter:

"A division of Belgian cavalry, supported by a brigade of infantry and by artillery, engaged and defeated, near the fortress of Diest, eighteen miles northeast of Louvain, a division of German cavalry, also supported by infantry and by artillery.

"The fighting was extremely fierce and resulted in the Germans being thrown back toward Hasselt and St. Trond."

Meanwhile the forts at Liege, to the southeast, still held out, though fiercely bombarded by German siege guns. The fortress of Namur was also being attacked. The Germans had bridged the river Meuse and were moving their crack artillery against the Belgian lines. French troops had joined the Belgian defenders and the main battle line extended from Liege on the north to Metz on the south.

A visit to Haelen and other towns by a Brussels correspondent August 17, "showed the frightful devastation which the Germans perpetrated in Belgian territory.

"For instance, at Haelen itself houses belonging to the townspeople have been completely wrecked. Windows were broken, furniture destroyed, and the walls demolished by shell fire. Even the churches have not been respected. The parish church at Haelen has been damaged considerably from shrapnel fire.

"On the battlefield there are many graves of Germans marked by German lances erected in the form of a cross."

ON THE BATTLEFIELD OF DIEST

A correspondent of the New York Tribune said:

"Across the battlefield of Diest there is a brown stretch of harrowed ground half a furlong in length. It is the grave of twelve hundred Germans who fell in the fight of August 11. All over the field there are other graves, some of Germans, some of Belgians, some of horses. When I reached the place peasants with long mattocks and spades were turning in the soil. For two full days they had been at the work of burial and they were sick at heart. Their corn is ripe for cutting in the battlefield, but little of it will be harvested. Dark paths in their turnip fields are sodden with the blood of men and horses."

The Belgians, in contempt of German marksmanship, had forced the enemy to the attack, which had been made from three points of the field simultaneously. The fighting had been fierce, but now that both sides had swept on, no one seemed to know how those in the fight had really fared. Only by the heaps of dead could one make estimate:

"At least, there were most dead on the side toward the bridge. A charge of 300 Uhlans, who were held in check for a short time by seventeen Belgians at a corner, seems, however, to have come near success. The derelict helmets and lances that covered the fields show that the charge pressed well up to the guns and to the trenches in the turnip fields where the Belgian soldiers lay. On the German left mitrailleuses got in their work behind, and in the houses on the outskirts of the villages. Five of these houses were burned to the ground, and two others farther out broken all to pieces and burned. In a shed was a peasant weeping over the dead bodies of his cows.

"It would be easy now at the beginning of this war to write of its tragedy. The villages have each a tale of loss to tell. All of the twelve hundred men in the long grave were men with wives, sweethearts, and parents. All the Belgian soldiers and others who were buried where they fell have mourners.

A LETTER FROM THE GRAVE

"A letter which I picked up on the field and am endeavoring to have identified and sent her for whom it is intended will speak for all. It is written in ink on half a sheet of thin notepaper. There is no date and no place. It probably was written on the eve of battle in the hope that it would reach its destination if the writer died. This is the translation:

"Sweetheart: Fate in this present war has treated us more cruelly than many others. If I have not lived to create for you the happiness of which both our hearts dreamed, remember my sole wish now is that you should be happy. Forget me and create for yourself some happy home that may restore to you some of the greater pleasures of life. For myself, I shall have died happy in the thought of your love. My last thought has been for you and for those I leave at home. Accept this, the last kiss from him who loved you."

"Postcards from fathers with blessings to their gallant sons I found, too, on the field, little mementos of people and of places carried by men as mascots. Everywhere were broken lances of German and Belgian, side by side; scabbards and helmets, saddles and guns. These the peasants were collecting in a pile, to be removed by the military. High up over the graves of twelve hundred, as we stood there, a German biplane came and went, hovering like a carrion crow, seeking other victims for death.

"In the village itself death is still busy. A wounded German died as we stood by his side and a Belgian soldier placed his handkerchief over his face. Soldiers who filled the little market-place may be fighting for life now as I write. The enemy is in force not a mile away from them, and in a moment they may be attacked. It is significant that all German prisoners believed they were in France. The deception, it appears, was necessary to encourage them in their attack, and twelve hundred dead in the harrowed field died without knowing whom or what they were fighting."

THOUGHT THEY WERE IN FRANCE

A number of German prisoners were taken by the Belgians during the fighting at Haelen-Diest. From these it was

learned that the German soldiers really believed they were fighting in France. At Diest it is said that 400 surrendered the moment they lost their officers and were surprised to learn that they were in Belgium.

King Albert of Belgium was constantly in the field during the early engagements of the war, moving from point to point inside the Belgian lines by means of a high-powered automobile, in which he was slightly wounded by the explosion of a shell. He was thus enabled to keep in touch with the field forces, as well as with his general staff, and speedily endeared himself to the Belgian soldiery by his personal disregard of danger.

The Belgians by their gallant fight against the trained legions of Germany quickly won the admiration even of their foes. The army of Belgium was brought up to its full strength of 300,000 men and everywhere the soldiers of the little country battled to halt the invaders. Often their efforts proved effective. The losses on both sides were truly appalling, the Germans suffering most on account of their open methods of attack in close order. But their forces were like the sands of the sea and every gap in the ranks of the onrushing host was promptly filled by more Germans.

TIRLEMONT AND LOUVAIN

The fighting at Tirlemont and Louvain was described by a citizen of Ostend, who says he witnessed it from a church tower at Tirlemont first and later proceeded to Louvain. He says:

"Until luncheon time Tuesday, August 18, Tirlemont was quiet and normal. Suddenly, about 1 o'clock, came the sound of the first German gun. The artillery had opened fire.

"From the church tower it was possible to see distinctly the position of the German guns and the bursting of their shells. The Belgians replied from their positions east of Louvain. It was a striking sight, to the accompaniment of the ceaseless thud-thud of bursting shells with their puffs of cottonlike smoke, tearing up the peaceful wheat fields not far away.

BELGIANS RETIRE AT LOUVAIN

"Gradually working nearer, the shells began to strike the houses in Tirlemont. This was a signal for the populace, which had been confident that the Belgian army would protect them, to flee. All they knew was that the Germans were coming. From the tower the scene was like the rushing of rats from a disturbed nest. The people fled in every direction except one.

"I moved down to Louvain, where everything seemed quiet and peaceful. The people sat in the cafes drinking their evening beer and smoking. Meanwhile the Belgian troops were retiring in good order toward Louvain.

TOWN IN PANIC WITH REFUGEES

"By midnight the town was in the throes of a panic. Long before midnight throngs of refugees had begun to arrive, followed later by soldiers. By 11 o'clock the Belgian rear guard was engaging the enemy at the railroad bridge at the entrance to the town.

"The firing was heavy. The wounded began to come in. Riderless horses came along, both German and Belgian. These were caught and mounted by civilians glad to have so rapid a mode of escape.

TROOPS HINDERED BY CIVILIANS

"I remember watching a black clad Belgian woman running straight down the middle of a road away from the Germans. Behind her came the retiring Belgian troops, disheartened but valiant. This woman, clad in mourning, was the symbol of the Belgian populace.

"At some of the barricades along the route the refugees and soldiers arrived simultaneously, making the defense difficult. All about Tirlemont and Louvain the refugees interfered with the work of the troops. The road to Brussels always was crowded with refugees and many sorrowful sights were witnessed among them as they fled from the homes that had been peaceful and prosperous a few days before.

BRUSSELS FILLED WITH REFUGEES

"Brussels is filled with refugees from surrounding towns, despite the large numbers who left the city for Ghent and Ostend during the last few days," said a correspondent, writing from Ghent on August 20.

"The plight of most of the refugees is pitiable. Many are camped in the public square whose homes in the suburbs have been fired by the Prussians. The roads leading into Brussels have been crowded all day with all kinds of conveyances, many drawn by dogs and others by girls, women and aged peasants.

"Most of these people have lost everything. Few of them have any money. The peasant is considered lucky who succeeded in saving a single horse or a cow.

"Military men characterize the German force which is moving across Belgium as overwhelming, saying it consists of at least two or three army corps. The advance of this huge force is covered over the entire thirty-mile front by a screen of cavalry. The Germans had no difficulty in taking Louvain, which was virtually undefended.

"In the high wooded country between Louvain and Brussels the Germans found an excellent defensive position. Having occupied Louvain, the Kaiser's troops pushed forward with great celerity, the cavalry opening out in fan-shaped formation, spreading across country.

"At one point they ran into a strong force of Belgian artillery, which punished them severely. Later in the day a Belgian scouting force reached Louvain and found it unoccupied, but received imperative orders to fall back, because of the danger of being outflanked and annihilated."

ALLIES MEET THE INVADERS

By August 20 the Germans were in touch with the French army that had advanced into Belgium and occupied the line Dinant-Charleroi-Mons, the right of the French resting on Dinant and the left on Mons, where they were reinforced by the British expeditionary force under Field Marshal French.

There was a heavy engagement at Charleroi, and a four days' battle was begun at Mons August 23. Slowly but surely the Franco-British army was forced back across the French border, to take up a new position on the line, Noyon-Chanula Fere, which constituted the second line of the French defense.

The German right, opposing the British, was under command of General von Kluck; General von Buelow and General von Hausen commanded the German center opposing the Franco-Belgian forces between the Sambre and Namur and the Meuse. The Grand Duke Albrecht of Wuertemberg operated between Charleroi and the French border fortress of Maubeuge. The German Crown Prince led an army farther east, advancing toward the Meuse. The Crown Prince of Bavaria commanded the German forces farther south toward Nancy, and General von Heeringen was engaged in repulsing French attacks on Alsace-Lorraine, in the region of the Vosges mountains, where the French had met with early successes.

Meanwhile on August 18 the town of Aerschot had been the scene of a bloody engagement and was occupied and partly destroyed by the Germans. The occupation of Brussels followed on August 20-21 and the German line of communications was kept open by a line of occupied towns.

After overwhelming the Belgians the Kaiser's great advance army swept quickly into deadly conflict with the allies. The first mighty shock came at Charleroi, where the French were forced back, and on August 23 came the first battle with the British at Mons.

THE BATTLE OF MONS—FOUR DAYS OF FIGHTING—RETREAT OF THE ALLIES

All England was thrilled on the morning of September 10 when the British government permitted the newspapers to publish the first report from Field Marshal Sir John D. P. French, commander-in-chief of the British army allied with the French and Belgians on the continent, telling of the heroic fight made by the British troops, August 23-26, to keep from being annihilated by the Germans.

The withdrawal of the British army before the German advance was compared to the pursuit of a wildcat by hounds, the English force backing stubbornly toward the River Oise, constantly showing its teeth, but realizing that it must reach the river or perish. The report of Field Marshal French created much surprise in England, as it was not known until his statement was made public just how hard pressed the British army had been.

The communication was addressed to Earl Kitchener, the secretary for war, and its publication indicated that the government was responding to the public demand for fuller information on the progress of operations, so far as the British forces in France were concerned.

The report, as published in the London Gazette, the official organ, was as follows:

FIELD MARSHAL FRENCH'S REPORT

"The transportation of the troops from England by rail and sea was effected in the best order and without a check. Concentration was practically completed on the evening of Friday, August 21, and I was able to make dispositions to move the force during Saturday to positions I considered most favorable from which to commence the operations which General Joffre requested me to undertake. The line extended along the line of the canal from Condé on the west, through Mons and Binche on the east.

"During August 22 and 23 the advance squadrons did some excellent work, some of them penetrating as far as Soignies (a town of Belgium ten miles northeast of Mons) and several encounters took place in which our troops showed to great advantage.

"On Sunday, the 23d, reports began to come in to the effect that the enemy was commencing an attack on the Mons line, apparently in some strength, but that the right of the position from Mons was being particularly threatened.

"The commander of the First Corps had pushed his flank back to some high ground south of Bray and the Fifth Cavalry evacuated Binche, moving slightly south. The enemy thereupon occupied Binche.

"The right of the third division under General Hamilton was at Mons, which formed a somewhat dangerous salient and I directed the commander of the Second Corps if threatened seriously to draw back the center behind Mons.

"In the meantime, about five in the afternoon, I received a most unexpected message from General Joffre by telegraph, telling me that at least three German corps were moving on my position in front and that a second corps was engaged in a turning movement from the direction of Tournai. He also informed me that the two reserve French divisions and the Fifth French Army Corps on my right were retiring.

CHOSE A NEW POSITION

"In view of the possibility of my being driven from the Mons position, I had previously ordered a position in the rear to be reconnoitered.

"This position rested on the fortress of Maubeuge on the right and extended west to Jenlain, southeast of Valenciennes on the left. The position was reported difficult to hold because standing crops and buildings limited the fire in many important localities.

"When the news of the retirement of the French and the heavy German threatening on my front reached me, I endeavored to confirm it by aeroplane reconnoissance, and as a result of this I determined to effect a retirement to the Maubeuge position at daybreak on the 24th.

"A certain amount of fighting continued along the whole line throughout the night and at daybreak on the 24th the second division from the neighborhood of Harmignies made a powerful demonstration as if to retake Binche. This was supported by the artillery of both the first and the second divisions while the first division took up a supporting position in the neighborhood of Peissant. Under cover of this demonstration the Second Corps retired on the line of Dour, Quarouble and Frameries. The third division on the right of the corps suffered considerable loss in this operation from the enemy, who had retaken Mons.

"The Second Corps halted on this line, where they intrenched themselves, enabling Sir Douglas Haig, with the First Corps, to withdraw to the new position.

NIGHT ATTACK ON THE LEFT

"Toward midnight the enemy appeared to be directing his principal effort against our left. I had previously ordered General Allenby with the cavalry to act vigorously in advance of my left front and endeavor to take the pressure off.

"About 7:30 in the morning General Allenby received a message from Sir Charles Fergusson, commanding the fifth division, saying he was very hard pressed and in urgent need of support. On receipt of this message General Allenby drew in his cavalry and endeavored to bring direct support to the fifth division.

"During the course of this operation General DeLisle of the Second Cavalry Brigade thought he saw a good opportunity to paralyze the further advance of the enemy's infantry by making a mounted attack on his flank. He formed up and advanced for this purpose, but was held up by wire about 500 yards from his objective.

GENERAL SMITH-DORRIEN IN RETREAT

"The Nineteenth Infantry Brigade was brought by rail to Valenciennes on the 22d and 23d. On the morning of the 24th, they were moved out to a position south of Quarouble to support the left flank of the Second Corps. With the assistance of cavalry Sir Horace Smith-Dorrien was enabled to effect his retreat to a new position.

"At nightfall a position was occupied by the Second Corps to the west of Bavay, the First Corps to the right. The right was protected by the fortress of Maubeuge, the left by the Nineteenth Brigade in position between Jenlain and Bavay and cavalry on the outer flank. The French were still retiring and I had no support except such as was afforded by the fortress of Maubeuge.

ARMY IN GREAT PERIL

"I felt that not a moment must be lost in retiring to another position. I had every reason to believe that the enemy's forces were somewhat exhausted and I knew that they had suffered heavy losses. The operation, however, was full of danger and difficulty, not only owing to the very superior forces in my front, but also to the exhaustion of the troops.

"The retirement was recommenced in the early morning of the 25th to a position in the neighborhood of Le Cateau and the rear guard were ordered to be clear of Maubeuge and Bavay by 5:30 a. m.

"The fourth division commenced its detrainment at Le Cateau on Sunday, August 23, and by the morning of the 25th eleven battalions and a brigade of artillery with the divisional staff were available for service. I ordered General Snow to move out to take up a position with his right south of Solesmes, his left resting on the Cambrai-Le Cateau road south of La Chapriz. In this position the division rendered great help.

"Although the troops had been ordered to occupy Cambrai-Le Cateau-Landrecies position and ground had, during the 25th, been partially prepared and entrenched, I had grave doubts as to the wisdom of standing there to fight.

"Having regard to the continued retirement of the French right, my exposed left flank, the tendency of the enemy's western corps to envelop me, and, more than all, the exhausted condition of the troops, I determined to make a great effort to continue the retreat till I could put some substantial obstacle, such as the Somme or the Oise between my troops and the enemy.

RETREAT IS ORDERED

"Orders were therefore sent to the corps commanders to continue their retreat as soon as they possibly could toward the general line of Vermand, St. Quentin and Ribemont, and the cavalry under General Allenby were ordered to cover the retirement. Throughout the 25th and far into the evening the First Corps continued to march on Landrecies, following the road along the eastern border of the forest of Mormal, and arrived at Landrecies about 10 o'clock. I had intended that the corps should come further west so as to fill up the gap between Le Cateau and Landrecies, but the men were exhausted and could not get further in without a rest.

"The enemy, however, would not allow them this rest and about 9:30 that evening the report was received that the Fourth Guards brigade in Landrecies was heavily attacked

by troops of the Ninth German army corps, who were coming through the forest to the north of the town.

FRENCH AID IS GIVEN

"At the same time information reached me from Sir Douglas Haig that his first division was also heavily engaged south and east of Marilles. I sent urgent messages to the commander of two French reserve divisions on my right to come up to the assistance of the First Corps, which they eventually did.

"By about 6 in the afternoon the Second Corps had got into position, with their right on Le Cateau, their left in the neighborhood of Caudry, and the line of defense was continued thence by the fourth division toward Seranvillers.

"During the fighting on the 24th and 25th the cavalry became a good deal scattered, but by early morning of the 26th General Allenby had succeeded in concentrating two brigades to the south of Cambrai.

"On the 24th the French cavalry corps, consisting of three divisions under General Sordet, had been in billets, north of Avesnes. On my way back from Vavay, which was my *poste de commandement* during the fighting of the 23d and the 24th, I visited General Sordet and earnestly requested his co-operation and support. He promised to obtain sanction from his army commander to act on my left flank, but said that his horses were too tired to move before the next day.

"Although he rendered me valuable assistance later on in the course of the retirement, he was unable for the reasons given to afford me any support on the most critical day of all—namely, the 26th.

GERMANS USE HEAVY GUNS

"At daybreak it became apparent that the enemy was throwing the bulk of his strength against the left of the position occupied by the Second Corps and the fourth division. At this time the guns of four German army corps were in position against them, and Sir Horace Smith-Dorrien reported to me that he judged it impossible to continue his retirement at daybreak.

"I sent him orders to use his utmost endeavors to break

off the action and retire at the earliest possible moment, as it was impossible for me to send him support.

"The French cavalry corps under General Sordet was coming up on our left rear early in the morning, and I sent him an urgent message to do his utmost to come up and support the retirement of my left flank, but owing to the fatigue of his horses he found himself unable to intervene in any way.

"There had been no time to intrench the position properly, but the troops showed a magnificent front to the terrible fire which confronted them.

ARMY FACED ANNIHILATION

"At length it became apparent that if complete annihilation was to be avoided retirement must be attempted, and the order was given to commence it about 3:30 in the afternoon. The movement was covered with most devoted intrepidity and determination by the artillery, which had itself suffered heavily, and the fine work done by the cavalry in the further retreat from the position assisted materially the final completion of this most difficult and dangerous operation.

"I cannot close the brief account of this glorious stand of the British troops without putting on record my deep appreciation of the valuable services rendered by Sir Horace Smith-Dorrien. I say without hesitation that the saving of the left wing of the army under my command on the morning of the 26th could never have been accomplished unless a commander of rare and unusual coolness, intrepidity and determination had been present to personally conduct the operations.

"The retreat was continued far into the night of the 26th and through the 27th and the 28th, on which date the troops halted on the line from Noyon, Chauny and LeFere.

PRAISES SORDET'S HELP

"On the 27th and 28th I was much indebted to General Sordet and the French cavalry division which he commands for materially assisting my retirement and successfully driving back some of the enemy on Cambrai. General d'Amade also, with the Sixty-first and Sixty-second Reserve divisions, moved down from the neighborhood of Arras on the enemy's

right flank and took much pressure off the rear of the British forces.

"This closed the period covering the heavy fighting which commenced at Mons on Sunday afternoon, August 23, and which really constituted a four days' battle.

"I deeply deplore the very serious losses which the British forces suffered in this great battle, but they were inevitable, in view of the fact that the British army—only a few days after concentration by rail—was called upon to withstand the vigorous attack of five German army corps.

"It is impossible for me to speak too highly of the skill evinced by the two general officers commanding army corps, the self-sacrificing and devoted exertions of their staffs, the direction of troops by the divisional, brigade and regimental leaders, the command of small units by their officers and the magnificent fighting spirit displayed by the noncommissioned officers and men.

[Signed] "J. D. P. FRENCH,
"Field Marshal."

TOLD BY A WOUNDED SOLDIER

A British soldier, who was wounded in the fight during the retreat from Mons, told the following story of the battle there:

"It was Sunday, August 23, and the British regiments at Mons were merry-making and enjoying themselves in leisure along the streets. Belgian ladies, returning from church, handed the soldiers their prayer books as souvenirs, while the Belgian men gave the men cigarettes and tobacco.

"About noon, when the men were beginning to think about dinner, a German aeroplane appeared overhead and began throwing out a cloud of black powder, which is one of their favorite methods of assisting batteries to get the range.

"No sooner had the powder cloud appeared than shrapnel began to burst overhead and in a moment all was confusion and uproar. But it didn't take the regiments long to get into fighting trim and race through the city to the scene of operations, which was on the other side of the small canal, in the suburbs.

"Here our outposts were engaging the enemy fiercely. The outposts lost very heavily, most of the damage being done by shells. The rifle fire was ineffective, although at times the lines of contenders were not more than 300 yards apart.

"The first reinforcements to arrive were posted in a glass factory, the walls of which were loop-holed, and we doggedly held that position until nightfall, when we fixed bayonets and lay in wait in case the enemy made an attempt to rush the position in the darkness.

DESTROY BRIDGES BEHIND THEM

"About midnight orders came to retire over the canal and two companies were left behind to keep the enemy in check temporarily. After the main body had crossed the bridge was blown up, leaving the two outpost companies to get across as best they could by boats or swimming. Most of them managed to reach the main body again.

"The main body retired from the town and fell back through open country, being kept moving all night. When daylight arrived it was apparent from higher ground that Mons had been practically blown away by the German artillery.

"Throughout the morning we continued to fight a rear-guard action, but the steady march in retreat did not stop until 6 o'clock in the evening, when the British found themselves well out of range of the German artillery in a quiet valley.

"Here all the troops were ordered to rest and eat. As they had been without food since the previous morning's breakfast it was rather amusing to see the soldiers going into the turnip fields and eating turnips as though they were apples.

"At 8 o'clock all lights were extinguished, the soldiers were ordered to make no noise and the pickets pushed a long distance backward. Long before dawn the troops were hastily started again and continued the retirement.

"By noon the enemy was again heard from and a large detachment was assigned the task of fighting to protect our rear.

WATCH DUEL IN AIR

"During the afternoon both the German and British armies watched a duel in the air between French and German aeroplanes. The Frenchman was wonderfully clever, and succeeded in maneuvering himself to the upper position, which he gained after fifteen minutes of reckless effort. Then the Frenchman began blazing away at the German with a revolver.

"Finally he hit him, and the wounded German attempted to glide down into his own lines. The glide, however, ended in the British lines near my detachment, the West Kent Infantry. We found the aviator dead when we reached the machine. We buried him and burned the aeroplane.

"At dusk a halt was made for food, and as the Germans had fallen behind the English spent a quiet night. At dawn, however, we found the Germans close to our heels, and several regiments were ordered to prepare intrenchments. This is tedious and tiresome work, especially in the heat and without proper food, but we quickly put up fortifications which were sufficient to protect us somewhat from the artillery fire.

"It was not long before the German gunners found the range and began tearing up those rough fortifications, concentrating their fire on the British batteries, one of which was completely demolished. Another found itself with only six men. Both these disasters bore testimony to the excellent marksmanship of the German gunners.

OFFICER SPIKES THE GUNS

"As it became evident that we must leave these guns behind and continue the retreat, an officer was seen going around putting the guns out of action, so that they would be of no use to the Germans. His action required cool bravery, because the Germans, having found the range, continued firing directly at these batteries.

"Things rapidly got hotter, and the commanding officer ordered a double-quick retreat. We were not long in doing the retiring movement to save our own skins.

"I was wounded at this time by a Maxim bullet. For a

moment I thought my head had been blown off, but I recovered and kept on running until I reached a trench, where I had an opportunity to bandage the wound. I rushed off to the ambulances, but found the doctors so busy with men worse off than I that I went back to my place in the line."

THE BATTLE AT CHARLEROI

The loss of life in the Franco-German battle near Charleroi was admittedly the greatest of any engagement up to that time. It was at Charleroi that the Germans struck their most terrific blow at the allies' lines in their determination to gain the French frontier. Though the tide of battle ebbed and flowed for awhile the French were finally forced to give way and to retreat behind their own frontier, while the British were being forced back from their position at Mons. The fighting along the line was of the fiercest kind. It was a titanic clash of armies in which the allies were compelled to yield ground before the superior numbers of the German host.

One of the wounded, who was taken to hospital at Dieppe, said of the fighting at Charleroi:

"Our army was engaging what we believed to be a section of the German forces commanded by the crown prince when I was wounded. The Germans at one stage of the battle seemed lost. They had been defending themselves almost entirely with howitzers from strongly intrenched positions. The Germans were seemingly surrounded and cut off and were summoned to surrender. The reply came back that so long as they had ammunition they would continue to fight.

"The howitzer shells of the Germans seemed enormous things and only exploded when they struck the earth. When one would descend it would dig a hole a yard deep and split into hundreds of pieces. Peculiarly enough the howitzer shells did much more wounding than killing. The other shells of the Germans, like cartridges, the supply of which they seemed to be short of, did only little damage.

AEROS CONSTANTLY ABOVE

"The German aeroplane service was perfect. An aircraft was always hovering over us out of range. We were certain within an hour after we sighted an aeroplane to get

the howitzers among us. Whenever we fired, however, we did terrific execution with our seventy-five pieces of artillery. I counted in one trench 185 dead. Many of them were killed as they were in the act of firing or loading.

"The ground occupied by the Germans was so thick with dead that I believe I saw one soldier to every two yards. You might have walked for a mile on bodies without ever putting foot to the ground. They buried their dead when they had time, piling fifteen or twenty in a shallow pit."

THE FRENCH IN ALSACE-LORRAINE

On August 9 the advance guard brigade of the French right wing, under General Pau, a veteran of the Franco-Prussian war of 1870-71, invaded Alsace, fought a victorious action with an intrenched German force of equal numbers and occupied Muelhausen and Kolmar. The news of the French entry into the province lost in 1871 was received all over France with wild enthusiasm. The mourning emblems on the Strasbourg monument in Paris were removed by the excited populace and replaced by the tricolor flag and flowers in token of their joy. Muelhausen was soon after retaken by the German forces, only to be recaptured later by the French and then evacuated once more.

On the day of the first French occupation of Muelhausen France declared war against Austria in consequence of the arrival of two Austrian army corps on the Rhine to assist the main German army.

After the French occupation of Muelhausen a large German army was sent to the front in Alsace-Lorraine and succeeded in dislodging the French from that city, but not without severe fighting.

Two weeks after the war began the French defeated a Bavarian corps in Alsace and for awhile General Pau more than held his own in that former province of France. On August 21 the Germans drove back the French who had invaded Lorraine, and occupied Lunéville, ten miles inside the French border.

About the same time the French reoccupied Muelhausen,

after three days' fighting around the city. Another French army was reported to be within nineteen miles of Metz. But before the end of the month the French had been compelled to evacuate both their former provinces. They continued during September, however, to make frequent assaults on the German frontier positions, but without regaining a sure foothold on German soil, the bulk of their efforts being devoted to the defense of their own frontier strongholds.

FIGHTING AROUND NANCY

An official dispatch from the foreign office in Paris, dated August 28, said:

"Yesterday the French troops took the offensive in the Vosges mountains and in the region between the Vosges and Nancy, and their offensive has been interrupted, but the German loss has been considerable.

"Our forces found, near Nancy, on a front of three kilometers, 2,500 dead Germans, and near Vitrimont, on a front of four kilometers, 4,500 dead. Longwy, where the garrison consisted of only one battalion, has capitulated to the Crown Prince of Germany after a siege of twenty-four days."

FRENCH TRAPPED IN ALSACE

The German view of early operations in Alsace-Lorraine was given in the following dispatch September 2 from the headquarters of the general staff at Aix-la-Chapelle:

"The French forces were trapped in Alsace-Lorraine. Realizing that the French temperament was more likely to be swayed by sentiment than by stern adherence to the rules of actual warfare, the German staff selected its own battle line and waited. The French did not disappoint. They rushed across the border. They took Altkirch with little opposition. Then they rushed on to Muelhausen. Through the passes in the Vosges mountains they poured, horse, artillery, foot—all branches of the service. Strasburg was to fall and so swift was the French movement that lines of communication were not guarded.

"Then the German general staff struck. Their troops from Saarburg, from Strasburg and from Metz, under the command of General von Heeringen, attacked the French all

along the line. They were utterly crushed. The Germans took 10,000 Frenchmen prisoners and more than one hundred guns of every description. Alsace-Lorraine is now reported absolutely cleared of French troops.

"The armies of Crown Prince Frederick Wilhelm and of Crown Prince Rupprecht of Bavaria are moving in an irresistible manner into France. In a 3-day battle below Metz the French were terribly cut up and forced to retreat in almost a rout. It is declared that in this engagement the French lost 151 guns and were unable to make a stand against the victorious Germans until they had passed inside of their secondary line of defense."

THE GERMAN "SPY POSTERS"

Just prior to the declaration of war, cable dispatches from Paris told of a remarkable series of posters dotting the countryside of France. These posters, innocently advertising "Bouillon Kub," a German soup preparation, were so cleverly printed by the German concern advertising the soup, that they would act as signals to German army officers leading their troops through France.

In one of our photographic illustrations, one of these "spy posters" is seen posted on the left of an archway past which the French soldiers are marching en route to meet the Germans near the Alsace frontier.

The ingenuity of the signs was remarkable. Thus a square yellow poster would carry the information, "Food in abundance found here," while a round red sign would advertise, "This ground is mined." Many geometrical figures and most of the colors were utilized, and animal forms, flowers and even the American Stars and Stripes were employed to convey their messages of information.

The French Minister of the Interior got wind of the system, and orders were telegraphed throughout France to destroy these posters. Bouillon Kub, therefore, is no longer advertised in France.

A SOLDIER'S EXPERIENCE UNDER FIRE

A wounded French soldier described his experiences under fire during the Alsace campaign. He said in part:

"There! A blow in the breast, a tearing in the body, a fall with a loud cry and a terrible pain; there I lay one of the victims of this terrible day. My first sensation was anger at the blow, my second an expectation of seeing myself explode, for, judging by the sound of the ball, I believed I had a grenade in my body; then came the pain, and with it helplessness and falling.

"Oh, how frightful are those first moments! Where I was hit, how I was wounded, I could form no idea; I only felt that I could not stir, saw the battalion disappear from sight and myself alone on the ground, amid the fearful howling and whistling of the balls which were incessantly striking the ground around me.

"With difficulty could I turn my head a little, and saw behind me two soldiers attending on a third, who was lying on the ground. Of what happened I can give no account except that I cried for help several times as well as I could, for the pain and burning thirst had the upper hand. At last both of them ran to me, and with joy I recognized the doctor and hospital attendant of my company.

"'Where are you wounded?' was the first question. I could only point. My blouse was quickly opened, and in the middle of the breast a bloody wound was found. The balls still constantly whizzed around us; one struck the doctor's helmet, and immediately I felt a violent blow on the left arm. Another wound! With difficulty I was turned round, to look for the outlet of the bullet; but it was still in my body, near the spine. At last it was cut out. They were going away—'The wound in the arm, doctor.' This, fortunately, was looked for in vain; the ball had merely caused a blue spot and had sunk harmlessly into the ground.

"I extended my hand to the doctor and thanked him, as also the attendant, whom I commissioned to ask the sergeant to send word to my family. The doctor had carefully placed my cloak over me, with my helmet firmly on my head, in order in some measure to protect me from the leaden hail.

"Thus I lay alone with my own thoughts amid the most terrible fire for perhaps an hour and a half. All my thoughts, as far as pain and increasing weakness allowed, were fixed on

my family. Gradually I got accustomed to the danger which surrounded me, and only when too much sand from the striking bullets was thrown on my body did I remember my little enviable position. At last, after long, long waiting, the sanitary detachment came for me."

THE REAL TRAGEDY OF WAR

It is not a pleasant picture—this story of the French soldier. It has little in it of the grandeur, the beat of drums, the sound of martial music, which is supposed to accompany war. The tread of marching feet has died away, the excitement is gone, and man the demon is supplanted by man the everyday human creature of suffering and home folks and fear.

It is only a personal account of an individual experience, yet in it may be found the real significance and the real tragedy of war; for, after the fighting is over, after the intoxication of legalized murder has gone, after nations turn their attention from victories to men, it is the aggregate of individual experiences which counts the costs of war.

Thousands of German, French, Belgian, Austrian, Russian, and British men in the prime of life have been miserably slain and lie in obscure graves of which the enemy now is the guardian, while others writhe in the agony of lingering wounds or sullenly brood over their fate in the dull routine of military prisons. In every part of the warring countries mothers weep over the sons they shall see no more, and wives over the husbands snatched from them forever. In many a mansion, in many a comfortable home, in many a peasant's cottage, the empty chair is eloquent of the absent father, brother, husband or son who shall be absent forever.

CHAPTER X

GERMAN ADVANCE ON PARIS

Allies Withdraw for Ten Days, Disputing Every Inch of Ground With the Kaiser's Troops—Germans Push Their Way Through France in Three Main Columns—Official Reports of the Withdrawing Engagements—Paris Almost in Sight.

FLUSHED with their successes over the Allies at Mons and Charleroi, the Germans pushed their advance toward the French capital with great celerity and vigor. During the last week of August and the first few days of September, it appeared inevitable that the experience of Paris in 1870-71 was to be repeated and that a siege of the city by the German forces would follow immediately.

It was conceded that the armies of the Allies had been forced back and that Paris was endangered. The German advance was general, all along the line. The flower of the Kaiser's army had marched through Belgium and pushed back the lines of the Allies to the formidable rows of fortifications that surround Paris. The Germans advanced in three main columns, constantly in touch with one another, from the right, passing through Mons, Cambrai and Amiens, to the extreme left in Lorraine. The center threatened Verdun, and from that point the right advance swept through Northern France like an opening fan, with the fortress of Verdun as the pivot.

Three million men were engaged in the main struggle. When the Germans first reached the Franco-Belgian frontier near Charleroi they were opposed by 700,000 French and 150,000 British troops. After being driven back the Allies began

assembling 1,000,000 men between the frontier and Paris. The Allies hoped to hold the whole German army in check while the Russians pursued their successes in eastern Germany. French troops guarded the entire frontier, battling to check the other German invading columns. The holding of the Germans, once they broke through the fortifications that formed the chief reliance of the French, would be impossible. The next stand would be around Paris, which was well fortified. The invaders were, of course, attempting to get through where there were no forts.

ALLIES MAKE STRENUOUS RESISTANCE

Strenuous resistance to the onward movement of the German enemy was made by the Allies from day to day, but for a period of ten days there was an almost continual retirement of the French and British upon Paris. It was in fact a masterly retreat, but a retreat nevertheless. From the line of La Fère and Mezieres, occupied by the Allies after the battles at Mons and Charleroi, they fell back 70 miles in seven days, disputing every step of the way, but withdrawing gradually to the line of defenses around the French capital. From Cambrai the Germans pushed through Amiens to Beauvais; from Peronne to Roye, Montdidier, Creil, and on to the forest of Chantilly. From the region of Le Cateau and St. Quentin the German advance was by Noyon to Compiègne (famous for its memories of Joan of Arc's famous sortie), at which point the Allies made a desperate stand and the Germans had to fight for every inch of ground. They then passed through Senlis, which was first bombarded, down to Meaux, almost within sight of Paris, the head of the German army resting on a line between Beaumont, Meaux and La Ferte, at which point the resistance of the Allies finally forced a change in German plans.

Other German forces passed through Laon, Soissons and Chateau Thierry. Farther to the east, the road from Mezieres led the Germans to Rheims, Mourmelon, and opposite Chalons on the River Marne.

Another German army from the direction of Longwy, under the command of the Crown Prince, was operating through Suippes and on the wooded Argonne plateau, with

its five passes, famous in the action of 1792 which preceded the battle of Valmy. At the entrance to this hilly country stands the little town of Sainte Menehould, where there was severe fighting with the French. Here the German Crown Prince made his headquarters.

The great plain of the Argonne is full of most wonderful ecclesiastical buildings and many magnificent cathedrals, townhalls and ancient fortresses were passed by the warring armies in their advance and withdrawal, some of these historic structures sustaining irreparable damage.

The German advance continued southward toward Paris until September 4.

RELENTLESS PURSUIT OF THE BRITISH

All reports agree that during the retirement of the Allies, the Germans pursued the British headquarters staff with uncanny precision throughout the ten days from Mons back to Compiègne. After fierce street fighting in Denain and Landrecies Sir John French withdrew his headquarters to Le Cateau, which was at once made the target of a terrific bombardment. The town caught fire, burning throughout one night, and the British headquarters had to be evacuated, this time in favor of St. Quentin, in the local college. Here the same thing happened and Field Marshal French was compelled once more to retire, to the neighborhood of Compiègne.

In an official report issued on Sunday, September 6, it is stated that, "The 5th French army on August 29 advanced from the line of the Oise River to meet and counter the German forward movement and a considerable battle developed to the south of Guise. In this the 5th French army gained a marked and solid success, driving back with heavy loss and in disorder three German army corps, the 10th, the Guard, and a reserve corps. In spite of this success, however, and all the benefits which flowed from it, the general retirement to the south continued and the German armies, seeking persistently after the British troops, remained in practically continuous contact with the rearguards.

"On August 30 and 31 the British covering and delaying troops were frequently engaged, and on September 1 a very

vigorous effort was made by the Germans, which brought about a sharp action in the neighborhood of Compiègne. This action was fought principally by the 1st British Cavalry Brigade and the 4th Guards Brigade and was entirely satisfactory to the British. The German attack, which was most strongly pressed, was not brought to a standstill until much slaughter had been inflicted upon them and until ten German guns had been captured. The brunt of this affair fell upon the Guards Brigade, which lost in killed and wounded about 300 men."

This affair was typical of the numerous rearguard engagements fought by both the British and the French forces during their retirement.

MASTERLY TACTICS IN RETIRING

Pressing hard upon the rear of the Allies for ten days was the greatest military machine that has ever been assembled in one cohesive force. Through Belgium had poured nearly 2,000,000 German troops, made up of about 800,000 first-line soldiers and more than 1,000,000 reserves. The twenty-six-hour march of part of the German army through Brussels was stunning evidence of the might of the "war machine," and despite fierce fighting all the way, the great army had never faltered in its 150-mile advance in Belgium.

But the numerical might of the German advance was matched by the masterly tactics of the Allies in retiring. By these tactics, in which General Joffre, the French commander-in-chief, co-operated with the British field-marshal, Sir John French, the Allies prevented their lines being overwhelmed by the superior numbers of their foe, but the German right flank and center, strung out over a line more than 150 miles long, northeast of Paris, kept smashing on. Losses were frightfully heavy, but the Kaiser's order was "Take Paris!"

It was believed certain that the German general staff had staked everything on investing Paris immediately, by completely breaking down the opposition massed between the German lines and the city. Paris had therefore prepared for the siege, with her great circles of forts strengthened and her food supply replenished. Many of the residents fled the city in panic, fearing a repetition of the dread days of 1871, with their privation and distress, but the spirit of the French peo-

ple generally remained unshaken and General Gallieni, military governor of Paris, assumed complete control of the situation in the city.

GOVERNMENT MOVED TO BORDEAUX

On August 26 the French cabinet had resigned in a body and it was reconstructed on broader lines under Premier Viviani to meet the demands of the national emergency.

German troops were reported within 40 miles of Paris on September 3, and at 3 A. M. of that day a proclamation was issued by President Poincaré, announcing that the seat of government would be temporarily transferred from Paris to Bordeaux. The minister of the interior stated that this decision had been taken "solely upon the demand of the military authorities because the fortified places of Paris, while not necessarily likely to be attacked, would become the pivot of the field operations of the two armies."

The text of President Poincaré's proclamation was as follows:

"ENDURE AND FIGHT!"

"FRENCHMEN: For several weeks our heroic troops have been engaged in the fierce combat with the enemy. The courage of our soldiers has won for them a number of marked advantages. But in the north the pressure of the German forces has constrained us to retire. This situation imposes on the president of the Republic and the government a painful decision.

"To safeguard the national safety the public authorities are obliged to leave for the moment the city of Paris. Under the command of its eminent chief, the French army, full of courage and spirit, will defend the capital and its patriotic population against the invader. But the war must be pursued at the same time in the rest of the French territory.

"The sacred struggle for the honor of the nation and the reparation of violated rights will continue without peace or truce and without a stop or a failure. None of our armies has been broken.

"If some of them have suffered only too evident losses, the gaps in the ranks have been filled up from the waiting reserve

forces, while the calling out of a new class of reserves brings us tomorrow new resources in men and energy.

"Endure and fight! Such should be the motto of the allied army, British, Russians, Belgians and French.

"Endure and fight! While on the sea our allies aid us to cut the enemy's communications with the world.

"Endure and fight! While the Russians continue to carry a decisive blow to the heart of the German empire.

"It is for the government of this republic to direct this resistance to the very end and to give to this formidable struggle all its vigor and efficiency. It is indispensable that the government retain the mastery of its own actions. On the demand of the military authorities the government therefore transfers its seat momentarily to a point of the territory whence it may remain in constant relations with the rest of the country. It invites the members of parliament not to remain distant from the government, in order to form, in the face of the enemy, with the government and their colleagues, a group of national unity.

"The government does not leave Paris without having assured a defense of the city and its entrenched camp by all means in its power. It knows it has not the need to recommend to the admirable Parisian population a calm resolution and sangfroid, for it shows every day it is equal to its greatest duties.

"Frenchmen, let us all be worthy of these tragic circumstances. We shall gain a final victory and we shall gain it by untiring will, endurance and tenacity. A nation that will not perish, and which, to live, retreats before neither suffering nor sacrifice, is sure to vanquish."

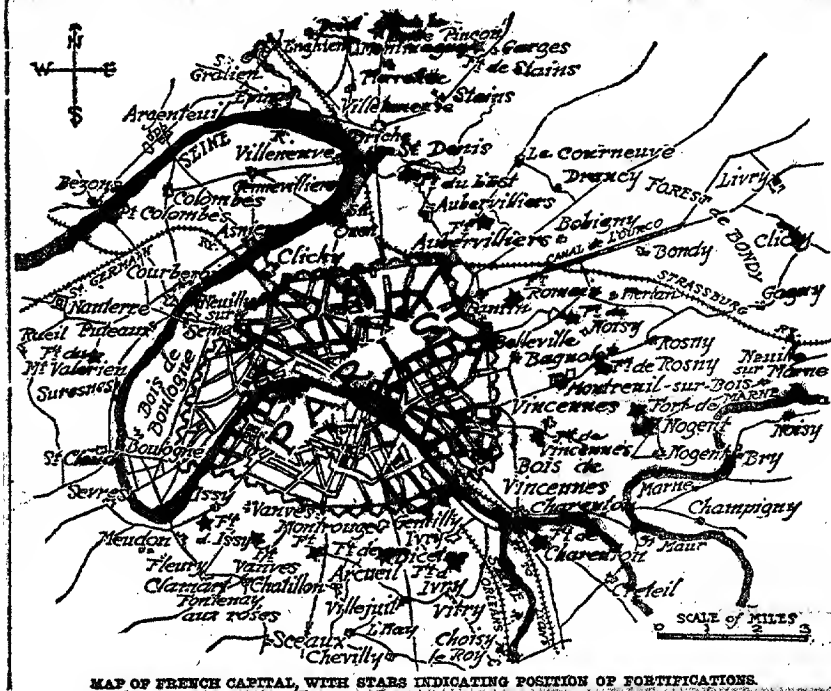

The removal of the French government departments to Bordeaux was accomplished within twenty-four hours and the southern city became at once a center of remarkable activity. Ambassador Herrick, representing the United States, remained in Paris to render aid to his fellow-countrymen who were seeking means of returning to America and were more than ever anxious to get away when a state of siege became imminent.

A radical change in the French military operations was put in effect after the Germans had swept in from Belgium, and had taken the cities of Lille, Roubaix, and Longwy. The French army had attempted to strike and shatter the Germans at their weakest point, and failed.

Paris prepared for the worst when the Kaiser's conquering army reached La Fère, about seventy miles away. From Amiens to La Fère the Germans pressed their attack hardest. As the Allies were seen to be gradually falling back, reserve troops were assembled in Paris and the forts put in readiness for siege.

THE FORTIFICATIONS OF PARIS

Paris has one of the strongest fortification systems of any city in the world. The siege of the giant city would be a much greater undertaking than forty-four years ago, as the forti-

MAP OF FRENCH CAPITAL, WITH STARS INDICATING POSITION OF FORTIFICATIONS

fications have been essentially augmented and strengthened since the Franco-Prussian war.

The fortifications consist of the old city walls, the old belt of forts and the new enceinture of the fortified camps, which have been advanced far outside of the reach of the old forts. The main wall, ten meters (33 feet) high, consists of ninety-four bastions and is surrounded by a ditch fifteen meters wide. Behind the wall a ringroad and a belt line run around the city.

The belt of old forts surrounds this main fortification of the city at a little distance and consists of not less than sixteen forts. Those farthest advanced are hardly half a mile distant from the main wall. The experiences of the last war, the immense progress of the artillery, and especially the wider reach of the modern siege guns induced the French army authorities to build a belt of still stronger forts, which surrounds the old fortress of 1870 like a protective net. The forts, redoubts and batteries belonging to this last belt of fortifications are situated at least two miles from the city limits proper, and even Versailles is taken into this belt of fortifications.

The circumference of the circle formed by them is 124 kilometers (nearly 77 miles) and the space included in it amounts to 1,200 square kilometers. This new belt of fortifications consists of seven forts of the first class, sixteen forts of the second class and fifty redoubts or batteries, which are connected with each other by the "Great Belt Line," of 113 kilometers (71 miles).

FORM LARGE FORTIFIED CAMPS

The strongest of these forts form fortified camps, large enough to give protection to strong armies and also the possibility for a new reconcentration. There are three of these camps. The northern camp includes the fortifications from the Fort de Cormeilles on the left to the Fort de Stains on the right wing, with the forts of the first class, Cormeilles and Domont, and the forts of the second class, Montlignon, Montmorency, Ecouen and Stains, and it is protected in the rear by the strong forts in the vicinity of St. Denis. The eastern camp goes from the Oureq canal and the forest of Bondy to the Seine, and its main strongholds are the forts of

Vaujours and Villeneuve-St. Georges, with the smaller forts of Chelles, Villiers, Champigny and Sully.

On the left bank of the Seine the southwestern camp is situated, including Versailles, whose main forts are those of St. Cyr, Haut-Buc, Villeras and Palaiseau, to which the large redoubt of Bois d'Arcy and the forts of Chatillon and Hautes-Bruyeres, situated a little to the rear, belong likewise.

To invest this strongest fortress of the world the line of the Germans ought to have a length of 175 kilometers and to its continuous occupation, even if the ring of the investing masses were not very deep, a much greater number of troops would be necessary than were used in 1870 for the siege of Paris.

GERMAN AMMUNITION CAPTURED

A correspondent at Nanteuil, September 12, thus described the capture of a German ammunition column while the Germans were feeling their way toward Paris:

"The seven-kilometer column was winding its way along Crepy-en-Valois when General Pau sent cavalry and artillery to intercept it. The column was too weakly guarded to cope with the attack, and so was captured and destroyed. This capture had an important bearing on the subsequent fighting.

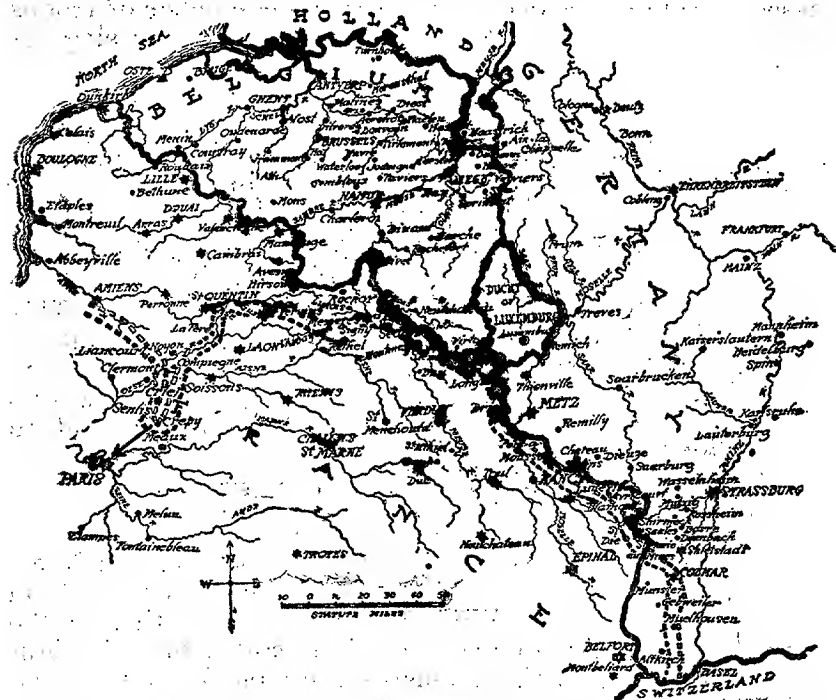

"A noticeable feature of the operations has been the splendid marching qualities of the French troops. This was displayed especially when two divisions, which were sent to intercept the expected attempt of the Germans to invest Paris, covered eighty kilometers (49½ miles) in two stages."

ALLIES PLAN TO PROTECT PARIS

The plan of the Allies on September 1 was to make a determined stand before Paris, in the effort to protect the city from the horrors of a siege. With their left wing resting on the strongly fortified line of the Paris forts and with their right wing strengthened by the defensive line from Verdun to Belfort, they would occupy a position of enormous military strength. If the Germans concentrated to move against their front the French reserve armies could assemble west of the Seine, move forward and attack the German invading columns in flank.

If in their effort to continue the great turning movement the Germans pushed forward across the Seine and attempted by encircling Paris to gain the rear of the allied armies, the French could mass their reserve corps behind their center at Rheims, push forward against the weakened German center in an attack that if successful would cut off the German invading columns and expose them to annihilation.

Such were the conditions and the possibilities when the German advance reached its climax on September 4.

POSITION OF HOSTILE ARMIES, SEPTEMBER 4, 1914

Heavy dotted line denotes battle front of the Allies; lighter line the position of the German Troops.

CHAPTER XI

BATTLE OF THE MARNE

German Plans Suddenly Changed—Direction of Advance Swings to the Southeast When Close to the French Capital—Successful Resistance by the Allies—The Prolonged Encounter at the Marne—Germans Retreat With Allies in Hot Pursuit for Many Miles.

SUDDENLY the German plans were changed. With Paris almost in sight, almost within the range of their heavy artillery, the German forces on the right of the line on September 4 changed the direction of their advance to a southeasterly course, which would leave Paris to the west. The people of the gay capital, who for several days had been preparing themselves once more for the thunder of the Prussian guns, began to breathe more freely, while all the world wondered at the sudden and spectacular transformation in the conditions of the conflict.

What had happened? Why was the advance thus checked and the march on Paris abandoned? Was it a trick, designed to lead the Allies into a trap? Or were the German troops too exhausted by forced marches and lack of rest to face the determined resistance of the allied forces before Paris?

These were the questions on every tongue, on both sides of the Atlantic, while the military experts sought strategic reasons for the change in German plans.

When the movement towards the east began the right of the German forces moved through Beaumont and L'Isle towards Meaux, apparently with the intention of avoiding Paris. Their front some twenty-four hours later was found to be extending across the River Marne as far south as Cou-

lommiers and La Ferté-Gaucher, the two opposing lines at that time stretching between Paris on the left flank and Verdun on the right.

On Monday, September 7, there came news that the southward movement of the German army had been arrested, and that it had been forced back across the Marne to positions where the German right wing curved back from La Ferté-sous-Jouarre along the bank of the River Ourcq, a tributary of the Marne, to the northward of Château Thierry. All this territory forms part of the district known as the "Bassin de Paris."

Then came a turn in the tide of war and the German plans were temporarily lost sight of when the Allies assumed the offensive along the Marne and the Ourcq and the Germans began to fall back. For four days their retreat continued. Ten miles, thirty miles, forty-five miles, back toward the northeast and east the invaders retired and Paris was relieved. The tide of battle had thrown the Germans away from the French capital and Frenchmen believed their retirement was permanent.

BATTLE OF THE MARNE

Important and interesting details of the battle of the Marne and the movements that preceded it are given in an official report compiled from information sent from the headquarters of Field Marshal Sir John French (commander-in-chief of the British expeditionary forces), under date of September 11. This account describes the movements both of the British force and of the French armies in immediate touch with it. It carries the operations from the 4th to the 10th of September, both days inclusive, and says:

"The general position of our troops Sunday, September 6, was south of the River Marne, with the French forces in line on our right and left. Practically there had been no change since Saturday, September 5, which marked the end of our army's long retirement from the Belgian frontier through Northern France.

"On Friday, September 4, it became apparent that there was an alteration in the advance of almost the whole of the

first German army. That army since the battle near Mons on the 23d of August had been playing its part in a colossal strategic endeavor to create a Sedan for the Allies by out-flanking and enveloping the left of their whole line so as to encircle and drive both the British and French to the south.

THE CHANGE IN GERMAN STRATEGY

"There was now a change in its objective and it was observed that the German forces opposite the British were beginning to move in a southeasterly direction instead of continuing southwest on to the capital, leaving a strong rear guard along the line of the River Oureq (which flows south of and joins the Marne at Lizy-sur-Oureq) to keep off the French Sixth Army, which by then had been formed and was to the northwest of Paris. They were evidently executing what amounted to a flank march diagonally across our front.

"Prepared to ignore the British as being driven out of the fight, they were initiating an effort to attack the left flank of the main French army, which stretched in a long curved line from our right toward the east, and so to carry out against it alone an envelopment which so far had failed against the combined forces of the Allies.

"On Saturday, the 5th, this movement on the part of the Germans was continued and large advance parties crossed the Marne southward at Trilport, Sammeron, La Ferte-sous-Jouarre and Chateau Thierry. There was considerable fighting with the French Fifth Army on the French left, which fell back from its position south of the Marne toward the Seine.

"On Sunday large hostile forces crossed the Marne and pushed on through Coulommiers and past the British right, farther to the east. They were attacked at night by the French Fifth, which captured three villages at the point of bayonets.

ALLIES TAKE THE OFFENSIVE

"On Monday, September 7, there was a general advance on the part of the Allies. In this quarter of the field our forces, which had now been reinforced, pushed on in a northeasterly direction in co-operation with the advance of the

French Fifth Army to the north and of the French Sixth Army to the eastward against the German rearguard along the River Ourcq.

"Possibly weakened by the detachment of troops to the eastern theater of operations and realizing that the action of the French Sixth Army against the line of Ourcq and the advance of the British placed their own flanking movement in considerable danger of being taken in the rear and on its flank, the Germans on this day commenced to retire toward the northeast.

"This was the first time that these troops had turned back since their attack at Mons a fortnight before and from reports received the order to retreat when so close to Paris was a bitter disappointment. From letters found on dead soldiers there is no doubt there was a general impression among the enemy's troops that they were about to enter Paris.

GERMAN RETREAT IS HASTENED

"On Tuesday, September 8, the German movement northeastward was continued. Their rear guards on the south of the Marne were being pressed back to that river by our troops and by the French on our right, the latter capturing three villages after a hand-to-hand fight and the infliction of severe loss on the enemy.

"The fighting along the Ourcq continued on this day and was of the most sanguinary character, for the Germans had massed a great force of artillery along this line. Very few of their infantry were seen by the French. The French Fifth Army also made a fierce attack on the Germans in Montmirail, regaining that place.

"On Wednesday, September 9, the battle between the French Sixth Army and what was now the German flank guard along the Ourcq continued.

"The British corps, overcoming some resistance on the River Petit Morin, crossed the Marne in pursuit of the Germans, who now were hastily retreating northwest. One of our corps was delayed by an obstinate defense made by a strong rear guard with machine guns at La Ferte-sous-Jouarre, where the bridge had been destroyed.

"On Thursday, September 10, the French Sixth Army continued its pressure on the west while the Fifth Army by forced marches reached the line of Chateau Thierry and Dormans on the Marne. Our troops also continued the pursuit on the north of the latter river and after a considerable amount of fighting captured some 1,500 prisoners, four guns, six machine guns and fifty transport wagons.

"Many of the enemy were killed or wounded and the numerous thick woods which dot the country north of the Marne are filled with German stragglers. Most of them appear to have been without food for at least two days.

"Indeed, in this area of the operations, the Germans seem to be demoralized and inclined to surrender in small parties. The general situation appears to be most favorable to the Allies.

"Much brutal and senseless damage has been done in the villages occupied by the enemy. Property has been wantonly destroyed. Pictures in chateaus have been ripped up and houses generally have been pillaged.

"It is stated on unimpeachable authority also that the inhabitants have been much ill-treated.

TRAPPED IN A SUNKEN ROAD

"Interesting incidents have occurred during the fighting. On the 10th of September part of our Second Army Corps, advancing into the north, found itself marching parallel with another infantry force some little distance away. At first it was thought this was another British unit. After some time, however, it was discovered that it was a body of Germans retreating.

"Measures promptly were taken to head off the enemy, who were surrounded and trapped in a sunken road, where over 400 men surrendered.

"On September 10 a small party under a noncommissioned officer was cut off and surrounded. After a desperate resistance it was decided to go on fighting to the end. Finally the noncommissioned officer and one man only were left, both of them being wounded.

"The Germans came up and shouted to them: 'Lay down

your arms!' The German commander, however, signed to them to keep their arms and then asked to shake hands with the wounded noncommissioned officer, who was carried off on his stretcher with his rifle by his side.

"Arrival of reinforcements and the continued advance have delighted our troops, who are full of zeal and anxious to press on.

SUCCESS OF THE FLYING CORPS

"One of the features of the campaign on our side has been the success obtained by the Royal Flying Corps. In regard to the collection of information it is impossible either to award too much praise to our aviators for the way they have carried out their duties or to overestimate the value of the intelligence collected, more especially during the recent advance.

"In due course certain examples of what has been effected may be specified and the far-reaching nature of the results fully explained, but that time has not arrived.

"That the services of our Flying Corps, which has really been on trial, are fully appreciated by our allies is shown by the following message from the commander-in-chief of the French armies, received September 9 by Field Marshal Lord Kitchener:

"Please express most particularly to Marshal French my thanks for the services rendered on every day by the English flying corps. The precision, exactitude and regularity of the news brought in by its members are evidence of their perfect organization and also of the perfect training of the pilots and the observers.—JOSEPH JOFFRE, General.'

"To give a rough idea of the amount of work carried out it is sufficient to mention that during a period of twenty days up to the 10th of September a daily average of more than nine reconnaissance flights of over 100 miles each has been maintained.

FIVE GERMAN PILOTS SHOT

"The constant object of our aviators has been to effect an accurate location of the enemy's forces and, incidentally, since the operations cover so large an area, of our own units. Nevertheless, the tactics adopted for dealing with hostile aircraft are to attack them instantly with one or more British

machines. This has been so far successful that in five cases German pilots or observers have been shot while in the air and their machines brought to ground.

"As a consequence the British Flying Corps has succeeded in establishing an individual ascendancy which is as serviceable to us as it is dangerous to the enemy.

"How far it is due to this cause it is not possible at present to ascertain definitely, but the fact remains that the enemy have recently become much less enterprising in their flights. Something in the direction of the mastery of the air already has been gained in pursuance of the principle that the main object of military aviators is the collection of information.

"Bomb dropping has not been indulged in to any great extent. On one occasion a petrol bomb was successfully exploded in a German bivouac at night, while from a diary found on a dead German cavalry soldier it has been discovered that a high explosive bomb, thrown at a cavalry column from one of our aeroplanes, struck an ammunition wagon, resulting in an explosion which killed fifteen of the enemy."

LOSSES AT THE MARNE ENORMOUS

Some idea of the terrific character of the fighting at the Marne and of the great losses in the prolonged battle may be gained from the following story, telegraphed on September 14 by a correspondent who followed in the rear of the allied army:

"General von Kluck's host in coming down over the Marne and the Grand Morin rivers to Sezanne, twenty-five miles southwest of Epernay, met little opposition, and I believe little opposition was intended. The Allies, in fact, led their opponents straight into a trap. The English cavalry led the tired Germans mile after mile, and the Germans believed the Englishmen were running away. When the tremendous advance reached Provins the Allies' plan was accomplished, and it got no farther.

"Fighting Sunday, September 6, was of a terrible character, and began at dawn in the region of La Ferte-Gaucher. The Allies' troops, who were drawn up to receive the Germans, understood it would be their duty to hold on their very

best that the attacking force at Meaux might achieve its task in security. The battle lasted all night and until late Monday.

"The Germany artillery fire was very severe, but not accurate. The French and English fought sternly on and slowly beat the enemy back.

"Attempts of the Germans to cross the Marne at Meaux entailed terrible losses. Sixteen attempts were foiled by the French artillery fire directed on the river and in one trench 600 dead Germans were counted.

COUNTRY STREWN WITH DEAD

"The whole country was strewn with the dead and dying. When at last the Germans retired they slackened their rifle fire and in one place retired twelve miles without firing a single shot. One prisoner declared that they were short of ammunition and had been told to spare it as much as possible.

"Monday saw a tremendous encounter on the Ourcq. In one village, which the Germans hurriedly vacated, the French in a large house found a dinner table beautifully set, with candles still burning on the table, where evidently the German staff had been dining. A woman occupant said they fled precipitately.

"There was a great deal of hand-to-hand fighting and bayonet work on the Ourcq, which resulted in the terrible Magdeburg regiment beating a retreat.

"Monday night General von Kluck's army had been thrown back from the Marne and from the Morin and to the region of Sezanne and his position was serious. Immediate steps were necessary to save his line of communications and retreat. To this end reinforcements were hurried north to the Meaux district and the Ourcq and tremendous efforts were made to break up the French resistance in this section.

GERMAN GUNS ARE SILENCED

"The second attempt on the Ourcq shared the fate of the first. Though all Monday night and well on into Tuesday the great German guns boomed along this river, the resistance of the allies could not be broken. 'Hold on!' was the command and every man braced himself to obey. While the

Oureq was being held the struggle of Sezanne was bearing fruit.

"The German resistance on Thursday morning was broken. I heard the news in two ways: from the silence of the German guns and from the wounded who poured down to the bases.

"The wounded men no longer were downhearted, but eager to rejoin the fray. On every French lip was the exclamation that 'They are in full retreat!' and 'They are rushing back home!' and in the same breath came generous recognition of the great help given by the British army.

"The number of wounded entailed colossal transportation work. I counted fifteen trains in eight hours. A fine, grim set of men, terribly weary but amiable, except for the officers.

GERMANS LEAVE SPOILS BEHIND

"The enemy crossed the Marne on the return journey north under great difficulties and beneath a withering fire from the British troops, who pursued them hotly. The German artillery operated from a height. There was again much hand-to-hand fighting and the river was swollen with dead.

"Tuesday night the British were in possession of La Ferté-sous-Jouarre and Chateau Thierry and the Germans had fallen back forty miles, leaving a long train of spoils behind them.

"On the same day, in the neighborhood of Vitry-le-François, the French troops achieved a victory. Incidentally they drove back the famous Imperial Guard of Germany from Sezanne, toward the swamps of Saint Gond, where, a century ago, Napoleon achieved one of his last successes. The main body of the guard passed to the north of the swamps, but I heard of men and horses engulfed and destroyed.

"'It is our revenge for 1814,' the French officers said. 'If only the emperor were here to see.'

BRITISH KEEP UP PURSUIT

"Wednesday the English army continued the pursuit toward the north, taking guns and prisoners.

"On that day I found myself in a new France. The good

news had spread. Girls threw flowers at the passing soldiers and joy was manifested everywhere.

"The incidents of Wednesday will astound the world when made known in full. I know that two German detachments of 1,000 men each, which were surrounded and cornered but which refused to surrender, were wiped out almost to the last man. The keynote of these operations was the tremendous attack of the Allies along the Ourcq Tuesday, which showed the German commander that his lines were threatened. Then came the crowning stroke.

"The army of the Ourcq and of Meaux and the army of Sezanne drew together like the blades of a pair of shears, the pivot of which was in the region of the Grand Morin. The German retreat was thus forced toward the east and it speedily became a rout."

RETREAT SEEN FROM THE SKY

The best view of the retreating German armies was obtained, according to a Paris report, by a French military airman, who, ascending from a point near Vitry, flew northward across the Marne and then eastward by way of Rheims down to the region of Verdun and back again in a zigzag course to a spot near Soissons.

He saw the German hosts not merely in retreat, but in flight, and in some places in disorderly flight.

"It was a wonderful sight," the airman said, "to look down upon these hundreds and thousands of moving military columns, the long gray lines of the Kaiser's picked troops, some marching in a northerly, others in a northeasterly direction, and all moving with a tremendous rapidity.

"The retreat was not confined to the highways, but many German soldiers were running across fields, jumping over fences, crawling through hedges, and making their way through woods without any semblance of order or discipline.

"These men doubtless belonged to regiments which were badly cut up in the fierce fighting which preceded the general retreat. Deprived of the majority of their officers, they made a mere rabble of fugitives. Many were without rifles, having

abandoned their weapons in their haste to escape their French and British pursuers."

GERMANS ABANDON GUNS

The London Times correspondent describes the German retreat in a hurricane, with rain descending in torrents, the wayside brooks swollen to little torrents.

"The gun wheels sank deep in the mud, and the soldiers, unable to extricate them, abandoned the guns," he said.

"A wounded soldier, returned from the front, told me that the Germans fled as animals flee which are cornered and know it.

"Imagine the roadway littered with guns, knapsacks, cartridge belts, Maxims and heavy cannon. There were miles of roads like this.

"And the dead! Those piles of horses and those stacks of men I have seen again and again. I have seen men shot so close to one another that they remained standing after death.

"At night time the sight was horrible beyond description. They cannot bury whole armies.

"In the day time over the fields of dead carrion birds gathered, led by the gray-throated crow of evil omen with a host of lesser marauders at his back. Robbers, too, have descended upon these fields.

"Trainload after trainload of British and French troops swept toward the weak points of the retreating host.

"The Allies benefited by this advantage of the battleground; there is a network of railways, like the network of a spider's web."

FIGHTING DESCRIBED BY U. S. OFFICERS

Two military attaches of the United States embassy at Paris, Lieut.-Col. H. T. Allen and Capt. Frank Parker, both of the Eleventh cavalry, U. S. A., returned on September 15 from an automobile trip over the battlefield where from September 8 until the night of September 11 the French and Germans were fiercely engaged. This battle was the one which assured the safety of Paris.

On September 1 the German left and center were separated, but like a letter "V" were approaching each other,

with Paris as their objective. Had the Allies attacked at that time they would have had to divide their forces and, so weakened, give battle to two armies. By retreating they drew after them the two converging lines of the V and when the Germans were in wedge-shaped formation, attacked them on the flank and center at Meaux and made a direct attack at Sezanne.

The four days' battle at Meaux ended with the Germans crossing the river Aisne and retreating to the hills north and west of Soissons. Col. Allen and Capt. Parker saw the end of the battle north of Sezanne, which resulted in the retreat of the Germans to Rheims.

The battles, as Col. Allen and Capt. Parker describe them, were as follows:

On the 8th the Germans advanced from a line stretching from Epernay and Chalons, a distance of twenty-five kilometers (sixteen miles). In this front, counting from the German right, were the Tenth, the Guards, the Ninth and Twelfth Army Corps. The presence of the Guards, the *corps d'elite* of the German army, suggested that this was intended to be a main attack upon Paris and that the army at Meaux was to occupy the center. The four combined corps numbered over 200,000. The French met them, they assert, with 190,000.

The Germans advanced until their left was at Vitry-le-Francois and their right rested at Sezanne, making a column 15 miles long, headed west toward Paris. The French butted the line six miles east of Sezanne, in the forests of La Fere and Champenoise. It was here that the greater part of the fight occurred. It was fighting at long distance with artillery and from trench to trench with the bayonet.

THIRTY THOUSAND MEN KILLED

During the four days in which fortune rested first on one flag and then on another 30,000 men of both armies are said to have been killed and a considerable number of villages were wiped from the map by the artillery of both armies.

Two miles from Sezanne a French regiment was destroyed by an ambush. The Germans had thrown up conspicuous trenches and with decoys sparsely filled them. From the forest in the rear the mitrailleuse was trained on the French.

The French infantry charged this trench and the decoys fled, making toward the flanks, and as the French poured over the trenches the hidden guns swept them.

In another trench the American attachés counted the bodies of more than 900 German guards, not one of whom had attempted to retreat. They had stood fast with their shoulders against the parapet and taken the cold steel. Everywhere the loss of life was appalling. In places the dead lay across each other three and four deep.

TURCOS FIERCEST FIGHTERS OF ALL

"The fiercest fighting of all seems to have been done by the Turcos and Senegalese. In trenches taken by them from the guards and the famous Death's Head Hussars, the Germans showed no bullet wounds. In nearly every attack the men from the desert had flung themselves upon the enemy, using only the butt or the bayonet. Man for man no white man drugged for years with meat and alcohol is a physical match for these Turcos, who eat dates and drink water," said Richard Harding Davis, who saw the end of the fighting at Meaux. "They are as lean as starved wolves. They move like panthers. They are muscle and nerves and they have the warrior's disregard of their own personal safety in battle, and a perfect scorn of the foe.

"As Kipling says, 'A man who has a sneaking desire to live has a poor chance against one who is indifferent whether he kills you or you kill him.'"

NIGHT BATTLE DESCRIBED BY SOLDIER

The following narrative of a night engagement during the prolonged battle of the Marne is quoted from a French soldier's letter to a compatriot in London:

"Our strength was about 400 infantrymen. Toward midnight we broke up our camp and marched off in great silence, of course not in closed files, but in open order. We were not

allowed to speak to each other or to make any unnecessary noise, and as we walked through the forest the only sound to be heard was that of our steps and the rustling of the leaves. It was a perfectly lovely night; the sky was so clear, the atmosphere so pure, the forest so romantic, everything seemed so charming and peaceful that I could not imagine that we were on the warpath, and that perhaps in a few hours this forest would be aflame, the soil drenched by human blood, and the fragrant herbs covered with broken limbs.

"Yet all those silent, armed men, marching in the same direction as I did, were ever so many proofs that no peace meeting or any delightful romantic adventure was near, and I wondered what thoughts were stirring all those brains. Suddenly a whisper passed on from man to man. It was the officer's command. A halt was made, and in the same whisper we were told that part of us had to change our direction so that the two directions would form a V. A third division proceeded slowly in the original direction.

COMMANDS ARE WHISPERED

"I belonged to what may be called the left leg of the V. After what seemed to be about half an hour, we reached the edge of the forest, and from behind the trees we saw an almost flat country before us, with here and there a tiny little hill, a mere hump four or five feet high. On the extreme left-hand side the land seemed to be intersected by ditches and trenches.

"Another whispered command was passed from man to man, and we all had to lie down on the soil. A moment afterward we were thus making our way to the above-mentioned ditches and trenches. It is neither the easiest nor the quickest way to move, but undoubtedly the safest, for an occasional enemy somewhere on the hills at the farther end of the field would not possibly be able to detect us. I don't know how long it took us to reach the ditches, which were, for the greater part, dry; nor do I know how long we remained there or what was happening. We were perfectly hidden from view, lying flat down on our stomachs, but we were also unable to see anything. Everybody's ears were attentive, every nerve was strained. The sun was rising. It promised to be a hot day.

FIRST SHOT IS HEARD

"Suddenly we heard a shot, at a distance of what seemed to be a mile or so, followed by several other shots. I ventured to lift my body up in order to see what was happening. But the next moment my sergeant, who was close by me, warned me with a knock on my shoulder not to move, and the whispered order ran, 'Keep quiet! Hide yourself!' Still, the short glance had been sufficient to see what was going on. Our troops, probably those who had been left behind in the forest, were crossing the plain and shooting at the Germans on the crest of the hill, who returned the fire.

"The silence was gone. We heard the rushing of feet at a short distance; then, suddenly, it ceased when the attacking soldiers dropped to aim and shoot. Some firing was heard, and then again a swift rush followed. This seemed to last a long time, but it was broken by distant cries, coming apparently from the enemy. I was wondering all the time why we kept hidden and did not share in the assault.

"The rifle fire was incessant. I saw nothing of the battle. Would our troops be able to repulse the Germans? How strong were the enemy? They seemed to have no guns, but the number of our soldiers in that field was not very large.

ATTACKED WITH BAYONETS

"A piercing yell rose from the enemy. Was it a cry of triumph? A short command rang over the field in French, an order to retreat. A swift rush followed; our troops were being pursued by the enemy. What on earth were we waiting for in our ditches? A bugle signal, clear and bright. We sprang to our feet, and 'At the bayonet!' the order came. We threw ourselves on the enemy, who were at the same time attacked on the other side by the division which formed the other 'leg' of the V, while the 'fleeing' French soldiers turned and made a savage attack.

"It is impossible to say or to describe what one feels at such a moment. I believe one is in a state of temporary madness, of perfect rage. It is terrible, and if we could see ourselves in such a state I feel sure we would shrink with horror.

"In a few minutes the field was covered with dead and wounded men, almost all of them Germans, and our hands

and bayonets were dripping with blood. I felt hot spurts of blood in my face, of other men's blood, and as I paused to wipe them off, I saw a narrow stream of blood running along the barrel of my rifle.

"Such was the beginning of a summer day."

SCENES ON THE BATTLEFIELD

Writing from Sezanne a few days after the battle of the Marne a visitor to the battlefield described the conditions at that time as follows:

"The territory over which the battle of the Marne was fought is now a picture of devastation, abomination and death almost too awful to describe.

"Many sons of the fatherland are sleeping their last sleep in the open fields and in ditches where they fell or under hedges where they crawled after being caught by a rifle bullet or piece of shell, or where they sought shelter from the mad rush of the franc-tireurs, who have not lost their natural dexterity with the knife and who at close quarters frequently throw away their rifles and fight hand to hand.

"The German prisoners are being used on the battlefield in searching for and burying their dead comrades. Over the greater part of the huge battlefield there have been buried at least those who died in open trenches on the plateaus or on the high roads. The extensive forest area, however, has hardly been searched for bodies, although hundreds of both French and Germans must have sought refuge and died there. The difficulty of finding bodies is considerable on account of the undergrowth.

"Long lines of newly broken brown earth mark the graves of the victims. Some of these burial trenches are 150 yards long. The dead are placed shoulder to shoulder and often in layers. This gives some idea of the slaughter that took place in this battle.

"The peasants, who are rapidly coming back to the scene, are marking the grave trenches with crosses and planting flowers above or placing on them simple bouquets of dahlias, sunflowers and roses.

FOUGHT ON BEAUTIFUL CHATEAU LAWNS

"Some of the hottest fighting of the prolonged battle took place around the beautiful chateau of Mondement, on a hill six miles east of Sezanne. This relic of the architectural art of Louis XIV occupied a position which both sides regarded as strategically important.

"To the east it looked down into a great declivity in the shape of an immense Greek lamp, with the concealed marshes of St. Soud at the bottom. Beyond are the downs and heaths of Epernay, Rheims and Champagne, while the heights of Argonne stand out boldly in the distance. To the west is a rich agricultural country.

"The possession of the ridge of Mondement was vital to either the attackers or the defenders. The conflict here was of furnace intensity for four days. The Germans drove the French out in a terrific assault, and then the French guns were brought to bear, followed by hand-to-hand fighting on the gardens and lawns of the chateau and even through the breached walls.

"Frenchmen again held the building for a few hours, only to retire before another determined German attack. On the fourth day they swept the Germans out again with shell fire, under which the walls of the chateau, although two or three feet thick, crumpled like paper."

The same correspondent described evidences on the battlefields of how abundantly the Germans were equipped with ammunition and other material. He saw pyramid after pyramid of shrapnel shells abandoned in the rout, also innumerable paniers for carrying such ammunition. These paniers are carefully constructed of wicker and hold three shells in exactly fitting tubes so that there can be no movement.

The villages of Oyes, Villeneuve, Chatillon and Soizy-aux-Bois were all bombarded and completely destroyed. Some fantastic capers were played by the shells, such as blowing away half a house and leaving the other half intact; going through a window and out by the back wall without damaging the interior, or going a few inches into the wall and remaining fast without exploding.

Villeneuve, which was retaken three times, was, including its fine old church, in absolute ruins.

A SERIES OF BATTLES

The battle line along the Marne was so extended that the four-days' fighting from Sunday, September 6, to Thursday morning, September 10, when the Germans were in full retreat, comprised a series of bloody engagements, each worthy of being called a battle. There were hot encounters south of the Marne at Crecy, Montmirail and other points. At Chalons-sur-Marne the French fought for twenty-four hours and inflicted heavy losses on the enemy. General Exelmans, one of France's most brilliant cavalry leaders, was dangerously wounded in leading a charge.

There was hard fighting on September 7 between Lagny and Meaux, on the Trilport and Crecy-en-Brie line, the Germans under General von Kluck being compelled to give way and retire on Meaux, at which point their resistance was broken on the 9th.

General French's army advanced to meet the German hosts with forced marches from their temporary base to the southeast of Paris.

The whole British army, except cavalry, passed through Lagny, and the incoming troops were so wearied that many of them at the first opportunity lay down in the dust and slept where they were.

But a few hours' rest worked a great change, and a little later the British troops were following the German retreat up the valley with bulldog tenacity.

The British artillery did notable work in those days, according to the French military surgeons who were stationed at Lagny. At points near there the bodies of slain Germans who fell before the British gunners still littered the ground on September 10, and the grim crop was still heavier on the soil farther up the valley, where the fighting was more desperate.

As far as possible the bodies were buried at night, each attending to its own fallen.

MANY SANGUINARY INCIDENTS

Sanguinary incidents were plentiful in the week of fighting to the south of the Marne. In an engagement not far from Lagny the British captured thirty Germans who had

given up their arms and were standing under guard when, encouraged by a sudden forward effort of the German front, they made a dash for their rifles. They were cut down by a volley from their British guards before they could reach their weapons.

"Among dramatic incidents in the fighting," according to an English correspondent, "may be mentioned the grim work at the ancient fishponds near Ermenonville. These ponds are shut in by high trees. Driving the enemy through the woods, a Scotch regiment hustled its foes right into the fishponds, the Scotchmen jumping in after the Germans up to the middle to finish them in the water, which was packed with their bodies."

VAST GRAVEYARD AT MEAUX

Some idea of how the Germans were harassed by artillery fire during their retreat was obtained on a visit to the fields near Meaux, the scene of severe fighting. The German infantry had taken a position in a sunken road, on either side of which were stretched in extended lines hummocks, some of them natural and some the work of spades in the hands of German soldiers.

The sunken road was littered with bodies. Sprawling in ghastly fashion, the faces had almost the same greenish-gray hue as the uniforms worn. The road is lined with poplars, the branches of which, severed by fragments of shells, were strewn among the dead. In places whole tops of trees had been torn away by the artillery fire.

Beside many bodies were forty or fifty empty cartridge shells, while fragments of clothing, caps and knapsacks were scattered about. This destruction was wrought by batteries a little more than three miles distant. Straggling clumps of wood intervened between the batteries and their mark, but the range had been determined by an officer on an elevation a mile from the gunners. He telephoned directions for the firing and through glasses watched the bursting shells.

THE BATTLE AT CRECY

A graphic picture of the fight in Crecy wood was given by a correspondent who said:

The French and English in overwhelming numbers had poured in from Lagny toward the River Marne to reinforce the flanking skirmishers. One of the smaller woods south-east of Crecy furnished cover for the enemy for a time, but led to their undoing. The Allies' patrols discovered them in the night as the Germans were moving about with lanterns.

Suddenly the invaders found their twinkling glow-worms the mark for a foe of whom they had been unaware. Without warning a midnight hail storm from Maxims screamed through the trees. The next morning scores of lanterns were picked up in the wood, with the glasses shattered. A dashing cavalry charge by the British finally cleared the tragic wood of the Germans.

BRITISH BLOW UP A BRIDGE

At Lagny one of the sights of the town was a shattered bridge, which was blown up by General French as soon as he got his army across it. At that time British infantry and artillery had poured through the town and over the bridge for several days. General French's idea was to keep raiding detachments of German cavalry from incursions into the beautiful villas and gardens of the western suburbs.

Fifteen minutes after the bridge had been reduced to a twisted mass of steel and broken masonry a belated order came to save it, but the British engineers who had received the order to destroy it had done their work well.

The inhabitants were cleared out of all the neighboring houses, which were shaken by the terrific explosion when the charge was set off. Every window in the nearby houses was shattered.

The people of Lagny took the destruction of their beautiful bridge in good part. They were too grateful for their deliverance from the Germans to grumble about the wrecked bridge.

GERMAN LOSSES AT THE MARNE

There is no doubt that the German losses in the engagements at the Marne far exceeded those of the Allies and were most severe, in both men and material. The Germans made incredible efforts to cross the Marne. The French having destroyed all the bridges, the Germans tried to construct

three bridges of boats. Sixteen times the bridges were on the point of completion, but each time they were reduced to matchwood by the French artillery.

"There is not the slightest doubt," said a reliable correspondent, "that but for the superb handling of the German right by General von Kluck, a large part of Emperor William's forces would have been captured at the Marne. The allied cavalry did wonders, and three or four additional divisions of cavalry could have contributed towards a complete rout of the Germans."

The general direction of the German retirement was northeast, and it was continued for seventy miles, to a line drawn between Soissons, Rheims and Verdun.

A week after the battle the field around Meaux had been cleared of dead and wounded, and only little mounds with tiny crosses, flowers and tricolored flags recalled the terrible struggle.

The inhabitants of neighboring villages soon returned to their homes and resumed their ordinary occupations.

FALL OF MAUBEUGE

While the fighting at the Marne was in progress, German troops achieved some successes in other parts of the theater of war. Thus, the fortified French town of Maubeuge, on the Sambre river midway between Namur in Belgium and St. Quentin, France, fell to the Germans on September 7. The investment began on August 25. More than a thousand shells fell in one night near the railway station and the Rue de France was partially destroyed. The loss of life, however, was comparatively slight.

At 11:50 o'clock on the morning of September 7 a white flag was hoisted on the church tower and trumpets sounded "cease firing," but the firing only ceased at 3:08 o'clock that afternoon. In the meantime the greater part of the garrison succeeded in evacuating the town. The German forces marched in at 7:08 o'clock that evening.

The retreat of the German forces from the Marne ended the second stage of the great war.

CHAPTER XII

THE RUSSIAN CAMPAIGN

Slow Mobilization of Troops—Invasion of German and Austrian Territory—Cossacks Lead the Van—Early Successes in East Prussia—"On to Berlin"—Heavy Losses Inflicted on Austrians—German Troops Rushed to the Defense of the Eastern Territory.

WHEN at 7:30 o'clock on the evening of August 1, 1914, the German Ambassador at St. Petersburg handed the declaration of war to the Russian foreign minister, the immediate reason was that Russia had refused to stop mobilizing her army, as requested by Germany on July 30.

The general mobilization of the Russian army and fleet was proclaimed on July 31 and martial law was proclaimed forthwith in Germany. The government of the Kaiser had given Russia twenty-four hours in which to reply to its ultimatum of the 30th. Russia paid no attention to the ultimatum, but M. Goremykin, president of the Council of the Russian Empire, issued a manifesto which read:

"Russia is determined not to allow Servia to be crushed and will fulfill its duty in regard to that small kingdom, which has already suffered so much at Austria's hands."

Austria-Hungary declared war against Russia on August 6. From that time on the Russian army had two main objectives—first, the Austrian province of Galicia, and second the eastern frontier of Germany, across which lay the territory known as East Prussia. And while the early days of the great conflict saw a German host pouring into Belgium, animated by the battle-cry, "On to Paris!" the gathering legions of the Czar headed to the west and crossed the Prussian frontier with hoarse, resounding shouts of "On to Berlin!"

MOBILIZATION WAS SLOW

The mobilization of the Russian army was slow compared with that of Germany, France and Austria, and some weeks elapsed after the declaration of war before Russia was prepared to attack Germany with the full force of which it was capable. The immense distances to be traversed by troops proceeding to the frontier and by the reserves to their respective depots caused delays that were unavoidable but were minimized by the eagerness of the Russian soldiery to get to the front. In Russia, as in all the other great countries engaged in the conflict, with the probable exception of Austria, the war was popular and a wave of patriotic enthusiasm and martial ardor swept over the land, from the Baltic to the Black Sea, from St. Petersburg to Siberia.

In Russia military service is universal and begins at the age of 20, continuing for twenty-three years. There are three divisions of the Russian army—the European, Caucasian and Asiatic armies. Military service of the Russian consists of three years in the first line, fourteen years in the reserve (during which time he has to undergo two periods of training of six weeks each) and five years in the territorial reserve. The Cossacks, however, hold their land by military tenure and are liable to serve at any time in the army. They provide their own horses and accouterments. The total strength of the Russian army is about 5,500,000 men; the field force of the European army consists of 1,000,000 soldiers with about the same number in the second line. There were besides at the beginning of the war over 5,000,000 men unorganized but available for duty.

ARMY REORGANIZED RECENTLY

Since the disastrous war with Japan the Russian army has been reorganized and it has profited largely by the harsh experience of the Manchurian campaign.

The physique of the Russian infantryman is second to none in Europe. The Russian "moujik" (peasant) is from childhood accustomed to cover long distances on foot, so that marches of from 30 to 40 miles are covered without fatigue by even the youngest recruits. They wear long boots, which are made of excellent soft leather, so that sore feet were

quite the exception even in Manchuria, where very long marches were undergone by many of the units.

Each regiment of infantry contains four battalions commanded by a major or lieutenant-colonel. The battalion consists of four companies of 120 men, commanded by a captain, so that each regiment on a war footing numbers upwards of 2,000 men.

The Russian cavalry is divided into two main categories. There are the heavy regiments of the Guard, which consist mainly of Lancer regiments, and there are also numberless Cossack or irregular cavalry regiments, which are recruited chiefly from the districts of the River Don and the highlands of the Caucasus.

The horses of the Russian horse and field artillery are distinctly poor and very inferior to those of the cavalry. The artillery is therefore somewhat slow in coming into action. But the horses, while weedy-looking, are very hardy and pull the guns up steep gradients. The Russian gunners prefer to take up "indirect" rather than "direct" positions. Batteries are also rather slow in changing positions and in moving up in support of their infantry units.

THE RUSSIAN COSSACKS

What the Uhlans are to the German army, the Cossacks of the Don and the Caucasus are to the Russians—scouts, advance guards and "covering" cavalry. They are good all-round fighters, capable of long-continued effort and tireless in the saddle; they are also trained to fight in dismounted action.

As a soldier the Cossack is altogether unique; his ways are his own and his confidence in his officers and himself is perfect. His passionate love of horses makes his work a pleasure. The Cossack seat on horseback is on a high pad-saddle, with the knee almost vertical and the heel well drawn back. Spurs are not worn, and another remarkable thing is that he has absolutely no guard to his sword. The Russian soldier scorns buttons; he says, "They are a nuisance; they have to be cleaned, they wear away the cloth, they are heavy, and they attract the attention of the enemy."

The Cossack pony is a quaint little beast to look at, but the finest animal living for his work, and very remarkable

for his wonderful powers of endurance. The Cossack and his mount have been likened to a clever nurse and a spoilt child—each understands and loves the other, but neither is completely under control. The Cossack does not want his horse to be a slave, and recognizes perfectly that horses, like children, have their whims and humors and must be coaxed and reasoned with, but rarely punished. The famous knout (whip) is carried by the Cossacks at the end of a strap across the left shoulder. Most of the men are bearded and in full dress, with the high fur cap stuck jauntily on the head of square cut hair, the Cossack presents a picturesque and martial figure. The appearance of these men is quite different from that of the clean-shaven regular infantryman of the Russian army.

RUSSIAN PLAN OF CAMPAIGN

While the direct objective of the Russians was Berlin, there were many reasons why a bee-line course could not be followed. Germany had prepared an elaborate defense system to cover the direct approaches to Berlin, and the fortresses of Danzig, Graudenz, Thorn, and Posen were important points in this scheme. The nature of the country also adapts itself to these defensive works and would make progress slow for an attacker.

Moreover, as Austria and her forces mobilized before Russia, a diversion was created by the Austrian invasion of south Poland, in which the Germans also took the offensive. Under these circumstances the Russian plan of campaign resolved itself into three parts:—

(1) A northern movement from Kovno and Grodno on Insterburg and Königsberg as a counter-attack.

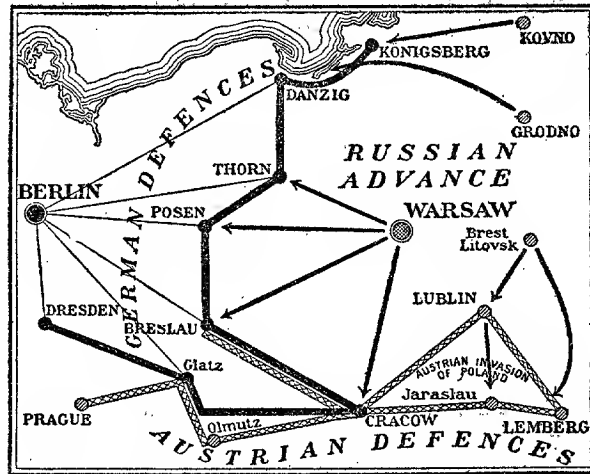

(2) A central movement from Warsaw towards Posen with supporting movements north and south.

(3) A southern movement on Lublin in Poland to repulse the invaders combined with a movement from the east on Lemberg in order to turn the Austrian flank.

The first purpose of Russia was to clear Poland of enemies, as they threatened the Russian left flank. At the same time Russia took the offensive by an invasion of Prussia in the

north. This latter movement led to a victory at Gumbinnen and the investment of Königsberg. Later came victory at Lublin, rolling back the Austrians, and the capture of Lemberg, which signalized the Russian invasion of Austrian territory. Thus Russia was for awhile clear of the enemy, while she established a strong footing in both Prussia and Austria.

We can now understand the main Russian plan a little better. In the north the army was to advance from Königsberg and endeavor to cut off Danzig and break the line of

THE RUSSIAN PLAN OF CAMPAIGN

In the above view the German lines of defense are shown black, the Austrian lines of defense are indicated by crossed lines, and the Russian advances are shown by arrows.

defenses between that place and Thorn, thus leaving this fortress in the rear. In the south the Austrians, already heavily punished, would be driven back on the Carpathian passes to the south, and westward also toward Cracow, which is the key to the situation. If Cracow fell Russia would have a good route into Germany, and the move would be supported by advances from Warsaw, thus threatening Breslau from two sides.

THE RUSSIAN CAMPAIGN

GERMAN TROOPS HURRIED EAST

Early in September, however, the danger of the Russian advance into Germany, which apparently had given the German general staff but little concern at first, was fully realized and large bodies of German troops were detached from the western theater of war and hurried to the eastern frontier. Germany had evidently reckoned on Austria being able to hold its ground better, and was badly prepared for a flanking move on Breslau so early in the campaign. But the Servian and Russian defeats of Austria left Germany to bear the full force of the terrific Russian onslaught, and her forces proved equal to the occasion. Under General von Hindenberg the German army of the east soon repelled the Russian invaders and forced them to retire from East Prussia across their own border, where they were followed by the Germans. A series of engagements on Russian soil followed, in which the advantage lay as a rule with the Germans. The losses on both sides were heavy, but the Germans captured many thousands of Russian prisoners and considerable quantities of arms and munitions of war. The immense resources of the Russian empire in men and material made the problem of Russian invasion a very serious one for Germany. This was fully realized by the Kaiser, who about October 1, at the end of the second month of the war, proceeded in person to his eastern frontier to direct the defensive operations against Russia.

CZAR NICHOLAS AT THE FRONT

About the same time the Czar, Nicholas II, also took the field in person, arriving at the front on October 5, accompanied by General Soukhomlinoff, the Russian minister of war.

"I am resolved to go to Berlin itself, even if it causes me to lose my last moujik (peasant)," the Czar is reported as saying in September. The spirit and temper of the Russian government may be judged by the fact that before the war was many days old the name of the Russian capital was officially changed from "St. Petersburg," which was considered to have a German flavor, to "Petrograd," a purely Russian or Slavic form of nomenclature.

RUSSIA PREPARES TO STRIKE AUSTRIA

By the third week of August, according to an announcement from Petrograd, Russian troops had checked an attempt by the Austrians to enter Poland from the Galician frontier and were preparing to invade Austria on a large scale. At that time Russia was said to have 2,000,000 men under arms for the invasion of Germany and Austria, also 500,000 on the Roumanian and Turkish borders, and 3,000,000 men in reserve. (The latter were called out by imperial ukase before Czar Nicholas started for the front.) The Poles had been promised self-government and had been called on to support Russia. The Jews throughout the Russian empire were also promised a greater measure of protection, freedom of action and civil rights. These measures inaugurated an era of better feeling in Russia and Poland and were strongly approved by the allies of Russia.

Most of the Austrian reserves were mobilized by August 15 and Germany's ally announced that she would soon have her total war strength of 2,000,000 men in the field. Austria sent some troops to join the German forces in Belgium and an army of several hundred thousand men was gathered along the Austro-Russian frontier under command of the Archduke Frederick. General Rennenkampf was in command of the Russian forces for the invasion of East Prussia, while General Russky led the Russian army operating against Galicia.

INVASION OF PRUSSIA

Within a week the Russian movement in eastern Germany assumed menacing proportions, the great army of invasion having moved rapidly, considering the natural obstacles. More than 800,000 men were sent over the border into Prussia. The Germans evacuated a number of towns, after setting them afire, and a considerable part of the Kaiser's eastern field forces was bottled up in military centers. Germany's active field force was at this time inferior in numbers to the invading army.

By the capture of Insterberg the Russians paralyzed one of the main German strategic centers and gained control of an important railroad. The German Twentieth Army Corps was reported to have been routed near Lyck. At the start

the Russian forces extended from Insterberg to Goldapp, a distance of about thirty-two miles. Seventy-five miles further on was the first of the two strong German lines of fortifications.

Early victories were claimed by the Russians in their advance into Austria, which was made slowly. Austria then turned to fight the Russian invasion. It was forced to gather all its forces for this principal struggle and hence retired from offensive operations against the Servians. Unless she could halt the Russians pouring in from the north, a success against Servia could do her no good.

By the first of September the Russian advance into East Prussia was well under way and the strong fortress of Königsberg was in danger of a siege. German troops were being rushed to its defense. In Galicia there were fierce encounters between the Russian invaders and the Austrians. Several victories were claimed by the Russians all along the line and whole brigades of Austrian troops were reported destroyed, while the Russian losses were also admittedly heavy. The fiercest fighting occurred in the vicinity of Lemberg, the capital of Galicia, which was soon to fall to General Russky. The Austrian attack on Russian Poland failed and the Austrians were driven back across their own frontier. The Russians were seeking to destroy the hope of the Kaiser for help from Austria in Eastern Germany, where the Russian advance, ridiculed or belittled by Germany before it began, became more menacing every day. The German war plans had contemplated a quick, decisive blow in France and then a rapid turn to the East to meet the Russians with a tremendous force. But the belligerency of the Belgians and the cooperation of the British balked these plans, while the Russians moved faster than was expected by their foe. Austria had failed everywhere to stop the Czar's forces, and then came a crushing blow to Austrian hopes in a ruinous defeat near Lemberg and the loss of that fortress.

THE FALL OF LEMBERG

The capture of Lemberg from the Austrians early in September after a four days' battle was one of the striking Russian successes of the war. Details reached the outer

world on September 10th from Petrograd (St. Petersburg) as follows, the story being that of an eyewitness:

"The commencement of the fighting which resulted in the capture of Lemberg began August 29th, when the Russians drove the enemy from Zischow (forty-five miles east of Lemberg) and moved on to Golaya Gorka—a name which means 'the naked hill.'

"We spent the night on Naked Hill, and the actual storming of the town was begun at 2:30 o'clock in the morning. Then followed a four days' battle. A virtually continuous cannonade continued from dawn to darkness without cessation.

"Even in the darkness the weary fighters got little sleep. Whenever a single shot was heard the men dashed for their places and the battle boiled again with renewed fury.

"The enemy's counter attacks were delivered with great energy and a dense hail of lead and iron was poured over our ranks. The Russian advance was greatly impeded by the hilly nature of the ground and the great number of extinct craters, which formed splendid natural fortifications for the enemy, which held them doggedly. Out of these, however, the enemy was driven in succession.

"We suffered much from thirst, for the stony country was devoid of springs. The days were oppressively hot and the nights bitterly cold.

RUSSIAN ARTILLERY SUPERIOR

"Both sides fought with great obstinacy, but the nearer we approached Lemberg the harder the struggle became. However, it soon was evident that we were superior in artillery.

"At length the enemy was driven from all sides beneath the protection of the Lemberg forts. Our troops were very weary, but in high spirits.

"For two days the fight raged around the forts, but we were always confident of the prowess of our artillery. The big guns of both sides rained a terrific hail down on the armies, which suffered terrific losses.

"At last we noticed that the resistance of the forts was

growing weaker. A charge at double quick was ordered, and we carried the first line of works.

"It was evident from that point that many of the enemy's guns had been destroyed. Not enough of them had been left to continue an effective defense, but the enemy was undiscouraged and tried to make up with rifle fire what it lacked in artillery.

LOSSES BECOME HEAVIER

"Between the first and second lines our losses were heavier than before, but under bayonet charges the enemy broke and fled in panic.

"Our troops entered the town at the enemy's heels. We ran into the town, despite our fatigue, with thunderous cheering.

"An episode which had much to do with ending the enemy's dogged resistance occurred during the fighting between the first and second lines. The Austrians in the hope of checking the Russian effort to encircle the town had thrown out a heavy screen of Slav troops with a backing of Magyars who had been ordered to shoot down the Slavs from behind if they showed any hesitation.

"This circumstance became known to the Russian commander, who ordered a terrific artillery fire over the heads of the Slavs and into the ranks of the Magyars. This well-directed fire set the whole line in panic."

More than 35,000 Austrians and Russian wounded were abandoned on the field of battle between Tarnow, Lemberg and Tarnopol owing to lack of means of transportation, according to reliable reports. Both armies declined to ask for an armistice for the burial of the dead and the collection of the wounded, each fearing to give an advantage to the other.

THE BATTLE BEFORE LEMBERG

The immense superiority of the Austrian forces east of Lemberg enabled the Austrians at first to adopt the offensive. As soon, however, as the Austrians realized the impossibility of an advance on Warsaw they concentrated their large and overwhelming forces in an attempt to outflank the right wing of the Russian army, which was drawing slowly but surely towards Lemberg. On the other Russian flank the two Rus-

sian army corps, after crossing the River Zlota Lipa without much opposition, continued their advance to the River Knila Lipa, where they found the bridges had all been destroyed by the Austrian advance guards. Two bridges were constructed on the Rogarten-Halicz line, which enabled a crossing to be effected in spite of heavy and incessant artillery fire from the Austrian 24-centimeter guns.

Once across the river, the two Russian corps crossed the upper reaches of the River Boog and so approached the town of Lemberg from the east. The main Austrian army, how-

ever, had by this time moved up to bar the further advance of the Russian forces, and the whole of their armies on the left bank of the River Vistula being in front of the three Russian corps, the latter were compelled to adopt a defensive rôle for three or four days, after which, having received large reinforcements, the Russian force moved forward and drove the Austrian troops out of their entrenchments outside Lemberg at the point of the bayonet. A desperate attempt was made by means of a counter-attack to arrest the advance of the Russian troops, but this only resulted in the capture of 6,000 Austrian prisoners.

Lemberg was not a fortress but was recently converted into a semi-fortified place, as a series of lunettes, redoubts, etc., had been hastily prepared. It was the headquarters of the 11th Austrian Corps, which consisted of the famous 43rd Landwehr infantry division, and was further divided into three Landwehr brigades. There was also a Landwehr Uhlán regiment, together with a howitzer division of field artillery. These batteries were armed with 10.5-centimeter guns, fitted with the German or Krupp eccentric breech action. The forts outside the town were said to be armed with the 15-centimeter siege gun made of steel, also with a Krupp action. The ammunition for these guns is chiefly high explosive shell and shrapnel; one of the forts is also said to have had a battery of three 24-centimeter heavy siege guns of quite a modern pattern.

GERMANY RUSHES REINFORCEMENTS

When Lemberg fell the Russian advance covered a line extending from far up in Eastern Prussia, near Tilsit, across the frontier and on down south into Austrian Galicia. Königsberg was hearing the sound of the Russian guns and its besiegers seemed on the verge of victory. A central column of mighty strength was pushing its way into Germany, despite a stubborn resistance. Then the tide turned. German reinforcements were brought up and under General von Hindenberg the Germans administered a severe defeat to General Rennenkampf's army near Allenstein, in which it was claimed that 60,000 prisoners were taken. Other reverses were suffered by the Russians and soon after the middle of September

they had been forced to retire from German territory, the German troops following them into Russia, where a series of minor engagements occurred near the frontier.

GENERAL RENNENKAMPF'S DEFEAT

The operations leading to the defeat of General Rennenkampf's Russian army by the Germans were as follows:

From September 7 to 13 the Russians took a strong position on the line from Angerburg to Gerdauen, Allenburg, and Kehlau, the left wing resting on the Mazurian lakes and the right wing protected in the rear and flank by the forest of Frisching, whose pathless woods and swamps furnished an almost impregnable position. The Russians devoted great efforts to intrenching their position and brought up besides their heavy artillery. Russian cavalry scouted far to the west and south, but otherwise the army undertook no offensive operations in the days following a battle at Tannenberg.

The German forces, according to the German official account, were composed of the Second, Third, Fourth and Twentieth corps, two reserve divisions and five cavalry divisions.

General von Hindenburg, the German commander, meanwhile was assembling every available man, depriving the fortresses of their garrisons and calling in all but a bare remnant of the force protecting the southern frontier in the vicinity of Soldau, adding them to reinforcements received from the west.

General von Hindenburg again resorted to the customary German flanking movement, and since the German right, protected by the forest and marshes, seemed too strong, he adopted the daring strategy of sending the flanking force to the lake region to the south, the same character of movement by which the Russian Narew army had been defeated on August 28, in the vicinity of Ortelsburg, and which in case of failure might have been equally as disastrous for the Germans.

STRATEGY IS SUCCESSFUL

The strategy, however, succeeded, although General Rennenkampf offered a desperate resistance to the frontal attacks. After three days' fighting the Russians were forced

back slightly in the center. When the flank movement of the Germans was discovered already threatening the flank, a counter-movement was launched with a new army collected at Lyck, including the Twenty-second corps and parts of the Third Siberian corps, just arriving from Irkutsk, and the balance of the defeated army. The counter-attacks failed and on September 10 the Russians began to fall back on their main position, retreating in good order and well covered.

The Russian artillery on the right wing appears to have made a good retreat owing to a timely start, while the left wing was hard pressed by the enveloping German infantry. From this wing the Russians retreated across the border in two columns, while the main body went northward and the others in an easterly direction, pursued by the Germans, who advanced far from the border.

The German government appointed Count von Merveldt as governor of the Russian province of Suwalki and other points occupied by them.

The University of Koenigsberg on September 18 conferred upon General von Hindenburg honorary doctors' degrees from all four of the departments of philosophy, theology, law and medicine, in recognition of his success against the Russian invader.

AUSTRIA STRUGGLING FOR EXISTENCE

In Galicia, however, Russian successes continued. The important fortress of Mikolajoff, 25 miles south of Lemberg, was captured and this cleared away every Austrian stronghold east of Przemyśl, which was then invested by the Russians.

Austria was now struggling for her very existence as a monarchy. Following the crushing defeats administered to the Austrian troops and with the Czar's forces sweeping Galicia, Vienna was hurriedly fortified. All reports indicated that the large Austrian force, nearly 1,000,000 men in all, opposing the main Russian invasion had proved ineffective. Help from Germany did not arrive in time. Official dispatches reported the main Austrian army retreating, pursued and harassed by the Russians. The other important Austrian army was surrounded near Lublin.

While the Muscovite host went smashing through Galicia,

chasing the Austrian army before it, the Russian staff belittled the retreat from East Prussia, saying that the Russian army was merely falling back on a new defensive position. The German artillery had been getting in its deadly work and the pressure on Koenigsberg was soon to be relieved.

There were many reports at this time of a popular demand in Austria that an end be made to the struggle. Peace talk was a marked feature of the sixth week of the war, but there were no definite results in any part of the immense theater of war.

The third week of September found the Germans, greatly reinforced, making a strong resistance to Russian progress, with the aid of the heavy German artillery. The shattered Austrian armies, under Generals von Auffenberg and Dankl, were making desperate endeavors to concentrate in the vicinity of Rawaraska, but were apparently surrounded by the Russians, who continued to capture Austrian prisoners by the thousand. Fears were entertained for Cracow, one of the strongest fortresses in Austria, if not in Europe, which seemed likely soon to fall into the hands of Russia.

It was stated in Rome, and said to be admitted in Vienna, that the Archduke Frederick, commanding the Austrian forces in Galicia, had lost 120,000 men, or one-fourth of his entire army. German troops were reported marching south toward Poland to assist the Austrians.

The Russian successes in Galicia gave them command of the Galician oil-fields, upon which Germany largely depended for her supply of gasoline, which is a prime necessary in modern war.

RUSSIANS AT PRZEMYSL

On September 21 the Russians began the bombardment of Przemyśl, having previously occupied Grodek and Mosciska, west of Lemberg. The shattered second Austrian army was evidently incapable of staying the Russian advance, and took refuge in Przemyśl. A part of this Galician stronghold was soon captured by the Russians, forcing the Austrians to take refuge in the eastern forts, where the entire garrison was concentrated at the end of September, preparing to make a final resistance. The situation of the garrison was critical,

as it was entirely surrounded by the enemy. On September 21 also the Russian troops took by storm the fortifications of Jaroslav, on the river San, and captured many guns.

The German offensive from East Prussia was apparently halted October 1 by the almost impassable condition of the Russian roads in the north. Germany was said to have at this time thirty army corps of the line and the first reserve prepared to operate against Russia and to resist the Russian advance upon Cracow.

The German main defenses against Russia extended in a general line from Koenigsberg to Danzig, thence south along the Vistula to the great fortress of Thorn. From there the fortified line swung to the southwest to Posen, thence south to Breslau, the main fortress along the Oder, and from there to Cracow.

Early in October the Russian invasion of Hungary began. The Russian armies continued to sweep through Galicia and that province was reported clear of Austrian troops. The German successes claimed against the Czar farther north included victories at Krasnik and Zamoso, in Russian Poland; Instenburg and Tannenburg, in East Prussia.

ESTIMATE OF AUSTRIAN LOSSES

A Russian estimate places the Austrian losses in Galicia at 300,000 in killed, wounded and prisoners, or nearly one-third of their total forces. They also lost, it was claimed at Petrograd, 1,000 guns, more than two-thirds of their available artillery.

The Russian newspaper correspondents described horrible scenes on the battlefields abandoned by the Austro-German forces in Galicia.

"Streams," said one eyewitness, "were choked full with slain men, trodden down in the headlong flight till the waters were dammed and overflowing the banks. Piles of dead are awaiting burial or burning. Hundreds of acres are sown with bodies and littered with weapons and battle debris, while wounded and riderless horses are careering madly over the abandoned country. The trophies captured comprise much German equipment. An ammunition train captured at Janow (eleven miles northwest of Lemberg) was German, while the

guns taken included thirty-six of heavy caliber bearing Emperor William's initials and belonging to the German Sixth army corps.

"The line of retreat of the Austro-German forces was blocked with debris of every kind—valuable military supplies, telephone and telegraph installations, light railway and other stores, bridging material—in fact, everything needed by a modern army was flung away in flight. Over 1,000 wagons with commissariat supplies alone were captured."

Forty-five thousand Austro-German prisoners were reported to have arrived at Lublin. Russian correspondents with the armies in Galicia asserted that German troops were interspersed with Austrian troops in the intrenchments in order to raise the morale of the Austrians. One correspondent declared that while the Austrians often took flight the Germans were ready, to the last man, to perish.

ON THE FIRING LINE IN RUSSIAN POLAND—VIVID DESCRIPTION BY
AN AMERICAN EYEWITNESS

The first American permitted to witness actual battles near the eastern frontier of Germany was Karl H. von Wiegand, who wrote as follows from the firing line near East Wirballen, Russian Poland, October 9:

"The German artillery today beat back, in a bloody, ghastly smear of men, the Russian advance.

"Yesterday I saw an infantry engagement. Today it was mostly an artillery encounter. The infantry attack is the more ghastly, but the artillery the more awe-inspiring. This was the fifth day of constant fighting and still the German trenches hold.

"Today's battle opened at dawn. With two staff officers assigned as my chaperons, I had been attached overnight to the field headquarters. I slept well, exhausted by the excitement of my first sight of modern war, but when dawn once again revealed the two long lines of the Russian and German positions the Russian guns began to hurl their loads of shrapnel at the German trenches.

"We had breakfast calmly enough despite the din of guns. Then we went to one of the German batteries on the left center. They were already in action, though it was only 6 o'clock. The

men got the range from observers a little in advance, cunningly masked, and slowly, methodically, and enthusiastically fed the guns with their loads of death.

"The Russians didn't have our range. All of their shells flew screaming 1,000 yards to our left. Through my glasses I watched them strike. The effect on the hillock was exactly as though a geyser had suddenly spouted up. A vast cloud of dirt and stones and grass spouted up, and when the debris cleared away a great hole showed.

RUSSIANS TRY NEW RANGE

"While we watched the Russians seemed to tire of shooting holes in an inoffensive hill. They began to try chance shots to the right and to the left. It wasn't many minutes before I realized that, standing near a battery, the execution of which must have been noted on the Russian side, I had a fine chance of experiencing shrapnel bursting overhead. It was a queer sensation to peer through field glasses and see the Russian shells veer a few hundred feet to the right. I saw one strike a windmill, shattering the long arms and crumpling it over in a slow burning heap. Then we beat a retreat, further toward the center.

"We had been standing behind a slight declivity. I hadn't caught a glimpse of the enemy. Shells were the only things that apprised us of the Russian nearness. But as we passed out on an open field, considerably out of range of the field guns, I could see occasional flashes that bespoke field pieces, a mile or so away.

RUSSIAN INFANTRY CHARGES

"Back behind us, on the extreme left, I was told the Russians were attacking the German trenches by an infantry charge, the German field telephone service having apprised the commanders along the front. With glasses we could see a faint line of what must have been the Russian infantry rushing across the open fields.

"We passed on to the center, going slightly to the rear for horses. As we arrived at the right wing we witnessed the last of a Russian infantry advance at that end. The wave of Russians had swept nearly to the German trenches, situated between two sections of field artillery, and there had been

repulsed. Russians were smeared across in front of these pits, dead, dying, or wounded—cut down by the terrible spray of German machine guns.

"I got up to the trenches as the German fire slackened because of the lack of targets. The Russians had gone back. Strewn in the trenches were countless empty shells, the bullets of which had, as it looked to inexperienced eyes, slain thousands. As a matter of fact, there were hundreds of dead in the field ahead.

GUN BARRELS SIZZLING HOT

"German infantrymen spat on their rapid firers as we reached the trench and delightedly called our attention to the sizzle that told how hot the barrels were from the firing.

"The men stretched their cramped limbs, helped a few wounded to the rear, and waited for breakfast. It was not long forthcoming. Small lines of men struggling along under steaming buckets came hurrying up to the accompaniment of cheers and shouts. They bore soup that the men in the trenches gulped down ravenously. Meanwhile men with the white brassard and the red Geneva cross were busy out in the open, lending succor to the Russian wounded. The battle seemed to have come to a sudden halt.

"But even as I was getting soup, the artillery fusillade broke forth again. From 9 o'clock to noon the Russians hurled their heavy shells at the German trenches and the German guns. The German batteries replied slowly.

"There was mighty little fuss and feathers about this business of dealing death from guns. The crews at each piece laughed among themselves, but there were none of the picturesque shouts of command, the indiscriminate blowing of bugles, and the flashy waving of battle flags that the word battle usually conjures up. It was merely a deadly business of killing.

"Over to the right, a scant 300 yards away, the Russians had apparently succeeded in getting the range. As I watched through the glasses I saw shrapnel burst over the battery there and watched a noncommissioned soldier fall with three of his comrades. I was told that one had been killed and three wounded. The Red Cross crew came up and bore away the

four—the dead and the live—and before they were gone the gun was speaking away with four fresh men working it.

“But the shrapnel kept bursting away over it and soon an orderly came riding furiously back on his horse, saluted the officers with me, and shouted as he hurried back to the artillery reserve: ‘Six inch shells to the front; more ammunition.’

“I went back to see the wounded, but the surgeon wouldn’t let me. I expressed to him my wonder at the few wounded. I had seen only a few in the trenches, and no German dead until I saw the artilleryman killed. He explained that the losses on the German side were light because the trenches were well constructed and because there had been no hand-to-hand, bayonet to bayonet fighting.

ATTACKS BY RUSSIAN INFANTRY

“Yesterday, my first day at Wirballen, I saw the third attempt of the Russians to carry the German center by storm. Twice on Wednesday their infantry had advanced under cover of their artillery, only to be repulsed. Their third effort proved no more successful.

“The preliminaries were well under way, without my appreciating their significance, until one of my officer escorts explained.

“At a number of points along their line, observable to us, but screened from the observation of the German trenches in the center, the Russian infantry came tumbling out, and, rushing forward, took up advanced positions, awaiting the formation of the new and irregular battle line. Dozens of light rapid-firers were dragged along by hand. Other troops—the reserves—took up semi-advanced positions. All the while the Russian shrapnel was raining over the German trenches.

“Finally came the Russian order to advance. At the word hundreds of yards of the Russian fighting line leaped forward, deployed in open order, and came on. Some of them came into range of the German trench fire almost at once. These lines began to wilt and thin out.

MEN PAUSE ONLY TO FIRE

“But on they came, all along the line, protected and unprotected alike, rushing forward with a yell, pausing, firing, and advancing again.

"From the outset of the advance the German artillery, ignoring for the moment the Russian artillery action, began shelling the onrushing mass with wonderfully timed shrapnel, which burst low over the advancing lines and tore sickening gaps.

"But the Russian line never stopped. For the third time in two days they came tearing on, with no indication of having been affected by the terrible consequences of the two previous charges. As a spectacle the whole thing was maddening.

"On came the Slav swarm, into the range of the German trenches, with wild yells and never a waver. Russian battle flags—the first I had seen—appeared in the front of the charging ranks. The advance line thinned and the second line moved up.

"Nearer and nearer they swept toward the German positions. And then came a new sight. A few seconds later came a new sound. First I saw a sudden, almost grotesque melting of the advancing line. It was different from anything that had taken place before. The men literally went down like dominoes in a row. Those who kept their feet were hurled back as though by a terrible gust of wind. Almost in the second that I pondered, puzzled, the staccato rattle of machine guns reached us. My ear answered the query of my eye.

MACHINE GUN FIRE TELLS

"For the first time the advancing line hesitated, apparently bewildered. Mounted officers dashed along the line, urging the men forward. Horses fell with the men. I saw a dozen riderless horses dashing madly through the lines, adding a new terror. Another horse was obviously running away with his officer rider. The crucial period for the section of the charge on which I had riveted my attention probably lasted less than a minute. To my throbbing brain it seemed an hour. Then, with the withering fire raking them even as they faltered, the lines broke. Panic ensued. It was every man for himself. The entire Russian charge turned and went tearing back to cover and the shelter of the Russian trenches.

"I swept the entire line of the Russian advance with my glasses—as far as it was visible from our position. The whole

advance of the enemy was in retreat, making for its intrenched position.

DEAD MEN COVER ACRES

"After the assault had failed and the battle had resumed its normal trend I swept the field with my glasses. The dead were everywhere. They were not piled up, but were strewn over acres. More horrible than the sight of the dead, though, were the other pictures brought up by the glasses. Squirming, tossing, writhing figures everywhere! The wounded! All who could stumble or crawl were working their way back toward their own lines or back to the friendly cover of hills or wooded spots.

"After the charge we moved along back of the German lines at a safe distance and found the hospital corps bringing back the German wounded.

"The artillerymen had resumed their duel and as we came up in the lee of the outbuildings of a deserted farmhouse a shell struck and fired the farmhouse immediately in front of us. As we paused to see if the shot was a chance one, or if the Russian gunners had actually gotten the range, a regiment of fresh reserves, young men who had just come up from the west, passed us on their way to get their baptism of fire.

"Their demeanor was more suggestive of a group of college students going to a football game than the serious business on which they were bent. They were singing and laughing, and as they went by a noncommissioned officer inquired rather ruefully whether there were any Russians left for them.

"Throughout the day we watched the fight waged from the opposing trenches and by the artillery.

"Suddenly at sundown the fighting ceased as if by mutual agreement. As I write this I can see occasional flashes of light like the flare of giant fireflies out over the scene of the Russian charge—the flashes of small electrical lamps in the hands of the Russian hospital corps.

"I'm glad I don't have to look at what the flashes reveal out there in the night."

CHAPTER XIII

THE AUSTRO-SERVIAN CAMPAIGN

*Declaration of War by Austria—Bombardment of Belgrade—
Servian Capital Removed—Seasoned Soldiers of Serbia
Give a Good Account of Themselves—Many Indecisive
Engagements—Servians in Austrian Territory.*

FORMAL declaration of war against Serbia was proclaimed by Austria on Tuesday, July 28. The text of the official announcement was as follows:

“The Royal Government of Serbia not having given a satisfactory reply to the note presented to it by the Austro-Hungarian Ministry in Belgrade on July 23, 1914, the Imperial and Royal Government of Austria-Hungary finds it necessary itself to safeguard its rights and interests and to have recourse for this purpose to the force of arms. Austria-Hungary, therefore, considers itself from this moment in a state of war with Serbia.”

This declaration was signed by Count Berchtold, the Austrian minister for foreign affairs.

The events that immediately preceded the declaration of war, as summarized in a previous chapter, were as follows:

On June 28 a Slav student who thought he was a patriot killed the Archduke Francis Ferdinand, heir to the Austrian throne, at Serajevo, the capital of Bosnia, which had been lately made a province of Austria. An inquiry was begun in which evidence was introduced to show that the assassin's work was part of a plot for the revolt of the Southern Slav provinces of Austria, and that it was instigated by Servians, if not by the Servian Government. On July 23, however, before the investigation was completed, Austria sent an ultimatum to Serbia demanding that it use every means in its

power to punish the assassins and also to stop all further anti-Austrian propaganda. Austria demanded that she be permitted to have representatives in the work of investigation in Serbia.

The next day, July 24, Russia joined the little Slav country in asking for a delay. Austria refused to grant this.

On July 25, ten minutes before 6 p. m., the hour at which the ultimatum expired, the Servian premier, M. Pashitch, gave his reply to the Austrian ambassador at Belgrade. Serbia agreed to all the conditions and apologies demanded by Austria, except the requirement that Austrian officials should be allowed to participate in the inquiry to be conducted in Serbia into the assassination of the Archduke. Even this was not definitely refused.

On July 27 the Austrian foreign office issued a statement in which appeared these words:

"The object of the Servian note is to create the false impression that the Servian Government is prepared in great measure to comply with our demands.

"As a matter of fact, however, Serbia's note is filled with the spirit of dishonesty, which clearly lets it be seen that the Servian Government is not seriously determined to put an end to the culpable tolerance it hitherto has extended to intrigues against the Austro-Hungarian monarchy."

Russia at once notified Austria that it could not permit Servian territory to be invaded. It was then realized in Europe that the great Slav nation would support its little brother. Germany let it be known that no other country must interfere with the Austro-Servian embroglio, which meant that Germany was prepared to back Austria.

An eleventh-hour proposal by the British foreign secretary, Sir Edward Grey, that mediation between Serbia and Austria be undertaken by a conference of the Ambassadors in London, was accepted by France and Italy, but declined by Germany and Austria. Then next day, July 28, came Austria's declaration of war, which soon made Europe the theater of the bloodiest struggle of all the ages.

SERVIA AND ITS ASPIRATIONS

Servia's reply to the declaration of war was to concentrate

a strong division of its forces in the Sanjak of Novi-Bazar, from which they would be in a position to threaten Bosnia and Herzegovina, the two Balkan provinces that Austria had lately annexed. It was also reported that Serbia intended to invade Bosnia with the object of enlisting further support from the Bosnian Serbs, who were said to be on the point of rising against Austria-Hungary.

The country of the Servians being well suited for defense, they were never completely overrun by the Turks, as other Balkan states were, and as a consequence they still retain, like the Greeks, a native aristocracy of culture. Physically, they are fairer than most of the Balkan Slavs and more refined in appearance. By temperament they are light-hearted, joyous, frivolous, and charming to deal with.

In Serbia itself, including territory acquired in recent wars, there are about 4,500,000 Serbs. In Austria there are about 3,500,000 Serbs, including Croats who belong to the Servian race.

The Servians have long dreamed and talked and written of a greater Serbia, that should take in all the Servian race. They look back to the time of King Stephen Dushan, in the fourteenth century, when Serbia was supreme in the Balkans and was nearly as advanced in civilization as the most advanced nations of Europe. The re-establishment of this ancient kingdom had become a passion with the Serbs—not only with those in Serbia, but with many in Hungary as well. Hence, their animus against Austria and Austrian rule, while Austria's fight was, primarily, for the preservation and solidification of her heterogeneous dominions; secondarily, for revenge for the Archduke's death. Incidentally, it may be mentioned that the Archduke Francis Ferdinand was a close personal friend of the German Kaiser.

THE SERVIAN ARMY

The Servian forces under General Radumil Putnik, consist of ten divisions, divided into four army corps, with a peace footing of 160,000 and a war strength of over 380,000. Most of the men called to arms against Austria were veterans of the two recent Balkan wars, and hence probably the most seasoned troops in Europe.

The rifle of the Servian army is the Mauser, model of 1899, with a caliber of 7 millimeters, but it is doubtful if Servia possessed enough of them to arm the reserves. The Servian field piece is a quick-firing gun of the French Schneider-Canet system. The army has some 350 modern guns.

At the outbreak of the war Servia had ten of the most modern aircraft, but she had not developed their efficiency to a degree at which they would be of much material benefit to her in the struggle.

The extremely mountainous nature of Servia and of the adjacent territory of Bosnia make military movements somewhat slow and difficult, especially for troops unaccustomed to mountain warfare. Compared with this mountainous region, the district of Agram, where one Austrian army corps had its headquarters, is easy country to operate in, while the plain of Hungary on the opposite side of the Danube made the task of concentrating troops an easy one for the Austrians.

Another Austrian army corps had its base at Serajevo in Bosnia. A railway to the northeast from this Bosnian capital touches the Servian border at Mokragora. To the north of this point lies Kragujevac, the new capital of Servia, to which King Peter, his court and the Government repaired from Belgrade just before the declaration of war. Southeast of the new capital is the important Servian city of Nish.

The western frontier of Servia follows the windings of the River Drina, a tributary of the Danube. The Danube itself forms part of the northern boundary and the former capital, Belgrade, is picturesquely situated on the south bank of the Danube at its junction with a tributary. Two Austrian fortresses command the city from across the Danube. On the plain of Hungary to the north is Temesvar, an important point at which another Austrian army corps was located.

CHANCES AGAINST SERVIA

At the outset the chances of war were heavily against Servia. Such artificial defenses as she possessed were on the Bulgarian frontier. Many of her troops were engaged in endeavoring to establish Servian rule among the neighboring peoples in her new Albanian possessions. Austria was prepared to bring against her immediately the three army

corps from Temesvar, Serajevo and Agram, and four more corps, from Hermanstadt, Budapest, Graz, and Kaschau, within a fortnight. Serbia's one hope appeared to be the difficulty of the country, otherwise she could not oppose for a moment the advance of 250,000 troops supported by 800 pieces of artillery. Then, too, Austria had warships on the Danube and it was partly through this fact that it was decided by the Servian Government to evacuate Belgrade and to retire to Kragujevac, sixty miles southeast.

In spite, however, of the seeming futility of opposition, Serbia, encouraged by Russian support, prepared for a strenuous campaign against the Austrian forces, and the first two months of the war ended without any decisive advantage to Austria. The Servians, on the other hand, claimed numerous successes. Their task was lightened by the Russian invasion of Austrian territory and the determined advance of the Czar's host, which demanded the fullest strength of the Austrian forces to resist. As the Russians hammered their enemy in Galicia the spirits of the Servians rose and their seasoned soldiers gave a good account of themselves in every encounter with Austrian troops. They crossed the Drina and carried the war into Bosnia, putting up a stiff fight wherever they encountered the enemy, and while they sustained severe losses in killed and wounded during August and September, the losses they inflicted upon the Austrians were still heavier.

AUSTRIANS BOMBARD BELGRADE

The Austrian troops on the banks of the Danube became active soon after war was declared. In the first few days they seized two Servian steamers and a number of river boats. Belgrade was bombarded from across the river and many of its public buildings, churches and private residences suffered damage.

The hostile armies came into contact for the first time on the River Drina, between Bosnia and Servia, and Vienna was compelled to admit defeat in this preliminary engagement of the war. The Servians forced a passage through the Austrian ranks, but only at the cost of many killed and wounded.

When Crown Prince Alexander of Servia began the invasion of Bosnia in earnest, in the middle of August, Austria

found herself at a disadvantage because of the necessity of massing most of her forces against the Russians. Roumania and Montenegro were then preparing to join the Servians in the field against Austria.

Later in August the Servians captured several of the enemy's strongholds in Bosnia. After a four-day battle on the banks of the Drina the Austrians were defeated with heavy loss, a large number of guns and prisoners being captured by the Servians. The Montenegrin troops repulsed an Austrian invading force and took several hundred prisoners in an all-day battle on the frontier.

Early in September a heavy engagement was fought by the Servian and Austrian armies near Jadar, resulting in Servian victory. It was claimed that the Austrians left 10,000 dead on the field of battle. The Servians also successfully defended Belgrade, which had been bombarded on several occasions. Fifteen or twenty miles west of Belgrade on the Save River, an Austrian force was decisively defeated by the Servians, who then seemed to be duplicating the successes of the Russian army against Austria.

The attitude of Turkey was being closely watched at this time, Greece and Bulgaria being prepared to enter the war against the Ottoman Empire if the latter decided on belligerency, but on September 5 Turkey again declared her intention to remain neutral.

SERVIAN CAPTURE SEMLIN

Crossing the Save River into Hungary, the Servians scored a brilliant stroke in the capture of Semlin, an important Austrian city. They also reported continued successes in Bosnia. Reports of wholesale desertions of Slavs from the Austrian army were received daily and probably had considerable foundation in fact. It was said that the Servians were being received enthusiastically by the people of Hungary.

These Servian triumphs led to the reorganization of the Balkan League, including Servia, Montenegro, Bulgaria and Greece.

On September 20 the Servian Government announced that an Austrian attacking army which attempted to cross the frontier near the Sabatz Mountains had been routed with a

loss of 15,000 killed and wounded. The Servian losses in this and other engagements were claimed to have been small in comparison with those of the enemy.

Continuing their forward movement into Hungary, the Servians inflicted further losses on the Austrians near Novi-pazow, while the Montenegrins reported a victory in the mountain slopes over their border.

On October 1 it was reported that the Servians had again repulsed an Austrian attempt at invasion and had driven the Austrians back across the Drina with loss. They had also checked another Austrian attempt to take Belgrade. The Servian war office claimed that the combined Servian-Montenegrin armies had made material progress in their invasion of Bosnia-Herzegovina, and that they were within striking distance of Serajevo, which they expected to capture. This, however, was denied by the Vienna ministry of war, which claimed that the Servian situation was entirely satisfactory to Austria.

On October 5 Servian troops were reported to have begun a northeast advance from Semlin, to effect a junction with two Russian columns advancing southward in Hungary. One of these columns was then assaulting a fortress in Northwest Hungary, sixty-six miles southeast of Olmutz, while the other was descending the valley of the Nagyan against Huszt in the province of Marmaros. This latter province or county, which the Russians invaded through the Carpathian passes, lies in the northeast of Hungary, bordering on Galicia, Bukowina and Transylvania. There was a legend that the eastern Carpathians are impregnable, but this legend was destroyed by the Russian invasion.

Before attaining Uzsok pass, in the Carpathians, the Russians successively captured by a wide flanking movement three well-masked positions which were strongly defended by guns. Each time the Russians charged the enemy fled and the Russians followed up the Austrian retreat with shrapnel and quick fire, inflicting heavy losses.

German troops joined the Austrian forces in Hungary and at some points succeeded in repulsing the invaders, though their general advance was not decisively checked and they continued the endeavor to effect a junction with the Servians to the south. Advices from Budapest, October 6, declared that

the Russians had captured Marmaros-Sziget, capital of the county of Marmaros, necessitating the removal of the government of that department to Huszt, twenty-eight miles west-northwest of Sziget. A second Russian column was reported to be threatening Huszt and Austro-German reinforcements were being hurried up to check the Russian advance.

ATROCITIES IN SERBIA CONFIRMED BY AMERICAN OFFICER

Unspeakable brutalities were practiced in Serbia by the Germans, according to Major W. H. Cressy, an American, who served as a medical officer in the Serbian army and who recently returned from the war zone after four years with Allied forces.

Major Cressy, on February 20, 1919, addressed 700 clergymen who were viewing the picture "Ravished Armenia" in New York City.

"The day after we captured Monastir I went with some other officers into a room where we found a group of young women, who were about to become mothers, seated around a circular table. Their tongues had been pulled out and spiked to the table.

"I have seen children with their arms and legs cut off and some with their eyes gouged out. One favored form of punishment was to tie the victim to the wheel of a commissary cart so that his head struck the ground at every revolution of the wheel. I have found countless Serbians crucified with nails to the trunks of trees."

The officer warned the clergymen to watch for German propaganda. "Only last week," he said, "I held in my hand an Iron Cross of the first class. It was one of those sent to this country to fourteen 'loyal Americans' for rendering valiant service to the Fatherland."

Dr. Cressy served for twenty-six months in the Serbian army. He has worked in the little country which stood in the way of Prussian control of the Balkans and saved the Mediterranean and the Suez Canal to the Allies. He saw the mutilated, diseased, and starved 32,000 Serbians who returned from the war, a remnant of the original 400,000 Serbian army.

CHAPTER XIV

STORIES FROM THE BATTLEFIELD

Thrilling Incidents of the Great War Told by Actual Combatants—Personal Experiences from the Lips of Survivors of the World's Bloodiest Battles—Tales of Prisoners of War, Wounded Soldiers and Refugees Rendered Homeless in Blighted Arena of Conflict.

HAND-TO-HAND FIGHTING

CAVALRY fighting on the banks of the River Marne in the year 1914 was almost identical with the charge in the days when Hannibal's Numidian horse charged at Romans at Lake Trasimene, or when Charles Martel and the chivalry of France worsted the Moors and saved Europe on the plains of Tours.

A good description of a cavalry charge was given by Private Capel of the Third British Hussars, a veteran of the Boer war, who took part in the fighting beginning at Mons and was separated from his regiment in a charge at Coulommiers, in the battle of the Marne, when his horse fell.

"You hear," said he, "the enemy's bugles sounding the charge. Half a mile away you see the Germans coming and it seems that in an instant they will be on you. You watch fascinated and cold with a terror that makes you unable to lift an arm or do anything but wait and tremble.

"They come closer and still you are horrorstruck. Then you feel your horse fretting and suddenly you start from your daze, and fear changes suddenly to hate. Your hand goes to the saber hilt, your teeth clinch and you realize that you must strike hard before the enemy, who is now very close, can strike. Every muscle tightens with the waiting.

"Before your own bugles have sounded two notes of the charge you find yourself leaning forward over the neck of

your galloping horse. All the rest is a mad gallop, yells of the enemy and your own answer, a terrible shock in which you are almost dismounted, and then you find yourself face to face with a single opponent who, standing up in the stirrups, is about to split your head. You notice that you are striking like a fiend with the saber.

"After that madness passes it seems almost like a complex maneuver and soon you find yourself riding for dear life—perhaps to escape, perhaps after the Germans. You then realize that you have been whipped and that the charge has failed, or you see the backs of the fleeing enemy, feel your horse straining in pursuit and know that you have gained a victory."

FRIGHTFUL MORTALITY AMONG OFFICERS

The official reports of the loss of life in the battles in France tell of the large number of officers killed. Sharpshooters on both sides have had instructions to aim at officers. These sharpshooters are often concealed far in advance of their troops. Their small number and their smokeless powder make their discovery most difficult. This lesson was learned at great cost to the British during the Boer war.

Dispatches from Bordeaux stated that letters found on dead and captured German officers prove the truth of reports regarding the terrible mortality in the German ranks, especially among officers. In the Tenth and Imperial Guard Corps of the German army it is said that only a few high ranking officers escaped being shot, and many have been killed. The German officers have distinguished themselves by their courage, according to the stories of both British and French who fought them.

An officer of an Imperial Guard regiment, who was taken prisoner after being wounded, said:

"My regiment left for the front with sixty officers; it counts today only five. We underwent terrible trials."

A German artillery officer wrote:

"Modern war is the greatest of follies. Companies of 250 men in the Tenth Army Corps have been reduced to seventy men, and there are companies of the guard commanded by volunteers of a year, all the officers having disappeared."

STORIES FROM THE BATTLEFIELD

SAYS GERMANS FOUGHT EVERY DAY

The following is from a letter written during the prolonged battle of the Aisne by a lieutenant of the Twenty-sixth German Artillery:

"The Tenth Corps has been constantly in action since the opening of the campaign. Nearly all our horses have fallen. We fight every day from 5 in the morning till 8 at night, without eating or drinking. The artillery fire of the French is frightful. We get so tired that we cannot ride a horse, even at a walk. Toward noon our battery was literally under a rain of shrapnel shells and that lasted for three days. We hope for a decisive battle to end the situation, for our troops cannot rest. A French aviator last night threw four bombs, killing four men and wounding eight, and killing twenty horses and wounding ten more. We do not receive any more mail, for the postal automobiles of the Tenth Corps have been destroyed."

HOW IT FEELS TO BE WOUNDED

Many men in the trenches have proved themselves heroes in the war. A wounded British private told this story:

"We lay in the trench, my friend and I, and when the order to fire came we shot, and shot till our rifles burned up. Still the Germans swarmed on toward us, and then my friend received a bad wound. I turned to my work again, continuing to shoot slowly. Then I rose a little too high on my shoulder.

"Do you know what it is like to be wounded? A little sting pierced my arm like a hot wire; too sharp almost to be sore, and my rifle fell from me. I looked at my friend then and he was dead."

In one casualty list made public by the British war office in September, sixteen officers were reported killed, thirty-eight wounded and ten missing. The famous Coldstream Guards and the Black Watch regiments were among the sufferers.

HOW GENERAL FINDLEY DIED

A correspondent in France described the death of General Neil Douglas Findley of the British Royal Artillery as follows:

"When at dawn the British advance continued toward Soissons the enemy was fighting an exceptionally fierce rear-

guard action. A terrible shell fire was directed against our artillery under General Findley, temporarily situated in a valley by the village of Prise. It seemed a matter of moments when we should have to spike our guns and General Findley saw the urgency for action.

"'Boys,' his voice echoed down the line, 'we are going to get every gun into position.' Then deliberately the general approached a regimental chaplain kneeling beside a gunner. 'Here are some of my personal belongings, chaplain. See that they don't go astray.'

"One by one our guns began to blaze away and the general had a word of encouragement and advice for every man. In vain his staff tried to persuade him to leave the danger zone.

"Our range was perfect, the German fire slackened and died away and with a yell our men prepared to advance. The outburst came too soon, one parting shell exploding in a contact with Findley's horse, shattering man and beast."

KILLED FOE IN REVOLVER DUEL

While their men battled on a road near Antwerp, it is said that a Belgian cavalry sergeant and an officer of German Uhlans fought a revolver duel which ended when the Belgian killed his foe, sending a bullet into his neck at close range.

The daring Uhlans had approached close to the Antwerp fortifications on a reconnoitering expedition. They were seen by a small Belgian force, which immediately went out on the road to give battle. As they neared each other, the German commander shouted a jibe at the Belgian sergeant. There was no answer, but the sergeant rode at a gallop straight for the Uhlan. Miraculously escaping the shots aimed at him, he drew up alongside the officer and informed him that his life was to be forfeited for the insulting words he had uttered. Both began firing with their revolvers, while at the same time their men clashed.

Only a few of the soldiers witnessed the thrilling duel, for they themselves were fighting desperately. After their officer's death the Uhlans withdrew, leaving a number of dead. Someone carried word of the duel to King Albert, who had just arrived in Antwerp, and he called before him and personally congratulated the sergeant, Henri Pyppes. The latter

was wounded in the arm by one of the Uhlan's bullets, but he refused to be taken to the hospital and remained on duty in the field.

LITTLE STORIES FROM FRANCE

Count Guerry de Beauregard, a French veteran of the war of 1870, thus announced the death of a son at the front: "One son already has met the death of the brave beyond the frontier at the head of a squadron of the Seventh Hussars. Others will avenge him. Another of my sons, an artilleryman, is with the general staff. My eldest son is with the Twenty-first Chasseurs. Long live France!"

A wounded French soldier who was taken to Marseilles verified a remarkable story of his escape from death while fighting in German Lorraine. The soldier owes his life to a small bust of Emperor William, which he picked up in a village school and placed in his haversack. A German bullet struck the bust and, thus deflected, inflicted only a slight wound on the soldier.

Twenty German prisoners taken during the mêlée near Crecy, were herded together in a clearing, their rifles being stacked nearby. In a rash moment they thought that they were loosely guarded and made a combined rush for the rifles. "They will never make another," was the laconic report of the guard.

SAYS DEAD FILLED THE MEUSE

Edouard Helsey of the Paris newspaper, *Le Journal*, reported to be serving with the colors, wrote under date of August 29:

"It would be difficult to estimate the number of Germans killed last week. Whole regiments were annihilated at some points. They came out of the woods section by section. One section, one shell—and everything was wiped out.

"At two or three places which I am forbidden to name corpses filled the Meuse until the river overflowed. This is no figure of speech. The river bed literally was choked by the mass of dead Germans. The effect of our artillery surpasses even our dreams."

DETROIT ARTIST'S NARROW ESCAPE

Lawrence Stern Stevens, an artist of Detroit, narrowly escaped death near Aix-la-Chapelle at the hands of a crazed German lieutenant, by whom he was suspected of being a spy.

Stevens left Brussels on Aug. 24 in an automobile. He was accompanied by a photographer and a Belgian newspaper correspondent, and his intention had been to make sketches on the battlefield. His arrest at Lanefte thwarted this plan. He underwent a terrifying ordeal at the hands of his demented captor, although he was not actually injured.

On the evening of Aug. 24 he was court-martialed and sentenced to death and held in close confinement over night. Early on the morning of Aug. 25 he was led out, as he supposed, to be shot, but the plans had been changed and instead he was taken before Gen. von Arnim. After being forced to march with German troops for two days, Stevens fell in with a party of American correspondents at Beaumont, from which point he traveled to Aix-la-Chapelle on a prison train, and eventually reached Rotterdam and safety.

SAD PLIGHT OF FRENCH FUGITIVES

M. Brieux, the noted French dramatist, who witnessed the arrival at Chartres of a train full of fugitives who had fled from their homes before the German advance, described his experience for the Figaro. The fleeing people gathered round him and told him stories and he wrote his impressions as follows:

"Children weep or gaze wide-eyed, wondering what is the matter. Old folks sit in gloomy silence. Women with haggard cheeks and disheveled hair seem to belong to another age.

"They tell of invaders who scattered powder around or threw petroleum into their houses and then set them afire.

"And when did this happen? Yesterday! It is not a matter of centuries ago in distant climes, but yesterday, and quite near to us. Yet one cannot believe it was really yesterday that these things were done."

One of the fugitives explained to M. Brioux why after the first hour of their flight she had to carry her elder child as well as her baby. She showed him a pair of boots.

"I felt the inside with my fingers," says Brioux. "Nails had come through the soles. I looked at the child's feet. They were dirty with red brown clots. It was blood."

CHAUNCEY DEPEW ON A RUNNING-BOARD

Chauncey M. Depew, former United States Senator for New York, was in Geneva when the trouble began. He said on his return: "After crossing the border into France we picked up men joining the colors on the way to Paris, until our train could hold no more.

"Whenever I stuck my head into a corridor the soldiers would set up a cheer on seeing my side whiskers. They mistook me for an Englishman and cried: 'Long live the *entente cordiale!*'"

IN THE "VALLEY OF DEATH"

The fiercest fighting of all that preceded the Russian victory at Lublin was in a gorge near the village of Mikolaiiff, which the Russian soldiers reverently named the "Valley of Death."

The gorge was full of dead men, lying in heaps, according to an officer who participated in the battle. "When we attacked at 3 o'clock in the morning," he said, "the gorge contained 15,000 Austrians, a large proportion of whom were mowed down by the artillery fire which plowed through the valley in the darkness. The Austrians surrendered and we entered the gorge to receive their arms, while their general stood quietly on a hill watching the scene. Eight of his standards being turned over to the Russians was more than he could bear, for he drew a pistol and shot himself."

GENERAL USE OF KHAKE UNIFORMS

The war put everybody into khaki, with a few exceptions. On the battle line or in the field the English soldier and the English officer get out of their richly colored and historic

uniforms and into khaki, of a neutral hue. The Germans are in gray. The Austrians have most of their soldiers in khaki, and the Russians all wear khaki-colored cloth. The French still cling to their blue coats and brilliant red trousers, although steps are being taken to reclothe the army in more modern fashion, and the Belgians have a uniform that is very similar to the French.

The French and Belgian officers are dangerously ornamented with gilt trimmings during warfare and present such brilliant targets that some of the Belgian regiments during hard fighting with the Germans have lost nearly all of their leaders.

The new twentieth century mode of warfare puts the ban on anything that glitters, even the rifle barrels, bayonets and sabers.

A BELGIAN BOY HERO

On a cot in the Red Cross hospital at Ostend, September 12, lay one of the heroes of the war. He is Sergeant van der Bern of the Belgian army, and only 17 years old. He was only a corporal when he started out with twenty-nine men on a reconnoitering expedition during which he was wounded, but displayed such valor that his bravery was publicly related to all the soldiers, and Van der Bern was promoted.

Van der Bern and his little command came suddenly upon a band of fifty Uhlans while on their expedition. Outnumbered, his men turned and fled. The corporal shouted to them and dashed alone toward the Germans. The other Belgians rallied and threw themselves upon the Uhlans. Within a few minutes only Van der Bern and two others of his command remained. Twenty-seven Belgians were dead or wounded. Within a few minutes more the corporal's companions fell, mortally wounded. Then the boy picked them up and displaying almost superhuman strength carried them to safety. As he was making his retreat, burdened by the two wounded men, Van der Bern was hit twice by German bullets. He staggered on, placed his men in charge of the Red Cross and without a word walked to headquarters and reported the engagement. Then he fell in a faint.

WHEN THE GERMANS RETREATED

A vivid description of the rout and retreat of the Germans during hurricane and rain on September 10, which turned the roads into river ways so that the wheels of the artillery sank deep in the mire, was given by a correspondent writing from a point near Melun. He described how the horses strained and struggled, often in vain, to drag the guns away, and continued:

"I have just spoken with a soldier who has returned wounded from the pursuit that will go down with the terrible retreat from Moscow as one of the crowning catastrophes of the world. They fled, he declares, as animals flee who are cornered, and know it.

"Imagine a roadway littered with guns, knapsacks, cartridge belts, Maxims and heavy cannons even. There were miles and miles of it. And the dead—those piles of horses and those stacks of men! I have seen it again and again, men shot so close to one another that they remained standing after death. The sight was terrible and horrible beyond words.

"The retreat rolls back and trainload after trainload of British and French are swept toward the weak points of the retreating host. This is the advantage of the battleground which the Allies have chosen. The network of railways is like a spider's web. As all railways center upon Paris, it is possible to thrust troops upon the foe at any point with almost incredible speed, and food and munitions are within arm's reach."

PRINCE JOACHIM WOUNDED

Prince Joachim, youngest son of Emperor William, was wounded during a battle with the Russians and taken to Berlin. On September 15 it was reported from Berlin that the wound was healing rapidly, despite the tearing effect of a shrapnel ball through the thigh. The empress and the surgeons were having considerable trouble in keeping the patient quiet in bed. He wanted to get on his feet again and insisted that he ought to be able to rejoin his command at the front in about a fortnight.

"The prince treats the wound as a trifle," said the Berlin dispatch. "He smilingly greeted an old palace servant whom

he had known since childhood with the remark: 'Am I not a lucky dog?' "

From an officer who was with Prince Joachim when he was wounded the following description of the incident was obtained:

"It was during the hottest part of the battle, shortly before the Russian resistance was broken, that the prince, who was with the staff as information officer, was dispatched to the firing line to learn how the situation stood. He rode off with Adjutant Captain von Tahlzahn and had to traverse the distance, almost a mile, under a heavy hail of shell and occasional volleys.

"As the Russian artillery was well served and knew all the ranges from previous measurements, the ride was not a particularly pleasant one, but he came through safely and stood talking with the officers when a shrapnel burst in their vicinity. The prince and the adjutant were both hit, the latter receiving contusions on the leg, but the shot not penetrating.

"To stop and whip out an emergency bandage which the prince, like every officer and private, carries sewed inside the blouse, and bind it around the thigh to check the bleeding was the work of but a moment. It was a long and dangerous task, however, to get him back to the first bandaging station, about a mile to the rear, under fire and from there he was transported to the advanced hospital at Allenstein, where he remained until he was able to travel.

"Prince Joachim, who was already recommended for the Iron Cross for bravery before Namur, received the decoration shortly before he was wounded. The prince, who has many friends in America, conveyed through his adjutant his thanks for assurances of American sympathy and interest."

EX-EMPRESS DEVOTED TO FRANCE

The aged ex-Empress Eugenie of France, widow of Napoleon III, has been living for many years in retirement in the county of Hampshire, England. She was recently visited by Lord Portsmouth, an old friend, who found the illustrious lady full of courage and devotion to the French cause in the

present war. In explaining her failure to treat her guest as she would have desired, the empress said:

"I cannot give you dinner because most of the men of my kitchen have gone to war."

A "BATTLESHIP ON WHEELS"

Just before the war France added to its equipment the most modern of fighting devices. It is a train of armored cars with rapid-fire guns, conning towers and fighting tops. As a death-dealing war apparatus it is the most unique of anything used by any of the nations. This "battleship" on wheels consists of an armored locomotive, two rapid-fire gun carriages and two armored cars for transporting troops. The rapid-fire guns are mounted in such manner that they can be swung and directed to any point of the compass. Rising from the car behind the locomotive, is a conning tower from which an officer takes observations and directs the fire of the rapid-fire guns. Rails running on top of the cars permit troops to fire from the roof of the cars. For opening railway communications this "battleship on wheels" is unexcelled.

GAVE HIM A FORK TO MATCH

The scene is a village on the outskirts of Muelhausen, in Alsace. A lieutenant of German scouts dashes up to the door of the only inn in the village, posts men at the doorway and entering, seats himself at a table.

He draws his saber and places it on the table at his side and orders food in menacing tones.

The village waiter is equal to the occasion. He goes to the stables and fetches a pitchfork and places it at the other side of the visitor.

"Stop! What does this mean?" roared the lieutenant, furiously.

"Why," said the waiter, innocently, pointing to the saber, "I thought that was your knife, so I brought you a fork to match."

DECORATED ON THE BATTLEFIELD

On a train loaded with wounded which passed through Limoges, September 11, was a young French officer, Albert Palaphy, whose unusual bravery on the field of battle won for him the Legion of Honor.

As a corporal of the Tenth Dragoons at the beginning of the war, Palaphy took part in the violent combat with the Germans west of Paris. In the thick of the battle the cavalryman, finding his colonel wounded and helpless, rushed to his aid.

Palaphy hoisted the injured man upon his shoulders, and under a rain of machine gun bullets carried him safely to the French lines. That same day Palaphy was promoted to be a sergeant.

Shortly afterward, although wounded, he distinguished himself in another affair, leading a charge of his squad against the Baden guard, whose standard he himself captured.

Wounded by a ball which had plowed through the lower part of his stomach and covered with lance thrusts, he was removed from the battlefield during the night, and learned he had been promoted to be a sublieutenant and nominated chevalier in the Legion of Honor.

This incident of decorating a soldier on the battlefield recalls Napoleonic times.

"AFTER YOU," SAID THE FRENCHMAN

Lieutenant de Lupel of the French army is said to have endeared himself to his command by a most unusual exhibition of what they are pleased to term "old-fashioned French gallantry."

Accompanied by a few men, Lieutenant de Lupel succeeded in surrounding a German detachment occupying the station at Mezières. The lieutenant, on searching the premises, came upon the German officer hiding behind a stack of coal. Both men leveled their guns, and for a moment faced each other.

"After you," finally said the Frenchman courteously.

The German fired and missed and Lieutenant de Lupel killed his man.

The French soldiers cheered their leader, and he has been praised everywhere for his action.

A "WALKING WOOD" AT CRECY

A correspondent describes a "walking wood" at Crecy. The French and British cut down trees and armed themselves with the branches. Line after line of infantry, each man

bearing a branch, then moved forward unobserved toward the enemy.

Behind them, amid the lopped tree trunks, the artillerymen fixed themselves and placed thirteen-pounders to cover the moving wood.

The attack, which followed, won success. It almost went wrong, however, for the French cavalry, which was following, made a detour to pass the wood and dashed into view near the ammunition reserves of the Allies.

German shells began falling thereabouts, but British soldiers went up the hills and pulled the boxes of ammunition out of the way of the German shells. Ammunition and men came through unscathed. By evening the Germans had been cleared from the Marne district.

CHAPLAIN CAPTURES AUSTRIAN TROOPERS

The Bourse Gazette relates the story of a Russian regimental chaplain who, single-handed, captured twenty-six Austrian troopers. He was strolling on the steppes outside of Lemberg, when suddenly he was confronted by a patrol of twenty-six men, who tried to force him to tell the details of the position of the Russian troops.

While talking to the men, the priest found that they were all Slavs, whereupon he delivered an impassioned address, dwelling on the sin of shedding the blood of their Slav brethren.

At the end of the address, the story concludes, the troopers with bent heads followed the priest into the Russian camp.

A BRITISH CAVALRY CHARGE

Here is a picturesque story of a British cavalry charge at Thuin, a town in Belgium near Charleroi, and the subsequent retreat to Compiègne:

"On Monday morning, August 24, after chafing at the long delay, the 2nd British Cavalry Brigade let loose at the enemy's guns. The 9th Lancers went into action singing and shouting like schoolboys.

"For a time all seemed well; few saddles were emptied, and the leaders had charged almost within reach of the enemy's guns when suddenly the Germans opened a mur-

derous fire from at least twenty concealed machine guns at a range of 150 yards.

"The result was shattering, and the Lancers caught the full force of the storm. Vicomte Vauvineux, a French cavalry officer who rode with the brigade as interpreter, was killed instantly. Captain Letourey, who was the French master of a school in Devon, was riding by the side of Vauvineux, and had a narrow escape, as his horse was shot from under him. Other officers also fell.

"While the bulk of the brigade swerved to the right the others held on and rode full tilt into wire entanglements buried in the grass thirty yards in front of the machine guns, and were made prisoners. Three regiments of the best cavalry in the British went into the charge, and suffered severely. The 18th Hussars and the 4th Dragoons also suffered, but not to the same extent as the others.

"A happy feature of the charge was the gallant conduct of Captain Grenfell, who, though twice wounded, called for volunteers and saved the guns. It is said that he has been recommended for the Victoria Cross.

"After this terrible ordeal the British brigade was harassed for fourteen days of retreat, the enemy giving them rest neither day nor night. At 2 o'clock each morning they were roused by artillery fire, and every day they fought a retiring action, pursued relentlessly by the guns.

"It was a wonderful retreat. Daily the cavalry begged to be allowed to go for the enemy in force to recover lost ground, but only once were they permitted to taste that joy, at the village of Lassigny, which they passed and repassed three times.

"The Germans made repeated efforts, which were always foiled, to capture the retreating transport. It had, however, many narrow escapes. At one point it escaped by a furious gallop which enabled the wagons to cross a bridge less than an hour ahead of the enemy. The engineers had mined the bridge and were waiting to blow it up. They sent a hurry-up call to the transport, and the latter responded with alacrity. The bridge was blown up just in time to separate the two forces.

"At Compiègne the brigade for the first time saw and welcomed their French brothers-in-arms."

BOY SCOUT HERO OF THE WAR

One of the popular heroes of Belgium is Boy Scout Leyssen, who has been decorated by King Albert for his valor and devotion to his country.

This young man, who was born at Liège, is described as of almost uncanny sharpness, with senses and perceptions as keen as an Indian. He was able to find his way through the woods and pass the German sentinels with unerring accuracy.

Leyssen made his way through the German lines from Antwerp for the tenth time on Sunday, September 6, carrying dispatches to secret representatives of the Belgian government in Brussels. He discovered and denounced eleven German spies in Belgium, and performed a variety of other services, and all without impairing his boyish simplicity.

KAISER ASKS FOR PRAYERS

After the first three weeks of war, Emperor William requested the supreme council of the Evangelical Church throughout the German empire to include the following prayer in the liturgy at all public services during the war:

"Almighty and most merciful God, God of the armies, we beseech Thee in humility for Thy almighty aid for German Fatherland. Bless our forces of war; lead us to victory and give us grace that we may show ourselves to be Christians toward our enemies as well. Let us soon arrive at a peace which will everlastingly safeguard our free and independent Germany."

SPIRIT OF FRENCH WOMEN

When sympathy was expressed in Paris for a poor woman, mother of nine sons, eight of whom were at the front, she replied: "I need no consolation. I have never forgotten that I was flogged by Prussians in 1870. I have urged my sons to avenge me and they will."

As one train of soldiers for the front moved out of a Paris railway station two girls who had bravely kissed farewell to a departing man turned away, and one began to cry, but the other said: "Keep up a little longer, he can still see us."

Another carried a baby, and as her husband leaned out of the window and the train started she threw it into his arms, crying: "Leave it with the station master at the next station, and I will fetch it; you must have it for another few minutes."

A Paris painter, called for military duty, was obliged to leave his wife and four children almost destitute. When he communicated with his wife on the subject she replied: "Do your duty without worrying about us. The city, state and our associations will look after us women and children." In her letter, the wife enclosed a money order for \$1 out of \$1.20, the total amount of money which she possessed.

KILLS MANY WITH ARMORED CAR

Lieutenant Henkart, attached to the general staff of the Belgian Army, perfected a monitor armored motor car which was successfully used by the Belgians.

During the war the officer engaged in reconnoitering in one of his armored cars. He had several encounters with Uhlans, of whom he killed a considerable number, virtually single-handed. His only assistants in his scouting trips were a chauffeur, an engineer and a sharpshooter.

On one occasion the party killed five Uhlans. Two days later it killed seven and on another occasion near Waterloo, the auto ran into a force of 500 Germans and escaped after killing twenty-five with a rapid-fire gun, which was mounted on the motor car.

A GERMAN RUSE THAT FAILED

A Belgian diplomat in Paris related an incident he observed at Charleroi. He said:

"Twenty Death's Head Hussars entered the town at 7 o'clock in the morning and rode quickly down the street, saluting and calling out 'Good-day' to those they met, saying, 'We are friends of the people.'"

"Mistaking them for English cavalrymen, the people cried 'Long live England!' The Belgian soldiers themselves were deceived until an officer at a window, realizing their mistake, ran to the street and gave the alarm. The Belgian soldiers rushed quickly to arms and opened fire on the fleeing Germans, of whom several were killed."

DIED WRITING TO HIS WIFE

Here is a story of a heroic death on the battlefield, told simply in a letter found in the cold hands of a French soldier who had just finished writing it when the end came. "I am awaiting help which does not come," the letter ran. "I pray God to take me, for I suffer atrociously. Adieu, my wife and dear children. Adieu, all my family, whom I so loved. I request that whoever finds me will send this letter to Paris to my wife, with the pocketbook which is in my coat pocket. Gathering my last strength I write this, lying prostrate under the shell fire. Both my legs are broken. My last thoughts are for my children and for thee, my cherished wife and companion of my life, my beloved wife. Vive la France!"

IN THE PARIS MILITARY HOSPITAL

A visitor to the military hospital within the intrenched camp of Paris, just outside the city walls, said on September 18:

"Men of all ranks are there, from the simple private to a general of division. There is no sign of discouragement or sadness on the pale faces, which light up with the thought of returning to battle.

"I saw hundreds of men lying on the beds in the wards with varieties of wounds, no two being identical. This Turco—or African soldier—suffered from a torn tongue, cut by a bullet, which traversed his cheek. Another had lost three fingers of his left hand. A bullet entered the temple of this infantryman and fell into his mouth, where by some curious reaction he swallowed it.

"Many of the patients are suffering from mere flesh wounds. One poor fellow whose eye was put out by a bullet said: "That's nothing. It is only my left eye and I aim with my right. I need the lives of just three Germans to pay for it."

SMOKE AS WOUNDS ARE TREATED

"The Turcos, though terrible hand-to-hand fighters, are hard to care for. They have great fear of pain and it is difficult to bandage their wounds. The doctors give them

cigarettes, which they smoke with dignity as if performing a ritual.

"All the African soldiers were wrathful at a German officer lying in a neighboring room. They muttered in a sinister fashion, 'To-morrow!' and put two hands to the neck. I understood this to mean that they would strangle him to-morrow. Much vigilance is required to keep the officer out of their reach.

"One Turco killed two Prussians with his bayonet and two with the stock of the gun in a single fight. His body is covered with the scars of years of fighting in the service of France. When asked if he liked France he replied: 'France good country, good leaders, good doctors.' He seemed to mind his wound less than the lack of cigarettes."

SPIRIT OF BELGIAN SOLDIERS

Writing from Antwerp on September 1, William G. Shepherd, United Press staff correspondent, illustrated the spirit of the soldiery of Belgium by the following story:

"The little Belgian soldier who climbed into the compartment with me was dead tired; he trailed his rifle behind him, threw himself into the seat and fell sound asleep. He was ready to talk when he awoke an hour later.

"'Yes, I was up all night with German prisoners,' he said. 'It was a bad job, there were only sixteen of us to handle 200 Germans. We had four box cars and we put twenty-five prisoners in one end of the car and twenty-five in the other, and the four of us with rifles sat guard by the car door.

"'We rode five hours that way and I expected every minute that the whole fifty Germans in the car would jump on us four and kill us. Four to fifty; that's heavy odds. But we had to do it. You see there aren't enough soldiers in Belgium to do all the work, so we have to make out the best we can.'

"That's the plucky little Belgian soldier, all over.

"In the first place, he's different from most soldiers, because he is willing to fight when he knows he's going to lose.

"'We have to make out the best we can,' is his motto.

"In the second place, he's a common-sense little fellow. Even while he's fighting, he's doing it coolly, and there is

no blind hatred in his heart that causes him to waste any effort. He gets down to the why and wherefore of things.

"‘I really felt sorry for those German prisoners,’ said a comrade of the first soldier. ‘They were all decent fellows. They told me their officers had fooled them. They said the officers gave them French money on the German frontier and then yelled to them, “On into France!” They went on three days and got to Liège before they knew they were in Belgium instead of France.’

"‘We didn’t want to hurt Belgium,’ they told us, ‘because we’re from Alsace-Lorraine ourselves.’

"‘You see,’ continued the logical little Belgian, ‘it wasn’t their fault, so we couldn’t be mad at them.’

"‘That is the Belgian idea—cool logic.’

"‘Why did you fight the Germans?’ I asked a high government official.

"‘Because civilization can’t exist without treaties, and it is the duty that a nation owes to civilization to fight to the death when written treaties are broken,’ was the reply.

"‘It must be a rule among nations that to break a treaty means to fight. The Germans broke the neutrality treaty with Belgium and we had to fight.’

"‘But did you expect to whip the Germans?’

"‘How could we? We knew that hordes of Germans would follow the first comers, but we had no right to worry about who would be whipped; all we had to do was to fight, and we’ve done it the best we could.’

"‘It has been a cool-headed logical matter with the Belgians from the start. Treaties are made with ink; they’re broken with blood, and just as naturally and coolly as the Belgian diplomats used ink in signing the treaties with Germany so the Belgian soldiers have used their blood in trying to maintain the agreements.’

RIFLES USED BY NATIONS OF WAR

In the present war Germany uses a Mauser rifle, with a bullet of 8 millimeters caliber, steel and copper coated. Great Britain’s missile is the Lee-Enfield, caliber 7.7 mm., the coating being cupro-nickel.

The French weapon is the Lebel rifle, of 8 mm. caliber, with bullets coated with nickel. Russia uses Mossin-Nagant

rifles, 7.62 mm., with bullets cupro-nickel coated. Austria's chief small arm is the Mannlicher, caliber 8 mm., with a steel sheet over the tip.

Hitting a man beyond 350 yards, the wounds inflicted by all these bullets are clean cut. They frequently pass through bone tissue without splintering.

When meeting an artery the bullet seems to push it to one side and goes around without cutting the blood channel.

Amputations are very rare compared with wars of more than fifty years ago. A bullet wound through a joint, such as the knee or the elbow, then necessitated the amputation of the limb. Now such a wound is easily opened and dressed.

Even Russia, which made a sad sanitary showing in the war with Japan, now has learned her lesson and has efficient surgical arrangements.

All the nations use vaccine to combat typhoid, the scourge which once decimated camps, and killed 1,600 in the Spanish-American war.

GERMAN UHLANS AS SCOUTS

Concerning the German Uhlans, of whom so much has been heard in the European war, Luigi Barzini, a widely known Italian war correspondent, said:

"The swarms of cavalry which the Germans send out ahead of their advance are to be found everywhere—on any highway, on any path. It is their business to see as much as possible. They show themselves everywhere and they ride until they are fired upon, keeping this up until they have located the enemy.

"Theirs is the task of riding into death. The entire front of the enemy is established by them, and many of them are killed—that is a certainty they face. Now and then, however, one of them manages to escape to bring the information himself, which otherwise is obtained by officers in their rear making observation.

"At every bush, every heap of earth, the Uhlan must say to himself: 'Here I will meet an enemy in hiding.' He knows that he cannot defend himself against a fire that may open on him from all sides. Everywhere there is danger for the Uhlan—hidden danger.

"Nevertheless he keeps on riding, calmly and undisturbed, in keeping with German discipline."

FOUGHT WITHOUT SHOES

The Paris *Matin* relates that on the arrival of a train bringing wounded Senegalese riflemen nearly all were found smoking furiously from long porcelain pipes taken from the enemy and seemingly indifferent to their wounds. One gayly told of the daring capture of a machine gun by eighteen of his comrades. The gun, he said, was brought up by a detachment of German dragoons and the Senegalese bravely charged and captured everything.

Though their arms and bodies were hacked by sabers, the Senegalese complained of nothing but the obligation to fight with shoes on. Before going into battle at Charleroi they slyly rid themselves of these impediments and came back shod in German footwear to avoid punishment for losing equipment.

KILLED A GENERAL

The shot which resulted in the death of Prince von Buelow, one of the German generals, was fired by a Belgian private named Rosseau, who was decorated by King Albert for his conduct in the battle of Haelen.

Rosseau was lying badly wounded among his dead comrades when he saw a German officer standing beside his horse and studying a map. Picking up a rifle beside a dead German, Rosseau fired at this officer and wounded him. The officer proved to be Prince von Buelow. Exchanging his hat for the German general's helmet and taking the general's horse, Rosseau made his way to the Belgian lines and was placed in a hospital at Ghent.

HOW A GERMAN PRINCE DIED

The Hanover *Courier* gave the following account by an eyewitness of the death of Prince Frederick William of Lippe at Liege:

"On all sides our detachment was surrounded by Belgian troops, who were gradually closing in for purposes of exterminating us. At the prince's command we formed a circle

eight deep, maintaining a stubborn defense. At length a strong division arrived to support us. The prince raised himself from a kneeling position and turned to the standard bearer, who lay prone beside him, covering the standard with his body.

"'Raise the standard,' commanded the prince, 'so that we may be recognized by our friends.'

"The standard bearer raised the flag, waving it to and fro. This action immediately brought upon the standard bearer and the prince a violent fusillade. The standard was shot away and at the same moment the prince was struck in the chest and expired instantly."

RAILWAY STATION A SHAMBLES

Mrs. Herman H. Harjes, wife of the Paris banker, who, with other American women, was deeply interested in relief work, visited the North railroad station at Paris on September 1 and was shocked by the sights she saw among the Belgian refugees.

"The station," said Mrs. Harjes, "presented the aspect of a shambles. It was the saddest sight I ever saw. It is impossible to believe the tortures and cruelties the poor unfortunates had undergone.

"I saw many boys with both their hands cut off so that it was impossible for them to carry guns. Everywhere was filth and utter desolation. The helpless little babies, lying on the cold, wet cement floor and crying for proper nourishment, were enough to bring hot tears to any mother's eyes.

"Mothers were vainly besieging the authorities, begging for milk or soup. A mother with twelve children said:

"'What is to become of us? It seems impossible to suffer more. I saw my husband bound to a lamppost. He was gagged and being tortured by bayonets. When I tried to intercede in his behalf, I was knocked senseless with a rifle. I never saw him again.'"

BURIED ON THE FIELD

The bodies of the dead in this war were not, with occasional exceptions, returned to their relatives, but were buried on the field and where numbers required it, in common graves.

Valuables, papers and mementoes were taken from the bodies and made up in little packets to be sent to the relatives, and the dead soldiers, each wrapped in his canvas shelter tent, as shroud, were laid, friend and foe, side by side in long trenches in the ground for which they had contested.

GERMAN LISTS OF THE DEAD

In the German official Gazette daily lists of the dead, wounded and missing were published. The names marched by in long columns of the Gazette, arrayed with military precision by regiments and companies, batteries or squadrons—first the infantry and then cavalry, artillery and train.

The company lists were headed usually by the names of the officers, killed or wounded; then came the casualties from the enlisted strength—first the dead, then the wounded and the missing. A feature of the early lists was the large proportion of this last class, reports from some units running monotonously, name after name, “missing” or “wounded and missing”—in mute testimony of scouting patrols which did not return, or of regiments compelled to retire and leave behind them dead, wounded and prisoners, or sometimes of men wandering so far from their comrades in the confusion of battle that they could not find and rejoin their companies for days.

THE LANCE AS A WEAPON

An attempt was made in lists of the German wounded to give the nature and location of the wound. These were principally from rifle or shrapnel fire. A scanty few in the cavalry were labeled “lance thrust,” indicating that the favorite weapon of the European cavalry has not done the damage expected of it, although the lance came more into play in the later engagements between the Russian and German cavalry divisions.

“FATHERLAND OR DEATH!”

Writing from Aix-la-Chapelle, Germany, on August 29th, Karl H. von Wiegand, who is considered by the Allies a German mouthpiece, said:

“America has not the faintest realization of the terrible carnage going on in Europe. She cannot realize the deter-

mination of Germany, all Germany—men, women and children—in this war. The German Empire is like one man. And that man's motto is 'Vaterland oder Tod!' (Fatherland or Death!)

"English news sources are reported here as telling of the masterly retreat of the allies. Here in the German field headquarters, where every move on the great chess-board of Belgium and France is analyzed, the war to date is referred to as the greatest offensive movement in the history of modern warfare."

GERMAN PLANS WELL LAID

The German offensive plans were well laid. No army that ever took the field was ever so mobile. Thousands of army autos have been in use. Each regiment had its supply. The highways were mapped in advance. There was not a cross-road that was not known. Even the trifling brooks had been located. Nothing had been left to chance and the advance guard was accompanied by enormous automobiles filled with corps of sappers who carried bridge and road building materials.

THE TERRIBLE KRUPP GUNS

How well the German plans worked was shown when Namur, which, it was boasted, would resist for months, fell in two days. The terrible work of the great Krupp weapons, whose existence had been kept secret, is hard to realize. One shot from one of these guns went through what was considered an impregnable wall of concrete and armored steel at Namur, exploded and killed 150 men.

And aside from the effectiveness of these terrible weapons, Belgian prisoners who were in the Namur forts declare their fire absolutely shattered the nerves of the defenders, whose guns had not sufficient range to reach them.

GERMANS DEFY DEATH

"It makes you sick to see the way that the Germans literally walk into the very mouth of the machine guns and cannon spouting short-fused shrapnel that mow down their lines and tear great gaps in them," said a Belgian major who was

badly wounded. "Nothing seems to stop them. It is like an inhuman machine and it takes the very nerve out of you to watch it."

SPIRIT OF GERMAN WOMEN

"The women of Germany are facing the situation with heroic calmness," said Eleanor Painter, an American opera singer on landing in New York September 7th, direct from Berlin, where she had spent the last four years. "It is all for the Fatherland. The spirit of the people is wonderful. If the men are swept away in the maelstrom of war, the women will continue to fight. They are prepared now to do so.

"There are few tears in Berlin. Of course there is sorrow, deep sorrow. But the German women and the few men still left in the capital realize that the national life itself is at stake and accept the inevitable losses of a successful military occupation. There is a grim dignity everywhere. There are no false ideas as to the enormity of the struggle for existence. A great many Germans, in fact, realizing that it is nearly the whole world against Germany, do not believe that the Fatherland can survive. But they are determined that while there is a living German so long will Germany fight.

FATHER AND TEN SONS ENLIST

"A German father with his ten sons enlisted. General von Haessler, more than the allotted three-score years and ten, veteran of two wars, offered his sword. Boys who volunteered and who were not needed at the time wept when the recruiting officers sent them back home, telling them their time would come.

"The German women fight their own battles in keeping back tears and praying for the success of the German arms. Hundreds of titled women are at the front with the Red Cross, sacrificing everything to aid their country. Baroness von Ziegler and her daughter wrote from Wiesbaden that they were en route to the front and were ready to fight if need be.

"Even the stupendous losses which the army is incurring cannot dim the love of the Fatherland nor the desire of the Germans, as a whole nation, to fight on. I speak of vast

STORIES FROM THE BATTLEFIELD

losses. An officer with whom I talked while en route from Berlin to Rotterdam, told me of his own experience. He was one of 2,000 men on the eastern frontier. They saw a detachment of Russians ahead. The German forces went into battle singing and confident, although the Russian columns numbered 12,000. Of that German force of 2,000 just fifty survived. None surrendered."

FEARFUL STATE OF BATTLEFIELDS

Dead men and horses, heaped up by thousands, lay putrefying on the battlefields of the Aisne, Colonel Webb C. Hayes, U. S. A., son of former President Hayes, declared in Washington on Oct. 7, on his return from observing the war and its battlefields. He was the bearer of a personal message to President Wilson from the acting burgomaster of Louvain.

"When I left Havre on Sept. 27," he said, "the Allies were fearful that they would not be able to penetrate to the German line through the mass of putrefying men and horses on the battlefields, which unfortunately the combatants seem not to heed about burying. I don't see how they could pass through these fields. The stench was horrible, and the idea of climbing over the bodies must be revolting even to brave soldiers."

Col. Hayes had been on the firing line; he had visited the sacked city of Louvain as the guest of Germans in an armored car; he had been in Aix-la-Chapelle, at the German base, and had seen some of the fighting in the historic Aisne struggle.

"It is a sausage grinder," he declared.

"On one side are the Allies, apparently willing to sacrifice their last man in defense of France; on the other are the Germans, seemingly prodigal of their millions of men and money and throwing man after man into the war."

"What about the alleged atrocities in Belgium?" he was asked.

"Well, war is hell; that's about the only answer I can give you. The real tragic feature of the whole war is Belgium. Its people are wonderful folk—clean, decent, respectable. What this nation should do is to concentrate its efforts to aid the women and children of Belgium. Help for hospitals is not so much needed, but the fate of these people is really pathetic."

Asked for a brief description of what he saw along the battle line, Col. Hayes declared:

"The battle front these days is far different from what it used to be. There are few men to be seen, and practically no guns. All are concealed. Shrapnel flies through the air and bursts. That is the scene most of the time. In the hand-to-hand fighting bayonets are used much by the French, while the Turcos use knives."

"Shall you go back?" Col. Hayes was asked.

"Does anyone wish to visit a slaughterhouse a second time?" he replied.

PRINCES WOUNDED BY THE FOE

Prince August William, the fourth son of Emperor William, was shot in the left arm during the battle of the Marne and Emperor William bestowed the Iron Cross of the first class on him.

Prince Eitel, the Kaiser's second son, was wounded during the battle of the Aisne. Up to October 7 four of Emperor William's sons had been placed temporarily *hors de combat*.

Prince George of Servia, while leading his battalion against the Austrians September 18, was hit by a ball which entered near the spinal column and came out at the right shoulder. The wound was said not to be dangerous.

HOW THE SCOTSMEN FOUGHT

At St. Quentin, France, the Highland infantrymen burst into the thick of the Germans, holding on to the stirrups of the Scots Greys as the horsemen galloped, and attacked hand to hand. The Germans were taken aback at the sudden and totally unexpected double irruption, and broke up before the Scottish onslaught, suffering severe losses alike from the swords of the cavalry and from the Highlanders' bayonets. The scene of this charge is depicted in one of our illustrations.

TWO TRAGIC INCIDENTS

During the Russian retreat through the Mazur lake district, in East Prussia, a Russian battery was surrounded on three sides by the enemy's quick firers. The infantry was on the other side of the lake, and the Russian ammunition was

exhausted. In order to avoid capture, the commander ordered the battery to gallop over the declivity into the lake. His order was obeyed and he himself was among the drowned.

During an assault on the fortress of Ossowitz, a German column got into a bog. The Russians shelled the bog and the single road crossing it. The Germans, in trying to extricate themselves, sank deeper into the mire, and hundreds were killed or wounded. Of the whole column, about forty survived.

IN THE BRUSSELS HOSPITALS

A peculiar incident of the war is noted by a doctor writing in the New York American, who went through several of the great Brussels hospitals and noted the condition of the wounded Belgian soldiers. These soldiers carried on the defense of their country with a valor which the fighting men of any nation might admire and envy. The writer remarks:

"Two facts struck me very forcibly. The first was the very large number of Belgian soldiers wounded only in the legs, and, secondly, many of the soldiers seem to have collapsed through sheer exhaustion.

"In peace times one sees and hears little or nothing of extreme exhaustion, because in times of peace the almost superphysical is not demanded. War brings new conditions.

"These Belgian soldiers were at work and on the march during stupendous days, practically without a moment's respite. They went, literally, until they dropped. As a medical man, their condition interested me enormously.

"What force of will to fight and struggle until the last gasp! The exhaustion one sees often in heat strokes and in hot climates is commonplace, but this type of exhaustion is, by itself, the final triumph of brave spirits.

"The victims presented a very alarming appearance when first I met them. They seemed almost dead; limp, pale, and cold. Recovery usually is not protracted; in every case the men knocked out in this manner expressed a fervent desire to return at once to the ranks.

GERMAN WARNING TO FRENCH TOWNS

Following is the text of a proclamation published in French and posted in all towns occupied by the Germans:

"All the authorities and the municipality are informed that every peaceful inhabitant can follow his regular occupation in full security. Private property will be absolutely respected and provisions paid for.

"If the population dare under any form whatever to take part in hostilities the severest punishment will be inflicted on the refractory.

"The people must give up their arms. Every armed individual will be put to death. Whoever cuts telegraph wires, destroys railway bridges or roads or commits any act in detriment to the Germans will be shot.

"Towns and villages whose inhabitants take part in the combat or who fire upon us from ambush will be burned down and the guilty shot at once. The civil authorities will be held responsible. (Signed) VON MOLTKE."

MOTORS IN THE RUSSIAN ARMY

The Russian army has always placed much dependence on its horses, having a vast number, but it has realized the importance of the motor vehicle in warfare and already it is much better equipped than other nations suppose. An illustration of the fact is the following, related by a Red Cross man who accompanied the Russian forces into eastern Germany:

"I was walking beside one of our carts. We could hear heavy artillery fire as we went, when shouts from our people behind warned us to get off the road. We pulled onto the grass as there came thundering past, bumping from one rough place to another on the poor road and going at a sickening pace, a string of huge motor cars crowded with infantrymen. They

looked like vehicles of the army establishment, all apparently alike in size and pattern and each carrying about thirty men.

"They were traveling like no motor wagon that I ever saw—certainly at not less than forty miles an hour. The procession seemed endless. I didn't count them, but there were not less than a hundred, and perhaps a good many more. That was General Rennenkampf reinforcing his threatened flank."

JENNIE DUFAN'S NARROW ESCAPE

Jennie Dufan, the American opera singer, had one of the most thrilling experiences told by a refugee from the war zone.

Miss Dufan was visiting in Saulxures, Province of Alsace, when the war started, and was in the hitherto peaceful valley of that region until August 24. She was with her sister, Elizabeth, and her two brothers, Paul and Daniel.

On August 6 the German artillery occupied the heights on one side of the valley, overlooking the town. On the 12th the Germans occupied the town itself. At that time there were but two French regiments near Saulxures.

The French, however, opened fire on the Germans, and Miss Dufan with her father and sister at once retreated to the cellar in an effort to escape the flying shells.

"Then began a tremendous artillery duel that lasted for days," she said. "All this time we were living in the cellar, where we were caring for ten wounded French officers. I often went out over the battlefield when the fire slackened and did what I could for the wounded and dying.

"My brothers Paul and Daniel were drafted into the German army. They had sworn an oath not to fire a shot at a Frenchman, and their greatest hope was that they would be captured and permitted to put on the French uniform.

"Between August 12 and 24 the artillery duel raged, and finally the opposing armies came to a hand-to-hand fight with the bayonet. First it was the Germans who occupied the town, then the French. The Germans finally came to our house and accused my sister, my father, and myself of being spies because they found a telephone there. The soldiers lined us up against the wall to shoot us, but we fell on our knees and begged them to spare the life of our father. They gave no heed till a German colonel came along and, after questioning us, ordered that we be set free."

VALLEY OF DEATH ON THE AISNE

A non-combatant who succeeded in getting close to the firing lines on the Aisne when the great battle had raged continuously for five weeks, wrote as follows on October 21st of the horrors he had witnessed:

"Between the lines of battle there is a narrow strip, varying from seventy yards to a quarter of a mile, which is a neutral valley of death. Neither side is able to cross that strip without being crumpled by fire against which no body of men can stand. The Germans have attempted to break through the British and French forces hundreds of times but have been compelled to withdraw, and always with severe losses.

"A number of small towns are distributed in this narrow strip, the most important being Craonne. The Germans and French have reoccupied it six times and each in turn has been driven out. The streets of Craonne are littered with the dead of both armies. The houses, nearly all of which have been demolished by exploding shells, are also full of bodies of men who crawled into them to get out of the withering fire and have there died. Many of these men died of sheer exhaustion and starvation while the battle raged day after day.

"Both armies have apparently abandoned the struggle to hold Craonne permanently, and it is now literally a city of the dead.

"It is a typical French village of ancient stone structures; the tiny houses all have, or had, gables and tiled roofs. These have mostly been broken by shell fire. Under the shelter of its buildings both the Germans and French have been able at times to rescue their wounded.

"This is more than can be said of the strip of death between the battle lines. There the wounded lie and the dead go unburied, while the opposing forces direct their merciless fire a few feet above the field of suffering and carnage. I did not know until I looked upon the horrors of Craonne that such conditions could exist in modern warfare.

"I thought that frequent truces would be negotiated to give the opposing armies an opportunity to collect their wounded and bury their dead. I had an idea that the Red

Cross had made war less terrible. The world thinks so yet, perhaps, but the conditions along the Aisne do not justify that belief. If a man is wounded in that strip between the lines he never gets back alive unless he is within a short distance of his own lines or is protected from the enemy's fire by the lay of the land.

"This protracted and momentous battle, which raged day and night for so many weeks, became a continuous nightmare to the men engaged in it, every one of whom knew that upon its issue rested one of the great deciding factors of the war."

BRITISH AID FOR FRENCH WOUNDED

The following paragraphs from a letter received October 15th by the author from an English lady interested in the suffrage movement, give some idea of the spirit in which the people of England met the emergency; and also indicate the frightful conditions attending the care of the wounded in France:

"London, October 7, 1914.—The world is a quite different place from what it was in July—dear, peaceful July! It seems years ago that we lived in a time of peace. It all still seems a nightmare over England and one feels that the morning must come when one will wake up and find it has all been a hideous dream, and that peace is the reality. But the facts grow sadder every day, as one realizes the frightful slaughter and waste of young lives. * * *

"But now that we are in the midst of this horrible time, we can only stop all criticism of our Government, set our teeth, and try to help in every possible way. All suffrage work has stopped and all the hundred-and-one interests in societies of every kind are in abeyance as well. The offices of every kind of society are being used for refugees, Red Cross work, unemployment work, and to meet other needs of the moment.

"Every day of our time is taken up with helping to equip 'hospital units,' private bodies of doctors and nurses with equipment, to go to France and help the French Red Cross work among the French wounded. The situation in France at present is more horrible than one can imagine. Our English soldiers have medical and surgical help enough with them for first aid. Then they are sent back to England, and here

all our hospitals are ready and private houses everywhere have been given to the War Office for the wounded. But the battlefield is in France; many of the French doctors have been shot; the battle-line is 200 miles long, and the carnage is frightful.

"Last week we sent off one hospital unit, and a messenger came back from it yesterday to tell us awful facts—16,000 wounded in Limoges for one place, and equal numbers in several other little places south of Paris—just trains full of them—with so little ready for them in the way of doctors or nurses. One hears of doctors performing operations without chloroform, and the suffering of the poor fellows is awful."

COMPARATIVE WEALTH OF NATIONS AT WAR

The wealth of the principal belligerent nations, in terms of property, goods and appraisable resources of all kinds, is estimated as follows:

	National Wealth	National Debt	Percent
United States.....	\$260,000,000,000	\$18,000,000,000	6.9
Great Britain.....	90,000,000,000	36,675,000,000	40.7
France	65,000,000,000	23,000,000,000	35.4
Russia	40,000,000,000	25,400,000,000	63.5
Italy	25,000,000,000	7,000,000,000	28.0
Japan	28,000,000,000	1,300,000,000	4.6
Germany	80,000,000,000	33,000,000,000	38.7
Austria-Hungary.....	25,000,000,000	20,000,000,000	80.0

It is worth noting in this connection that the fourth liberty bond issue of six billions was oversubscribed to extent \$866,416,300—almost an extra billion. There were over 21,000,000 individual subscribers.

The war bills of the United States between April 6, 1917, and October 31st, 1918, as officially reported at Washington November 2, 1918, amounted to twenty billions, five hundred and sixty-one million dollars (\$20,561,000,000). Of this sum, seven billions and seventeen millions (\$7,017,000,000) have been loaned to the allies and will be repaid.

Only a little more than one-fourth of the expense had up to the date of the report been raised by taxation. Most of the remainder had been raised by bond issues practically all of which were subscribed by our own people, so that the debt is owing not to foreign creditors, but to ourselves.

The same report shows that on November 1st, 1918, the treasury's working balance stood at one billion, eight hundred and forty-five millions, seven hundred and thirty-nine thousand dollars (\$1,845,739,000) the largest sum ever available at any one time in the history of the nation—with continuing receipts of instalment payments on the fourth liberty loan coming in at the rate of two billions per month, and preparations for the fifth loan well under way.

FIGURES THAT ARE DIFFICULT TO COMPREHEND.

The direct cost of the war for all belligerent nations to May 1, 1918, was reported at about \$175,000,000,000 by the Federal Reserve board bulletin, issued November 18. It was estimated that the cost would amount to nearly \$200,000,000,000 before the end of the year.

For purely military and naval purposes, it appears that all belligerents had spent about \$132,000,000,000 to May 1. The remainder represented interest on debt, and other indirect war expenses.

The mobilization and the first five months of the war in 1914 cost all belligerents about \$10,000,000,000. In 1915 the expenses jumped to \$26,000,000,000, in 1916 they increased to \$38,000,000,000; and in 1917 they were estimated at \$60,000,000,000. In 1918 expenses ran only a little above the rate of 1917.

The public debt of the principal entente allies is calculated at approximately \$105,000,000,000, not counting the debt incurred since May 1918. The annual burden to all belligerents to pay interest and sinking fund allowances will be not less than \$10,000,000,000, and probably much more.

Unofficial reports indicate that Germany's national debt, represented mainly by war bonds held within the empire, is now nearly \$35,000,000,000 (almost two-fifths of the estimate national wealth of \$80,000,000,000). Besides this, France claims a return of the 1871 indemnity, \$20,000,000,000; \$28,000,000,000 for pensions; and reparation of damages, \$20,000,000,000; being \$68,000,000,000 in all.

Whatever may be the weight of the final burden of reparation and restitution to be placed on Germany, the size of the task ahead of her may be illustrated by comparison of her national debt with that of the United States, Germany has 66,000,000 population and \$80,000,000,000 of estimated wealth, to pay \$35,000,000,000 of war debt already created.

The United States has 110,000,000 population and an estimated national wealth of \$250,000,000,000, to pay nearly \$18,000,000,000 war debt already created, or approximately \$23,000,000,000 up to the end of May, 1919. This means that the per capita burden will be at least three times greater in Germany than in the United States.

CHAPTER XV

THE MYSTERY OF THE FLEETS

Movements of British Battleships Veiled in Secrecy—German Dreadnoughts in North Sea and Baltic Ports—Activity of Smaller Craft—English Keep Trade Routes Open—Several Minor Battles at Sea.

SHORTLY before war was declared a great review of the British navy was held at Spithead, on the English Channel, when several hundred vessels were gathered in mighty array for inspection by King George and the lords of the Admiralty. The salutes they fired had hardly ceased to reverberate along the shores of the Channel when the momentous struggle was on. It found the British fleet fully mobilized and ready for action. The ships had their magazines filled, their bunkers and oil tanks charged, their victualing completed, and last, but not least, their full crews aboard.

Then, without a moment's delay, they disappeared, under orders to proceed to stations in the North Sea, to cruise in the Channel, the Atlantic or the Mediterranean; to keep trade routes open for British and neutral ships and capture or destroy the ships of the enemy. Silently and swiftly they sailed, and for weeks the world knew little or nothing of their movements or whereabouts.

Mystery equally deep shrouded the German fleet. In all probability it lay under the guns of the coast cities and forts of Germany, but nothing definite was permitted to leak out. The test of the two great navies, the supreme test of dreadnoughts and superdreadnoughts, failed to materialize, and for weeks the people of Great Britain and Germany could only wonder what had become of their naval forces and why they did not come into contact with each other. A few minor engagements in the North Sea, in which light cruisers and

torpedo-boat destroyers were concerned, served only to deepen the mystery.

Only naval men and well-informed civilians realized that Germany was biding her time, waiting to choose her own hour for action, realizing the strength of the opposing force and determined not to risk her own ships until the opportune moment should arrive which would offer the best possible chances for success. And meanwhile the main British fleet lay in the North Sea, waiting for the enemy to appear.

After awhile letters began to come from the North Sea, telling of the life aboard the vessels lying in wait, scouting or patrolling the coasts. The ships were all stripped for action; all inflammable ornaments and fittings had been left behind or cast overboard; stripped and naked the fighting machines went to their task. All day long the men were ready at their guns, and during the night each gun crew slept around the weapon that it was their duty to serve, ready to repel any destroyers or submarines coming out of the surrounding darkness to attack them.

Vice-Admiral Sir John Jellicoe had assumed supreme command of the British home fleet on August 4, with the rank of admiral. His chief of staff was Rear Admiral Charles E. Madden. Rear Admiral Sir George Callaghan was in command of the North Sea fleet.

AN ADMIRALTY ANNOUNCEMENT

On Thursday, September 10, the secretary of the British Admiralty made the following announcement: "Yesterday and today strong and numerous squadrons and flotillas have made a complete sweep of the North Sea up to and into the Heligoland Bight. The German fleet made no attempt to interfere with our movements and no German ship of any kind was seen at sea."

That much patience had to be exercised by the seamen of the North Sea fleet is evidenced by a letter in which the writer said to his family, "If you want to get away from the excitement of war, you should be here with me." This situation, of course, might be changed at a moment's notice. The London Times said in September: "It is not to be wondered at if our seamen today envy a little the old-time sailors who did not have to compete with such things as mines, destroyers and

submarines. In the accounts of the old blockades we read how by means of music and dancing, and even theatrical entertainments, the monotonous nature of the work was counteracted, and the officers of the ships, including Nelson and other great commanders, welcomed these diversions for the prevention of the evils which might be bred by enforced idleness. It is a true saying that everything that stagnates corrupts. There is no possible chance of the crews of our modern vessels stagnating under the new conditions of war. Whether engaged in blockading in the big ships, scouting in the cruisers, or patrolling the coasts in the destroyers, the life is described as tremendously interesting and exciting. There has been no sense of monotony whatever. Indeed, the conditions are such that, were it not obligatory for portions of every crew to take rest, all of them would be continually on the alert. We may be certain that arrangements have been made for ensuring that the crews obtain periods of relaxation from the constant strain; but the only real change comes in the big ships when they have of necessity to refill their bunkers."

LOSS OF THE CRUISER AMPHION

The cruiser *Amphion* was the first British war vessel lost in the war. The survivors on landing at the North Sea port of Harwich, England, on August 10, stated that hardly had they left Harwich than they were ordered to clear the decks for action. They sighted the German mine-laying vessel *Koenigin Luise*, and, as it refused to stop even when a shot was fired across its bows, they gave chase.

The German ship fired and then the destroyers, accompanying the *Amphion*, surrounded and sank it after a brief combined bombardment.

The captain, it is said, was beside himself with fury. He had a revolver in his hand and threatened his men as they prepared to surrender to the rescuing ships. He flatly refused to give himself up and was taken by force.

When the smoke of a big ship was seen on the horizon the *Amphion* gave chase, firing a warning shot as it drew near the vessel, which at once made known its identity as the Harwich boat *St. Petersburg*, carrying Prince Lichnowsky, the German ambassador, to the Hook of Holland.

A typical aerial battle. Destruction of a Boche plane by dauntless American aviators, swooping like eagles upon their prey, regardless of the anti-aircraft shells that burst all about them, and helping by their intrepidity and skill to clear the air of the Hun and maintain the supremacy gained by the Allies in aerial warfare. Thousands of American flyers were trained and ready to carry the war into Germany when the Teuton forces collapsed and cried "Enough!" (Photo from I. F. S.)

Above—Field dressing station on captured ground near Cambrai, during the last great drive on the British front. The wounded are being brought in by German prisoners taken during the drive, as seen in the foreground. A typical scene at a dressing station, where first aid is given the wounded. (*British Official Photo, from I. F. S.*)

Below—A dashing attack by French poilus, advancing with full packs, bayonets fixed, and typical daring and courage. The spirit of the poilu is admirably illustrated in this snapshot. (*Photo by I. F. S.*)

While returning to port came the tragedy of the Amphion. As it struck a sunken mine it gave two plunging jerks. Then came an explosion which ripped up its forepart, shot up its funnels like arrows from a bow, and lifted its heavy guns into the air. The falling material struck several of the boats of the flotilla and injured some of the men on board them.

The Amphion's men were dreadfully burned and scalded and had marks on their faces and bodies which resembled splashes of acid.

The scene at Harwich was like that which follows a colliery explosion. Of the British seamen in the hospital thirteen were suffering from severe burns, five from less serious burns, two from the effects of lyddite fumes, and one each from concussion, severe injury, slight wounds, shock, and slight burns. A few wounded German sailors also lay in the hospital.

SINKING A GERMAN SUBMARINE

On August 12 there came from Edinburgh the story of an eyewitness of a naval battle in the North Sea on the previous Sunday between British cruisers and German submarines, in which the German submarine U-15 was sunk.

"The cruiser squadron on Sunday," the story ran, "suddenly became aware of the approach of the submarine flotilla. The enemy was submerged, only the periscopes showing above the surface of the water.

"The attitude of the British in the face of this attack was cool and the enemy was utterly misled when suddenly the cruiser Birmingham, steaming at full speed, fired the first shot. This shot was carefully aimed, not at the submerged body of a submarine, but at the thin line of the periscope.

"The gunnery was superbly accurate and shattered the periscope. Thereupon the submarine, now a blinded thing, rushed along under water in imminent danger of self-destruction from collision with the cruisers above.

"The sightless submarine was then forced to come to the surface, whereupon the Birmingham's gunner fired the second shot of the fight. This shot struck at the base of the conning tower, ripping the whole of the upper structure clean and the U-15 sank like a stone.

"The remainder of the submarine flotilla fled."

NAVAL BATTLE OFF HELIGOLAND

In the last week of August a naval engagement occurred off the island of Heligoland, in the North Sea. British war vessels sank five German ships, killing 900 men. A graphic description of the engagement was given by a young lieutenant who was on one of the British torpedo boat destroyers:

"I think the home papers are magnifying what really was but an affair of outposts. We destroyers went in and lured the enemy out and had lots of excitement. The big fellows then came up and afforded some excellent target practice, and we were very glad to see them come; but it was a massacre, not a fight.

"There was superb generalship and overwhelming forces on the spot, but there was really nothing for them to do except to shoot the enemy, even as father shoots pheasants.

"Have you ever noticed a dog rush in on a flock of sheep and scatter them? He goes for the nearest and barks and goes so much faster than the flock that it bunches up with its companions. The dog then barks at another and the sheep spread out fanwise, so in front of the dog there is a semicircle of sheep and behind him none.

"That was much what we did at 7 a. m. on August 28. The sheep were the German torpedo craft, which fell back on the limits of our range and tried to lure us within the fire of the Heligoland forts. But a cruiser then came out and engaged our *Arethusa* and they had a real heart-to-heart talk, while we looked on, and a few of us tried to shoot at the enemy, too, though it was beyond our distance.

"We were getting nearer Heligoland all the time. There was a thick mist and I expected every minute to find the forts on the island bombarding us, so the *Arethusa* presently drew off after landing at least one good shell on the enemy. The enemy gave every hit as good as he got there.

"We then reformed, but a strong destroyer belonging to the submarines got chased, and the *Arethusa* and *Fearless* went back to look after it. We presently heard a hot action astern, so the captain in command of the flotilla turned us around and we went back to help. But they had driven the

enemy off and on our arrival told us to 'form up' on the Arethusa.

CRUISER FIRES ON SHIPS

"When we had partly formed and were very much bunched together, making a fine target, suddenly out of the mist arrived five or six shells from a point not 150 yards away. We gazed at whence they came and again five or six stabs of fire pierced the fog, and we made out a four-funneled German cruiser of the Breslau class.

"Those stabs were its guns going off. We waited fifteen seconds and the shots and noise of its guns arrived pretty well from fifty yards away. Its next salvo of shots went above us, and I ducked as they whirled overhead like a covey of fast partridges.

"You would suppose our captain had done this sort of thing all his life. He went full speed ahead at once, upon the first salvo, to string the bunch out and thus offer less target. The commodore from the Arethusa made a signal to us to attack with torpedoes. So we swung round at right angles and charged full speed at the enemy like a hussar attack.

"Our boat got away at the start magnificently and led the field, so all the enemy's firing was aimed at us for the next ten minutes, when we got so close that debris from their shells fell on board. Then we altered our course and so threw them out in their reckoning of our speed, and they had all their work to do over again.

"Humanly speaking, our captain by twisting and turning at psychological moments saved us. Actually, I feel that we were in God's keeping that day. After ten minutes we got near enough to fire our torpedo. Then we turned back to the Arethusa. Next our follower arrived just where we had been and fired its torpedo, and of course the enemy fired at it instead of at us. What a blessed relief!

"After the destroyers came the Fearless, and it stayed on the scene. Soon we found it was engaging a three-funneler, the Mainz, so off we started again, now for the Mainz, the situation being that the crippled Arethusa was too tubby to do anything but be defended by us, its children.

"Scarcely, however, had we started when, from out of

the mist and across our front, in furious pursuit came the first cruiser squadron of the town class, the Birmingham, and each unit a match for three like the Mainz, which was soon sunk. As we looked and reduced speed they opened fire, and the clear bang-bang of their guns was just like a cooling drink.

"To see a real big four-funnel spouting flame, which flame denoted shells starting, and those shells not at us but for us, was the most cheerful thing possible. Once we were in safety, I hated it. We had just been having our own imaginations stimulated on the subject of shells striking.

"Now, a few minutes later, to see another ship not three miles away, reduced to a piteous mass of unrecognizability, wreathed in black fumes from which flared out angry gusts of fire like Vesuvius in eruption, as an unending stream of hundred-pound shells burst on board it, just pointed the moral and showed us what might have been.

"The Mainz was immensely gallant. The last I saw of it it was absolutely wrecked. It was a fuming inferno. But it had one gun forward and one aft still spitting forth fury and defiance like a wild cat.

"Then we went west, while they went east. Just a bit later we heard the thunder of the enemy's guns for a space. Then fell silence, and we knew that was all.

A MARVELOUS RESCUE

"The most romantic, dramatic, and piquant episode that modern war can ever show came next. The Defender, having sunk an enemy, lowered a whaler to pick up its swimming survivors. Before the whaler got back, an enemy's cruiser came up and chased the Defender, which thus had to abandon its small boat.

"Imagine their feelings, alone in an open boat without food, twenty-five miles from the nearest land, and that land an enemy's fortress, with nothing but fog and foes around them, and then suddenly a swirl alongside, and up, if you please, hops His Britannic Majesty's submarine E-4, opens its conning tower, takes them all on board, shuts up again, dives and brings them home, 250 miles."

THREE BRITISH CRUISERS SUNK

On Tuesday morning, September 22, the British cruisers Aboukir, Cressy and Hogue were torpedoed and sunk by a German submarine in the North Sea. Each of the vessels carried a crew of about 650 men, and the total of the death roll was about 1,400.

The three cruisers had for some time been patrolling the North Sea. Soon after 6 o'clock in the morning the Aboukir suddenly felt a shock on the port side. A dull explosion was heard and a column of water was thrown up mast high. The explosion wrecked the stokehold just forward of amidships and tore the bottom open.

Almost immediately the doomed cruiser began to settle. Except for the watch on deck, most of the crew were asleep, wearied by the constant vigil in bad weather, but in perfect order the officers and men rushed to quarters. The quick-firers were manned in the hope of a dying shot at the submarine, but there was not a glimpse of one.

Meanwhile the Aboukir's sister cruisers, more than a mile away, saw and heard the explosion and thought the Aboukir had struck a mine. They closed in and lowered boats. This sealed their own fate, for, while they were standing by to rescue survivors, first the Hogue and then the Cressy was torpedoed.

Only the Cressy appears to have seen the submarine in time to attempt to retaliate, and she fired a few shots before she keeled over, broken in two, and sank.

British naval officers by this time were beginning to wonder how long the German high seas fleet intended to remain under cover in the Kiel canal.

"Our only grievance," one said, "is that we have not had a shot at the Germans. Our only share of the war has been a few uncomfortable weeks of bad weather, mines and submarines."

A number of the survivors were taken to the Dutch port of Ymuiden, where they were interned as technical prisoners of war.

THE GERMAN COMMANDER'S STORY

The German submarine which accomplished the hitherto unparalleled feat was the U-9, in command of Capt.-Lieut. Otto

Weddigen, whose interesting story was given to the public through the German Admiralty on October 6, as follows:

"I set out from a North Sea port on one of the arms of the Kiel canal and set my course in a southwesterly direction. The name of the port I cannot state officially, but it was not many days before the morning of September 22 when I fell in with my quarry.

"British torpedo-boats came within my reach, but I felt there was bigger game further on, so on I went. It was ten minutes after six in the morning of the 22nd when I caught sight of one of the big cruisers of the enemy.

"I was then eighteen sea miles northwesterly of the Hook of Holland. I had traveled considerably more than 200 miles from my base. I had been going ahead partially submerged, with about five feet of my periscope showing.

"Almost immediately I caught sight of the first cruiser and two others. I submerged completely and laid my course in order to bring up in center of the trio, which held a sort of triangular formation. I could see their gray-black sides riding high over the water.

"When I first sighted them they were near enough for torpedo work, but I wanted to make my aim sure, so I went down and in on them. I had taken the position of the three ships before submerging, and I succeeded in getting another flash through my periscope before I began action. I soon reached what I regarded as a good shooting point.

"Then I loosed one of my torpedoes at the middle ship. I was then about twelve feet under water and got the shot off in good shape, my men handling the boat as if it had been a skiff. I climbed to the surface to get a sight through my tube of the effect and discovered that the shot had gone straight and true, striking the ship, which I later learned was the *Aboukir*, under one of its magazines, which in exploding helped the torpedo's work of destruction.

"There was a fountain of water, a burst of smoke, a flash of fire, and part of the cruiser rose in the air.

STRIKES THE SECOND CRUISER

"Its crew were brave and, even with death staring them in the face, kept to their posts. I submerged at once. But I had stayed on top long enough to see the other cruisers, which I

learned were the Cressy and the Hogue, turn and steam full speed to their dying sister.

"As I reached my torpedo depth I sent a second charge at the nearest of the oncoming vessels, which was the Hogue. The English were playing my game, for I had scarcely to move out of my position, which was a great aid, since it helped to keep me from detection.

"The attack on the Hogue went true. But this time I did not have the advantageous aid of having the torpedo detonate under the magazine, so for twenty minutes the Hogue lay wounded and helpless on the surface before it heaved, half turned over, and sank.

"By this time the third cruiser knew, of course, that the enemy was upon it, and it sought as best it could to defend itself. It loosed its torpedo defense batteries on bows, starboard, and port, and stood its ground as if more anxious to help the many sailors in the water than to save itself.

"In the common method of defending itself against a submarine attack, it steamed in a zigzag course, and this made it necessary for me to hold my torpedoes until I could lay a true course for them, which also made it necessary for me to get nearer to the Cressy.

"I had to come to the surface for a view, and saw how wildly the fire was being sent from the ship. Small wonder that was when they did not know where to shoot, although one shot went unpleasantly near us.

"When I got within suitable range I sent away my third attack. This time I sent a second torpedo after the first to make the strike doubly certain. My crew were aiming like sharpshooters and both torpedoes went to their bull's-eye. My luck was with me again, for the enemy was made useless and at once began sinking by the head. Then it careened far over, but all the while its men stayed at the guns looking for their invisible foe.

"They were brave and true to their country's sea traditions. Then it eventually suffered a boiler explosion and completely turned turtle. With its keel uppermost it floated until the air got out from under it and then it sank with a loud sound, as if from a creature in pain.

"The whole affair had taken less than one hour from the

time of shooting off the first torpedo until the Cressy went to the bottom.

"I set my course for home. Before I got far some British cruisers and destroyers were on the spot and the destroyers took up the chase.

"I kept under water most of the way, but managed to get off a wireless to the German fleet that I was heading homeward and being pursued. But although British destroyers saw me plainly at dusk on the 22d and made a final effort to stop me, they abandoned the attempt, as it was taking them too far from safety and needlessly exposing them to attack from our fleet and submarines."

MERCHANTMEN CAPTURED AND SUNK

During the first months of the war a large number of merchant vessels, principally German and British, were captured or sunk. According to a British Admiralty return, issued September 28, twelve British ships with an aggregate tonnage of 59,331 tons had been sunk on the high seas by German cruisers up to September 23. Eight other British ships, whose tonnage aggregated 2,970, had been sunk by German mines in the North Sea, and 24 fishing craft, with a tonnage of 4,334, had been captured or sunk by the Germans in the same waters. British ships detained at German ports numbered 74, with a total tonnage of 170,000.

On the other side the Admiralty reported 102 German ships, with a total tonnage of 200,000, detained in British ports since the outbreak of the war; while 88 German ships, of an aggregate tonnage of 338,000, had been captured since hostilities began.

The return also showed that 168 German ships, with an aggregate tonnage of 283,000, had been detained or captured by the Allies. Fifteen ships, with a tonnage of 247,000, were detained in American ports, while fourteen others, with a tonnage of 72,000, remained in the Suez Canal.

The German mines in the North Sea had also destroyed seven Scandinavian ships, with a tonnage of 11,098.

GERMAN CRUISERS ACTIVE

Several German cruisers were amazingly active in distant waters early in the war. Among these were the Goeben, Breslau, Emden, Karlsruhe, and Leipzig, which captured or sank

a number of vessels of the enemy. The German cruisers Scharnhorst and Gneisenau also operated in the Pacific, bombarding the French colony of Papeete, on the island of Tahiti, and inflicting much damage, including the sinking of two vessels.

On August 26 the big converted German liner Kaiser Wilhelm der Grosse, while cruising on the northwest coast of Africa, was sunk by the British cruiser Highflyer.

The German cruiser Dresden was reported sunk by British cruisers in South American waters in the second week of September. The Emden, operating under the German flag in the Indian Ocean, sank several British steamers. Several Austrian vessels succumbed to mines off the coast of Dalmatia and in the Baltic there were a number of casualties in which both Russian and German cruisers suffered. The Russian armored cruiser Bayan was sunk in a fight near the entrance to the Gulf of Finland.

On September 20 the German protected cruiser Koenigsberg attacked the British light cruiser Pegasus in the harbor of Zanzibar and disabled her. Off the east coast of South America the British auxiliary cruiser Carmania, a former Cunard liner, destroyed a German merchant cruiser mounting eight four-inch guns. About the same time the German cruiser Hela was sunk in the North Sea by the British submarine E-9. The Kronprinz Wilhelm, a former German liner, which had been supplying coal to German cruisers in the Atlantic, was also sunk by the British.

GERMAN COLONY OCCUPIED

The British Admiralty announced on September 12 that the Australian fleet had occupied Herbertshoehe, on Blanche Bay, the seat of government of the German Bismarck Archipelago and the Solomon Islands.

The Bismarck Archipelago, with an area of 18,000 square miles and a population of 200,000, is off the north coast of Australia and southwest of the Philippine Islands. The group was assigned to the German sphere of influence by an agreement with Great Britain in 1885. German New Guinea was included in the jurisdiction.

GERMANS SINK RUSS CRUISER

On October 11 German submarines in the Baltic torpedoed and sank the Russian armored cruiser Pallada with all its

crew, numbering 568 men. The Pallada had a displacement of 7,775 tons and was a sister ship of the Admiral Makarov and Bayan. She was launched in November, 1906, and had a water-line length of 443 feet; beam, 57 feet; draft of 21¼ feet, and a speed of 21 knots. She carried two 8-inch, eight 6-inch, twenty-two 12-pounders, four 3-pounders, and two torpedo tubes. Seven inches of Krupp armor protected the vessel amidships and four inches forward.

The Pallada was engaged in patrolling the Baltic with the Admiral Makarov when attacked by the submarines. She opened a strong fire on them, but was blown up by a torpedo launched by one of the submerged craft, while the Makarov escaped.

BRITISH CRUISER HAWKE SUNK

On October 15th, while the British cruisers Hawke and Theseus were patrolling the northern waters of the North Sea, they were attacked by a German submarine. The Hawke, a cruiser of 7,750 tons, commanded by Capt. H. P. E. T. Williams, was torpedoed and sank in eight minutes. Only seventy-three of her crew of 400 officers and men were saved.

BRITISH AVENGE AMPHION'S LOSS

Capt. Cecil H. Fox, who was in command of the British cruiser Amphion when she was destroyed by a German mine early in the war, had his revenge on October 17, when, in command of the cruiser Undaunted, he sank four German torpedo boat destroyers off the coast of Holland. Only 31 of the combined crews of 400 men were saved and these were taken as prisoners of war.

CHAPTER XVI

SUBMARINES AND MINES

Battleships in Constant Danger from Submerged Craft—Opinions of Admiral Sir Percy Scott—Construction of Modern Torpedoes—How Mines Are Laid and Exploded on Contact.

SIR PERCY SCOTT, admiral in the British navy, who through his inventions made possible the advance in marksmanship with heavy guns and increased the possibilities of hitting at long range and of broadside firing, said recently that everything he has done to enhance the value of the gun is rendered useless by the advent of the latest type of submarine, a vessel which has for its principal weapon the torpedo. Dreadnoughts and super-dreadnoughts are doomed, because they no longer can be safe at sea from the submarine nor find safety in harbors.

"The introduction of vessels that swim under water," he said, "has in my opinion entirely done away with the utility of the ships that swim on top of the water. The functions of a war vessel were these: Defensively, [1] to attack ships that come to bombard our forts, [2] to attack ships that come to blockade us, [3] ~~to~~ attack ships conveying a landing party, [4] to attack the enemy's fleet, [5] to attack ships interfering with our commerce; offensively, [1] to bombard an enemy's ports, [2] to blockade an enemy, [3] to convoy a landing party, [4] to attack the enemy's fleet, [5] to attack the enemy's commerce.

"The submarine renders 1, 2 and 3 impossible, as no man of war will dare to come even within sight of a coast that is adequately protected by submarines. The fourth function

of a battleship is to attack an enemy's fleet, but there will be no fleet to attack, as it will not be safe for a fleet to put to sea. Submarines and aeroplanes have entirely revolutionized naval warfare; no fleet can hide itself from the aeroplane's eye, and the submarine can deliver a deadly attack in broad daylight.

"In time of war the scouting aeroplanes will always be high above on the lookout, and the submarines in constant readiness. If an enemy is sighted the gong sounds and the leash of a flotilla of submarines will be slipped. Whether it be night or day, fine or rough, they must go out in search of their quarry; if they find her she is doomed and they give no quarter; they cannot board her and take her as prize as in the olden days; they only wait till she sinks, then return home without even knowing the number of human beings they have sent to the bottom of the ocean.

"Not only is the open sea unsafe; a battleship is not immune from attack even in a closed harbor, for the so-called protecting boom at the entrance can easily be blown up. With a flotilla of submarines commanded by dashing young officers, of whom we have plenty, I would undertake to get through any boom into any harbor and sink or materially damage all the ships in that harbor."

A PRACTICAL MAN'S VIEWS

This is not a mere theorist or dreamer talking, says Burton Roscoe in commenting on Admiral Scott's statements; it is the one man in England most supremely versed in naval tactics, the man to whom all nations owe the present effectiveness of the broadside of eight, twelve and fourteen inch guns and the perfection in sighting long range guns.

The newest type of submarine torpedo is 100 per cent efficient. The torpedo net of steel that used to be the ship's defense against torpedoes is now useless. The modern torpedoes need only to come in contact with a surface like the torpedo net or the armor plate of a battleship to discharge a shell which will burst through a two-inch armor caisson, rupture the hull of a battleship, and sink it in a few minutes.

The torpedo submarines of the modern type have a submerged speed of from eight to ten knots an hour. Only a small surface, including the bridge or conning tower, is ex-

posed, thus making it almost impossible to hit them with the clumsy guns aboard ship. The highest type of submarine has a submerged tonnage of 812 tons and its length is 176 feet.

Each submarine carries from one to six torpedoes, each of which is capable of sinking the most heavily armored vessel afloat. The sighter in the conning tower moves swiftly up within range of the vessel he is attacking and gives the signal for the discharge of the torpedo. The men aboard the attacked ship have no warning of their impending death except a thin sheaf of water that follows on the surface in the wake of the submerged torpedo and which lasts only an instant.

RUN BY COMPRESSED AIR

By a compressed air arrangement motive power is furnished the torpedo in transit for its propellers. A gyroscope keeps it on a plane and upright. A striker on the nose of the torpedo is released by a fan which revolves in the water. The nose of the torpedo strikes the side of the battleship and the compact jars the primer of fulminate of mercury. The high explosive of gunpowder forces out a shell and explodes with it after the shell has penetrated the armor. Then the work is done.

It is generally believed the principal harbors and fortifications in England are heavily supplied with torpedoes of the new type. It is also believed that the fortifications about the River Elbe are thus equipped. If this is a fact the defending nation will be able not only to repulse any fleet attempting an invasion but also to destroy it. By throwing across the Straits of Dover, or across the lower end of the North Sea, a flotilla of its powerful submarines England can prevent any naval invasion of France or England or Belgium by Germany should the attacking fleet take this route.

In the latest type of submarine the United States is deficient. There are only twenty-nine submarines in the United States naval service at the present time and only eighteen under construction.

The old type of torpedo did not have penetrative power

Cross section of Belgian Type of Fortress. The forts at Liege were of this type and long withstood the battering of the German guns.

This kind of modern fort was designed by the famous Belgian military engineer, General Brailmont. The strength of every such work must depend on the spirit of its garrison, and at Liege and Namur the Belgian defenders gave a good account of themselves. These forts are provided with an elaborate system for repelling attempts to carry the works by assault and for making a counter-attack. There are land-mines, fired electrically from the forts, wire entanglements, disappearing guns, and search-lights to locate and blind an attacking enemy.

Construction of Modern Torpedo, Showing All Important Parts, Including Engine, Propellers, Steering Gear, etc.

sufficient to sink the modern armor-clad battleship unless it struck under exceptionally favorable circumstances. A large percentage of the destructive power was expended on the outside of the hull. Commander Davis of the United States navy invented the torpedo that carries its power undiminished into the interior of the vessel.

CAN CUT TORPEDO NETS

The new torpedoes are provided with special steel cutters by which they cut through the strongest steel torpedo net. The torpedo has within it an eight-inch gun, capable of exploding a shell with a muzzle velocity of about 1,000 feet a second. The projectile carries a bursting charge of a high explosive, and this charge is detonated by a delayed-action fuse. When the torpedo strikes its target, the gun is fired and the shell strikes the outside plating of the ship. Then the fuse in the shell's base explodes the charge in the shell, immediately after the impact.

With a small fleet of these under-water fighting vessels—say of two or three—an invading or blockading fleet of not more than twenty men-of-war can be destroyed within an hour by an otherwise unprotected harbor or port.

Germany has a few of these latest style submarines, and if it can rush the construction of the thirty-one now being built, it will have a flotilla that will protect its harbor towns against invasion.

QUICK VENGEANCE FELL ON U-BOAT COMMANDERS

Not a single German U-boat commander known to have committed atrocities on the sea after America entered the war succeeded in living more than two months after his barbarities became known, according to Colonel George A. Chester, formerly an engineer officer in the army. For thirteen months he was connected with the Bureau of Naval Intelligence.

Colonel Chester states that the speedy punishment of the U-boat commanders was due to the work of the Naval Intelligence Service.

"It is not a secret any longer," he said. "So closely and accurately were such German officers followed by the Naval

Intelligence Service that their whereabouts always was known in spite of the use of false names and other devices contrived by the German Admiralty.

"Every effort to hide their identity failed, so complete was the system and information of the bureau. Their vessels were followed constantly by a swarm of Allied destroyers and their destruction was a certainty. None of them escaped longer than two months."

SUBMERGED MINES—HOW THEY ARE LAID AND THEIR WORKING

The sinking of the light cruiser Pathfinder of the British navy by a German mine in the North Sea early in the war called special attention to the deadly character of the mines of the present day.

A modern mine-laying ship puts to sea with a row of contact mines on rails along her side, ready for dropping into the sea. The rails project over the stern. The essential parts of a special type of mine of recent design consist of (1) the mine proper, comprising the explosive charge and detonating apparatus in a spherical case; (2) a square-shaped anchor chamber, connected with the mine by a length of cable; (3) a plummet-weight used in placing the mine in position, connected with the anchor chamber by a rope. Thus the mine appears on the deck of the mine-laying ship before being lowered over the stern.

Before the mine goes over, a windlass inside the plummet-sinker is revolved by hand until the length of cable between the plummet and the anchor-chamber has been reeled off equivalent to the depth below the surface at which the explosive mine is to float.

Then the entire apparatus is hove overboard. The plummet and anchor-chamber sink, while the spherical mine proper is kept on the surface for the moment by means of a buoyant air-chamber within. A windlass in the anchor-chamber now pays out the cable between it and the mine as the anchor-chamber sinks. On the plummet touching bottom, the tension in the cable between it and the anchor-chamber is lessened, and the windlass mentioned stops. The anchor-chamber thereupon sinks to the bottom, dragging down the spherical mine until that is at the selected depth ready for its deadly work.

CHAPTER XVII

AERO-MILITARY OPERATIONS

Aerial Attacks on Cities—Some of the Achievements of the Airmen in the Great War—Deeds of Heroism and Daring—Zeppelins in Action—Their Construction and Operation.

DURING the first ten weeks of the war German airmen flew over Paris several times and dropped bombs that did some damage. Aeroplanes, not Zeppelins, were used in these attempts to terrorize the capital and other cities of France.

The early visits of Zeppelin airships to Antwerp have been described in a previous chapter. These were continued up to the time of the fall of Antwerp. While comparatively few lives were lost through the explosion of the bombs dropped, the recurring attacks served to keep the inhabitants, if not the Belgian troops, in a state of constant excitement and fear. When the city fell into German hands, a similar condition arose in England, where it was feared that Antwerp might be made the base for German airship attacks on London and other cities of Great Britain; and all possible precautions were taken against such attacks. The members of the Royal Flying Corps were kept constantly on the alert; powerful searchlights swept the sky over London and the English coast every night and artillery was kept in readiness to repel an aerial invasion. Such was the condition in the third week of October.

BRITISH ATTACK ON DUSSELDORF

A new type of British aeroplane was developed during the war, capable of rising from the ground at a very sharp angle and of developing a speed of 150 miles an hour. And in their

operations in France and Belgium the British army aviators proved themselves highly efficient and earned unstinted praise from Field Marshal Sir John French, in command of the British forces on the continent. One of their notable exploits was an attack, October 8, on the Zeppelin sheds at Dusseldorf and Cologne, in German territory. The attack was made by Lieut. R. S. G. Marix, of the Naval Flying Corps, in a monoplane, and Squadron Commander Spencer Grey, with Lieut. S. V. Lippe, in a biplane. Flying from Antwerp at a height of 5,000 feet, to escape the almost continuous German fire, Lieut. Marix succeeded in locating the Zeppelin hangars at Dusseldorf. Then descending to a height of only 1,000 feet he released two bombs when directly over them, damaging both hangars and aircraft. A German bullet passed through Lieut. Marix's cap and the wings of his aeroplane were pierced in a dozen places, but he succeeded in returning to the burning city of Antwerp, which he was ordered to leave the same evening.

During the same raid Commander Spencer Grey flew to Cologne. He was unable to locate the Zeppelin hangars but dropped two bombs into the railway station, which was badly damaged.

A night or two later a German Zeppelin flew over Ghent and dropped a bomb near the South station. On October 11 two German aviators dropped a score of bombs on different quarters of Paris, killing three civilians and injuring fourteen others. The property damage, however, was slight and the effectiveness of bomb-dropping as a means of destroying a city or fortifications remained to be proved to the military mind. It was noted that a large proportion of the bombs dropped by German aviators failed to explode.

HEROIC ACTS BY AIRMEN

Stories of heroism displayed by aviators on both sides of the great conflict have abounded. One story of the devotion of German airmen, told to a correspondent by several German officers, he succeeded in verifying, but was unable to learn the name of the particular hero of the occurrence. This story was as follows:

"In one of the battles around Rheims it became necessary

to blow up a bridge which was about to be crossed by advancing French troops coming to relieve a beleaguered fort. The only way to destroy the bridge was for an airman to swoop down and drop an exceptionally powerful bomb upon it.

"There were twenty-four flyers with that division of the German army. A volunteer was asked for, it being first announced that the required task meant sure death to the man undertaking it.

"Every one of the twenty-four stepped forward without hesitation. Lots were quickly drawn. The chosen man departed without saying farewell to any one. Within five minutes the bridge was in ruins and the aeroplane and its heroic pilot had been blown to pieces. This incident was not published in the press of Germany, because of the fear that it would cause terrible anxiety to the wives of all married German flyers."

A DUEL HIGH IN THE AIR

An aerial victory for a French aviator, fought thousands of feet in the air in the presence of troops of both armies, was reported by Lieutenant de Laine of the French aerial corps on October 10. The air duel was one of the most thrilling since the war began. Lieutenant de Laine's account of the combat was as follows:

"I had been ordered to fly over the German lines with an observer who was to drop pamphlets. These pamphlets contained the following inscription:

"'German soldiers, attention! German officers say that the French maltreat prisoners. This is a lie. German prisoners are as well treated as unfortunate adversaries should be.'

"We had no sooner taken wing than the aeroplane was sighted by German observers in captive balloons anchored about six miles distant. Immediately two Albatross machines rose from the German camp and came forward.

"We continued to advance, meanwhile sending the aeroplane higher and higher until the barograph showed we were 6,000 feet above the ground. Our machine was speedier than the German aeroplane, which was constructed of steel and was so heavy it could not work up the speed of the French army monoplane.

"We were able to get over the German lines and my com-

panion began hurling thousands of the pamphlets in every direction. It was like a snowstorm.

"In the meantime, the German artillery got their long range air guns in action and were hurling volley after volley against us. The shells were of special type, designed to create violent air waves when they burst. We were too high to be reached, but we had to turn our attention to the two aeroplanes which were rushing toward us.

"As they approached the German artillery fire stopped. We were too high to distinguish what was going on beneath us, but I could imagine the thousands of soldiers staring skyward in wonder at the strange spectacle above them.

"We kept swinging in wide circles over the German lines and I kept getting higher and higher in order to outmaneuver the German plane and to prevent it from getting above us so that bombs could be thrown at us.

"The machines were all equipped with rapid-fire guns, and when we got within 100 yards of each other, both sides opened fire. The bullets went wide. Finally we began to swing backward, getting lower and lower. One of the German machines was thus lured over the French lines and our land artillery opened against it. One of its wings was shattered and it dropped, but the other aeroplane escaped."

HOW A GERMAN AVIATOR ESCAPED

How a German aviator in Belgium secured control of a falling aeroplane after his companion had been killed is described in a thrilling letter received by his father in Berlin September 30. It reads:

"Dear Father: I am lying here in a beautiful Belgian castle slowly recovering from wounds I thought would kill me. On August 22 I made a flight with Lieutenant J., a splendid aviator; established the fact that the enemy was advancing toward us. In the region of Bertrix we came into heavy rain-clouds and had to descend to 3,000 feet. As we came through the clouds we were seen and an entire French division began shooting at us.

"Lieutenant J. was hit in the abdomen. Our motor was put out of commission. We were trying to volplane across a forest in the distance when suddenly I felt the machine give

a jump. I turned around—as I was sitting in front—and found that a second bullet had hit Lieutenant J. in the head and killed him.

“I leaned over the back of the seat and managed to reach the steering apparatus and headed down. A hail of shots whistled about me. I felt something hit me in the forehead. Blood ran into my eyes. I was faint. But will prevailed and I retained consciousness. Just as we were near the ground a gust of wind hit the plane and turned my machine over. I fell in the midst of the enemy with my dead companion. The ‘red trousers’ were coming from all directions and I drew my pistol and shot three of them. I felt a bayonet at my breast and gave myself up for dead when an officer shouted: “‘Let him live! He is a brave soldier.’”

“I was taken to the commanding general of the Seventeenth French army corps, who questioned me, but, of course, got no information. He said I would later be sent to Paris, but as I was weak from loss of blood and seriously wounded I was taken into their field hospital and cared for. The officers were very nice to me and when the French fell back I took advantage of the confusion to crawl under a bush, where I remained until our troops came.”

Many occurrences of a similarly thrilling character have been related in the camps of the contending armies. The above suffice to show the patriotic devotion and heroism of the military forces of the air, which for the first time in history have been a prominent feature of warfare in 1914.

ZEPPELINS IN ACTION

The real story of the performances of air-craft in the war has not been told, but there has been enough to give the world a terrifying glimpse of these modern weapons.

The three attacks on Antwerp by a Zeppelin airship brought into action the long predicted onslaught by forces of the air against the ground. After one of the great German dirigibles had been brought down by gunfire because it was accidentally guided too near the earth, another returned over the city, and the havoc wrought by this single craft realizes

the horrors that would follow any concerted attack by a fleet of the aerial destroyers if they were launched against a city.

The Zeppelin is an impressive thing because of its size, cigar-shaped and ranging from 300 to over 500 feet in length, driven at a rate of 40 miles an hour by four propellers and carrying a huge car. It is most valuable for use at night, of course, but has proved it is capable of doing its deadly work out of range of ordinary gunfire at day. Artillery has been invented which can reach airships flying at 5,000 feet, but there is not much of it. The half dozen German Zeppelins which have been destroyed by French and Russian fire met their fate chiefly because they got too near the ground.

Refugees from Belgium describe the method used by Zeppelins in dropping bombs. The dirigible is kept as much as possible out of range of the enemy's guns while it lowers a steel cage, attached to a steel rope, 200 or 300 feet long. The cage carries a man who throws down the bombs. Because of the small size of the cage and the fact that it is kept constantly in motion it is difficult for heavy guns to hit it. The great airship remains perfectly stable while the missiles, of which there are a variety for different missions, are being hurled. All the military Zeppelins of Germany are armed and there are a large number of unarmed dirigibles in reserve.

War is always prolific of true tales that read like fables, and the late war has added to the former tales a new sort brought down from above, for in this war, for the first time, men fought in the air. One of the most striking stories is told by Captain Alan Bott of the British Royal Air Service. He was 22 years old when he enlisted at the opening of the war, and his first service was in France, where his adventures were those of the average aviator and included a toll of seven enemy machines destroyed, and the British Military Cross for valor added to his laurels.

When General Allenby's expedition to Jerusalem was being arranged Captain Bott was sent to join the army in Palestine. He was with them until April, 1918, when, having

chased an enemy machine sixty miles beyond the lines from his base at Jaffa, he was himself set upon by two antagonists and his machine sent spinning to the ground. He was pinned down by his engine, was discovered by some Arabs, who could not quite decide whether to kill him or sell him to the Turks. They were tossing up to settle the question when a Turkish force came along, drove the Arabs off, and made him a prisoner.

After three weeks of convalescing in an Austrian hospital, 75 miles from Jaffa, he essayed an escape but failed because of his bad leg, and was transferred to Nazareth, where he was imprisoned with common criminals, murderers and brigands, whom he described as "filthy brutes." At first he was put into an underground dungeon. After eating his daily bowl of soup and loaf of bread and fighting cooties for a few days, he planned several means of escape, which he said did not appeal to the Turks and finally feigned insanity and was sent to Constantinople. But a wreck not far from Constantinople gave him an opportunity to escape. He met a Turkish officer in a German uniform, paid him two Turkish pounds to exchange suits and spent some time in Constantinople being saluted everywhere by Turkish and German soldiers, and having a lot of fun listening to the plotting and planning in the cafes, while he avoided German officers. He learned that Turkey was ready to make a separate peace, but had no way to get the news through the lines. The Allies appeared not to realize Turkey's readiness to quit. He finally stowed away on a cargo steamer bound for Odessa, but the crew went Bolshevik en route and the steamer rolled with her engine dead for nearly three weeks before the officers and crew compromised and continued. In Odessa he heard of Bulgaria's surrender and so stowed away on another ship bound for the Bulgarian coast, where he landed in safety, finally reaching the British lines.

On August 10 the correspondent of the London Times in Brussels, describing the fighting at Liege, said aerial fleets were used by both Belgians and Germans. The fighting in midair was desultory but deadly. A huge Zeppelin sailed over Liege during the early fighting, but was pursued by a

Belgian aeroplanist, who risked and lost his life in destroying it.

After the destruction of this Zeppelin the Germans confined their aerial activity to the use of scouting aeroplanes, several of which were destroyed by shots from the forts. Attempts to reach the aeroplanes with shells were often unsuccessful, however, owing to the inability to shoot high enough.

AVIATION CAMPS IN EUROPE

In the early days of the great war only an occasional flash of news was received about the French and Russian aeromilitary operations or those of the German corps along the Russian and French frontiers. It was difficult to imagine that they were idle, for the German-Russian and the French-German frontiers had been the locations of many military aeronautical camps or fortresses. These were described at the outbreak of hostilities as follows:

"Along the German frontier facing Russia are the important aero centers of Thorn and Graudenz, while the nearest aero base in Russia is at Riga, farther north.

"Against German invasion there are French centers at Verdun, Nancy, Luneville and Belfort. The most important is at Belfort. Sixty miles from the Belgian frontier and 170 miles from Liege is the great center at Rheims, with the even more important base at Chalons-sur-Marne only twenty-five miles distant.

"Seventy-five to 100 miles is the scouting range of the military aeroplanes, while the dirigibles will scout 500 to 1,000 miles from the base, according to the duration efficiency. The Zeppelins might, taking some risk, travel even farther. With this taken into consideration, the fact that there are only two German aero centers on the French frontier—Aix-la-Chapelle and Metz—is not very significant. The range of the Vosges occupies the territory where there is no aero center.

"Back of the mountains, along the Rhone from Dusseldorf to Strasbourg, there are a dozen aero stations, some of them devoted to aeroplanes and dirigibles, others to dirigibles alone.

"The latest data show that Germany has sixty stations,

including private dirigible hangars, while France has thirty, in most cases of greater extent than those in Germany. Russia, eight months ago, had ten, but it is believed that this number has been increased twofold since that time.

HOW GERMAN EMPIRE IS FORTIFIED AGAINST AERIAL ATTACKS

CENTERS FROM WHICH KAISER WILLIAM'S DIRIGIBLE AND AEROPLANE FLEETS OPERATE. ONLY THOSE CITIES THAT HAVE AERODROMES ARE SHOWN ON THIS MAP. SEVERAL BELGIAN AND FRENCH AERODROMES ALSO ARE SHOWN.

"The two principal Belgian centers are at Brasschaet, near Antwerp, and Etterbeck, near Brussels. The aviators operating in the early engagements have undoubtedly flown down from Brussels and are in temporary camp at Liege. There are probably not more than four Belgian escadrilles, or little fleets of four machines each, on the scene, while Germany's force is supposedly greater."

CHAPTER XVIII

BATTLE OF THE AISNE

Most Prolonged Encounter in History Between Gigantic Forces—A Far-Flung Battle Line—Germans Face French and British in the Aisne Valley and Fight for Weeks—Mighty Armies Deadlocked After a Desperate and Bloody Struggle.

FOR a few days after the tide of battle in France turned in favor of the Allies (September 9), the German forces continued to retreat to the north, closely followed by the French and British armies that had fought and won the battle of the Marne, as described in a previous chapter. This northward movement was marked by heavy German losses in men and munitions of war, and lasted until Saturday, September 12, when the Germans were found to be occupying a position of great defensive strength on the River Aisne, north of Soissons. At that time they held both sides of the river and had a formidable line of intrenchments on the hills to the north of eight road bridges and two railway bridges crossing the Aisne. Seven of the road bridges and both the railway bridges had been destroyed.

The Allies gained some high ground south of the Aisne, overlooking the Aisne valley, east of Soissons. Then began (on Saturday, September 12) an action along the Aisne which was destined to go down in history as the greatest and most prolonged battle of all time. Two days, three days, a week, two weeks, three, four, five weeks it lasted, with varying fortune to the contending armies; but no decisive result. Germans, French and British, literally by the thousand, fell under the continuous hail of shrapnel, the hurricane of machine-gun and rifle fire, or in the desperate bayonet charges of daily occurrence, but still the battle raged. Minor positions were

gained and lost, towns and villages along the far-flung battle line were occupied and evacuated, countless deeds of heroism were wrought, to be sung and celebrated by posterity in a dozen different lands—but the lines on both sides held and victory refused to perch on any banner.

Modern scientific strategy exhausted its utmost efforts; flanking and turning movements were planned, attempted and failed; huge masses of men were hurled against each other in every formation known to military skill; myriads of lives and millions of money were sacrificed in historic endeavors to breach the enemy's front—but ever the foeman held his ground and neither side could claim decided advantage. Intrenchments such as the world has never seen before covered the countryside for fifty miles. Teuton, Gaul and Anglo-Saxon, Turco and Hindu, literally "dug themselves in," and refused to budge an inch, though hell itself, in all its horror and its fury, was loosed against them.

And thus the battle of the Aisne—also aptly called, from its extent and ramifications, the battle of the Rivers—continued through many weeks while all the world wondered and stood aghast at the slaughter, and the single gleam of brightness that came out of that maelstrom of death and misery was the growing respect of Frenchman, German and Briton for the individual and collective courage of each other and the death-defying devotion that was daily displayed by all.

FIGHTING CONTINUOUS DAY AND NIGHT

Beginning as an artillery duel in which the field-guns of the French and Germans were matched against each other from opposite heights as never before, the battle of the Aisne soon resolved itself into a series of daily actions in which every arm of the opposing hosts engaged. There was little rest for the troops day or night. Artillery fire beginning at daybreak and continuing till dusk might break out again at any hour of the night, the range of the enemy's intrenchments being known. Frequently the artillery seemed to open fire in the still watches of the night for no other reason than to prevent the enemy in his trenches from getting any sleep at all, and many a man was borne to the rear on both sides suffering from no wound, but from utter

exhaustion—a state of collapse which is often as deadly as shrapnel to the soldier in the field.

For weeks at a time the only real rest for many of the troops engaged along the line of battle came in snatches of a few hours when they were temporarily relieved by fresh troops brought up from the rear, and these in their turn might be soon exhausted by the continuous strain of keeping on the alert to repel attacks—or, as frequently happened, their ranks might be decimated, or worse, when they were ordered to a charge. Officers and men suffered alike from the strenuous nature of the demands made upon them—and so far as actual casualties are concerned the battle was one in which officers of all ranks, in all the armies, suffered perhaps more severely, in proportion to the number engaged, than in any previous battle. Hundreds of British officers, for example, were among the victims whose bones lie rotting in the valley of the Aisne, as whole pages of their portraits in the London journals, bearing many of the best known names in the British Empire, testified in mute protest against the horrors of war. And both Germany and France have a similar “roll of honor.”

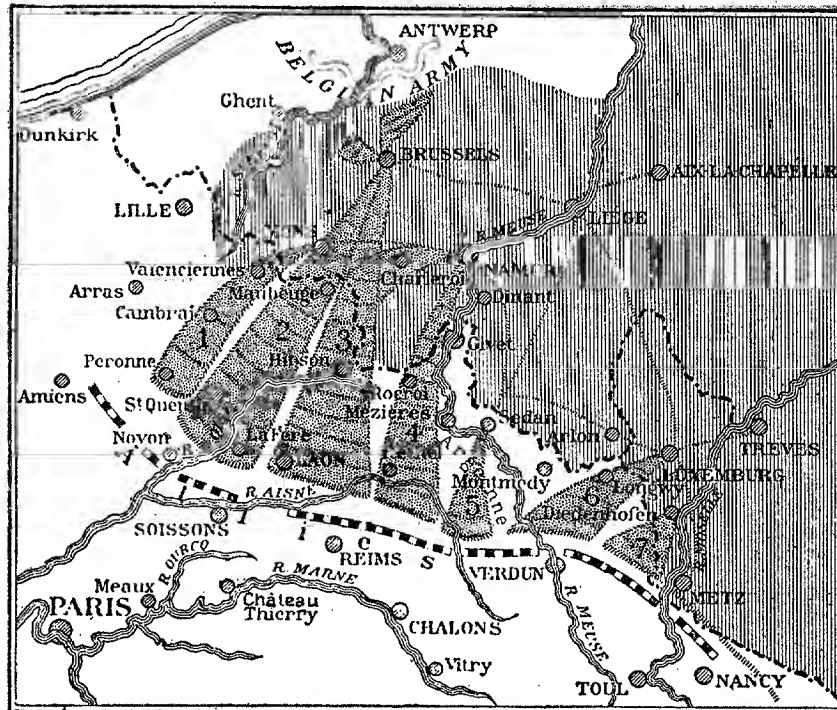

REPORTS OF THE BATTLE

While the great battle of the Rivers was in progress the most connected stories of its daily developments came through the British official news bureau, and these are reproduced in part in the pages that follow. The author of these reports is believed to be Colonel Swinton, of Field Marshal French's staff, who is generally credited with having contributed to the literature of the war some of the most interesting and enlightening accounts of the operations of the British and French armies in the field. And these reports are given here, because of their general character of apparent truth and fairness, and in the absence of any similar reports from the other side.

OPENING OF THE GREAT BATTLE

The following report from the British headquarters covers the period when the Allies' forward movement was halted along the Aisne and also describes the terrain, or country, in which the subsequent fighting occurred:

“From Thursday, September 10, the British army made

In the above view the Rivers Marne, Ourcq, Aisne, Oise, and Meuse are clearly shown, exaggerated in size for convenience of reference. The position of the Allies September 20, 1914, is shown by a black dotted line running from between Amiens and Peronne to Verdun and Nancy. The German front is indicated by the shaded sections, which also show the German lines of communication or retreat, numbered from 1 to 7. At this time the Allies were pushing north to Arras, endeavoring to turn the German right flank in command of General von Kluck.

steady progress in its endeavor to drive back the enemy in co-operation with the French. The country across which it had to force its way, and will have to continue to do so, is undulating and covered with patches of thick wood.

"Within the area which faced the British before the advance commenced, right up to Laon, the chief feature of tactical importance is the fact that there are six rivers running across the direction of the advance, at all of which it was possible that the Germans might make resistance. These rivers are, in order from the south, the Marne, Ourcq, Vesle, Aisne, Ailette and Oise.

"The Germans held the line of the Marne, which was crossed by our forces on September 9, as a purely rearguard operation. Our passage of the Ourcq was not contested. The Vesle was only lightly held, while resistance along the Aisne, both against the French and the British, has been and still is of a determined character.

"On Friday, September 11, but little opposition was met with along any part of our front, and the direction of the advance was, for the purpose of co-operating with our allies, turned slightly to the northeast. The day was spent in rushing forward and gathering in various hostile detachments. By nightfall our forces had reached a line north of the Ourcq, extending from Oulchy-le-Chateau to Longpont.

"On this day there was also a general advance of the French along their whole line, which ended in a substantial success, in one portion of the field Duke Albrecht of Wuerttemberg's army being driven back across the Saulx, and elsewhere the whole of the artillery of a German corps being captured. Several German colors also were taken.

"It was only on this day that the full extent of the victory gained by the Allies on September 8 [at the Marne] was appreciated by them, and the moral effect of this success has been enormous. An order dated September 6 and 7, issued by the commander of the German Seventh Corps, was picked up. It stated that the great object of the war was about to be attained, since the French were going to accept battle, and that upon the result of this battle would depend the issue of the war and the honor of the German armies.

"On Saturday, the 12th, the enemy were found to be

occupying a very formidable position opposite us on the north of the line at Soissons. Working from the west to the east, our Third Army Corps gained some high ground south of the Aisne overlooking the Aisne valley, to the east of Soissons. Here a long-range artillery duel between our guns and those of the French on our left and the enemy's artillery on the hills continued during the greater part of the day, and did not cease until nearly midnight. The enemy had a very large number of heavy howitzers in well-concealed positions.

"At Braisne the First cavalry division met with considerable opposition from infantry and machine-guns holding the town and guarding the bridge. With the aid of some of our infantry it gained possession of the town about midday, driving the enemy to the north. Some hundred prisoners were captured around Braisne, where the Germans had thrown a large amount of field-gun ammunition into the river, where it was visible under two feet of water.

FATEFUL ENCOUNTER BEGINS

"On our right the French reached the line of the River Vesle. On this day began an action along the Aisne which is not yet finished, and which may be merely of a rearguard nature on a large scale, or may be the commencement of a battle of a more serious nature.

"It rained heavily on Saturday afternoon and all through the night, which severely handicapped transport.

"On Sunday, the 13th, extremely strong resistance was encountered by the whole of our front, which was some fifteen miles in length. The action still consisted for the most part of a long-range gunfire, that of the Germans being to a great extent from their heavy howitzers, which were firing from cleverly concealed positions. Some of the actual crossings of the Aisne were guarded by strong detachments of infantry with machine-guns.

"By nightfall portions of all our three army corps were across the river, the cavalry returning to the south side. By early next morning, three pontoon bridges had been built, and our troops also managed to get across the river by means of the bridge carrying the canal over the river.

"On our left the French pressed on, but were prevented by artillery fire from building a pontoon bridge at Soissons.

A large number of infantry, however, crossed in single file the top girder of the railway bridge left standing.

"During the last three or four days many isolated parties of Germans have been discovered hiding in the numerous woods a long way behind our line. As a rule they seemed glad to surrender, and the condition of some of them may be gathered from the following incident:

"An officer proceeding along the road in charge of a number of led horses received information that there were some of the enemy in the neighborhood. He gave the order to charge, whereupon three German officers and 106 men surrendered.

RHEIMS OCCUPIED BY GERMANS

"Rheims was occupied by the enemy on September 3. It was reoccupied by the French after considerable fighting on September 13.

"On the 12th, a proclamation, a copy of which is in the possession of the British army, was posted all over the town. A literal translation of this poster follows:

"PROCLAMATION—In the event of an action being fought early today or in the immediate future in the neighborhood of Rheims, the inhabitants are warned that they must remain absolutely calm and must in no way try to take part in the fighting. They must not attempt to attack either isolated soldiers or detachments of the German army. The erection of barricades, the taking up of paving stones in the streets in a way to hinder the movement of troops, or, in a word, any action that may embarrass the German army, is formally forbidden.

"With an idea to securing adequately the safety of the troops and to instill calm into the population of Rheims, the persons named below have been seized as hostages by the commander-in-chief of the German army. These hostages will be hanged at the slightest attempt at disorder. Also, the town will be totally or partially burned and the inhabitants will be hanged for any infraction of the above.

"By order of the German authorities.

(Signed) "THE MAYOR."

"Here followed the names of eighty-one of the principal

inhabitants of Rheims, with their addresses, including four priests, and ending with the words, 'And some others.'"

HOW THE BATTLE DEVELOPED

The following descriptive report from Field Marshal Sir John French's headquarters was issued September 22:

"At the date of the last narrative, September 14, the Germans were making a determined resistance along the River Aisne. The opposition has proved to be more serious than was anticipated.

"The action now being fought by the Germans along their line is naturally on a scale which, as to extent of ground covered and duration of resistance, makes it undistinguishable in its progress from what is known as a 'pitched battle.'

"So far as we are concerned, the action still being contested is the battle of the Aisne. The foe we are fighting is just across that river, along the whole of our front to the east and west. The struggle is not confined to the valley of that river, though it will probably bear its name.

"On Monday, the 14th, those of our troops which had on the previous day crossed the Aisne, after driving in the German rearguards on that evening, found portions of the enemy's forces in prepared defensive positions on the right bank and could do little more than secure a footing north of the river. This, however, they maintained in spite of two counter-attacks delivered at dusk and 10 p. m., in which the fighting was severe.

"During the 14th strong reinforcements of our troops were passed to the north bank, the troops crossing by ferry, by pontoon bridges, and by the remains of permanent bridges. Close co-operation with the French forces was maintained and the general progress made was good, although the opposition was vigorous and the state of the roads, after the heavy rain, made movements slow.

FIRST CORPS MAKES CAPTURE

"One division alone failed to secure the ground it expected to. The First Army Corps, after repulsing repeated attacks, captured 600 prisoners and twelve guns. The cavalry also took a number of prisoners.

"There was a heavy rain throughout the night of Sep-

tember 14-15 and during the 15th the situation of the British forces underwent no essential change. But it became more and more evident that the defensive preparations made by the enemy were more extensive than was at first apparent. The Germans bombarded our lines nearly all day, using heavy guns brought, no doubt, from before Maubeuge as well as those with the corps.

"All the German counter-attacks, however, failed, although in some places they were repeated six times. One made on the Fourth Guards Brigade was repulsed with heavy slaughter.

"Further counter-attacks made during the night were beaten off. Rain came on towards evening and continued intermittently until 9 *a. m.*, on the 16th. Besides adding to the discomfort of the soldiers holding the line, the wet weather to some extent hampered the motor transport service, which was also hindered by broken bridges.

"On Wednesday, the 16th, there was little change in the situation opposite the British; the efforts made by the enemy were less active than on the previous day, though their bombardment continued throughout the morning and evening.

"On Thursday, the 17th, the situation still remained unchanged in its essentials. The German heavy artillery fire was more active than on the previous day. The only infantry attacks made by the enemy were on the extreme right of our position, and, as had happened before, they were repulsed with heavy loss, chiefly on this occasion by our field artillery.

NATURE OF THE FIGHTING

"In order to convey some idea of the nature of the fighting it may be said that along the greater part of our front the Germans have been driven back from the forward slopes on the north of the river. Their infantry are holding strong lines of trenches amongst and along the edges of the numerous woods which crown the slopes. These trenches are elaborately constructed and cleverly concealed. In many places there are wire entanglements and lengths of rabbit fencing.

"Both woods and open are carefully aligned, so that they can be swept by rifle fire and machine-guns, which are invisible from our side of the valley. The ground in front of the infantry is also, as a rule, under cross fire from the field artillery

placed on neighboring heights, and under high angle fire from pieces placed well back behind the woods on top of the plateau.

"A feature of this action, as of the previous fighting, is the use by the enemy of numerous heavy howitzers, with which they are able to direct long range fire all over the valley and right across it. Upon these they evidently place great reliance.

"Where our men are holding the forward edges of the high ground on the north side they are now strongly intrenched. They are well fed, and in spite of the wet weather of the last week are cheerful and confident.

HEAVY BOMBARDMENT BY BOTH SIDES

"The bombardment by both sides has been heavy, and on Sunday, Monday, and Tuesday was practically continuous. Nevertheless, in spite of the general din caused by the reports of the immense number of heavy guns in action along our front on Wednesday, the arrival of the French force acting against the German right flank was at once announced on the east of our front some miles away by the continuous roar of their quick-firing artillery, with which the attack was opened.

"So far as the British are concerned, the greater part of this week has been passed in bombardment, in gaining ground by degrees, and in beating back severe counter-attacks with heavy slaughter. Our casualties have been severe, but it is probable that those of the enemy are heavier.

"The rain has caused a great drop in the temperature and there is more than a distant feeling of autumn in the air.

"On our right and left the French have been fighting fiercely and have been gradually gaining ground. One village already has been captured and recaptured twice by each side and at the time of writing remains in the hands of the Germans.

"The fighting has been at close quarters and of the most desperate nature, and the streets of the village are filled with dead of both sides.

CHEERING MESSAGE TO THE FRENCH

"As an example of the spirit which is inspiring our allies the following translation of an *Ordre du Jour* (order of the

day), published on September 9, after the battle of Montmirail, by the commander of the French Fifth Army, is given:

"Soldiers: Upon the memorable fields of Montmirail, of Vauchamps, of Champaubert, which a century ago witnessed the victories of our ancestors over Blücher's Prussians, your vigorous offensive has triumphed over the resistance of the Germans. Held on his flanks, his center broken, the enemy now is retreating towards the east and north by forced marches. The most renowned army corps of old Prussia, the contingents of Westphalia, of Hanover, of Brandenburg, have retired in haste before you.

"This first success is no more than the prelude. The enemy is shaken but not yet decisively beaten. You have still to undergo severe hardships, to make long marches, to fight hard battles. May the image of our country, soiled by barbarians, always remain before your eyes! Never was it more necessary to sacrifice all for her.

"Saluting the heroes who have fallen in the fighting of the last few days, my thoughts turn toward you, the victors in the last battle. Forward, soldiers, for France!"

LETTER FROM A GERMAN SOLDIER

"So many letters and statements of our wounded soldiers have been published in our newspapers that the following epistle from a German soldier of the Seventy-fourth Infantry regiment, Tenth Corps, to his wife also may be of interest:

"My Dear Wife: I have just been living through days that defy imagination. I should never have thought that men could stand it. Not a second has passed but my life has been in danger, and yet not a hair of my head has been hurt.

"It was horrible; it was ghastly, but I have been saved for you and for our happiness, and I take heart again, although I am still terribly unnerved. God grant that I may see you again soon and that this horror may soon be over.

"None of us can do any more; human strength is at an end. I will try to tell you about it. On September 5 the enemy were reported to be taking up a position near St. Prix, southeast of Paris. The Tenth Corps, which had made an astonishingly rapid advance of course, was attacked on Sunday.

"Steep slopes led up to the heights, which were held in

considerable force. With our weak detachments of the Seventy-fourth and Ninety-first regiments we reached the crest and came under a terrible artillery fire that mowed us down. However, we entered St. Prix. Hardly had we done so than we were met with shell fire and a violent fusillade from the enemy's infantry. Our colonel was badly wounded—he is the third we have had. Fourteen men were killed around me. We got away in a lull without my being hit.

“The 7th, 8th, and 9th of September we were constantly under shell and shrapnel fire and suffered terrible losses. I was in a house which was hit several times. The fear of death, of agony, which is in every man's heart, and naturally so, is a terrible feeling. How often I have thought of you, my darling, and what I suffered in that terrifying battle which extended along a front of many miles near Montmirail, you cannot possibly imagine.

“Our heavy artillery was being used for the siege of Maubeuge. We wanted it badly, as the enemy had theirs in force and kept up a furious bombardment. For four days I was under artillery fire. It was like hell, but a thousand times worse.

“On the night of the 9th the order was given to retreat, as it would have been madness to attempt to hold our position with our few men, and we should have risked a terrible defeat the next day. The first and third armies had not been able to attack with us, as we had advanced too rapidly. Our morale was absolutely broken; in spite of unheard-of sacrifices we had achieved nothing.

“I cannot understand how our army, after fighting three great battles and being terribly weakened, was sent against a position which the enemy had prepared for three weeks, but, naturally, I know nothing of the intentions of our chiefs; they say nothing has been lost.

“In a word, we retired towards Cormontreuil and Rheims by forced marches by day and night. We hear that three armies are going to get into line, intrench and rest, and then start afresh our victorious march on Paris. It was not a defeat, only a strategic retreat. I have confidence in our chiefs that everything will be successful.

“Our first battalion, which has fought with unparalleled

bravery, is reduced from 1,200 to 194 men. These numbers speak for themselves.' ”

EVENTS FROM SEPTEMBER 21 TO 24

The next report from the official chronicler at the front, dated September 24, was in part as follows:

“The enemy is still maintaining himself along the whole front, and in order to do so is throwing into the fight detachments composed of units from the different formations, the active army, reserve, and landwehr, as is shown by the uniforms of prisoners recently captured.

“Our progress, although slow, on account of the strength of the defensive positions against which we are pressing, has in certain directions been continuous, but the present battle may well last for some days more before a decision is reached, since it now approximates nearly to siege warfare.

“The nature of the general situation after the operations of the 18th, 19th, and 20th, cannot better be summarized than as expressed recently by a neighboring French commander to his corps: ‘Having repulsed repeated and violent counterattacks made by the enemy, we have a feeling that we have been victorious.’

“So far as the British are concerned, the course of events during these three days can be described in a few words. During Friday, the 18th, artillery fire was kept up intermittently by both sides during daylight. At night the Germans counterattacked certain portions of our line, supporting the advance of their infantry as always by a heavy bombardment. But the strokes were not delivered with great vigor and ceased about 2 *a. m.* During the day’s fighting an aircraft gun of the Third Army Corps succeeded in bringing down a German aeroplane.

ARTILLERY FIRE BECOMES MONOTONOUS

“On Saturday, the 19th, the bombardment was resumed by the Germans at an early hour and continued intermittently under reply from our guns, which is a matter of normal routine rather than an event.

“Another hostile aeroplane was brought down by us, and one of our aviators succeeded in dropping several bombs over

the German line, one incendiary bomb falling with considerable effect on a transport park near LaFère.

"A buried store of the enemy's munitions of war also was found not far from the Aisne, ten wagonloads of live shells and two wagons of cable being dug up. Traces were discovered of large quantities of stores having been burned—all tending to show that as far back as the Aisne the German retirement was hurried.

"On Sunday, the 20th, nothing of importance occurred until the afternoon, when there was an interval of feeble sunshine, which was hardly powerful enough to warm the soaking troops. The Germans took advantage of this brief spell of fine weather to make several attacks against different points. These were all repulsed with loss to the enemy, but the casualties incurred by us were by no means light.

"The offensive against one or two points was renewed at dusk, with no greater success. The brunt of the resistance naturally has fallen on the infantry. In spite of the fact that they have been drenched to the skin for some days and their trenches have been deep in mud and water, and in spite of the incessant night alarms and the almost continuous bombardment to which they have been subjected, they have on every occasion been ready for the enemy's infantry when the latter attempted to assault. Indeed, the sight of the troops coming up has been a positive relief after long, trying hours of inaction under shell fire.

OBJECT OF GERMAN ATTACKS

"The object of the great proportion of artillery the Germans employ is to beat down the resistance of their enemy by concentrated and prolonged fire—to shatter their nerve with high explosives before the infantry attack is launched. They seem to have relied on doing this with us, but they have not done so, though it has taken them several costly experiments to discover this fact.

"From statements of prisoners, it appears that they have been greatly disappointed by the moral effect produced by their heavy guns, which, despite the actual losses inflicted, has not been at all commensurate with the colossal expenditure of ammunition which has really been wasted.

"By this it is not implied that their artillery fire is not

good. It is more than good—it is excellent. But the British soldier is a difficult person to impress or depress, even by immense shells filled with a high explosive, which detonate with terrific violence and form craters large enough to act as graves for five horses.

“The German howitzer shells are from eight to nine inches in calibre, and on impact they send up columns of greasy black smoke. On account of this they are irreverently dubbed ‘coal boxes,’ ‘Black Marias,’ or ‘Jack Johnsons’ by the soldiers.

“Men who take things in this spirit are, it seems, likely to throw out the calculations based on loss of morale so carefully framed by the German military philosophers.

“The German losses in officers are stated by our prisoners to have been especially severe. A brigade is stated to be commanded by a major; some companies of foot guards by one-year volunteers; while after the battle of Montmirail one regiment lost fifty-five out of sixty officers.

LETTER FOUND ON GERMAN OFFICER

“The following letter, which refers to the fighting on the Aisne and was found on a German officer of the Seventh Reserve Corps, has been printed and circulated to the troops:

“‘Cerny, South of Paris, Sept. 17.—My Dear Parents:—Our corps has the task of holding the heights south of Cerny in all circumstances till the Fourteenth Corps on our left flank can grip the enemy’s flank. On our right are other corps. We are fighting with the English guards, Highlanders and Zouaves. The losses on both sides have been enormous. For the most part this is due to the too-brilliant French artillery.

“‘The English are marvelously trained in making use of ground. One never sees them and one is constantly under fire. The French airmen perform wonderful feats. We cannot get rid of them. As soon as an airman has flown over us, ten minutes later we get shrapnel fire in our position. We have little artillery in our corps; without it we cannot get forward.

“‘Three days ago our division took possession of these heights and dug itself in. Two days ago, early in the morning, we were attacked by immensely superior English forces—one brigade and two battalions—and were turned out of our

positions. The fellows took five guns from us. It was a tremendous hand-to-hand fight.

"How I escaped myself I am not clear. I then had to bring up support on foot. My horse was wounded and the others were too far in the rear. Then came up the Guard Jager Battalion, Fourth Jager, Sixth Regiment, Reserve Regiment Thirteen, and Landwehr Regiments Thirteen and Sixteen, and, with the help of the artillery, we drove the fellows out of the position again. Our machine-guns did excellent work; the English fell in heaps.

"In our battalion three iron crosses have been given. Let us hope that we shall be the lucky ones the next time.

"During the first two days of the battle I had only one piece of bread and no water. I spent the night in the rain without my greatcoat. The rest of my kit was on the horses, which have been left miles behind with the baggage and which cannot come up into the battle because as soon as you put your nose up from behind cover the bullets whistle.

"War is terrible! We are all hoping that a decisive battle will end the war. Our troops already have got round Paris. If we beat the English the French resistance will soon be broken. Russia will be very quickly dealt with; of this there is no doubt.

"We have received splendid help from the Austrian heavy artillery at Maubeuge. They bombarded Fort Cerfontaine in such a way that there was not ten meters of parapet which did not show enormous craters made by the shells. The armored turrets were found upside down.

"Yesterday evening about 6, in the valley in which our reserves stood, there was such a terrible cannonade that we saw nothing of the sky but a cloud of smoke. We had few casualties."

TELEPHONE AN AID TO SPIES

"Espionage is carried on by the enemy to a considerable extent. Recently the suspicions of some of the French troops were aroused by coming across a farm from which the horses had been removed. After some search they discovered a telephone which was connected by an underground cable with the German lines, and the owner of the farm paid the penalty in the usual way in war for his treachery.

"After some cases of village fighting, which occurred earlier in the war, it was reported by some of our officers that the Germans had attempted to approach to close quarters by forcing prisoners to march in front of them. The Germans have recently repeated the same trick on a larger scale against the French, as is shown by the copy of an order issued by the French officials. It is therein referred to as a ruse, but if that term can be accepted, it is a distinctly illegal ruse.

REFERS TO RHEIMS CATHEDRAL

"Full details of the actual damage done to the cathedral at Rheims will doubtless have been cabled, so that no description of it is necessary. The Germans bombarded the cathedral twice with their heavy artillery.

"One reason it caught fire so quickly was that on one side of it was some scaffolding which had been erected for restoration work. Straw had also been laid on the floor for the reception of German wounded. It is to the credit of the French that practically all the German wounded were successfully extricated from the burning building.

"There was no justification on military grounds for this act of vandalism, which seems to have been caused by exasperation born of failure—a sign of impotence rather than of strength."

FIVE MORE DAYS OF BATTLE

On September 29 Field Marshal French's headquarters reported as follows:

"The general situation as viewed on the map remains practically the same as that described in the last letter, and the task of the army has not changed. It is to maintain itself until there is a general resumption of the offensive.

"No ground has been lost. Some has been gained, and every counter-attack has been repulsed—in certain instances with very severe losses to the enemy.

"Of recent events an actual narrative will be carried on from the 25th to 29th, inclusive. During the whole of this period the weather has remained fine.

"On Friday, the 25th, comparative quiet reigned in our sphere of action. The only incident worthy of special mention was the passage of a German aeroplane over the interior of

our lines. It was flying high, but drew a general fusillade from below, with the result that the pilot was killed outright and the observer was wounded. The latter was captured by the French.

"That night a general attack was made against the greater part of the Allies' position, and it was renewed in the early morning of Saturday, the 26th. The Germans were everywhere repulsed with loss. Indeed, opposite one portion of our lines, where they were caught in mass by our machine-guns and howitzers firing at different ranges, it is estimated that they left 1,000 killed or wounded.

"The mental attitude of our troops may be gauged from the fact that the official report next morning from one corps, of which one division had borne the brunt of the fighting, ran thus laconically: 'The night was quiet except for a certain amount of shelling both from the enemy and ourselves.'

AN ALL-DAY ATTACK

"At 3:40 *a. m.* an attack was made on our right. At 5 *a. m.* there was a general attack on the right of the —th division, but no really heavy firing. Further ineffectual efforts to drive us back were made at 8 *a. m.* and in the afternoon, and the artillery fire continued all day.

"The Germans came on in 'T' formation, several lines shoulder to shoulder, followed almost immediately by a column in support. After a very few minutes the men had closed up into a mob, which afforded an excellent target for our fire.

"On Sunday, the 27th, while the German heavy guns were in action, their brass bands could be heard playing hymn tunes, presumably at divine service.

"The enemy made an important advance on part of our line at 6 *p. m.*, and renewed it in strength at one point, with, however, no better success than on the previous night. Sniping continued all day along the whole front.

"On Monday, the 28th, there was nothing more severe than a bombardment and intermittent sniping, and this inactivity continued during Tuesday, the 29th, except for a night attack against our extreme right.

A TYPICAL BATTLE INCIDENT

"An incident that occurred Sunday, the 27th, serves to illustrate the type of fighting that has for the last two weeks

been going on intermittently on various parts of our lines. It also brings out the extreme difficulty of ascertaining what is actually happening during an action apart from what seems to be happening, and points to the value of good intrenchments.

"At a certain point in our front our advance trenches were on the north of the Aisne, not far from a village on a hillside and also within a short distance of German works, being on a slope of a spur formed by a subsidiary valley running north and a main valley of the river. It was a calm, sunny afternoon, but hazy, and from our point of vantage south of the river it was difficult exactly to locate on the far bank the well-concealed trenches.

"From far and near the sullen boom of guns echoed along the valley, and at intervals in a different direction the sky was flecked with the almost motionless smoke of anti-aircraft shrapnel.

"Suddenly and without any warning, for the reports of the distant howitzers from which they were fired could not be distinguished from other distant reports, three or four heavy shells fell into the village, sending up huge clouds of dust and smoke, which ascended in a brownish-gray column. To this no reply was made by our side.

"Shortly afterwards there was a quick succession of reports from a point some distance up the subsidiary valley on the side opposite our trenches and therefore rather on their flank. It was not possible either by ear or by eye to locate the guns from which the sounds proceeded. Almost simultaneously, as it seemed, there was a corresponding succession of flashes and sharp detonations in the line along the hillside along what appeared to be our trenches.

"There was then a pause and several clouds of smoke rose slowly and remained stationary, spaced as regularly as poplars.

"Again there was a succession of reports from German quick-firers on the far side of the misty valley and like echoes of detonations of high explosives; then the row of expanding smoke clouds was prolonged by several new ones. Another pause and silence, except for the noise in the distance.

"After a few minutes there was a roar from our side of

the main valley as our field guns opened one after another in a more deliberate fire upon the positions of the German guns. After six reports there was again silence save for the whirr of shells as they sang up the small valley. Then followed flashes and balls of smoke—one, two, three, four, five, six—as the shrapnel burst nicely over what in the haze looked like some ruined buildings at the edge of the wood.

TRYING TO ENFILADE THE TRENCHES

“Again, after a short interval, the enemy’s gunners reopened with a burst, still further prolonging the smoke, which was by now merged into one solid screen above a considerable length of the trenches and again did our guns reply. And so the duel went on for some time.

“Ignoring our guns, the German artillerymen, probably relying on concealment for immunity, were concentrating all their efforts in a particularly forceful effort to enfilade our trenches. For them it must have appeared to be the chance of a lifetime, and with their customary prodigality of ammunition they continued to pour bouquet after bouquet of high explosives or combined shrapnel and common shells into our works.

“Occasionally, with a roar, a high angle projectile would sail over the hill and blast a gap in the village. One could only pray that our men holding the trenches had dug themselves in deep and well, and that those in the village were in cellars.

“In the hazy valleys, bathed in sunlight, not a man, not a horse, not a gun, nor even a trench was to be seen. There were only flashes, and smoke, and noise. Above, against the blue sky, several round, white clouds were hanging. The only two visible human souls were represented by a glistening speck in the air. On high also were to be heard more or less gentle reports of the anti-aircraft projectiles.

“But the deepest impression created was one of sympathy for the men subjected to the bursts along that trench. Upon inquiry as to the losses sustained, however, it was found that our men had been able to take care of themselves and had dug themselves well in. In that collection of trenches on that Sunday afternoon were portions of four battalions of British

soldiers—the Dorsets, the West Kents, the King's Own Yorkshire light infantry, and the King's Own Scottish Borderers."

ARMIES IN A DEADLOCK

Later reports from the Aisne valley, up to October 17, when the big battle had been five weeks in progress, indicated little change in the general situation. Bombardments and artillery duels, varied by general attacks, occurred daily all along the line. The main positions of both armies were firmly held, though the French had gained some ground north of Rheims and continually threatened the German center. The left of the Allies' line had crept north to and beyond Arras, where there was severe fighting for several days; and at the end of the thirty-fifth day of the battle of the Rivers the lines of the opposing armies extended almost continuously from beyond Arras on the northwest, south in a great curve to the Aisne valley, thence east to Verdun, where the Crown Prince's army kept hammering away at that fortress without success, and thence southwest to Nancy and the Alsatian border.

By this time the armies of the center were in a species of deadlock. The strain on both sides had long promised to get beyond human endurance and the antagonists of the Aisne were likened by a French officer to two exhausted pugilists, who would soon be unable to inflict further punishment upon each other. But there was no sign of "throwing up the sponge" on either side, though beyond the actual sphere of conflict it was felt that "something must give way soon."

A BLAZING VALE OF DEATH

Writing on September 16, the fourth day of the battle, a special correspondent behind the British lines by Senlis and Chantilly, said:

"I have passed through a smiling land to a land wearing the mask of death; through harvest fields rich with great stacks snugly builded against the winter to the fields of a braver harvest; by jocund villages where there is no break in the ebb and flow of everyday life to villages and towns that despoiling hands have shattered in ruins.

"And I have passed up this Via Dolorosa toward the very harvesting itself—toward those great plains stretching away

on the banks of the River Aisne, where the second act of this drama of battles is at this moment being played.

"Details of this fight, which, as I write, reaches its fourth day of duration, are very scanty, but partly from personal observation and partly from information which has reached me I know that the struggle so far has been a terrible one, equal to, if not greater than, the struggle on the banks of the Marne.

"The events of Monday (September 14) revealed a foe battling desperately for his life; and this defense of General von Kluck's army demanded of the Allies their utmost strength and determination.

"Picture this battlefield, which will assuredly take its place with that of the Marne as one of the greatest combats of the greatest war. Through the middle of it flows the great river, passing from the east to the west. The banks of the river here are very steep. Above the plain, which sweeps away from the northern bank, rises the "massif" of Laon. It is an ideal area for great movements and for artillery work directed upon the valley of the river. Passing eastward a little, there are the heights behind the city of Rheims and above the Vesle, a tributary of the Aisne. Here again nature has builded a stronghold easy to defend, difficult exceedingly to attack.

"I know of heroic work against these great lines, work that will live with the most momentous of this struggle. I know of smashing attacks the thought of which takes one's breath away. I have heard narratives of the trenches and of the bridges—these engineers, French and English, have indeed 'played the game'—which no man can hear unmoved; how the columns went down again and again to the blazing death of the valley, and how men worked, building and girding in a very inferno—worked with the furious speed of those whose time of work is short.

HEROISM IN THE TRENCHES

"And in the trenches, too, the tale of heroism unfolds itself hour by hour. Here is an example, one among ten thousand, the story of a wounded private: 'We lay together, my friend and I. . . . The order to fire came. We shot and shot till our rifles burned us. Still they swarmed on towards us. We took careful aim all the while. "Ah, good, did you see that?"

I turned to my friend and as I did so heard a terrible dull sound like a spade striking upon newly turned earth. His head was fallen forward. I spoke, I called him by name. He was moaning a little. Then I turned to my work again. They are advancing quickly now. Ah! how cool I was. I shot so slowly, . . . so very slowly.

“And then—do you know what it feels like to be wounded? I rose just a little too high on my elbow. A sting that pierces my arm like a hot wire—too sharp almost to be sore. I felt my arm go away from me—it seemed like that—and then my rifle fell. I believe I was a little dazed. I looked at my friend presently. He was dead.”

THE GRIM STORY OF SENLIS

“So, on these green river banks and across these fair wooded plains the Germans make their great stand—the stand that if they are defeated will be their last in France. And meanwhile behind them lie the wasted fields and the broken villages. It is impossible adequately to describe the scenes which I have witnessed on the line of the great retreat, but here and there events have had place, which, in truth, cry to high heaven for report. Of such is the grim story of Senlis.

“I spent many hours in Senlis and I will recount that story as I saw it and as I heard it from those who lived through the dreadful procession of days. On Saturday, September 5, the Germans reached this beautiful old cathedral town and entered into occupation. They issued a proclamation to the inhabitants calling upon them to submit and to offer no sort of resistance on pain of severe reprisals.

“But the inhabitants of Senlis had already tasted the bitter draft of war making. The people had become bitter to the point of losing care of their own safety. They were reckless, driven to distraction.

“Bitter was the price exacted for the recklessness! The trouble began when, exasperated beyond measure by their insolence, a brave tobacconist declared to a couple of the Prussians: ‘I serve men, not bullies.’ He followed his words with a blow delivered fiercely from the shoulder.

“The infuriated soldiers dragged him from his shop and hurled him on his knees in front of the door. His wife rushed out shrieking for mercy. Mercy! As well ask it of a stone!

A shot rang out. . . . Another. . . . Man and wife lay dead.

"Immediately the news of this murderous act flew through the town. Outraged and furious, the conquerors marched instantly to the house of the mayor—their hostage—and arrested him. They conveyed him without a moment's delay to the military headquarters, where he was imprisoned for the night. On Wednesday morning a court-martial sat to decide his fate. A few minutes later this brave man paid for the indiscretion of his people with his life, dying splendidly.

"And then guns were turned on this town of living men and women and children. Shells crashed into the houses, into the shops, into the station. At Chantilly, seven kilometers away, the amazed inhabitants saw a great column of black smoke curl up into the air; they guessed the horrible truth. Senlis was burning.

"The work, however, was interrupted. At midday the glad tidings were heard, 'The Turcos are here.' Within the hour broken and blazing Senlis was re-relieved and rescued. The Turcos pursued and severely punished the enemy.

"Today these streets are terrible to look upon. House after house has been shattered to pieces—broken to a pile of stones. One of the small turrets of the cathedral has been demolished, and a rent has been torn in the stone work of the tower. The station is like a wilderness."

RHEIMS CATHEDRAL DAMAGED

A correspondent gives a vivid account of the German bombardment of Rheims, during the battle on the Aisne, as viewed by him from the belfry of the famous cathedral.

"What a spectacle it was!" he said. "Under the cold, drifting gray rainclouds the whole semicircle of the horizon was edged by heights on which the German batteries were mounted, three miles away.

"There was nothing but the inferno of bursting shells, those of the Germans landing anywhere within the space of a square mile. Sometimes it was just outside the town that they fell, trying to find the French troops lying there in their trenches, waiting to go forward to the attack of the hills, when their artillery should have prepared the way.

"The cathedral tower made a wonderful grand stand from

which to watch this appalling game of destruction. It was under the protection of the Red Cross flag, for directly the shells began to hit the cathedral in the morning some German wounded were brought in from a hospital nearby and laid on straw in the nave, while Abbé Andreaux and a Red Cross soldier pluckily climbed to the top of the tower and hung out two Geneva flags.

"The crescendo scream the shells make has something fiendish in it that would be thrilling apart from the danger of which it is the sign. You hear it a full second before the shell strikes, and in that time you can tell instinctively the direction of its flight.

"Then comes the crash of the explosion, which is like all the breakages you ever heard gathered into one simultaneous smash."

SAVING THE GERMAN WOUNDED

A few of the German shells struck the cathedral and set it on fire. The scene was thus described by Abbé Camu, a priest of Rheims:

"It was all over in an hour. There were two separate fires. We put the first out with four buckets of water, all we had in the place, but soon another shell struck the roof and the wind drove the flames along the rafters inside of the nave. We rushed up, but it was flaming all along and as we could do nothing, we hurried down.

"There were holes in the ceiling of the nave and sparks began to fall through them into a great heap of straw, ten feet high and twenty yards long, which the Germans had piled along the north aisle. We tried to catch the sparks in our hands as they fell, and such of the German wounded as were able to walk helped us. But the first spark that fell on the pile set it blazing. There was time to think of nothing but getting out the wounded.

"They screamed horribly. We carried many of those that could not walk, while others dragged themselves painfully along to the side door in the north aisle. Those who had only hand and arm wounds helped their comrades. We got out all except thirteen, whose bodies were left behind.

"When at last I came out of the flaming building I found the whole body of wounded huddled together around the doors.

Opposite to them was a furiously hostile crowd of civilians of the town and a number of soldiers with their rifles already leveled.

"I sprang forward. 'What are you doing?' I cried.

"'They shall all burn,' shouted the soldiers in answer. 'They shall go back and burn with the cathedral or we will shoot them here.'

"'You are mad!' I exclaimed in reply. 'Think of what this means. All the world will hear of the crime the Germans have committed here, and if you shoot these men the world will know that France has been as criminal in her turn. Anyhow,' I said, 'you shall shoot me first, for I will not move.'

"Unwillingly the soldiers lowered their rifles and I turned to six German officers who were among the wounded and asked if they would do what I told them to. They said they would and I asked them to tell their men to do the same. Then I formed them up in a solid body, those who could walk unaided carrying or helping those who could not. I put myself at the head and we set off to the Hotel de Ville, which is only a few hundred yards away.

"Well, then the crowd, mad with grief and rage, set on us. I can't describe it. You have never seen anything so dreadful as that scene. They beat some of the Germans and some of them they got down.

"'Can't you help me?' I called to a French officer I caught sight of.

"'You will never get to the Hotel de Ville like this,' he replied, so I forced my wounded through the gateway of a private house and we managed to close the gates after us.

"They had been roughly handled, some of them, and they stayed there a day and a night before we could move them again."

[The damage done to the cathedral at Rheims, by the way, though by no means slight, inexpressibly sad and truly regrettable, was not nearly so great as was indicated by many early reports. The friends of architectural art and beauty hope to see the cathedral fully restored at no distant date.]

"SLAUGHTER" AT SOISSONS

Much of the fighting during the battle of the Aisne centered around Soissons. On September 16 a correspondent described the fighting there as follows:

"For the last three hours I have been watching from the hills to the south of the town that part of the terrific struggle that may be known in history as the battle of Soissons.

"It has lasted for four days, and only now can it be said that victory is turning to the side of the Allies.

"The town itself cannot be entered for it still is being raked both by artillery and rifle fire, and great columns of smoke mark several points at which houses are burning.

"The center of the fighting lies where the British and French pontoon corps are trying to keep the bridges they have succeeded in throwing across the river.

"Men who have come from the front line tell me that the combat there has been a positive slaughter. They say that the unremitting and desperate firing of these four days and nights puts anything else in modern warfare into the shade, that river crossings are as great an objective on one side to take and keep as on the other to destroy."

SEVEN DAYS OF HELL

A wounded soldier, on being brought back to the hospital at Paris, after only one week in the valley of the Aisne, said in a dazed sort of way:

"Each day was like the others. It began at 6 o'clock in the morning with heavy shellfire. There was a short interval at which it stopped, about 5:30 every day. Then in the night came the charges, and one night I couldn't count them. It was awful—kill, kill, kill, and still they came on, shoving one another over on to us. Seven days and nights of it and some nights only an hour's sleep; it was just absolute hell!"

None of the wounded found another word to describe the battle and the sight of the men bore it out. Muddled to the eyes, wet, often with blood caked on them, many were suffering from the curious aphasia produced by continued trouble and the concussion of shells bursting. Some were dazed and speechless, some deafened, and yet, strange to say, said a correspondent, no face wore the terrible animal war look. They seemed to have been softened, instead of hardened, by their awful experience.

CHAPTER XIX

FALL OF ANTWERP

Great Seaport of Belgium Besieged by a Large German Force—Forts Battered by Heavy Siege Guns—Final Surrender of the City—Belgian and British Defenders Escape—Exodus of Inhabitants—Germans Reach the Sea.

WHEN the battle of the Marne ended in favor of the Allies and the Germans retired to take up a defensive position along the Aisne, the Belgian army renewed its activities against the invader. With the fortified city of Antwerp as their base, the Belgians began (on September 10) an active campaign, having for its object the reoccupation of their cities and towns which had been taken and garrisoned by German troops. In some cases they were successful in regaining possession of points which they had been forced to abandon during the German advance in August, and there were many hot encounters with the Germans who were left to hold open the German lines of communication through Belgium. But the forces of the Kaiser were too numerous and too mobile for successful opposition, and soon the Belgian army, despite the most gallant efforts, was compelled once more to retire behind the outer forts of Antwerp and there await the coming of an enemy who was approaching in force.

Great credit must be given to the Belgian army for the patriotic manner in which it met the sudden invasion by the Germans, and for its continued resistance against tremendous odds. Inspired by the example of King Albert and his devoted Queen, who spent most of their time with the Belgian forces in the field, and shared with them the vicissitudes of war, the defenders of Belgium fought with the utmost pertinacity. The resistance

of the Belgians when invaded, and the success of the Allies in halting the advance upon Paris and turning it into a retreat at the Marne, appear to have inflamed the German generals with a desire to crush Belgium completely under an iron heel. An object lesson of the power and possibilities of the great fighting machine must be given somewhere. Halted in France by the Franco-British armies and meeting with varying fortunes against the Russian hosts in the eastern campaign, Germany chose to make Belgium once more the international cockpit and hurled an army against Antwerp. This move, if successful (as it proved to be) would serve two purposes—first, the further punishment of Belgium for her unexpected resistance, and second, the striking of a direct blow at Great Britain, the possession of Antwerp being strategically regarded as “a pistol leveled at the head of London.”

THE SIEGE OF ANTWERP

In the third week of September the Germans, having massed a force believed to be sufficient for the capture of Antwerp, brought up their heavy Krupp siege guns which had been used successfully at Liège and Namur, and planted them within their seven-mile range, so as to command the outer belt of forts east and south of the city. [See map of the fortifications of Antwerp on page 102.] These huge howitzers were reinforced by heavy siege guns furnished by Austria. The fortification system of Antwerp was believed by its builders to be practically impregnable, but they had not reckoned with the tremendous shattering power and great range of the latest Krupp siege guns. For Antwerp was destined to fall, her outer and inner defenses broken down, within ten days from the time the siege began in earnest.

BRITISH MARINES AID DEFENDERS

The number of German troops engaged before Antwerp was variously estimated at from 80,000 to 200,000. The siege proper began on Tuesday, September 29. For more than a week previously there had been daily engagements in the suburbs of the city and on several occasions the Belgians made a sortie in force, only to encounter overwhelming numbers of the German enemy, before whom they were compelled

to retire behind the shelter of the forts. In all these engagements the Belgians gave a good account of themselves and inflicted severe losses on the enemy. But the odds against them were too great and then when the great siege guns began to thunder, it was soon realized that the city was in imminent danger.

King Albert did all in his power to encourage the defense and by his presence among his troops on the firing lines around the city added greatly to his reputation as a patriotic soldier. A force of several thousand British marines, coming from Ostend, aided the Belgian defense in the last days of the siege, but all efforts were unavailing. One by one the forts succumbed to the German fire with which the Belgian guns could not cope, and German troops penetrated nearer and nearer to the doomed city.

Finally, on October 9, when the inhabitants were in a state of terror as a result of the long-continued bombardment of the forts, and the shelling of the city, further resistance was seen to be useless, the defending forces, Belgian and British, made their escape to Ostend or into the neutral territory of Holland, the city formally capitulated through the Burgomaster, and occupation by the Germans followed immediately. The bulk of the British marines made their way back to Ostend, but a rearguard, consisting of 2,000 British, together with some Belgians, was cut off by the advance of the Germans across the Scheldt, and rather than surrender to them marched across the border into Holland and surrendered arms to the Dutch authorities. The men were interned and will be held in Holland till the end of the war. It is probable that this rearguard was deliberately sacrificed to enable the Anglo-Belgian army to make good its retreat.

The fate of Antwerp shows what might have happened to Paris had the Germans been able to bring up their great siege guns to the outer fortifications of the French capital and protect them while they performed their tremendous task of battering the defenses to pieces. The wrecking of Antwerp's outer and inner forts in ten days proves that solid, massive concrete, chilled steel and well-planned earthworks afford little or no security against the monstrous cannon of the Kai-

ser's armies. There appeared to be but one way of withstanding them.

As seems to have been demonstrated in the valley of the Aisne, they are apparently ineffective against field forces deeply intrenched in a far-flung line.

THE FIGHTING OUTSIDE ANTWERP

Early on Tuesday morning, October 6, one of the fiercest of the engagements outside Antwerp ended with the crossing of the River Nethe by the Germans and their approach to the inner forts. Monday had been the sixth day of the siege and the Belgian army was fighting with reckless courage to save Antwerp. As a precaution, the boilers of all the German ships lying in the harbor were exploded on Sunday, in order to prevent, if possible, use of these ships as transports for German troops across the North Sea or elsewhere. The detonation of the bursting boilers, resounding through the city, set the excited Sunday crowd very near to a panic. This was accelerated by the constant fear of airship attacks, and most of the population that was not already in active flight from the city sought safety in cellars.

The entire war has presented no greater picture of desolation than that of the hosts fleeing from the last Belgian stronghold. For forty-eight hours before the city fell great crowds of the citizens, dumb with terror as the huge German shells hurtled over their heads, were fleeing toward England and Holland in such numbers that the hospitality of those countries was likely to be taxed to the utmost.

The suburban town of Lierre was bombarded early in the week, the church was destroyed, and a number of citizens killed and wounded. The next day the village of Duffel was bombarded and the population fled into Antwerp. Many still had confidence in the ability of the Antwerp forts to withstand the German attack.

Although the Germans succeeded in crossing the Nethe, their repeated attempts to effect a passage over the Scheldt were repulsed and they then concentrated their attention on an approach to Antwerp from the southeast. In their trenches the Belgians resisted gallantly to the last. "Most wonderful," said an American observer on October 7, "is the patient.

unfaltering courage of the average Belgian soldier, who has been fighting for nine weeks. Tired, with hollow eyes, unkempt, unwashed and provided with hasty, though ample, meals, he is spending most of the time in the trenches.

"King Albert, the equal of any soldier in his devotion to duty, daily exposes himself to personal danger, while the Queen is devoting her time to the hospitals."

The effect of the German siege artillery was especially destructive near Vosburg. Several villages suffered heavily and the barracks at Contich were wrecked. The forts at Waelhem and Wavre-St. Catherines were totally destroyed by the terrific shell fire.

Most of the fighting around Antwerp was a battle of Krupps against men. Every day and night the fighting continued with deadly effect against the forts, while the shrapnel and shell made many of the trenches untenable.

As fast as the Belgians were compelled to withdraw from a position the Germans moved up and occupied it. The Belgians fought stubbornly with infantry and frequently they repulsed the Germans, but these repulses always meant a renewal of the artillery attacks by the Germans, with the eventual retirement of the Belgians until the end of endurance was reached and the city defenses were evacuated by their brave garrison.

An instance of the tenacity with which the infantry stuck to their positions was reported from the Berlaere, where the commanding officer and his aid-de-camp were in one of the most exposed positions. Sandbags protected them for some time, but at last the aid-de-camp was struck by shrapnel and had his face virtually blown away. Unperturbed by this terrible proof of the danger of his position, the commanding officer stuck to his post, and for further shelter placed the body of his junior over his body. In this position he lay firing, whenever possible, from 8 o'clock in the morning until 4 in the afternoon.

FIERCE FIGHT TO CROSS NETHE

The crossing of the River Nethe was attended by great loss to the Germans. They hurled their infantry recklessly against the Belgian trenches, and while they lost enormous numbers, eventually succeeded in crossing the river.

One of the unsuccessful attempts was described by an independent observer as follows:

"The Germans succeeded in getting a pontoon completed and they came down to the river bank in solid masses to cross it. As they came every Belgian gun that could be turned on the spot was concentrated on them and they were blown away, blocks of them at a time, and still the masses came on.

"The Belgian officers spoke with enthusiasm of the steadiness and gallantry with which, as each German company was swept away, another pushed into its place. But it was a dreadful sight, nevertheless.

"At last the bridge went, shattered and blown to bits. The Belgian guns continued for a while to search the opposite river bank, but the Germans fell back and no more masses of men came down to where the pontoon had been. Allowing for all exaggerations, there can be no doubt that the German loss must have been extremely heavy."

Near Termonde, on Wednesday, the 7th, the fighting was just as fierce. The Belgians had four batteries of field guns there which succeeded in destroying the locks of the river (the Scheldt), thus flooding a part of the river and blocking the Germans. Later they engaged in a hot duel with the German artillery. Two of the Belgian batteries were completely destroyed early in the action and all of the men serving them were killed. Not until the last of the remaining guns were put out of action did the Belgians withdraw.

Of the casualties in and around Antwerp during the siege it is possible only to make an estimate. It was said after the Germans entered the city that their total loss in killed, wounded and missing was near forty-five thousand men. German officers were credited before the attack with saying that they would sacrifice 100,000 men, if necessary, to take Antwerp. It is probable that the German casualties numbered at least twenty-five thousand, while the Belgian losses in actual killed and wounded were probably five thousand. The latter fought from entrenched positions, while the heavy German losses were sustained in the open and at the river crossings. The casualties among the British marines, who arrived only a day or two before the city capitulated, were comparatively insignificant.

STORY OF AN EYEWITNESS—HARROWING SCENES ATTENDING THE
FALL OF ANTWERP AND THE EXODUS OF ITS PEOPLE

A vivid picture of the pathetic scenes attending the fall of Antwerp was given by Lucien A. Jones, correspondent of the London Daily Chronicle, who wrote on October 11th as follows:

"Antwerp has been surrendered at last. The bitterest blow which has fallen upon Belgium is full of permanent tragedy, but the tragedy is lightened by the gallantry with which the city was defended. Only at last to save the historic buildings and precious possessions of the ancient port was its further defense abandoned. Already much of it had been shattered by the long-range German guns, and prolonged resistance against these tremendous engines of war was impossible. Owing to this the siege was perhaps the shortest in the annals of war that a fortified city has ever sustained. Heroic efforts were made by the Belgians to stem the tide of the enemy's advance, but the end could not long be delayed when the siege guns began the bombardment.

"It was at three minutes past noon on Friday, October 9th, that the Germans entered the city, which was formally surrendered by Burgomaster J. De Vos. Antwerp had then been under a devastating and continuous shell fire for over forty hours.

"It was difficult to ascertain precisely how the German attack was planned, but the final assault consisted of a continuous bombardment of two hours' duration, from half past 7 o'clock in the morning to half-past 9. During that time there was a continuous rain of shells, and it was extraordinary to notice the precision with which they dropped where they would do the most damage. The Germans used captive balloons, whose officers signaled the points in the Belgian defense at which they should aim.

GERMAN GUNS CONCEALED

"The German guns, too, were concealed with such cleverness that their position could not be detected by the Belgians. Against such methods and against the terrible power of the German guns the Belgian artillery seemed quite ineffective. Firing came to an end at 9.30 on Friday, and the garrison escaped, leaving only ruins behind them. In order to gain time for an orderly retreat a heavy fire was maintained against the

Germans up to the last minute and the forts were then blown up by the defenders as the Germans came in at the gate of Malines.

"I was lucky enough to escape by the river to the north in a motorboat. The bombardment had then ceased, though many buildings were still blazing, and while the little boat sped down the Scheldt one could imagine the procession of the Kaiser's troops already goose-stepping their way through the well-nigh deserted streets.

MANY HARROWING SCENES

"Those forty hours of shattering noise almost without lull seem to me now a fantastic nightmare, but the sorrowful sights I witnessed in many parts of the city cannot be forgotten.

"It was Wednesday night that the shells began to fall into the city. From then onward they must have averaged about ten a minute, and most of them came from the largest guns which the Germans possess, 'Black Marias,' as Tommy Atkins has christened them. Before the bombardment had been long in operation the civil population, or a large proportion of it, fell into a panic.

"It is impossible to blame these peaceful, quiet-living burghers of Antwerp for the fears that possessed them when a merciless rain of German shells began to fall into the streets and on the roofs of their houses and public buildings. The Burgomaster had in his proclamation given them excellent advice, to remain calm for instance, and he certainly set them an admirable example, but it was impossible to counsel perfection to the Belgians, who knew what had happened to their fellow-citizens in other towns which the Germans had passed through.

FOUGHT TO GET ON THE BOATS

"Immense crowds of them—men, women and children—gathered along the quayside and at the railway stations in an effort to make a hasty exit from the city. Their condition was pitiable in the extreme. Family parties made up the biggest proportion of this vast crowd of broken men and women. There were husbands and wives with their groups of scared children, unable to understand what was happening, yet dimly conscious in their childish way that something unusual and terrible and perilous had come into their lives.

"There were fully 40,000 of them assembled on the long quay, and all of them were inspired by the sure and certain hope that they would be among the lucky ones who would get on board one of the few steamers and the fifteen or twenty tugboats available. As there was no one to arrange their systematic embarkation a wild struggle followed amongst the frantic people, to secure a place. Men, women and children fought desperately with each other to get on board, and in that moment of supreme anguish human nature was seen in one of its worst moods; but who can blame these stricken people?

APPALLED BY THE HORROR OF WAR

"They were fleeing from '*les barbares*,' and shells that were destroying their homes and giving their beloved town to the flames were screaming over their heads. Their trade was not war. They were merchants, shopkeepers, comfortable citizens of middle age or more; there were many women and children among them, and this horror had come upon them in a more appalling shape than any in which horror had visited a civilized community in modern times.

"There was a scarcity of gangways to the boats, and the only means of boarding them was by narrow planks sloping at dangerous angles. Up these the fugitives struggled, and the strong elbowed the weak out of their way in a mad haste to escape.

"By 2 o'clock Thursday most of the tugboats had got away, but there were still some 15,000 people who had not been able to escape and had to await whatever fate was in store for them.

A GREAT EXODUS OF INHABITANTS

"At the central railway station incidents of a similar kind were happening. There, as down by the river, immense throngs of people had assembled, and they were filled with dismay at the announcement that no trains were running. In their despair they prepared to leave the city on foot by crossing the pontoon bridge and marching towards the Dutch frontier. I should say the exodus of refugees from the city must have totaled 200,000 men, women and children of all ages, or very nearly that vast number, out of a population which in normal times is 321,800.

"I now return to the events of Thursday, October 8th. At 12.30 in the afternoon, when the bombardment had already lasted over twelve hours, through the courtesy of a Belgian officer I was able to ascend to the roof of the cathedral, and from that point of vantage I looked down upon the scene in the city.

"All the southern portion of Antwerp appeared to be desolate ruin. Whole streets were ablaze, and the flames were rising to a height of twenty and thirty feet.

"From my elevated position I had an excellent view also of the great oil tanks on the opposite side of the Scheldt. They had been set on fire by four bombs from a German Taube aeroplane, and a huge thick volume of black smoke was ascending two hundred feet into the air. It was like a bit of Gustave Doré's idea of the infernal regions.

CITY ALMOST DESERTED

"The city by this time was almost deserted, and no attempt was made to extinguish the fires that had broken out all over the southern district. Indeed there were no means of dealing with them. For ten days the water supply from the reservoir ten miles outside the city had been cut off, and this was the city's main source of supply. The reservoir was just behind Fort Waelthen, and a German shell had struck it, doing great mischief. It left Antwerp without any regular inflow of water and the inhabitants had to do their best with the artesian wells. Great efforts were made by the Belgians from time to time to repair the reservoir, but it was always thwarted by the German shell fire.

KILLED BEFORE HIS WIFE'S EYES

"After leaving the cathedral, I made my way to the southern section of the city, where shells were bursting at the rate of five a minute. With great difficulty, and not without risk, I got as far as Rue Lamoiere. There I met a terror-stricken Belgian woman, the only other person in the streets besides myself. In hysterical gasps she told me that the Bank Nationale and Palais de Justice had been struck and were in flames, and that her husband had been killed just five minutes before I came upon the scene. His mangled remains were

lying not one hundred yards away from where we were standing.

"Except for the lurid glare of burning buildings, which lit up the streets, the city was in absolute darkness, and near the quay I lost my way trying to get to the Hotel Wagner. For the second time that day I narrowly escaped death by shell. One burst with terrific force about twenty-five yards from me. I heard its warning whirr and rushed into a neighboring porch. Whether it was from the concussion of the shell or in my anxiety to escape I caromed against the door and tumbled down, and as I lay on the ground a house on the opposite side crashed in ruins. I remained still for several minutes, feeling quite sick and unable to get up. Then I pulled myself together and ran at full speed until I came to a street which I recognized.

TAKE REFUGE IN CELLARS

"How many of the inhabitants of Antwerp remained in the city that night it is impossible to say, but they were all in the cellars of their houses or shops. The Burgomaster, M. De Vos, had in one of his several proclamations made many suggestions for safety during the bombardment, for the benefit of those who took refuge in cellars. Among the most useful of them, perhaps, was that which recommended means of escape to an adjoining cellar. The power of modern artillery is so tremendous that a cellar might very well become a tomb if a shell fell on the building overhead.

"Sleep was impossible that night, in the noise caused by the explosion of shells in twenty different quarters of the town. About 6 o'clock I was told that it was time we got out, as the Germans were entering the city. We hurried from the hotel and found the streets completely deserted. I walked down to the quay-side, and there I came across many wounded soldiers, who had been unable to get away in the hospital boat.

"On the quay piles of equipment had been abandoned. A broken-down motor-car, kit-bags, helmets, rifles and knapsacks were littered in heaps. Ammunition had been dumped there and rendered useless. The Belgians had evidently attempted to set fire to the whole lot. The pile of stuff was still smoldering. I waited there for half an hour, and during that

time hundreds of Belgian soldiers passed in the retreat. Just about this time a pontoon bridge which had been the means of the Belgian retreat was blown up to prevent pursuit by the Germans.

"At 8 o'clock a shell struck the Town Hall, and about 8:15 another shell shattered the upper story and broke every window in the place.

BURGOMASTER PARLEYS WITH GERMANS

"That was the German way of telling the Burgomaster to hurry up. A quarter of an hour later M. De Vos went out in his motor-car toward the German line to discuss the conditions on which the city should be surrendered.

"At 9:30 o'clock the bombardment of the city suddenly ceased, and we understood that the Burgomaster had by this time reached the German headquarters. Still we waited, painfully anxious to learn what would be the ultimate fate of Antwerp. Belgian soldiers hurried by and at 10:30 proclamations were posted on the walls of the Town Hall urging all in the city to surrender any arms in their possession and begging all to remain calm in the event of the Germans' occupation. A list was also posted of several prominent citizens who were appointed to look after the interests of those Belgians who remained.

"The 'impregnable' city of Antwerp had fallen, but without dishonor to its gallant defenders."

GERMAN MILITARY GOVERNOR OF ANTWERP APPOINTED—GERMAN OFFICIAL REPORTS

On October 10 Baron von der Schutz was appointed military governor of Antwerp. It was expected that the city would become the base for Zeppelin attacks upon England and also for a German naval campaign in which mines and submarines would play an important part. This was intimated in dispatches from Berlin following the German occupation of the city.

The German General Staff, in announcing the capture, added that they could not estimate the number of prisoners taken. "We took enormous quantities of supplies of all kinds," said the official statement.

CHAPTER XX

THE WOUNDED AND PRISONERS

Typical Precautions Used by the German Army—The Soldiers' First-Aid Outfit—System in Hospital Arrangements—How Prisoners of War Are Treated—Regulations Are Humane and Fair to All Concerned.

MODERN armies take the best possible care of their wounded and none has brought this department of warfare to greater perfection than the Germany army. One detail of this work shows the German army at its best.

Every soldier has sewn under a corner of his coat a strip of rubber cloth. Under this strip is a piece of antiseptic gauze, a strip of bandage and plaster and cloth for the outer bandage. This cloth bears in simple pictures directions for dressing every sort of wound.

When a soldier is wounded either he or some comrade rips open this package and applies at once the life saving dressing, which will last at any rate until the soldier is brought to a station, where the first scientific attention is given.

Through this simple and inexpensive device thousands upon thousands of German soldiers, who have been slightly wounded in battle, have returned to their comrades within a few days completely well and have taken their places in the ranks once more. Without this care a large percentage of the wounds would become inflamed, as has been the case with hundreds of wounded French prisoners captured by the Germans.

The ordinary procedure of caring for the wounded in the German army is for the sanitary corps, which is well provided with stretchers and bandages, to gather up the wounded on or

near the firing lines and bring them to a gathering point a little way behind the lines.

Here the army surgeons are ready to begin work at once upon the most urgent cases. They are assisted by members of the corps, who remove the temporary bandages, and put on dressings which will last until the soldier reaches a hospital. Then from this first gathering point the wounded soldiers are put on stretchers in Red Cross wagons and carried to the field hospitals a few miles farther back, where doctors and nurses are at work.

HOSPITALS IN VILLAGE CHURCHES

These hospitals are usually established in village churches or town halls. One room is cleared and arranged for an operating room, where bullets and pieces of shell are removed and amputations are made if necessary.

"I have just visited such a field hospital," said a correspondent with the right wing of the German army in France, writing on September 28. "It was in a little whitewashed village church heated by a stove. Everywhere were white beds made of straw and covered with sheets. Perhaps twenty wounded were here, including two captured Irishmen. They lay quite still when the army doctor ushered us in, for they were too seriously wounded to pay much attention to anything.

"Near this hospital was another in a town hall. While we were there a consulting surgeon arrived to investigate the condition of a seriously wounded lieutenant, whose leg might need amputation. Two orderlies put the patient on a stretcher, and he was taken into the next room for examination. Later in the day the amputation was performed.

MOVED TO HOSPITALS IN CITIES

"From these little field hospitals, as soon as the men can be moved, they are taken to some general hospital in the nearest large city, where several thousands can be cared for. Such a hospital exists in this neighborhood in the building of a normal college, where every corner is used in housing wounded men.

"I made a quick trip through this building and the memory of it is one of the most heartrending pictures I have of the war.

Room after room was filled with the victims of the conflict. Every man was seriously wounded. Some had suffered amputations and the heads of others were so bandaged that no feature could be seen, only a tube to the nose permitting breathing.

HORROR IN HOSPITAL SIGHTS

"In one room a surgeon had a soldier on the operating table and was pulling pieces of shell from a huge hole in the inner side of one of his legs. On a stretcher on the floor, waiting for his turn to come under the surgeon's care, was an officer. His face was covered with blood, he was waving his arms wildly and gasping for air. This scene left an impression of the utmost horror upon me.

"Slightly wounded soldiers, whom it is not necessary to leave for a while in the field hospitals, are sent directly to these larger hospitals and thence, after a short convalescence, are loaded into Red Cross trains and sent home for recovery. Later they return to take their places in the regiments. Such trains can be seen daily along any main line of railroad. In some cases freight cars with straw bedding are used.

"One of the finest examples of charity given during the war is a splendid Red Cross train entirely equipped as a modern hospital, even having a first class operating room. This was given to the German army by the citizens of Wilmersdorff, who also employed an excellent surgeon. Scores of lives will be saved through a small outlay of money.

GRAVEYARDS ON BATTLEFIELDS

"Near the large hospital I visited was a graveyard where there were scores of neatly marked fresh graves, each bearing a cross or tablet with the name of the soldier and his regiment, division and corps marked on it. In some cases comrades had added a word or two of scripture. The deaths are too numerous for an imposing ceremony at each burial, but for every one an army chaplain reads scripture and offers a short prayer, while a few comrades stand by with bared heads.

"The identity of each soldier is easily determined from the name plate which he wears in a little leather purse suspended from around the neck. After a battle these plates are gathered from the dead and from these the death lists are made

out. [It was said that after the battle of the Marne no fewer than 68,000 of these name plates or tags were found collected in one place.—Ed.]

“After a battle where the deaths mount into the thousands some field will be shut off for a cemetery and there the bodies are buried, each grave receiving some kind of a cross wherever it is possible, but here no names can be attached. There will be many homes in which there will be vacant places and where it will not even be known where the absent ones are buried.

KAISER INSISTS ON ENTERING

“While here I heard a touching story about a lieutenant who was dying in the hospital, while the Kaiser was inspecting it. The Kaiser came to the room where the officer lay and the attendants asked him not to enter, as a man was dying. The Kaiser immediately pushed his way in, went up to the lieutenant, put his hand on the officer’s shoulder, and said in German: ‘Hello, here I am!’

“The lieutenant began murmuring with his eyes closed.

“‘I have been dreaming and I dreamed that my Kaiser came to me, put his hand on my shoulder and spoke to me.’

“‘Open your eyes,’ said the Kaiser.

“The lieutenant obeyed, smiled a smile of recognition, and then closed his eyes in the final sleep.

SURGEONS WIN IRON CROSSES

“So far, according to official announcement, there have been between 50,000 and 60,000 wounded and immediately after a great battle the sanitary corps has been unable to cope quickly enough with the work, but under ordinary circumstances the provision made has been ample. The number of the sanitary corps was determined upon the experience in the Russo-Japanese war, in which the losses were by no means so heavy as they have been in this war, but where in a few cases numbers have been lacking the surgeons and their assistants have put forth herculean efforts. Many surgeons are now wearing the iron cross for bravery, winning the insignia by dragging out wounded from the rain of bullets.

TREATMENT OF PRISONERS OF WAR

The prisoner of war has been a conspicuous figure in the news that has come from the seething caldron of Europe. Many thousands of prisoners have been taken from the contending armies by their adversaries. For them the average American reader, perusing "war news" in the comfort of his security from the great conflict, has felt perhaps a grain of sorrow and wondered vaguely what horrors befell them after capture.

Early in September the German war department sent broadcast a statement that 30,000 Russians had been taken prisoners by the German soldiers after heavy battles in East Prussia, particularly around Ortelsburg, Hohenstein and Tannenburg. The statement mentioned the fact that among the prisoners were many Russian officers of high rank.

What is done with these prisoners, how they are handled and treated and whether high officials are punished more severely than mere privates, are questions frequently asked and seldom answered, for the procedure followed in such matters is but little known.

REGULATIONS ARE HUMANE TO ALL

The international laws of warfare, embodied in The Hague conventions, the Geneva convention and the declaration of London, contain provisions that provide expressly what manner of treatment shall be accorded prisoners of hostile nations who are taken in battle. If these provisions of international law are lived up to, the lot of the prisoner of war is not so hard as many people have been led to believe.

After the first year of the war, however, stories of ill-treatment of prisoners in German prison camps began to be told, and before long there were many well-authenticated cases of the kind. Inhuman treatment was reported by English and Canadian prisoners, and protests were duly made by the British government through neutral channels. The growing shortage of food in Germany was alleged as the cause of some of the complaints, but cases of actual brutality, involving cowardly physical abuse and even killing were also reported. The nation which captures its enemy's soldiers and makes prisoners of them is held entirely responsible

for whatever happens and shoulders at once a responsibility that is commensurate with the number of prisoners who are taken and detained.

The law of warfare says that a prisoner must be as fair with his captors as they are with him. He must be "humanely treated," so it is prescribed, and when he is questioned by his captors he must give his true name and the rank he holds in the army which has been defeated and of which he was once a part. Contrary to general belief, he is not stripped of "everything" and thrown into a dungeon and fed on a crust of bread and a mug of stale water. His captors do not deprive him of his personal possessions, except weapons, horses and military papers.

Furthermore, they must give him complete religious liberty, and it is specifically decreed that he must be given opportunity to attend a church of the denomination to which he belongs. And there he may pray as much for the success of his own nation or the much-desired relief from detention as the state of his mind dictates.

PRISONERS MAY BE CONFINED

The prisoner of war may be interned in a town or a fort, or even a camp, according to the convenience of his captors, but the enemy may not confine him, except, the law says, as "an indispensable measure of safety," and then only as long as the circumstances make it necessary. Of course the law gives the commanding officer considerable leeway in such matters, for he is left to determine when the "indispensable" occasion arises.

At other times when the prisoner is at liberty, he is subject to all the rules and regulations of the army of the government that captured him, and if he refuses to obey the rules or acts in an insubordinate manner toward the officers in command, he may be punished and disciplined according to his offense. And here it is again left to the discretion of his captors as to what measure of punishment shall be inflicted upon him.

ATTEMPTS AT ESCAPE

If a prisoner of war attempts to escape and his captors are vigilant to the extent of retaking him before he leaves the territory they occupy, or before he has a chance to rejoin his own

army, he may be severely punished. On the other hand, if he eludes his captors and makes a clean getaway and his army is again unfortunate, and he is captured the second time, the perfectly good escape from previous captivity must go unpunished and he must be treated as a prisoner of war, just as though he had not made the successful dash for liberty and further glory.

The government that holds prisoners of war is chargeable with their maintenance and must provide them with food, clothing and shelter as good as that provided for its own troops. The officers of the captors are required to keep records of all the prisoners under their charge, and if relief societies, which have been extensively formed by the women of Europe and many American women as well, wish to minister to their needs and comforts, the officers in command must afford them every possible facility. And if the friends of prisoners or the welfare societies see fit to send them presents and clothing, medicine and other necessities, such goods must be admitted to them free of any war duty that might be imposed by the nation holding them, and the railroads owned by the government are bound to carry such supplies free of transportation charges.

CAPTIVES MUST BE PAID FOR WORK

Prisoners of war may be put to work by the government that captures them and the duties must be assigned with a view to their aptitude, fitness and rank. The tasks must not be unduly severe, so as to border on cruelty, and they must have no bearing whatever on the operations of the war. The prisoners must be paid for the work they do, moreover, at a rate equal to that being paid to the soldiers of the national army, and prisoners may be authorized to work for the public service, for private persons or on their own account.

The wages of these prisoners, the law says, must go toward improving their condition, and the balance must be paid them after their release, with the proper deduction for their board and keep. When officers of hostile armies who are captured are put to work they must get the same wage rate as is paid to the corresponding officers of the government whose captives they are. All these moneys must be ultimately refunded by their own governments to their captors after the war is over,

peace is declared and the intricate problems of indemnities come up for solution.

A prisoner of war may even be paroled by his captors, and this is done sometimes when he is disabled or there are circumstances that prompt his enemies to let him go to those who are near and dear to him. When parole is granted to a prisoner he makes a solemn pledge and promise that he will live up to the terms under which he is released, and even his own nation may not ask him to perform a service that is inconsistent with that pledge.

BREAKER OF A PAROLE

It goes hard with the prisoner on parole who is caught fighting against the nation that released him, for he is not entitled to be treated as a prisoner of war, and the judgment meted out to him is as terrible as it is sure. Certain codes of honor are supposed to be observed even in international warfare, and a soldier who breaks his word of honor is considered the most despicable of men.

CHAPTER XXI

HORRORS OF THE WAR

American Relief for War-Stricken Peoples of Europe—Millions of Dollars Contributed in Cash and Gifts—Canada Aids the Belgians—Devastation of Poland Even Greater and More Terrible than that of Belgium.

SOON after the world became aware of the fact that the German army's progress through Belgium on its dash to Paris in August of 1914 had resulted in the absolute devastation of the little buffer state, an enterprising and sympathetic American citizen, Mr. James Keeley, editor of the Chicago Herald, penned a remarkable open letter "to the Children of America," in which he suggested the sending of a "Christmas ship" to Europe, filled with gifts of a useful character for the little ones of all the belligerent nations. The response was immediate and most truly generous. Newspapers and civic organizations all over the United States joined in gathering from young and old the contributions that freighted a United States warship with a cargo of gifts worth over two million dollars, and at Yuletide these gifts were systematically distributed among the innocent victims of the war in all the countries concerned.

The idea of the Christmas ship was nobly conceived and splendidly executed. Rulers of the belligerent nations recognized the beauty of the idea and paused awhile in their martial activities to welcome and thank the American commissioner who enacted the role of an international Santa Claus. But the slaughter on the fighting lines of eastern and western Europe went on unabated and the peaceful symbolism of the Christmas ship was soon forgotten in the daily recurrence of battle and bloodshed.

AWFUL CONDITIONS IN POLAND

While the frightful state of Belgium commanded the sympathy of the civilized world in the winter of 1914-15, the conditions in Poland were even worse. At the end of March the great Polish pianist, Ignace Paderewski, paid a visit to London on behalf of the suffering Poles and his efforts resulted in the formation of an influential relief committee. Among the members were such men as Premier Asquith, ex-Premier Balfour, Chancellor of the Exchequer Lloyd-George, Cardinal Bourne, archbishop of Westminster; Admiral Lord Charles Beresford and the Russian and French ambassadors. An American woman, Lady Randolph Churchill, also took an active part in the work of the committee, which soon succeeded in raising a large sum for the relief of the most urgent distress in Poland. While in London on his mission of mercy, Mr. Paderewski said:

"Is it the death agony or only the birth pangs? That is the question which every Pole throughout the world is asking himself as tragedy follows tragedy in the long martyrdom of our beloved nation. You have only heard the details of Belgium, but I tell you they are as nothing with what has happened in Poland.

"The scene of operations in Poland is seven times larger than that of Belgium, and she has had to endure seven times the torture. Remember, the battle of Europe is being fought in the east, not in the west, and while the tide of battle has reached a sort of ebb along the trenches about the frontiers of Alsace and Flanders, the great waves roll backward and forward from Germany to Russia and break always on Poland.

"Our country, in fact, is just as Belgium was called—the cockpit of Europe, and it may now be called the battlefield of the world, if not of civilization.

"It is only perhaps we Poles who have known to its utmost depths what this war has really meant. It is not only that there are 10,000,000 human beings on the verge of starvation, nay, actually perishing; there is worse than that.

"Remember that both Belgium and Poland are still under the yoke. The Russians, it is true, occupy some fifteen thousand miles of our country, but this is really nothing, for the

Germans occupy five-sixths of it, and the desolation passes all comprehension.

CALLS IT COMPULSORY SUICIDE

"As to actual battles, I can hardly speak of them. It is torture even to think of them. Only consider! Our one nation is divided as it were into three sections, which were thrust each against the others to work out their destruction. It is parricide! It is fratricide, nay suicide! Compulsory suicide! That is what it is!

"Listen to what it means to us all. I was told by a man from Austria that an army doctor, a Pole by birth, who was deputed to go over the Austrian battlefields and verify identification marks on the bodies, found among the 14,000 dead hardly any but Polish names. He looked in vain for any others, and in the end went mad with horror at the thought of it. Another story that came to me the other day told of another case of the tragedy of Poland which is almost too terrible for the human mind to contain. The incident took place during a charge. Both armies had been ordered to attack, and the Poles, as usual, were in the front lines. As they met in the shock they recognized each other.

"One poor fellow, as he was struck through by a bayonet, cried out in his death agony, 'Jesu Maria! I have five children! Jesu Maria!' The words went as straight to the brain of his conqueror as a dagger to the heart, and killed his reason. Somewhere among the madhouses of Europe there is a lunatic. He is not violent, but he never laughs. He only wanders about with the words of his dying victim, 'Ah, Jesu Maria! I have five children. Jesu Maria!'

"The promise of Grand Duke Nicholas that Poland shall be a nation once again went straight to the very heart of every one of our 25,000,000 fellow countrymen. That one promise has been sufficient to change the whole mentality of the nation and fill their souls with new hope. It has cleared up any doubt that might have existed in the minds of the Poles in Austria and Prussia as to what it is that the allies are fighting for—namely: the principles of nationality for which we have suffered, ah! how many centuries!"

MILLIONS OF POLES DESTITUTE

The ruin wrought by war in Belgium affected 7,000,000 people. In Poland more than twice that number have been rendered destitute. Not less than 15,000 villages have been laid waste, burned, or damaged in Russian Poland alone. The loss in property has been estimated at \$500,000,000, but may reach double that sum.

In Galicia the conditions are reported to be equally appalling, though the smashup has not been as complete, because the Russians have been able to maintain their positions more permanently than they have in the district west and northeast of the Polish capital.

The greater part of Poland lying in a broad sweep of country west, southwest and northeast of Warsaw has been swept over and battered to pieces by shot and shell like the strip of Flanders on both sides of the Yser river.

Without any direct interest in the present great conflict, the unhappy Poles found themselves impressed into the armies of these three great powers and fighting against their own racial brethren. That meant that brother was to fight against brother, and as the stress of the war increased and the age limit was raised to 38 years and even higher, nearly every able-bodied Pole was impressed into service.

Almost the first move of the Russians at the outbreak of hostilities was to invade Galicia. This brought with it instantly all the most frightful horrors of war. Embracing as it does a large part of the grain-growing district of the Polish peoples, the devastation of Galicia meant suffering for not only that province, but for Russian Poland as well. The crops had only been partially harvested by August, when the war began.

The panic of war stopped the work in the fields, even where the peasants were not compelled to flee before the invader. The men were called to the colors and the crops were allowed to rot in the fields. Numerous towns were sacked.

The advance to Lemberg by the Russians was swift. In the panic that followed this great city of 200,000 had scarcely 70,000 left when the invaders took possession. Families were broken up; none of the refugees had time to take supplies or clothes.

Germany's first move against Russia came from the great

fortresses along the Oder and Vistula. All of western Poland was overrun. When the Russian advance from Warsaw drove back the invaders, the scars of the conflict left this section of Poland badly battered. Then came Von Hindenburg's victorious armies, and again this section was torn by shot and shell and wasted. While some of the larger places, such as Lodz, Plock, Lowicz, Tchenstochow and Petrokov, were spared, the smaller towns, villages, and hamlets in the direct line of battle suffered equally from the defenders and invaders.

All the section to the northeast of Warsaw between the East Prussian frontier and the Bug, Narew, and Niemen rivers has suffered even a worse fate, as the bitterness engendered by the devastation worked by the Russians in East Prussia led to reprisals that not even the strict discipline of the German army could curb. Not only were the peasants' homes pounded to bits by the opposing artillery fire, but the armies as they fought back and forth took all the cattle, horses, and stock that came to their hands. Disease added to the suffering of the stricken people.

THOUSANDS OF VILLAGES DESTROYED

Henry Sienkiewicz, the great Polish writer and author of "Quo Vadis," a refugee in Switzerland, said, on March 15, 1915:

"In the kingdom of Poland alone there are 15,000 villages burned or damaged; a thousand churches and chapels destroyed. The homeless villagers have sought shelter in the forests, where it is no exaggeration to say that women and children are dying from cold and hunger by thousands daily.

"Poland comprises 127,500 square kilometers. One hundred thousand of these have been devastated by the battling armies. More than a million horses and two million head of horned cattle have been seized by the invaders, and in the whole of the 100,000 square kilometers in the possession of the soldiers not a grain of corn, not a scrap of meat, nor a drop of milk remain for the civil population.

"The material losses up to the present are estimated at 1,000,000,000 rubles (\$500,000,000). No fewer than 400,000 workmen have lost their means of livelihood.

"The state of things in Galicia is just as dreadful for the civil population—innocent victims of the war. Of 75,000 square kilometers all except 5,000 square kilometers around Cracow are in possession of the Russians. They commandeered 900,000 horses and about 200,000 head of horned cattle and seized all the grain, part of the salt fields, and the oil wells.

"The once rich province is a desert. Over a million inhabitants have sought refuge in other parts of Austria, and they are in sheer destitution."

Truly, "War is hell!"

RELIEF FOR BELGIAN SUFFERERS

Following the invasion and over-running of Belgium by the Germans, the problem of feeding the Belgian population became an urgent one. The invaders left the problem largely to the charitable sympathies of the civilized world, and from almost every quarter of the globe aid was sent in money or provisions for the stricken people. In spite of the enormous war drains upon the resources of the British Empire, every one of the Overseas Dominions did its full share in Belgian relief, while the United States, through the Rockefeller Foundation and other agencies, as well as the South American countries, also contributed to alleviate the suffering in the little kingdom. The contributions continued during more than two years and the relief was administered most efficiently by means of commissions.

RELIEF ASKED FOR SERBIA

On April 3, 1915, the leading United States newspapers printed an appeal received from Nish, the war capital of Serbia, which set forth a terrible situation in terms that confirmed a report already made public by Sir Thomas Lipton, who dedicated his famous steam yacht, the *Erin*, as a hospital ship for use in the Mediterranean, and visited Serbia in February and March. The appeal was dated February 23 and said in substance as follows:

"Typhus is raging in Serbia, and unless immediate aid be sent the mortality will be appalling.

"Typhus is a filth disease and is spread by lice, which flourish only in dirt. There are not enough buildings to house the sick and they lie huddled together on dirty straw.

"They have not changed their clothes for six months, and consequently personal cleanliness, which is absolutely essential in checking the disease, is impossible. They cannot get proper nourishment, as there is not enough available, nor is there money to buy it if it were.

"The doctors can usually only work for two weeks before contracting the disease, as they have no means of protecting themselves. Yet they volunteer for typhus hospitals, knowing that they are probably going to their death, for the mortality is over 50 per cent.

"The following four things are most urgently needed:

"1. Tents and portable chicken runs, as these make excellent houses. There is no lumber in Serbia, so nothing can be built here.

"2. Beds and bed linen. It is impossible to keep straw free from lice.

"3. Underclothing. Dirty clothes make an ideal breeding place for lice.

"4. Disinfectants and whitewash.

"Speedy help is essential, as every day's delay costs hundreds of lives."

The response to this touching appeal was immediate and generous, Germans and Austrians in America contributing freely. A large amount of cash and supplies for the Austrian prisoners was sent to the American consul at Nish, who was also acting consul for Germany and Austria in Serbia.

GERMAN REPORT OF VILLAGES RAZED

A dispatch from Berlin by wireless March 23 stated that according to a report received there from Cracow, the damages due to the war in Poland and Galicia at that time amounted to 5,000,000,000 marks (\$1,250,000,000).

In Galicia 100 cities and market places and 6,000 villages had been more or less damaged, while 250 villages had been destroyed. Horses to the number of 800,000 and 500,000 head of cattle, with all grain and other provisions in Galicia had been taken away by the Russians.

CHAPTER XXII

LATER EVENTS OF THE WAR

Results of the Battle of the Aisne—Fierce Fighting in Northern France—Developments on the Eastern Battle Front—The Campaign in the Pacific—Naval Activities of the Powers.

WITH a battle front reaching from the Belgian coast on the North Sea to the frontier of Switzerland, or a total distance of 362 miles, the operations in the western theater of war toward the end of October were being conducted on a more gigantic scale than was ever witnessed before. On both sides reinforcements were being rushed to the front. German efforts to break through the Allies' lines were concentrated on the main center at Verdun and on the right flank of the Allies' left wing, above its elbow, between Noyon and Arras, while powerful coincidental movements were in progress on the extreme western end of the line in Belgium and on the southeastern wing in Alsace. At Verdun continuous fighting of the fiercest character had been going on for over sixty days, surpassing in time and severity any individual battle in history. The army of the Crown Prince had been unable to force the French positions in the vicinity of Verdun and the check sustained by the Germans at this point early in the campaign constituted a principal cause of General von Kluck's failure in his dash toward Paris.

All along the tremendous battle front the allies' lines as a rule held firm in the thirteenth week of the war, when the great conflict had entered upon what may well be called its fourth stage. The third stage may be said to have ended with the fall of Antwerp and the subjugation of all Belgium but a small portion of its southwestern territory. On the main front the Allies were maintaining the offensive at some vital points, while repulsing the German assaults at others. One or two

of the French forts commanding Verdun had fallen but the main positions remained in the hands of the French, and all along the line it was a case of daily give-and-take.

FIERCE FIGHTING IN FLANDERS

After capturing Antwerp the Germans pushed on to Ostend, an "open" or unfortified town, and occupied it with slight resistance from the Belgian army, which was reforming its broken ranks to the south, between Ostend and the French frontier, and preparing to contest the passage of the Kaiser's forces across the River Yser. Moving northward from Lille, the Allies encountered the Germans at Armentières, which was occupied by a Franco-British force and there was also fierce fighting at Ypres, where there is a canal to the sea. For more than a week the Belgians gallantly held the banks of the Yser in spite of the utmost endeavors of the Germans to cross, and it was not until October 24 that the latter finally succeeded in getting south of the river, with the French seaport of Dunkirk as their next objective point. Bloody engagements were fought at Nieupoort, Dixmude, Deynze and La Bassée.

At this time the battle line formed almost a perpendicular from Noyon in France north to the Belgian coast, south of Ostend. A battle raged for several days in West Flanders and Northern France and both sides claimed successes. The losses of the Allies and the Germans were estimated in the thousands and the wounded were sent back to the rear by the trainful. In the Flemish territory the flat nature of the terrain, with its numerous canals and almost total absence of natural cover, made the losses especially severe. The passage of the Yser cost the Germans dearly and Dixmude was strewn with their dead. And their advance could get no farther.

The necessity of holding the French ports, Dunkirk and Calais, was fully realized by the Allies, who threw large reinforcements into their northern line. The Germans also drew heavily on their center and left wing to reinforce the right, and for a while the forces opposing one another at the extreme western end of the battle front were greater than at any other point. The Germans were firmly held on a line running from south of Ostend to Thourout, Roulers and Menin, the last mentioned place being on the border north of Lille. Flanking attacks being no longer possible, as the western flanks of both

armies rested on the North Sea, the Germans were compelled to make a frontal assault along the line formed by the Belgian frontier. As the Belgian troops, assisted by a British naval brigade, were pushed back from the Yser, they were gradually merged into the army of the allies, by whom they were received with the honors due the men who had made, for twelve long weeks, such a gallant and determined defense of their country against invasion and despoilment.

BRITISH WARSHIPS AID BELGIANS

Soon after the German occupation of Ostend, several British warships shelled the German positions in and around the city and aided in hampering the German advance along the coast. The principal vessels engaged in this work were three monitors which were being completed in England for the Brazilian government when the war started and which were bought by the admiralty.

These monitors, which had been renamed Mersey, Humber and Severn, drew less than nine feet of water and could take up positions not far from shore, from which their 6-inch guns and 4.7-inch howitzers, of which each vessel carried two, were able to throw shells nearly four miles across country, the range being given them by airmen.

French warships of light draft later joined the British monitors and destroyers and assisted in patrolling the coast, shelling German positions wherever the latter could be discovered by the aeroplane scouts. One reported feat of the naval fire was the destruction of the headquarters of a German general, Von Trip, in which the general and his staff lost their lives.

From time to time German aerial attacks were made in the vicinity of Dover, across the Straits, but these without exception proved to be without military importance in their results. Steps were taken to organize anti-aircraft artillery forces on the eastern coast of England and the continued failure of Zeppelin attacks, annoying as they were, soon restored the equanimity of the British public in this respect.

INDIAN TROOPS IN ACTION

The first word of the employment of British Indian troops at the front came on October 27, when it was reported that in the fighting near Lille a reserve force of Sikhs and Ghurkas,

the former with bayonets and the latter with the kukri (a short, curved sword) played havoc with an attacking force of Germans. "Never has there been such slaughter," said the dispatches. "Twenty thousand German dead and wounded, nearly half the attacking force, lay upon the field, while the British losses did not exceed 2,000."

THE FRENCH CAMPAIGN IN ALSACE

At the end of October the French right wing in Alsace-Lorraine was reported to be making distinct progress. It was said to be advancing through the passes of the Vosges in the midst of heavy snowstorms. Paris reported that the Germans, who were attempting a movement against the great French frontier fortress of Belfort, had been driven back with heavy losses, while from other sources the Germans were reported to be bringing up heavy mortars for the bombardment of Belfort. There were persistent reports of German defeats in Alsace, but these were repeatedly denied in Berlin. The situation in the territory coveted by the French appeared to resemble that farther west—neither side was making much headway.

THE RUSSIAN CAMPAIGN

In the eastern theater of war the conflict during October was waged with fortunes that favored, first one side and then the other. Contradictory claims were put forth from time to time by Petrograd, Vienna and Berlin, but the net result of the operations at the end of the thirteenth week of the war appeared to be that while the intended Russian march on Berlin had been completely checked, the Germans had been repulsed with heavy losses in all their attempts to cross the Vistula and occupy Warsaw, the capital of Russian Poland, which was at one time seriously threatened.

The fighting along the Vistula was fierce and prolonged for several days at a time. The Germans made numerous attempts to cross the river at different points by means of pontoon bridges, but these were destroyed by the Russian artillery as fast as completed. The slaughter on both sides was considerable. On October 28 the Russian battle front reached from Suwalki on the north to Sambor and Stryj on the south, a distance of about 267 miles. The German opera-

tions on the Vistula were still in progress and Poland furnished the main arena of battle. East Prussia was practically free from Russian troops, save at a few points near the boundary, but they strongly maintained their positions in Galicia.

THE AUSTRO-SERVIAN CAMPAIGN

After eleven weeks' bombardment by the Austrians, the Servian defenders of Belgrade were still bravely resisting, although half the city had been destroyed. The situation was such as to cause at once astonishment, pity and admiration.

In the open field the Servians continued to hold their own against the Austrian forces opposed to them. Their Montenegrin allies, under General Bukovitch, were reported to have defeated 16,000 Austrians, supported by six batteries of artillery, at a point northeast of Serajevo. The battle terminated in a hand-to-hand bayonet conflict which lasted four hours. The Austrians are said to have lost 2,500 men, killed and wounded, while the Montenegrins claimed that their losses amounted to only 300 men.

THE CAMPAIGN IN THE PACIFIC

Beginning with the loss of its colonies in the China sea, Germany was compelled to witness during the first two years of the war the passing into enemy hands of practically all its colonial possessions, which more than balanced its temporary possession of enemy soil in Europe. One by one its colonies in Asia and Africa were captured, and in these operations not only the Japanese but the Belgians assisted, the latter in Africa.

Late in October, 1914, the Japanese received the surrender of Tsing Tau, the important German city in Kiauchau, China. The place had been battered for weeks by land and sea by the Japanese forces, and the surrender was ordered, it was said, to save the German forces and civilians from certain annihilation if a defense by the garrison to the end were to be carried on. German warships were powerless to assist the beleaguered city, as Japanese and English war vessels had driven them far from the coast of China.

The Japanese cruiser Takachiho was sunk by a mine in Kiauchau Bay on the night of October 17. One officer and nine members of the crew are known to have been saved.

The cruiser carried a crew of 284 men. Her main battery consisted of eight 6-inch guns.

MAIN FLEETS STILL INACTIVE

Up to the last week in October the main fleets of the warring powers were still inactive, but rumors of intended German naval activity were frequent. The cat-and-mouse attitude of the British and German fleets in the North Sea was continued, the Germans lying snug in their ports, protected by their mines and submarines, while the British battleships lay in wait at all points of possible egress. The situation tried the patience of the people of both countries and there were frequent demands for action by the great and costly naval armaments. But the Germans apparently were not ready to risk a general engagement, and the British could not force them to come out and fight. The British admirals, therefore had, perforce, to pursue a policy of "watchful waiting," irksome as it was to all concerned, and "the tireless vigil in the North Sea," as it was termed by Mr. Asquith, was maintained day and night. No sea captain becalmed in the doldrums ever whistled for a wind more earnestly than the British Jack tars prayed for a chance at the enemy during those three months of playing the cat to Germany's mouse; and on the other hand, the German sailors were, no doubt, equally desirous of a chance to demonstrate the fighting abilities of their brand-new battleships. All were equally on the *qui vive*, for any hour might bring to the Germans the order to put to sea, and to the British the welcome cry of "Enemy in sight!"

CARING FOR BELGIAN REFUGEES

The plight of the Belgian people, including the refugees in Holland, England and France, was pitiable in the extreme and by the end of October had roused the sympathy of the entire world. A conservative estimate placed the number of Belgians expatriated at 1,500,000 out of a population of 7,000,000. On October 26 Mr. Brand Whitlock, United States minister to Belgium, reported that the entire country was on the verge of starvation, while Holland and England had their hands full caring for the Belgians who had sought refuge in those countries. In eight cities of Holland there were said to be 500,000 Belgian refugees. Over 70,000 arrived in London in one week and a central committee in London had twenty-

seven subcommittees at work in different cities in England, Scotland and Wales, placing the refugees in homes as rapidly as possible. The humanitarian problem of taking care of the Belgians was one of tremendous responsibility, but the people of the three countries in which most of them sought refuge rose nobly to the occasion and spared no effort to lessen their sufferings.

MORE CANADIANS FOR THE FRONT

It was announced in Ottawa, Canada, on October 19 that the Dominion Government had decided to put 30,000 more men in training in Canada, to be despatched to England when ready. As soon as the first unit of 15,000 was embarked, probably in December, another 15,000 men would be enlisted to replace them, the plan being to keep 30,000 men continuously in training, to be drawn upon in units of 10,000 or 15,000 as soon as equipped, during the continuance of hostilities in Europe. Thus with the 32,000 Canadian volunteers already landed in England, and 8,000 under arms guarding strategic points in the Dominion, Canada would soon raise 100,000 men as part of her contribution to Imperial defense.

But this was only a beginning. Later in the war Canada stood ready to furnish half a million men to the cause of the Empire, if required. Nearly 360,000 of that number had been enlisted when the war was two years old. The greatest problems were encountered in the first year, or rather in the first six months of the war, after which time efforts were systematized, the military machine worked smoothly, and the Dominion's splendid response to the call to arms was maintained throughout. General prosperity in the face of adverse conditions happily attended this record of patriotic achievement, and the predominant spirit in Canada was one of buoyant optimism as to the inevitable outcome of the great conflict.

THE "EMDEN" DRIVEN ASHORE A WRECK

During the first three months of the war the German cruiser Emden, operating principally in the Indian ocean, played havoc with British merchantmen, sinking over twenty vessels engaged in far Eastern commerce, besides a Russian cruiser and a French torpedo-boat. But she met her match in the second week of November, when she was engaged off the Cocos or

Keeling group of islands, southwest of Java, by the fast Australian cruiser Sydney and driven ashore a burning wreck after an hour's fight, with a loss of 280 men.

NAVAL BATTLE OFF CHILEAN COAST

Early in November a fleet of five German cruisers, under Admiral von Spee, encountered a British squadron composed of the cruisers Good Hope, Monmouth and Glasgow, in command of Rear-Admiral Sir Christopher Cradock, off the coast of Chile, in the Southern Pacific. Despite a raging gale, a long-range battle ensued, resulting in the defeat of the British and the loss of the flagship Good Hope, with the admiral and all her crew, and of the cruiser Monmouth. The Glasgow escaped in a damaged condition. The loss of life was about 1,000, officers and men.

Up to November 15, the struggle in the coast region of Belgium continued with terrific intensity and appalling loss of life on both sides. The Germans occupied Dixmude November 11, only to lose it on November 13, after a fierce attack by reinforced British troops.

DAILY COST OF WAR

The daily cost of the present war to the nations engaged in the struggle is estimated at not less than \$54,000,000 a day—a sum which fairly staggers the imagination. This enormous cost of the armies in the field gives a decided advantage to the nation best supplied with the “sinews of war” and may contribute to a shortening of hostilities. War is indeed a terrible drain upon the resources of a nation and only a few there are that can stand many months of war expenditures like those of August-October, 1914, amounting in the grand aggregate to nearly five billions of dollars (\$5,000,000,000).

TURKEY ENTERS THE WAR

On October 29 an act which was regarded in Russia as equivalent to a declaration of war by Turkey was committed at Theodosia, the Crimean port, when that town was bombarded without notice by the cruiser Breslau, flying the Turkish flag, but commanded by a German officer and manned by a German crew. The Breslau was a former German ship, and was said to have been purchased by the Turkish government, with the German battleship Goeben, when they sought refuge in the Dardanelles at the beginning of the war, from the French and British fleets in the Mediterranean.

FOURTH MONTH OF THE WAR

The month of November, the fourth month of the war, was marked by the heaviest losses to all the nations concerned, but made little change in the general situation.

Along the Aisne the battle begun early in September continued intermittently. Both sides literally dug themselves in and along the battle line in many places, the hostile trenches were separated by only a few yards. At the end of the month the burrowing had been succeeded by tunneling, and both sides prepared for a winter of spasmodic action. It was a military deadlock, but a deadlock full of danger for the side that first developed a weak point in its far-flung front.

With the utmost fairness and impartiality it can be said that at the beginning of December both the allied armies and the German forces facing them from the Belgian coast east and south to the borders of Alsace-Lorraine were exhausted by the strenuous efforts of the campaign. By December 5, the 130th day of the war, after a seven-weeks' struggle by the Germans for the possession of the French and Belgian coast, there was a general cessation of offensive operations by both sides and the indications were that this condition was due to pure physical weariness of leaders and men. The world had never before witnessed such strenuous military operations as those of the preceding three months and the temporary exhaustion of the armies therefore was not surprising.

In the last days of November, the city of Belgrade fell into the hands of the Austrians after a siege that had lasted, with continual bombardments, since the war began. The city was finally taken by storm at the point of the bayonet in a furious charge which fairly overwhelmed the gallant defense of the Servians.

In this month it began to be generally realized that the war was likely to be of prolonged duration. Strenuous preparations for the winter campaign were made on both sides and the recruiting for the new British army surpassed all previous records, the serious menace of the war being at last recognized.

The month of November was also marked by enormous contributions of cash and food stuffs by the people of the United States for the relief of the impoverished and suffering

Belgians. The people of Chicago alone contributed over \$500,000 and this was but a sample of the manner in which Americans rose to the opportunity to alleviate the distress in Belgium. "The United States has saved us from starvation," said a Belgian official on December 1.

The casualties of all the armies in the field during the month of November exceeded those of any previous period of the war. Basing an estimate of the total casualties upon the same percentage as that employed in the table given on another page, it is therefore safe to say that up to December 5 the total losses of the combatant nations in killed, wounded and missing aggregated not less than 3,500,000 men.

DECEMBER IN THE TRENCHES

The month of December, 1914, the fifth month of the war, registered but little change in the relative positions of the combatant nations. In the west the lines held firm from the North Sea to Switzerland. Daily duels of artillery and daily assaults here and there along the battle fronts proved unavailing, so far as any change in general conditions was concerned. Frequently the assaults were of a desperate character, especially in Flanders, where in the middle of the month the Allies assumed the offensive all along the line and sturdily strove to push back the German front in Belgium. But the utmost valor and persistence in attack were invariably met by resolute resistance. Both sides were strongly entrenched and the gain of a few yards today was usually followed by the loss of a few yards tomorrow.

Never before in the history of warfare had the science of entrenchment been developed to such an extent. The German, French, British and Belgian armies literally burrowed in the earth along a battle front of 150 miles. In many places the hostile trenches were separated by only a few yards, and mining was frequently resorted to. Tunneling toward each other, both the contending forces occasionally succeeded in blowing up the enemy's trench, and whole companies of unsuspecting troops were sometimes annihilated in this way. In the trenches themselves scenes unparalleled in warfare were witnessed. With the arrival of winter the troops on either side proceeded

to secure what comfort they could by all manner of clever and unique devices. Winter clothing was provided as far as possible, but on both sides there was inevitable suffering for lack of suitable supplies for the winter campaign, and individual initiative had frequently to supply the deficiencies of official forethought.

Many unique features of trench life were developed during the first month of winter warfare. Two-story trenches became common on both sides of the firing line. Bombproof underground quarters for staff and commanding officers were constructed, and these were fitted up so as to provide all the comforts of the winter cantonments of old-time warfare. The ever-necessary telephone was installed at frequent points in trenches that stretched for scores of miles in practically unbroken lines. Board roofs were built and provision made for heating the dugouts in which thousands of men passed many days and nights before their reliefs arrived. On the German side miles of trenches were provided with stockade walls, leaving ample room inside for the rapid movement of troops. The British built trenches with lateral individual dugouts at right angles to the main trench, protecting the men against flank fire—and these aroused the admiration even of their enemies. In the French trenches the ingenuity of a French engineer provided a system of hot shower baths on the firing line, and from all points along the deadlocked battle front came stories of the remarkable manner in which the troops of all the armies speedily accommodated themselves to unprecedented conditions and maintained a spirit of cheerfulness truly marvelous under the circumstances, especially as there was no cessation of the constant endeavor to gain ground from the enemy and no end to the daily slaughter.

IN THE GERMAN TRENCHES

A correspondent with the German army who visited the firing line in the Argonne forest late in November, by special permission of the German crown prince, described the conditions in the trenches as follows: "Here in the now famous Argonne forest—the scene of some of the war's most desperate fighting—the Germans are trenching and mining their

way forward, literally yard by yard. This afternoon I reached the foremost trench, south of Grandpré. About 160 feet ahead of me is the French trench. Picture to yourself a canebrake-like woods of fishpoles ranging in size from half an inch to saplings of two and three inches thick and so dense that you can hardly see forty yards even now when the leaves have fallen. Among these is a scattering of big trees, the trunks of which are veritable mines of bullets.

"Irregular lines of deep yellow clay trenches zigzag for miles. Other trenches run back from these to what looks like a huge Kansas 'prairie-dog town'—human burrows, where thousands of soldiers are literally living underground. From the lines of trenches running parallel to one another comes a constant spitting, sputtering, popping of rifles, making the woods resound like a Chinese New Year in San Francisco or an old-time Fourth of July. Field guns and hand grenades furnish the 'cannon-cracker' effect. Through the woods the high-noted 'zing zing' of bullets sounds like a swarm of angry bees, while high overhead shrapnel and shell go shrieking on their way. Here and there you may see spades full of earth being thrown up as if by invisible hands, marking the onward work of the German gopher-like pioneers in their subterranean warfare. That is the Argonne forest.

"As the trench I am in was still in the hands of the French three days ago and as the crown prince is advancing steadily, the trenches are temporary and contain little in the way of comforts. In deep niches cut in the side the soldiers rest, play cards or even sleep on damp ledges between fights.

"The trenches also serve as a cemetery. When the enemy's fire is so hot that it is impossible to stick your head out or to take the dead out to bury them, the grave is made in a niche or a ledge cut into the side of the trench."

GERMAN ADVANCE HALTED

The western operations in December made it clear that the German advance to the Channel ports of France had been definitely halted. In the terrible battle of Ypres in Flanders, following the prolonged engagements along the Yser river, the Allies succeeded in repulsing the desperate German on-

slaught, and the German offensive was brought to a full stop. Towns and villages in Flanders, in Artois and in Champagne, that had been captured in the early German rush, were retaken one by one by the Belgians, French and British, slowly but surely, until the Germans were forced to act upon the defensive along a line of entrenchments prepared to enable them to keep open their communications through Belgium with their great base at Aix-la-Chapelle.

An incident of the desperate fighting at Ypres, in which British and French troops practically annihilated six German regiments, including the crack Second regiment of Prussian Guards, has been graphically described by an eye-witness as follows:

"A long valley stretches out before us and the little rise on which we stand—about fifty feet above the plain—commands it. The British guns are shooting almost horizontally at the German infantry trudging through the mud 2,000 yards away.

"I count easily five regiments together, but further to the right a sixth one evidently wards off a flank attack on the part of the French colonial troops. The lone regiment is the Second Prussian regiment of the guard, the emperor's own, the élite of the Kaiser's army, 2,500 of the brawniest, most disciplined men in the world. It is now 1 o'clock. In one hour only 300 of these men will leave the field.

"A gust of wind brings to our ears the sound of music. The guards' band is encouraging the men. At the foot of the small hill on which we stand are twenty lines of trenches filled with Scotch and English infantry. The men are silently awaiting the attack. Not a rifle is being fired. The trenches are the Germans' goal; these and the British batteries once taken, the road into Ypres is clear.

"In the valley the Germans halt. The range is only 1,500 yards now and every British shot is telling. The effects are appalling. The gray masses move onward once more, seem to hesitate, but sharp bugle blasts launch them forward again and on the run they come for the trenches.

"At 1,000 yards our batteries again stop them. Whole rows are mowed down, vast spaces appearing between the ranks. The companies intermingle, then the regiments them-

selves seem to amalgamate and melt into one another. Officers are seen galloping along the sides, evidently trying to bring order out of chaos.

"The artillerymen work silently, the perspiration streaming down their cheeks, and continue sending on their messengers of death.

"The Second regiment of the Guard alone, off to the right, seems untouched, and on it comes. Suddenly the sound of a bagpipe is heard. The Scots are awake. From the trenches an avalanche rushes forward toward the disordered Germans.

"At the double-quick Scots and English, a few feet apart, yelling like demons, pounce on the attackers. Rifles are silent. It is cold steel alone. Our battery captains cry 'Stop firing.' There is a risk of shelling our own men now. We become spectators.

"On the right the Guard has suddenly turned toward the hill. A bugle blast and the mass of men half turns and seems to be thrown on the back of the British, outflanked. The situation is desperate. Our artillery is useless.

"Listen! Over the valley, rising louder and still louder, comes a song which the Germans have heard before. A crash of brass, a hoarse roar fills the air, echoing across the valley, drowning the shouts and curses of the human wave fighting below.

"The 'Marseillaise'—the English and Scots have heard it. 'Hold tight, the French are coming,' we scream. They cannot hear us, but we must shout—the strain is too intense.

"Past our batteries a company of Spahis rushes like a cyclone. Two more follow, then the Zouaves. Rifles close to their hips, bayonets low, throwing out over the valley its glorious anthem, the human flood crashes against the Guard.

"The lines waver in an indescribable jumble of gray, yellow, blue, and red uniforms, then seem to bounce back from the very force of the shock. Men appear, raised from their feet, and raised high in the air.

"Caught in a vise between the British and the French, the Guard alone remains. Ten times the shattered remnants of the Kaiser's proud regiment charged, and ten times was thrown back, first against the French, then against the Brit-

ish. Crying, 'Comrades, comrades!' hundreds began throwing their guns aside.

"At 2 o'clock it was over. The Allies had lost 1,200 men. Only 300 prisoners remained of the Second Prussian regiment of the Guard.

PROGRESS OF THE EASTERN CAMPAIGN

The campaign in the eastern theater of war attracted the attention of the whole world in December, when the German operations begun in November under Field Marshal Von Hindenburg, the victor of Tannenberg earlier in the war, were continued with varying successes. Early in the month the Germans captured Lodz, the second city and chief manufacturing center of Russian Poland, with a population of about 500,000, after a bombardment of a week's duration, the city being set on fire in many places. The Russians made a desperate resistance, and the fighting around Lodz constituted the most bitter struggle of the entire war on this front. A general Russian retirement in the direction of Warsaw followed, but the Germans failed in their subsequent efforts to envelop the flanks of the Russian army to the north and south. Russian reinforcements from Warsaw coming up promptly, the Germans were in their turn compelled to retire. Two German army corps were then practically cut off by the Russians, but made a successful retreat, fighting their way back to safety with the bayonet in one of the most brilliant exploits of the war. Thus the net result of the German campaign in Poland in December left the general situation there practically unchanged and the Russian front unbroken, while in East Prussia, too, the Russian invasion continued despite German efforts to roll it back across the frontier.

The losses on both sides in the eastern campaign in December were appalling, the fighting being of the fiercest possible nature. A typical struggle occurred a few miles west of Lodz in the little churchyard of Beschici, where the Russians, in one of the final phases of the struggle for the Polish city, showed that in spite of their defeats and discouragements they knew how to fight and die. This churchyard lies on a small eminence which formed a salient into the German lines. The

Germans were able to make an attack from three sides with infantry and artillery. All the Russian trenches were enfiladed by shrapnel from one direction or another, but the Russians clung to their positions obstinately. When the Germans finally captured the trenches 878 Russian corpses were found in a space about eighty yards square.

It was resistance of this nature which the Germans had to overcome in order to capture Lodz. Later in December it became clear that Russia was getting her millions into the field and that the strategy of the commander-in-chief, the Grand Duke Nicholas, would soon be aided by the weight of overwhelming numbers.

BELGIUM THANKS AMERICA

During November and December Madame Vandervelde, wife of a member of the Belgian cabinet, toured the United States soliciting aid for her suffering fellow-countrymen. The response everywhere was extremely generous and in appreciation of the aid given the war victims of her country Madame Vandervelde penned the following poem, entitled "Belgium Thanks America:"

Today it's Christmas morning; we hear no Christmas bell,
But still we tell the story which once we loved to tell.
"Good will! Good will!" we read it, and "Peace!"—we hear the name,
And crouch among the ruins, and watch the cruel flame,
And hear the children crying, and turn our eyes away—
For them there's neither bread nor home this happy Christmas day.

But look! there comes a message from far across the deep,
From hearts that still can pity and eyes that still can weep—
O little lips a-hunger! O faces pale and wan!
There's somewhere—somewhere—peace on earth, somewhere good will to man.
Across the waste of waters, a thousand leagues away,
There's some one still remembers that here it's Christmas day.

O God of Peace, remember, and in thy mercy keep
The hearts that still can pity, the eyes that still can weep,
Amid the shame and torment, the ruins and the graves,
To theirs, the land of freedom, from ours, the land of slaves,
What answer can we send them? We can but kneel and pray:
God grant—God grant to them, at least, a happy Christmas day.

GRIM REALITIES OF THE WAR

A vivid picture of the horrible realities of the war, as seen in a field hospital near the firing line, was given in "The New Republic" of November 28 by Mr. Henry W. Nevins, who described his experiences at Dixmude in Belgium as follows:

"When I entered Dixmude one night in the middle of October the first bombardment was over, but from both sides the heavy shells flew across the town. From the end of the main street came an incessant noise of rifles and machine guns. Unaimed bullets wailed through the air, and pattered as they struck the walls. Flaming houses shed a light upon the ruined streets, but only one house looked inhabited, and all the others which were not burning stood silent and empty, expecting destruction.

"That one house was used as an outlying hospital or dressing-place nearest the firing line, and the wounded had to be led or carried only two or three hundred yards to reach it. They sat on the dining-room chairs or lay helpless on the floor. A few surgeons were at work upon them, cutting off loose fingers and throwing them into basins, plugging black holes that welled up instantly through the plug, straining bandages, which in a minute ceased to be white, round legs and heads. The smell of fresh, warm blood was thick on the air. One man lay deep in his blood. You could not have supposed that anyone had so much in him. Another's head had lost on one side all human semblance, and was a hideous pulp of eye and ear and jaw. Another, with chest torn open, lay gasping for the few minutes left of life. And as I waited for the ambulance more were brought in, and always more.

"In a complacent and comfortable account of hospital work I lately read that 'deaths from wounds are happily rare; one surgeon put the number as low as 2 per cent.' Happy hospital, far away in Paris or some Isle of the Blest! The further from the front the fewer the deaths, because so many have died already.

"In the nearest hospitals to the front, half the wounded, and on some days more than half, die where they are put. Often they die in the ambulance, and one's care in drawing them out is wasted, for they will never feel again. I found

one always took the same care, though the greenish-yellow of the exposed hands or feet showed the truth. Laid on the floor of the main hospital itself, some screamed or moaned, some whimpered like sick children, especially in their sleep, some lay quiet, with glazed eyes out of which sight was passing. Mere fragments of mankind were there extended, limbs pounded into mash, heads split open, intestines hanging out from gashes. Did those bones—did that exquisite network of living tissue and contrivances for life—cost no more in the breeding than to be hewed and smashed and pulped like this? Shrapnel—shrapnel—it was nearly always the same. For this is, above all, an artillery war, and both sides are justly proud of their efficiency in guns."

GOVERNMENT RETURNS TO PARIS

Confidence of safety having been restored in the French capital, the Paris bourse reopened on December 7, after having been closed since September 3. President Poincaré transferred his official residence back to Paris from Bordeaux on December 9 and a meeting of the French cabinet was held in Paris on December 11, for the first time since the capital was threatened by the German advance at the end of August.

BRITISH NAVAL VICTORY

In the second week of December the British navy avenged the defeat of Rear Admiral Cradock's squadron off the Chilean coast in November, when a powerful special fleet, under Vice-Admiral Sir Frederick Sturdee, encountered the German cruiser fleet, under Admiral von Spee, off the Falkland Islands and practically destroyed it. Only one of the five German cruisers escaped. The flagship Scharnhorst, the Gneisenau, the Leipzig and the Nurnberg were sunk in the action, which lasted for five hours, and the German admiral with three of his sons and most of the officers and men of the German crews perished. The British losses were inconsiderable.

This sea fight in the South Atlantic was the most important engagement in which British men-of-war had participated since the era of Napoleon. The sailing of the British fleet in quest of Admiral von Spee's squadron had been kept secret and the news of the victory was therefore especially welcome to the people of England, who had been considerably worried

by a succession of minor naval losses inflicted by German cruisers, submarines and mines. The action was gallantly fought on both sides. The advantage in weight of metal and range of guns lay on the side of the British, and the battle was decided at long range. Admiral von Spee, refusing to surrender, in spite of the odds against him, went down with his ship. The flagship of the victorious admiral, Sir Frederick Sturdee, was the modern battle cruiser *Invincible*. A number of the German sailors were rescued by the British after the engagement and sent as prisoners of war to England. The total German loss was over 2,000 officers and men.

Fine strategy was shown by the British admiralty in sending Admiral Sturdee to South American waters. He was ordered to sea from his desk as chief of the British naval board, after Von Spee's Chilean victory in November, and was placed in command of some of the fastest and most powerful cruisers of the British fleet. The entire affair, from the time the admiral left London until he succeeded in finding and sinking the German squadron in the South Atlantic, took about a month—a truly remarkable exploit.

RULERS AT THE FRONT

During December all the armies in the field were visited by the rulers of their respective countries. The Czar spent some time with his troops near the firing lines in Poland; King George of England visited the British forces in Belgium and Northern France and conferred the Victoria Cross ("For Valor") on a number of officers and men; and President Poincaré made several trips to the front, conferring decorations upon General Joffre, commander-in-chief, and other French officers, for distinguished service. The gallant and devoted soldier-king, Albert of Belgium, remained steadfastly at the front with his troops, sharing all their privations and dangers during the fierce fighting in Flanders. Kaiser Wilhelm was also at the front, both east and west, but was forced to return to Berlin early in the month by an attack of illness. On his recovery after two weeks he again visited the western field headquarters in Belgium, but in the first week of January, 1915, he was again compelled by his ailment to make a hurried return to Berlin for medical treatment and rest.

BRITISH AND GERMAN SEA LOSSES

British and German naval losses in the world war to January 1, 1915, are shown in the following, compiled from admiralty reports, and, where these are missing, from other authoritative sources. The figures are approximately correct.

BRITISH LOSSES

Date	Name and Type	How Sunk	Tonnage	Lives lost	Complement
Aug. 7	Amphion, protected cruiser	Mined	3,440	136	320
Sept. 4	Speedy, torpedo gunboat	Mined	810	...	85
Sept. 5	Pathfinder, protected cruiser	Mined	2,940	250	268
Sept. 7	Warrior, protected cruiser	Stranded	13,500	...	704
Sept. 9	Oceanic, auxiliary cruiser	Wrecked	17,000	51	500
Sept. 18	Fishguard II, training ship	Foundered	...	25	25
Sept. 19	AE-1, submarine	Lost	...	25	25
Sept. 20	Pegasus, protected cruiser	Shelled	2,200	...	224
Sept. 22	Aboukir, protected cruiser	Torpedoed	12,000	510	700
Sept. 22	Cressy, protected cruiser	Torpedoed	12,000	561	700
Sept. 22	Hogue, protected cruiser	Torpedoed	12,000	362	700
Oct. 15	Hawke, protected cruiser	Torpedoed	7,350	350	544
Oct. 18	E-3, submarine	Shelled	800	25	25
Oct. 27	Audacious, dreadnought	Torpedoed	25,000	2	900
Oct. 31	Hermes, protected cruiser	Torpedoed	5,600	...	456
Nov. 1	Monmouth, armored cruiser	Shelled	9,800	540	540
Nov. 1	Good Hope, armored cruiser	Shelled	14,100	875	906
Nov. 5	D-5, submarine	Mined	550	21	21
Nov. 11	Niger, torpedo gunboat	Torpedoed	810	...	85
Nov. 26	Bulwark, battleship	Explosion	15,000	800	814
Jan. 1	Formidable, battleship	Torpedoed	17,000	579	850
Number of vessels lost, 21.			Totals	172,700	5,082 9,426

GERMAN LOSSES

Date	Name and Type	How Sunk	Tonnage	Lives lost	Complement
Aug. 5	Panther, gunboat	Shelled	900	75	130
Aug. 6	Koenigin Luise, mine layer	Torpedoed	1,800	79	150
Aug. 7	Augsburg, protected cruiser	Shelled	4,280	150	379

Number of vessels lost, 38.			Totals	134,626	5,605 8,863

CANADIANS AT THE FRONT

Late in December the first of the Canadian troops to leave their English training camp on Salisbury Plain were sent to the front in Northern France. The Princess Patricia regiment had the military honor of leading the Canadians to the firing line. It was made up largely of men who had seen previous service and promptly proceeded to give a good account of itself. A British guardsman returning wounded from the front on December 28 paid a characteristic tribute to the efficiency and daring of the Canadian troops, when he said: "They are all old soldiers. They knew as much about the game as we did and a blooming sight more than the enemy's infantry."

The Canadians first went into action at one of those ticklish spots where yards count. The trench of the British ended at a village which was vigorously shelled by the Germans, and was practically in ruins. Another trench on the right of a little town held by unmounted French cavalry made it impossible for the Germans to reach the village, but their "snipers" had ensconced themselves in some farm buildings to the northeast, making it extremely hazardous for supplies to reach the advanced British posts.

"About twenty of the Canadians," said the wounded guardsman, "managed to gain the ruins at the extreme end of the village during Christmas night and when daylight came they accounted for practically all the German 'snipers' and dashed back into safety before the German artillery fire was directed to the stronghold."

SERVIANS REOCCUPY BELGRADE

Just when it appeared likely that Serbia might share the fate of Belgium, a turn in the fortunes of war changed the entire situation of affairs in the little Slav kingdom. Aided by a fresh advance of Russian troops across the Carpathians, which caused the hurried withdrawal of three Austrian army corps from Servian territory to defend the threatened cities of Hungary, the Serbs again took the offensive and, inspired by the presence in the field of old King Peter, a gallant soldier of France in 1870, they reoccupied Belgrade and drove the Austrians before them in a disorderly rout, so that by Decem-

ber 15 Serbia was free of the Austrian enemy. Budapest, capital of Hungary, became panic-stricken at the Russian advance and the Servian victory, and the year 1914 closed with every evidence that the people of Austria, at any rate, were tired of the war, discontented at the prospect, and desirous of peace.

GERMAN ATTACK ON BRITISH COAST

For the first time in history since the days of the American commander, Paul Jones, British coast towns were bombarded on December 16, when a squadron of German cruisers, slipping across the North Sea in a fog, from their Heligoland base, appeared off Scarborough, Hartlepool and Whitby, on the eastern coast of England, and shelled each of them in turn. The loss of life in the three towns was about 100, men, women and children, and a considerable number of buildings were partially wrecked by the German shells. Comparatively speaking, of course the damage inflicted was trifling and from a military point of view the incident was unimportant, the German ships disappearing in the fog after a half-hour's bombardment. But the moral effect upon the British public was tremendous. The event came as a distinct shock to their over-confidence and as a reminder that the German navy was still to be reckoned with. The warships of the Kaiser brought home to the people of the United Kingdom the meaning of the war, as no previous incident had done, and fear of further attacks took possession of them. This fear, however, soon turned to rage, and then to a fierce determination to prosecute the war to a bitter end. The attack stimulated recruiting for Lord Kitchener's new army, and this was its chief result, though Germany had proved that her ships could reach British shores and bombard their defenseless towns, in spite of all the vigilance of the British fleet.

BRITISH RAID GERMAN PORT

By way of answer to the German attack on Scarborough and Hartlepool, a daring raid was made Christmas Day by the British navy on the German naval base at Cuxhaven, at the mouth of the Elbe. The chief participants were seven British naval airmen. They were assisted in the attack by several light cruisers, destroyers and submarines. The air-

men piloted seaplanes and succeeded in dropping a number of bombs in the vicinity of Cuxhaven, in an attempt to bring out into the open a portion of the German fleet lying there. The affair resulted in a contest between the most modern of war machines. No surface warships were sent out by the Germans, but the attack was repelled by means of Zeppelins, seaplanes and submarines. No great damage was done on either side and the British airmen all escaped without injury, though four of them lost their machines. One, Flight Commander Hewlett, fell with his plane into the North Sea at a considerable distance from Cuxhaven and was picked up by a Dutch trawler, which landed him in Holland several days afterward. The British vessels remained off Cuxhaven for three hours, engaged in the most novel combat in naval history.

A short time previous to the attack on Cuxhaven, the British submarine B-11 accomplished one of the most remarkable exploits of the war when it penetrated into the Dardanelles and torpedoed the Turkish battleship *Messudieh*. In doing so the submarine successfully passed and repassed five lines of submerged mines and returned to its base in safety after being under water for many hours at a stretch.

U. S. PROTEST ON MARINE CONDITIONS

On December 31, by mutual agreement between the State Department at Washington and the British Foreign Office, the text of a note sent by the United States to England, requesting an early improvement in the treatment of American shipping by the British fleet, was made public. The note of protest had been presented on December 29. It dealt with the manner in which American ships suspected of carrying contraband of war had been held up on the high seas and sent into British ports for examination. Sir Edward Grey, the British foreign secretary, and Walter Hines Page, United States ambassador, conferred on the subject in London, and it was announced on January 1, 1915, that an answer to the American note would be drawn up as soon as possible and that it would be in the same friendly spirit in which the American note was written.

ON THE WESTERN BATTLE FRONT

The battle lines in the western theater of war held firm and fast during the first two months of 1915. Along the entire

front, from Flanders to the Swiss frontier, there were few changes in the relative positions of the German forces and the Allies up to March 1, at which time both sides were occupied with preparations for the spring campaign. British reinforcements, forming part of Lord Kitchener's new army, were being transported to the front, while the far-flung lines of trenches were filled with battle-weary veterans of the winter campaign. In many places the entrenchments of the opposing forces were only a few yards apart and trenches were frequently destroyed by mines, resulting in losses to both sides, but without materially changing the general aspect of the conflict.

NAVAL BATTLE IN THE NORTH SEA

One of the most important naval battles of the war took place on January 24 in the North Sea between a British battle cruiser squadron under Vice-Admiral Sir David Beatty, comprising the battle cruisers Tiger, Lion, Princess Royal, New Zealand and Indomitable, assisted by a few light cruisers and destroyers, on the one hand, and on the other a German squadron, consisting of the battle cruisers Derfflinger, Seydlitz and Moltke, the armored cruiser Bluecher, one of the finest in the Kaiser's navy, and several light cruisers.

It was a running fight, covering over one hundred miles and lasting four hours. At the end of this time the German armored cruiser Bluecher was at the bottom of the sea and two of the German battle cruisers had been damaged. Two of Vice-Admiral Beatty's ships were seriously damaged, namely, the giant battle cruiser Lion, which was Sir David's flagship, and the torpedo boat destroyer Meteor, one of the largest and fastest of this class afloat. However, both of these vessels were safely towed into port. The loss in men on the British side was fourteen killed and twenty-nine wounded, while on the side of the Germans only 125 of the crew of 850 men on the Bluecher were saved; the other 725 went down with the ship.

The loss of the *Bluecher* was the hardest blow the German navy had sustained up to this time, as she was one of the newest and best vessels of her class. She was built at a cost of \$6,750,000. Her speed was slower than that of the other vessels in the German squadron, which doubtless accounted for her loss. The battle began about 150 miles from Heligoland and ended within about fifty miles of this German naval base.

Early in the month of February, England threatened to put all foodstuffs destined for German ports on the contraband list. In retaliation, Germany, on February 4, through Admiral von Pohl, chief of the admiralty staff, issued a proclamation designating the waters around Great Britain and Ireland as a war area, to become effective February 18 and to be enforced by a formidable fleet of submarines, the object being to conduct war operations in this area for the purpose of destroying commercial ships of the enemy.

Just at this time the great passenger steamship *Lusitania*, in her passage from New York to Liverpool, hoisted the American flag while sailing through the Irish Sea, and Germany charged that the British Admiralty had issued confidential orders to captains of all British ships to sail under the stars and stripes or other neutral flags when necessary to use this means of protection against destruction by the warships of the enemy. This situation seriously menaced the commerce of the United States as well as that of all other neutral nations, and the American Government, therefore, promptly issued a note of warning to both belligerents and demanded in strong terms the protection of American neutral rights on the high seas. Germany responded promptly and promised to use every precaution to protect neutral shipping, but pointed out that the use of the American flag by British ships would make it difficult to distinguish neutral vessels from those of the enemy; hence neutral shipping was urged to avoid the indicated war area. Great Britain, on the other hand, claimed the right to use neutral flags when necessary to protect human life and ships, when endangered by the war vessels of the enemy; and under the laws of warfare and customs of the nations this contention was correct.

It can readily be seen that this situation placed the sea commerce of the United States, as well as that of all other

neutral countries, in a most dangerous position. Up to March 1, 1915, about twenty merchant vessels of various nationalities were destroyed or damaged in the war zone established by Germany, including Dutch, Norwegian, Danish, American and British ships.

GREAT GERMAN VICTORY IN EAST PRUSSIA

After a difficult campaign against the Russian invaders in East Prussia, the German army, by the masterly strategy of Field Marshal von Hindenburg, practically annihilated the Russian Tenth Army of 150,000 men, completing the task February 20. It was the most spectacular campaign in the history of modern warfare.

The object of the German commander was not only to free East Prussia from the Russian invasion, but to completely capture the Russian Tenth Army. He sent one column in from the south to drive back the Russians who occupied the Mazurian lake gateway to East Prussia, and another column from the north was swung around in wide circles to the east and south, aiming to join hands with the southern German column, thus cutting off the Russian retreat. This movement would have succeeded absolutely except for delay in passing through the swamps, caused by mild weather which broke up the ice. A commander of one of the German corps said: "Nature has always helped Russia. Two days of hard frost and we should have had every man."

In the south also nature aided the Russians. There the German hosts attacked the enemy in the face of a driving snowstorm from the north, which hindered their operations but did not prevent them from gaining a victory which resulted in freeing Prussian territory from the invader.

ALLIES FORCE THE DARDANELLES

On March 1 a great allied fleet of forty British and French warships, having reduced the forts at the entrance to the Dardanelles, was on its way through the straits and the Sea of Marmora to Constantinople, with the object of capturing the city. Panic prevailed in the Turkish capital at the approach of the fleet, while for the first time in history hostile flags flew over the forts at the mouth of the Dardanelles.

The naval operations of the Allies in the Dardanelles, which began on February 17, proceeded without any serious check for a month. Mine sweepers were in daily use, to clear the channel of submerged and floating mines, and the forts at the Narrows, several miles inside the entrance of the straits, were subject to bombardment every fine day. High winds and fog hampered the operations to a considerable extent, but the purpose of the Allies under Vice-Admiral Carden was adamant and would not be denied. They were determined to hammer their way through to the Turkish capital. The greatest battle of all history between warships and shore forts was the result. Soon after the bombardment began it became known that the allied fleets were led by the great new British superdreadnaught Queen Elizabeth, launched after the war began and armed with 15-inch guns of immense range which proved most effective in reducing the forts at the mouth of the straits.

FROM THE DARDANELLES TO THE BLACK SEA

This Map Shows the Route of the Allied Fleets on the Way to Constantinople. The Principal Fortified Places Are Clearly Indicated.

THREE WARSHIPS SUNK

On March 18 three of the allied warships were sunk inside the Dardanelles and two crippled by the Turks during a bombardment in which ten vessels of the combined fleet participated. The official report of the battle was as follows:

"Mine-sweeping having been in progress during the last ten days inside the straits, a general attack was delivered by the British and French fleets on Thursday morning upon the fortresses at the Narrows. At 10:45 A. M. the Queen Elizabeth, Inflexible, Agamemnon, and Lord Nelson bombarded forts J, L, T, U and V, while the Triumph and Prince George fired at batteries F, E and H. A heavy fire was opened on the ships from howitzers and field guns.

"At 12:22 o'clock the French squadron, consisting of the Suffren, Gaulois, Charlemagne and Bouvet, advanced up the Dardanelles and engaged the forts at closer range. Forts I, U, F and E replied strongly. Their fire was silenced by the ten battleships inside the straits, all the ships being hit several times during this part of the action.

"By 1:25 P. M. all the forts had ceased firing. The Vengeance, Irresistible, Albion, Ocean, Swiftsure and Majestic then advanced to relieve the six old battleships inside the straits. As the French squadron, which had engaged the forts in a most brilliant fashion, was passing out, the Bouvet was blown up by a drifting mine. She sank in 36 fathoms north of Arenkeuf village in less than three minutes.

"At 2:23 P. M. the relief battleships renewed the attack on the forts, which again opened fire. The attack on the forts was maintained while the operations of the mine-sweepers continued.

"At 4:09 P. M. the Irresistible quitted the line, listing heavily, and at 5:50 o'clock sank, having probably struck a drifting mine. At 6:05 o'clock the Ocean, also having struck a mine, sank. Both vessels sank in deep water, practically the whole of their crews having been removed safely under a hot fire. The loss of the ships was caused by mines drifting with the current, which were encountered in areas hitherto swept clear.

"The British casualties in personnel were not heavy considering the scale of the operations, but practically the whole of the crew of the Bouvet were lost with the ship, an internal

explosion having apparently supervened on the explosion of the mine." [About 500 lives were lost on the Bouvet.]

On March 16 Vice-Admiral Carden, who had been incapacitated by illness, was succeeded in the chief command by Rear-Admiral John Michael De Robeck, with the acting rank of vice-admiral.

ADMIRAL DE ROBECK'S TRIBUTE TO THE FRENCH

After the engagement of March 18 Admiral De Robeck telegraphed to the British Admiralty the following tribute to the gallantry of the French in action:

"I desire to bring to the notice of your Lordships the splendid behavior of the French squadron. Their heavy loss leaves them quite undaunted. They were led into close action by Rear-Admiral Guepratte with the greatest gallantry."

About this time it was noted by the press and generally commented upon, in both England and America, that the Admiralty had not made public a single word of commendation for the work of the British navy since the war began. This unusual fact was interpreted as evidence of the inflexible purpose of the British to ignore minor losses and even defeats until the main battleship fleets of the belligerents should come to grips in the open sea. English newspapers began to taunt the Germans with permitting their navy to "rust in the Kiel Canal."

The sinking of the battle cruisers *Irresistible*, *Ocean* and *Bouvet* was the heaviest loss sustained by the Allies since the war began. The British crews were rescued, almost to a man, and the loss of the French crew was due mainly to the internal explosion following that of the mine. All the ships sunk were of the earlier pre-dreadnought type. On the same day, March 18, the British battle cruiser *Inflexible* and the French battleship *Gaulois* were put out of commission temporarily by the fire of the Turkish forts.

The *Irresistible*, the *Ocean* and the *Bouvet* were all sunk in portions of the straits which had been swept clear of anchored mines, and the drifting mines which proved so deadly were undoubtedly set afloat by the Turks, probably under the direction of German officers, on the swift current of the *Dardanelles* at points near the allied ships after the action began.

On March 24 the allied fleets renewed with vigor their attack upon the forts at the Narrows of the Dardanelles. A large body of troops was also landed upon the peninsula of Gallipoli, commanding the approach to Constantinople, and the Russian Black Sea fleet co-operated by a bombardment of the Turkish naval base, which left the Turkish fleet without supplies and practically paralyzed its movements.

BATTLE OF NEUVE CHAPELLE

The presence of part of Earl Kitchener's new British volunteer army at the western front in Belgium and France was signalized between March 10 and March 16, when the British gained a series of successes that drew marked attention to their operations. To the south of Ypres in Flanders the British army, which a German attack had compelled to fall back beyond St. Eloi, recaptured that village and almost all of the neighboring German trenches, in spite of several counter-attacks.

On March 11 Field Marshal Sir John French described the fighting which led to the capture of Neuve Chapelle in Northern France as follows:

"Since my last communique the situation on our front, between Armentières and La Bassée, has been materially altered by a successful initiative on the part of the troops engaged. Shortly after 8 A. M. on March 10 these troops assaulted and carried German trenches in the neighborhood of Neuve Chapelle.

"Before noon we captured the whole village of Neuve Chapelle. Our infantry at once proceeded to confirm and extend the local advantage gained. By dusk the whole labyrinth of trenches on a front about 4,000 yards was in our hands. We had established ourselves about 1,200 yards beyond the enemy's advanced trenches.

"During the 11th the enemy made repeated efforts to recover the ground lost. All his counter-attacks were repulsed with heavy loss.

"We continue to make steady progress and hard fighting continues. The local initiative displayed by our troops daily is admirable. It says much for the spirit which animates the army. The success achieved on the 10th and 11th is a striking example."

“THE END OF THE WORLD”

An officer who was wounded in the fighting thus vividly describes the battle of Neuve Chapelle:

“Modern warfare is such an infernal business that any man who is not killed ought to be cheerful. It all seems like a wild dream to me. I never heard such a row in all my life. And the bullets and the shells—it was like passing through the most awful hail storm.

“We were in our trenches at dawn when suddenly a most infernal din commenced. You never saw such a sight; you never heard such a noise. I heard one of my men say, ‘This is the end of the world,’ and I did not blame him for thinking so. We could see in the distance great masses of flame, earth and brick in great clouds of smoke, all ascending together as enormous shells screamed over our heads and burst among the German entrenchments and the houses of the village. At the end of a half-hour’s bombardment the fire ceased as suddenly as it had begun.

“All this time we were awaiting the order to advance towards Aubers. At length we jumped out into the open. The air seemed alive with bullets and shells. There was a buzzing noise, such as you hear in a tropical forest on a hot summer day. On we moved, until we came to an open stretch, which was being swept by an infernal shell fire. We crossed this in rushes to gain the shelter of a few houses, losing some 40 or 50 men. There we remained for some little time, reforming the battalion and awaiting further orders. When these came we moved forward over rough, open ground, coming upon lots of our poor fellows lying dead. They were from the only battalion which had preceded us.

“Then we entered the German trenches which had been captured. Again we halted. All this time our shells, German shells and rifle and machine gun bullets were shrieking overhead.

“Thank goodness, in an action like this you seem to lose your senses! A kind of elevation above all ordinary feelings comes over you and you feel as though you were rushing through air. There is so much to frighten you that you cease to be afraid. Then your senses gradually come back. That is why all infantry attacks should be carried through with one overwhelming rush.”

GERMAN ADVANCE IN POLAND

On March 12 two German armies were on the move in Poland, seeking to pierce the Russian lines. One of these armies was advancing along the road to Przasnysz with the bank of the River Narew as its objective. This was the main German attack and inaugurated one of the biggest battles of the war.

Farther south, on the Pilica, a German feint was in progress with the object of weakening the Russian defense in the north. But while Petrograd seemed to be resigning itself to the idea of a second withdrawal from before Przasnysz, there was little doubt of the ultimate outcome of this German attempt to gain a firm footing on Russian soil. The German troops were moved forward in close order and only in the daytime, and were entirely dependent on what natural cover they could find between the rushes, as the ground was frozen too hard to permit the use of intrenching tools.

These tactics naturally involved very heavy losses. The German casualties are also understood to have been extremely severe around Simno, especially on their extreme left, where they lost the greater part of their transport. It appeared certain that the Russians had fallen back before an onrush of forces of overwhelming numerical superiority, but it was equally certain that with every yard of the German advance from their railways the shock of their impact weakened while the Russian powers of resistance were enhanced.

BRITISH RELIEVE THE PRESSURE

Just as the French attacked the Germans in the western campaign when Field Marshal von Hindenburg made his rush from East Prussia in February, so the British army operating in Flanders undertook the task of relieving the pressure on its Russian ally when the Russians again were attacked in north Poland. This was part of the general plan of the allied generals. When one was attacked the other attacked, so as to compel the Germans and Austrians to keep strong forces at every point, and endeavor to prevent them from sending new troops where they could do the most good.

In March the Germans were occupied in an attempt to crush the Russians. For this purpose they had an army estimated at nearly half a million men marching along the roads

toward Przasnysz. To prevent this army from being further strengthened the British began to thrust at the German line north of La Bassée, and besides reporting the capture of the village of Neuve Chapelle, they advanced beyond that town.

BRITISH AUXILIARY CRUISER LOST

On March 12 the Admiralty issued a report of the loss of the large British auxiliary cruiser *Bayano* while on naval patrol duty in the Irish Sea. Evidence pointed to her having been torpedoed by a German submarine. Only 27 of the *Bayano's* crew of 250 were saved. Fourteen officers, including the commander, went down with the ship. The *Bayano* was a new twin screw steel steamer of 5,948 tons. The survivors were afloat on a raft when rescued. The loss of the *Bayano* was the most serious of the submarine blockade of the British coasts up to that time.

GERMAN CRUISER DRESDEN SUNK

For several months British warships in the South Atlantic and South Pacific oceans sought in vain for the German cruiser *Dresden*, one of the German squadron defeated off the Falkland Islands by Admiral Sturdee in December, when she was the only German vessel to escape. On February 27 she sank the British ship *Conway Castle* off Corral in the South Pacific, and on March 14 she was caught near Juan Fernandez Island by the British cruisers *Glasgow* and *Kent* and the auxiliary cruiser *Orama*. An action ensued and after five minutes' fighting the *Dresden* hauled down her flag. She was much damaged and set on fire, and after she had been burning for some time her magazine exploded and she sank. The crew were saved. Fifteen badly wounded Germans were landed at Valparaiso, and the remainder of the crew were taken on board the auxiliary cruiser *Orama* as prisoners of war.

The *Dresden* was a sister ship of the famous *Emden*, and was commissioned in October, 1907. In the spring of 1914 the *Dresden* was on the Caribbean station, and was lying off Tampico when the American forces captured Vera Cruz. Later on in the summer the *Dresden* was the vessel on which Victoriano Huerta, upon abandoning Mexico, traveled from Puerto to Jamaica. Upon the outbreak of the war the *Dresden* was still stationed in Central American waters, and for a

time was hunted by the British and French cruisers in the North Atlantic. She steamed south, however, and after sinking the British steamer *Hyades* and the *Holmwood* off the coast of Brazil, respectively, on August 16 and 26, went through the Strait of Magellan and joined Admiral Count Von Spee's fleet in the southern Pacific.

The sinking of the *Dresden* left at large on the high seas, so far as was known, only the German cruiser *Karlsruhe*, last reported as operating in the West Indies, and the auxiliary cruiser *Kronprinz Wilhelm*, which was still raiding commerce in the South Atlantic.

THE FALL OF PRZEMYSL

On March 22 the long siege of Przemyśl, the formidable Galician fortress that had been called the "key to the Austrian empire," ended with the surrender of the city to the Russians. The siege stands as the fifth longest in 136 years, having lasted 185 days, surpassed in duration only by the sieges of Gibraltar, Sebastopol, Vicksburg, Richmond and Port Arthur. The news of the Austrians' surrender was the most important that had come from the eastern front in weeks. For six months the stronghold had withstood assault, remaining a constant menace in the rear of the Russian advance in Galicia. From 120,000 to 150,000 Russians had been held in the neighborhood by the necessity of masking the fortress. Numerous efforts had been made to reach the beleaguered city by relieving armies, but each in turn proved unavailing, though for a time in December it appeared likely that a combined German and Austrian army would succeed in raising the siege.

The fall of Przemyśl was preceded by a sortie of the garrison in a last desperate attempt to hack its way through the enemy's lines. After a seven hours' battle they were compelled to retreat with a loss of nearly 4,000 prisoners. Only three days' rations were left. In the surrender of the city the Russians announced the taking of nearly 120,000 prisoners, including nine generals, 93 officers of the general staff, 2,500 officers and officials, and 117,000 soldiers.

Twenty-four thousand soldiers of the Przemyśl garrison were killed during the long siege, according to dispatches from Petrograd. Twenty thousand more were wounded making the total casualties of the Austrian defenders 44,000 men.

Depleted by disease, subsisting on horseflesh, and surrounded by a superior force of Russians, the garrison of Przemyśl was forced to surrender, but fell with honor, the gallant character of the defense under General von Kusmanek being conceded on all sides. The Russian commander who received the surrender was General Seliwanoff. In the early days of the siege a Bulgarian, General Radko Dimitrieff, was in command of the investing forces. General Seliwanoff commanded the Russian forces at Vladivostok during the Russo-Japanese war of 1904-05.

The duration of the siege compared with the length of time it took the Germans to capture such strongholds as Liège, Namur and Antwerp was due to two causes, one being the desire of the Russians to keep the loss of life among the besieging army at a minimum, the other to the lack of great guns which the Germans had in Belgium.

The investment was not a close one, the garrison having had a radius of about twelve miles in which to move about. An aeroplane post was maintained almost up to the last, and it is said that even some scanty food supplies were carried in by aeroplane.

Although the victory was a big one, it cost the Russians dearly. It is estimated that 150,000 Russians were killed and wounded during the months that the siege went on. Not only were many Russians killed by the efficient fire of the Austrian gunners, but the fierce sorties where attackers and defenders fought hand-to-hand resulted in heavy casualties.

Przemyśl was the greatest fortress in the Austrian empire. Hill, rock, marsh and river combined to give it strength and the work of nature had been supplemented by the labors of the finest military engineers in central Europe. The gallant defense which the garrison put up for 185 days is recorded as Austria's most noteworthy contribution to the war. For a long time the fortress had faced famine.

With the fall of Przemyśl the only important fortified town in Austrian Galicia which was not in the hands of the Russians was Cracow, close to the German border. A large Russian army with artillery was released for action. The Russian left wing stretched from the province of Bukowina on the southeast to Tarnow and the Vistula River near Cracow on the west.

ON THE EASTERN FRONT

On the eastern front of the stupendous battle line in March the most sanguinary fighting of the war occurred. Losses on both sides were appalling, while the gains in territorial acquisition amounted to little or nothing.

Describing the enormous losses on both sides in Poland, a neutral observer, Mr. Stanley Washburn, said in the *American Review of Reviews*:

"The German program contemplated taking both Warsaw and Ivangorod and the holding for the winter of the line between the two formed by the Vistula. The Russians took the offensive from Ivangorod, crossed the river, and after hideous fighting fairly drove Austrians and Germans from positions of great strength around the quaint little Polish town of Kozenice. From this town for perhaps ten miles west, and I know not how far north and south there is a belt of forest of fir and spruce. Near Kozenice the Russian infantry, attacking in flank and front, fairly wrested the enemy's position and drove him back into this jungle. The Russians simply sent their troops in after them.

"The fight was now over a front of perhaps twenty kilometers; there was no strategy. It was all very simple. In this belt were Germans and Austrians. They were to be driven out if it took a month. Then began the carnage. Day after day the Russians fed troops in on their side of the wood. Companies, battalions, regiments, and even brigades, were absolutely cut off from all communication. None knew what was going on anywhere but a few feet in front. All knew that the only thing required of them was to keep advancing.

"Yard by yard the ranks and lines of the Austrians were driven back, but the nearer their retreat brought them to the open country west of the wood the hotter was the contest waged. The last two kilometers of the woody belt are something incredible to behold; there seems hardly an acre that is not sown like the scene of a paperchase—only here with bloody bandages and bits of uniform. Men fighting hand to hand with clubbed muskets and bayonets contested each tree and ditch. The end was, of course, inevitable. The troops of the dual alliance could not fill their losses, and the Russians could.

"At last came the day when the dirty, grimy, bloody soldiers of the Czar pushed their antagonists out of the far side of the woodland—and what a scene occurred in that open bit of country with the quaint little village of Augustowo at the crossroads! Once out in the open the hungry guns of the Russians, so long yapping ineffectively without knowing what their shells were doing, had their chance. Down every road through the forest came the six-horse teams with the guns jumping and jingling behind, with their accompanying caissons heavy with death-charged shrapnel, and the moment the enemy were in the clear these batteries, eight guns to a unit, were unlimbered on the fringe of the wood and pouring out their death and destruction on the wretched enemy now retreating hastily across the open. And the place where the Russians first turned loose on the retreat is a place to remember.

"Dead horses, bits of men, blue uniforms, shattered transport, overturned gun-carriages, bones, broken skulls, and grisly bits of humanity strew every acre of the ground.

ENORMOUS LOSSES ON BOTH SIDES

"A Russian officer who seemed to be in authority on this gruesome spot volunteered the information that already they had buried at Kozienice, in the wood and on this open spot, 16,000 dead. Those that had fallen in the open and along the road had been decently interred, as the forests of crosses for ten miles along that bloody way clearly indicated, but back in the woods themselves were hundreds and hundreds of bodies that lay as they had fallen. Sixteen thousand dead means at least 70,000 casualties all told, or 35,000 on a side if losses were equally distributed. And this, figured on the basis of the 16,000 dead already buried, without allowing for the numbers of the fallen that still lie about in the woods. And yet here is a battle the name of which is hardly more than known in America, yet the losses on both sides amount to more than the entire army that General Meade commanded at the Battle of Gettysburg.

"He who has the heart to walk about in this ghastly place can read the last sad moments of almost every corpse. Here one sees a blue-coated Austrian with leg shattered by a jagged bit of a shell. The trouser perhaps has been ripped open

and clumsy attempts been made to dress the wound, while a great splotch of red shows where the fading strength was exhausted before the flow of life's stream could be checked. Here again is a body with a ghastly rip in the chest, made perhaps by bayonet or shell fragment. Frantic hands now stiffened in death are seen trying to hold together great wounds from which life must have flowed in a few great spurts of blood. And here it is no fiction about the ground being soaked with gore. One can see it,—coagulated like bits of raw liver, while great chunks of sand and earth are in lumps, held together by this human glue. Other bodies lie in absolute peace and serenity. Struck dead with a rifle ball through the heart or some other instantly vital spot. These lie like men asleep, and on their faces is the peace of absolute rest and relaxation, but of these alas! there are few compared to the ones upon whose pallid, blood-stained faces one reads the last frantic agony of death.

"The soldiers themselves go on from battlefield to battlefield, from one scene of carnage to another. They see their regiments dwindle to nothing; their officers decimated, three-fourths of their comrades dead or wounded, and yet each night they gather about their bivouacs apparently undisturbed by it all. One sees them on the road the day after one of these desperate fights marching cheerfully along, singing songs and laughing and joking with one another. This is *morale* and it is of the stuff that victories are made. And of such is the fiber of the Russian soldier, scattered over these hundreds of miles of front to-day. He exists in millions and has abiding faith in his companions, in his officers, and in his cause."

TERRIFIC FIGHTING IN MIDWINTER

Writing of the desperate fighting in Poland in midwinter when the Germans made a tremendous effort to pierce the Russian lines on the Bzura and Rawka front, with Warsaw as their objective point, an American correspondent, Mr. John F. Bass, said: "The fighting was terrific. The detonations of the cannon came in such rapid succession that they sounded like giant machine guns and the windows of the dressing stations for the wounded shook as if from an earthquake. It was not possible to distinguish individual gun explosions from the rattle of the infantry fire. All were mingled in one inarticu-

late battle shriek. At night, as in a furious thunderstorm, the darkness was pierced with the unintermittent flashes of the guns, while sickly green rockets shed a ghastly light over the fighting lines. The wounded brought in filled the hospitals to overflowing.

"It was estimated by the Russians that the Germans lost 60,000 men. I was told by an officer that the bodies of German soldiers were piled up before the Russian trenches in many of the assaults so high that German shells bursting among them threw mangled pieces of human beings into the trenches among the Russians.

"At night, under the glare of search-lights, the undulating mass of wounded made efforts to extricate themselves. Then, toward 2 o'clock in the morning, they moved no more." The winter cold had done its deadly work.

FRENCH MAKE GAINS IN MARCH

In the Champagne country of northern France the month of March was marked by almost continuous fighting of the fiercest character. French advices from Chalons-sur-Marne on March 29 were to the effect that 11,000 German dead had been taken from the trenches won by the French in the previous twenty days and that the total German losses during that time in the Champagne district exceeded 50,000 in killed, wounded and prisoners.

STIRRING EVENTS OF THE SPRING

All through the month of April the days were crowded with important occurrences east and west along the battle lines. The Russian movement across the Carpathians was pressed with vigor and some of the fiercest fighting of the war resulted, as the combined German and Austrian troops resisted the Russian advance into Hungary.

Early in the spring the British forces gained a notable victory at Neuve Chapelle in the western theater of war. Then the German forces in Flanders were heavily reinforced until it was estimated that they numbered not less than half a million men, gathered for the purpose of smashing the line of the Allies at the strategic point where the British and the Belgian troops were in touch with one another. Here, for three days, the Germans succeeded in pushing forward, driving a wedge for several miles into the line of the allied armies of England, France and Belgium. And here, too, the

Canadian division of the British army covered itself with glory and once more demonstrated the value to the British empire of the "lion's whelps." On one notable occasion, destined to be recorded in history as a red-letter day for Canadian arms, the gallant fellows from the great Dominion "saved the situation," to quote from the report of Field Marshal French, by a splendid charge, during which they recaptured from the Germans four of their field guns that had been lost the day before.

HOW CANADIAN COMMANDER DIED LEADING YPRES CHARGE

From Sir Max Aitken's official account of the battle of Ypres.

"It did not seem that any human being could live in the shower of shot and shell which began to play on the advancing troops. They suffered terrible casualties. For a short time every other man seemed to fall, but the attack was pressed even closer and closer. The 4th Canadian battalion at one moment came under a particularly withering fire. For a moment it wavered.

"Its most gallant commanding officer, Lieut.-Col. Birchall, carrying, after an old fashion, a light cane, coolly and cheerfully rallied his men and at the very moment when his example had infected them, fell dead at the head of his battalion.

"With a cry of anger they sprang forward as if to avenge his death. The astonishing attack which followed, pushed home in the face of direct frontal fire made in broad daylight by battalions whose names should live forever in the memories of soldiers, was carried to the first line of German trenches. After a hand-to-hand struggle the last German who resisted was bayoneted and the trench was won.

"It was clear that several German divisions were attempting to crush or drive back the Third Brigade and to sweep around and overwhelm our left wing. The last attempt partially succeeded. German troops swung past the unsupported left of the brigade and, slipping in between the wood and St. Julien, added to our torturing anxieties by apparently isolating us from the brigade base.

"In the exertions made by the Third Brigade during this supreme crisis, Major Norsworthy, already almost disabled by a bullet wound, was bayoneted and killed. Captain McQuaig of the same battalion was seriously wounded.

"General Curry flung his left flank around and in the crisis of this immense struggle held his trenches from Thursday afternoon until Sunday afternoon. He did not abandon them then. There were none left. They had been obliterated by artillery.

"He withdrew his undefeated troops from the fragments of his field fortifications and the hearts of his men were as completely unbroken as the parapets of his trenches were completely broken.

"The Ninetieth Winnipeg Rifles, which held the extreme left

of the brigade position at the most critical moment, was expelled from the trenches early Friday morning by an emission of poisonous gas, but recovering in three-quarters of an hour it counter-attacked, retook the trenches it had abandoned and bayoneted the enemy.

"General Alderson, commanding the reinforcements, directed an advance by a British brigade which had been brought up in support.

"As the troops making it swept through the Canadian left and center, many of them going to certain death, they paused for an instant with deep-throated cheers for Canada, indicating the warm admiration which the Canadians' exertions had excited in the British army.

"On Monday morning General Curry was again called upon to lead his shrunken Second Brigade, reduced to a quarter of its original strength, into action at the apex of the line, which position the brigade held all that day. On Wednesday it was relieved and retired to the rear. 'Not a Canadian gun was lost in the long battle of retreat.'"

Concluding his account, Sir Max wrote: "The empire is engaged in a struggle without quarter and without compromise against an enemy still superbly organized, still immensely powerful, still confident that its strength is the mate of its necessity. To arms then, and still to arms! The graveyard of Canada in Flanders is very large."

GERMAN DRIVE TO THE COAST

Before the beginning of the spring campaign, it was realized by the Allies that the German general staff was preparing for a determined drive to the coast through the British and Belgian lines that protected the approach to Calais. It was for this reason that the British took the offensive at Neuve Chapelle and at the important strategic point known as Hill 60. The purpose of Field Marshal French was to strike the first blow, and the attacks were seemingly successful; but later news from the front showed that "something went wrong" at Neuve Chapelle, which in a large measure upset the British plans.

At Hill No. 60, though the British captured that important position, they were held back from further advance. Then came the long-expected German attack in the direction of Ypres, which was considered as one of the keys to the French seaport of Calais. By this attack the Allies were forced back from the Ypres canal, and the positions gained by the Germans brought them within twenty-five miles of the coast at Dunkirk.

The fighting at Neuve Chapelle, Hill 60 and Ypres was probably the most sanguinary of the entire war up to that time. The losses on both sides were enormous. Germans, British, Belgians and French were killed literally by the thousand, the British losses

at Neuve Chapelle alone being estimated at 20,000, while the German casualties in forcing the passage of the Ypres canal a few days later exceeded 9,000 men.

PRAISE FOR THE CANADIANS

It was in the most furious conflict of the western campaign—a battle between Langemarcke and Steenstrate, in Flanders—that the Canadian troops saved the British army from what seemed almost inevitable defeat. The Canadian division was in the front line of the British forces on April 23, when the Germans made their sudden assaults and broke through the line for a distance of five miles. Only the brilliant counter-charges of the Canadians saved the situation. They had many casualties, but their gallantry and determination brought success and, in the language of the official report of the prolonged battle, "their conduct was magnificent throughout."

The correspondent, describing the harrowing scene of the battle on April 23, said: "Long ago Kitchener's army was given its baptism of fire, but yesterday it got its initiation into hell."

In their great effort to smash the Allies on the Yser the Germans also sustained terrible losses. By April 27 it was asserted that the German force that managed to pass the Yser and took possession of the town of Lizerne had been practically annihilated. The fighting was said to have been far more terrible than that of the autumn of 1914, when the Yser canal ran red with blood.

It was charged by the Allies that in the fighting in Flanders late in April the Germans used asphyxiating gases, which placed thousands of the allied troops *hors de combat*, including many of the Canadian division. Strong protests against the German use of such methods were voiced by the allied generals, and a formal denunciation was made by Lord Kitchener in the British parliament.

ALLIED TROOPS AT THE DARDANELLES

On April 25-27, a strong force of British and French troops under General Sir Dan Hamilton effected a landing on both sides of the Dardanelles, to co-operate with the allied fleets seeking to force a passage through the straits to the Bosphorus. The landing was resisted by Turkish troops, but the Allies succeeded in establishing themselves on the Gallipoli peninsula by May 1, and made several thousand Turks prisoners of war. The bombardment of the Turkish forts in the Dardanelles by the allied warships was continued.

The French cruiser Leon Gambetta, with a displacement of 12,351 tons and crew of 714 men, commanded by Rear Admiral Fenet, cruising at the entrance of the Otranto canal in the Ionian sea, was torpedoed the night of April 26th by the Austrian submarine U-5, and went to the bottom in ten minutes; 578 lives were lost; all officers on board, including Rear Admiral Fenet, perished.

CHAPTER XXIII

SINKING OF THE LUSITANIA

Destruction of the Great Cunard Liner by a German Submarine Causes a Serious Crisis in German-American Relations—Over a Hundred Americans and Many Canadians Drowned, Including Citizens of Prominence and Wealth—Prompt Diplomatic Action by President Wilson—The German Campaign of Frightfulness and Its Results.

STEAMING majestically over a smiling sea, with the green hills of Erin in sight over the port bow and all well aboard, the greatest, fastest and most beautiful transatlantic liner in commission was nearing the end of her voyage from New York to Liverpool. It was the hour after luncheon on the great ship, the hour of the siesta or the promenade, the most peaceful hour of the day. Little children by the score played merrily about the great decks; families and friends foregathered in the lounges or beside the rail to watch the Irish coast slip by; all the internal economy of the giant ship moved smoothly, as if by clockwork.

It was more than a floating hotel, replete with comfort and luxury. It was a floating town, with a whole townful of people. Over fourteen hundred men, women and children were on the passenger list and six hundred men in the Cunard uniform constituted the crew. Among the passengers were many citizens of the United States and Canada, and there was an unusually large proportion of women and children on board, the families of men who had been drawn into the maelstrom of war.

For in spite of the calm and peace prevailing on the great passenger ship, the shadow of war impended over all. The bloody struggles of the great European cataclysm were proceeding at the other end of the English Channel and dire hints of dangers on the sea in the "war zone" had accompanied the sailing of the ship. But on this bright May day, as the liner approached its destination, danger seemed far distant and few indeed among passengers or crew gave serious thought to its imminence.

All was truly well on board. The skies were clear, the sea was smooth, and though the myriad passengers realized that they had entered a danger zone of the world's greatest war they had abounding confidence in the giant ship, in its veteran commander, and in the line to which it belonged, that had never yet lost the life of a single passenger committed to its care. And confidently they looked forward to a safe arrival in port next morning, the happy ending of a wartime voyage which the children on board, and their children's children, should recall with pride for a century to come. BUT—

Right ahead in the path of the floating palace, athwart the prescribed course of the Lusitania there lurked the deadliest slinking serpent of the seas—the tiny volcanic hull of an enemy submarine, most dangerous of war's new weapons. Lying leisurely in wait, its body submerged just beneath the swelling undulations of a summer sea, invisible, ruthless, insatiable; only the protrusion of a foot or so of periscopic tube betokened its presence without betraying its purpose. But in that innocent-looking tube lay vast potentialities for evil—nay, devilish certainties of dealing death and destruction. For the little steel-encased arrangement of lenses and mirrors peeping from the depths was the mechanical eye of the submarine and sufficed to betray to watchful Teutons below the approach of the great ship, treasure laden with human freight of non-combatants and neutrals, but flying the flag of the German's foe.

For the crew of the submarine "der Tag" had come. Without a thought of the innocents and neutrals aboard; reckless alike of immediate results and ultimate consequences, animated only by the deadly designs of a war-madness and a deliberate campaign of frightfulness, the firing signal was flashed from the German commander's station and the fatal torpedo was launched against the unsuspecting and unprotected leviathan. Traveling true to its mark, it tore its frightful way through the thin sheathing of the ship and, exploding on impact, pierced her vitals and sealed her doom. * * *

Barely a quarter of an hour elapsed before the giant vessel disappeared from sight, plunging bow foremost to the bottom in waters scarcely more than one-third of her length in depth, so that the shock of her bow striking the bottom of the sea was felt by the gallant captain on the bridge before he was torn loose from his ill-fated vessel.

And when the waters of the Atlantic closed over the hull of the Lusitania, within sight of the Irish coast on that fatal Friday, the lives of over eleven hundred non-combatant men, women and children, including more than a hundred American neutrals, were ruthlessly sacrificed to the Teuton god of war.

CHAPTER XXIV

A SUMMER OF SLAUGHTER

Submarine Activities—Horrors in Serbia—Bloody Battles East and West—Italy Enters the War and Invades Austria—Russians Pushed Back in Galicia.

The Lusitania was the twenty-ninth vessel to be sunk or damaged in the first week of May, 1915, in the war zone established by Germany about the British isles. Most of these vessels were torpedoed by German submarines, although in some cases it has not been established whether the damage was inflicted by mines or underwater boats.

Sixteen of the twenty-nine vessels were British trawlers. There were four British and one French merchantman in the list. The others were vessels of neutral nations.

One of them was the American steamer Gulfight, torpedoed off Scilly islands on May 1, with the loss of three lives. There were three Norwegian, two Swedish, and one Danish merchant vessel sunk.

BLOODY BATTLES EAST AND WEST.

The second week in May saw minor German successes on the western front, but these were immediately succeeded by determined efforts on the part of the Allies to retrieve lost ground. The week of May 10 to 15 was marked by fierce assaults by the British and French upon the German positions in Flanders and northern France. Thousands of lives were sacrificed on both sides. At one point on the Yser where the Germans were beaten back, they left 2,000 dead on the field, but this was only a small percentage of the total losses during this series of engagements in May. Around Ypres early in the month the Canadians lost heavily, but made a splendid record for gallantry and endurance in the face of odds. The Germans began at this time the use of asphyxiating gases in their attacks. The results were horrifying in the extreme, and as these inhuman

assaults with gas were continued, the Allies prepared to adopt the use of similar noxious gases by way of retaliation.

BRITISH WARSHIP TORPEDOED.

On May 12 the British warship Goliath was sunk by a Turkish torpedo during the continued attack by the Allies on the Dardanelles. Twenty officers and 160 men of the crew were saved and over 500 lives were lost. The Goliath was one of the older British battleships of the pre-dreadnaught type. She was built in 1898, was 400 feet long and 74 feet wide, with a displacement of 12,950 tons. Her armament consisted of four twelve-inch and twelve six-inch guns, twelve twelve-pounders, six three-pounders, and two machine guns.

In the determined attack on the Dardanelles, land forces of British and French troops co-operated with the combined fleets. The Turks made a stubborn resistance, but were compelled to give way gradually before the terrific bombardment of the warships and the persistent attacks by land. In the fighting on the Gallipoli peninsula the British colonial troops from New Zealand covered themselves with glory, fighting like veterans and breaking down Turkish opposition with the bayonet. On May 19 one of the most important forts at the Narrows, guarding the entrance to the Sea of Marmora, was silenced by the warships' fire, and this was an important step on the Allies' way to Constantinople.

Meanwhile an immense German army, said to number 1,600,000 men, had been forcing the Russians back in Galicia to the San River and the gates of Przemyśl. A German bombardment of this fortress seemed imminent on May 20.

ITALY ENTERS THE WAR.

On Sunday, May 23, Italy finally plunged into the great conflict with a declaration of war against Austria. The formal declaration, presented to the Austro-Hungarian foreign minister, Baron von Burian, by the Duke of Avarna, Italian ambassador at Vienna, asserted that Italy had "grave motives" for annulling her treaty of alliance with Austria and "confident in her good right," resumed her liberty of action. The declaration of war continued as follows:

"The government of the King, firmly resolved to provide by all means at its disposal for safeguarding Italian rights and interests, cannot fail in its duty to take, against every existing and future menace, the measures which events impose upon it for the fulfillment of national aspirations.

"His majesty, the King, declares that he considers himself from tomorrow (May 24, 1915), in a state of war with Austria-Hungary."

Thus the ninety-sixth anniversary of the birth of Queen Victoria, of England, found eleven of the countries of Europe at war, their rulers including three of her grandsons, two arrayed in a bitter struggle against the third. The Triple Alliance on this date became the Quadruple Alliance, when Italy joined the Allies. Austria was of course supported by Germany. Italy was expected to put 3,000,000 men in the field.

WHY ITALY WANTED WAR

The reasons why Italy entered the great conflict were succinctly stated on May 19 by Signor Enrico Corradini, nationalist leader, as follows:

"1. The necessity for Italy to take advantage of the present revolution in European affairs to settle her national irredentist problem at the expense of Austria. Our right to the Trentino, Trieste and Istria, now held by Austria, is not questioned by reasonable people anywhere in Europe.

"2. The necessity for Italy to arrive at a secure and definite settlement of her military frontiers on the north and east.

"3. The necessity for Italy to create for herself by her intervention a new moral and political position in the new European order of the future, to replace that which she had, thanks to her alliance with the central empires, a position which was liquidated at the outbreak of the war.

"4. The necessity for Italy to contribute to repelling the danger of a German hegemony which would flourish at the expense of the various individual cultures and civilizations."

INVASION OF AUSTRIA

Italy promptly threw an army across the Austrian frontier and began active operations in the direction of Trent and Trieste. The fortified city of Luzerne soon fell into Italian hands and continued successes marked the progress of the invaders all through the month of June. The Austrian strategy at first appeared to provide for a series of withdrawals after skirmishing; but late in the month a more determined resistance developed, the defenses of the Austrian troops being skilfully prepared. The loss of life during the month was comparatively light on both sides, but on June 26 the Italians—already masters of Plava on the left bank of the Isonzo river, and the heights dominating that town—were massing heavy bodies of troops before Gorizia and Tolmino for crucial battles at those two points, both of which blocked the way to the coveted Austrian seaport of Trieste.

STRUGGLE FOR THE DARDANELLES

All through the month of June the Allies continued their desperate struggle for the possession of the Dardanelles, the gateway to Constantinople. Under the direction of German officers and engineers, the Turkish troops and gunners offered determined resistance and the British, Colonial and French troops co-operating with the allied fleets, gained headway but slowly and at tremendous

cost. But it was declared that the Allies were bent upon forcing a passage through the straits regardless of cost and that every effort would be made to complete the operation during the summer. Several German submarines appeared in the Gulf of Saros during the month and effectively interfered with the activity of the British and French fleets. The results of the operations on the Gallipoli peninsula during the month indicated that the Dardanelles would prove a veritable slaughter pen before the Allies succeeded in winning their way to Stamboul.

LEMBERG IS RECAPTURED

On June 22 the city of Lemberg, capital of the Austrian province of Galicia, was recaptured from the Russians, who had held it for nearly ten months, by combined German-Austrian forces, under General Mackensen. This marked the culmination of a successful Teuton campaign in Galicia, including the recapture of the strong fortress of Przemyśl, as well as Lemberg, and the driving of the Russian invaders back to their own borders.

The eastern battle front in June extended for 680 miles north and south, and while the German drive through Galicia was entirely successful, the Russians gained some victories in the north. They were sorely handicapped by the lack of supplies and ammunition for their forces, and at the end of June the Russian authorities were organizing every possible industry for the production of ammunition.

The fiercest fighting of the war, as far as the Baltic provinces of Russia are concerned, occurred in a battle for the mastery of the Dabysa River early in June. The river changed hands five times in one day, and at nightfall the stream was completely choked with the bodies of thousands of dead, so that a plank roadway for artillery was laid by the Russians across a solid bridge of bodies.

HEROIC FEAT OF A CANADIAN

A thrilling and unprecedented feat was performed by Lieut. R. A. J. Warneford, a Canadian aviator, when alone in an aeroplane, he destroyed a Zeppelin airship with its crew of twenty-eight men in Belgium. He received the Victoria Cross for his exploit, but a few days later was killed while testing a new aeroplane near Paris. He was buried with naval honors in London, June 23.

On July 3, 1915, when the twelfth month of the Great War began, it was conservatively estimated that the total losses on all sides, including killed, wounded and missing, had exceeded six millions of men. Over 500 vessels had been destroyed, including 120 ships of war.

DEADLOCK IN THE WEST

During July and August there were no general engagements of importance in the Western theatre of war. The deadlock continued. The troops along the Western battle lines were, however, subjected almost daily to violent artillery bombardment.

By August 22 the British line in northern France and Flanders had been lengthened from 40 miles to over 100 miles, with over 800,000 troops on the firing line. German submarines were very active in the war zone during the month of August, over 170 merchant steamships of more than 500 tons displacement and nearly 2,000 noncombatant lives being the awful toll to date of this new method of warfare.

The British transport Royal Edward was torpedoed and sunk August 14 by a German submarine in the Aegean Sea. Nearly 1,000 lives were lost. The transport had on board a force of 32 officers and 1,350 men, in addition to the ship's crew of 220 officers and men. The troops consisted mainly of reinforcements for the 29th Division and details of the Royal Army Medical Corps.

FALL OF WARSAW

Warsaw, the capital of Poland, was taken by the Germans August 5. Bavarian troops under the command of Prince Leopold carried the forts of the outer and inner lines of the city's defenses, where the rear guards of the Russian troops made a tenacious resistance.

The German armies under Gen. von Scholz and Gen. von Gallwitz advanced in the direction of the road between Lomza, Ostrov and Vyszkoy and fought a number of violent engagements. The brave and desperate resistance of the Russians on both sides of the road between Ostrov and Rozan was without success.

Twenty-two Russian officers and 4,840 soldiers were taken prisoners. The Germans also captured seventeen machine guns.

The fall of Warsaw marked the culmination of the greatest sustained offensive movement of the war. Thrice before Teutonic armies had knocked at its gates, only to be denied by the strength of its defenses and the resistance of the forces holding it.

Warsaw lies on the Vistula, 625 miles southwest of Petrograd and 320 miles east of Berlin. It is an important industrial center and its population is estimated at not far from 900,000.

The great Russian fortress of Kovno was captured by the Germans August 17. More than 400 cannon were taken. The fortress was stormed in spite of the most stubborn Russian resistance.

The capture of Kovno was the most important German victory in the East after the taking of Warsaw.

Kovno fell under the eye of General von Hindenburg. The capture of the fortress was the first personal triumph of the "old man of the Mazurian lakes" since the great Austro-German campaign

in the East was inaugurated. The six great forts defending the city from the west and southwest were simply blown to pieces by the incessant pounding of Germany's great 42-centimeter guns and a host of minor pieces.

The forts were under direct attack for scarcely a week, demonstrating again the superiority of modern artillery over fort structures built by man.

Kovno, capital of the Russian province of that name, is on the right bank of the Niemen. It is a fortress of the first class. The civilian population of the city is more than 75,000.

The important Russian fortress of Novo Georgievsk, the last halting place of the Russians in Poland, fell into the hands of the Germans on August 19, after a most stubborn resistance. The garrison consisted of 85,000 men and of these over 20,000 were taken prisoners. Over 500 cannon were captured and a large amount of war ammunition seized.

BATTLE OF THE BAY OF RIGA

Russian naval forces aided by British submarines, in the Gulf of Riga won a decided victory August 18 over the German fleet which penetrated the gulf on August 13.

The great German battle cruiser Moltke, one of the finest ships of its kind afloat, was destroyed in the engagement. The cruiser had a displacement of 23,000 tons and carried a crew of 1,107 men and officers. Its main battery consisted of ten 11-inch guns, mounted in pairs in five turrets. Its secondary battery contained twelve 6-inch guns. Twelve 24-pounders and four torpedo tubes completed its armament. The Moltke was 610 feet long over all, with a beam of 96 $\frac{3}{4}$ feet, and cost \$12,000,000.

With the Moltke three German cruisers and seven torpedo boats, all unnamed, were destroyed.

The Russians lost the destroyer Novik of 1,260 tons, largest in the navy, and the gunboats Sivutch and Koriets, of 875 tons displacement.

The Russian victory did not end with the defeat of the German naval forces. The invading fleet was accompanied by four enormous transports, all crammed with troops. These soldiers attempted to make a landing on Pernau bay, on the northeastern shoulder of the Gulf of Riga. They were permitted to land and were then attacked and exterminated by the Russian forces at that point. The loss was estimated at 6,000 men.

WHITE STAR LINER ARABIC SUNK

The White Star liner Arabic, which sailed August 18 from Liverpool for New York, was sent to the bottom by a German torpedo August 19 off Fastnet on the south coast of Ireland, not far from the point at which the Lusitania was sunk by a German submarine.

Out of 429 persons aboard including crew, 39 lost their lives. Two Americans perished—Mrs. Josephine Bruguière, widow of Emil Bruguière, California millionaire banker, and Dr. E. F. Wood, of Janesville, Wis.

Capt. Finch, who commanded the steamer, gave the following graphic account of the disaster: "We were forty-seven miles south of Galley Head at 9:30 in the morning when I perceived the steamer Dunsley in difficulty. Going toward her, I observed a torpedo coming for my ship, but could not discern a submarine. The torpedo struck 100 feet from the stern, making terrible havoc of the hull. The vessel began to settle immediately and sank in about eight minutes.

"My order from the bridge about getting the boats launched was promptly obeyed. Two boats capsized. We had taken every precaution while in the danger zone. There were plenty of lifebelts on deck and the boats were ready for immediate launching. The officers and crew behaved excellently and did everything possible in the circumstances, getting people into the boats and picking up those in the sea.

"I was the last to leave, taking the plunge into the sea as the ship was going down. After being in the water some time I was taken aboard a raft, to which I had assisted two men and women.

"If the submarine had given me a little more time, I am satisfied I could have saved everybody."

The Arabic's tonnage was 15,201 gross. It was 600 feet long, 65 feet beam and 47 feet in depth. It was built at Belfast in 1903 by Harland & Wolff.

On September 4 the German forces under General von Beseler stormed and captured the bridgehead at Friedrichstradt, the most important defense of Riga. The furiousness of the attacks in this region led military critics to believe that the fall of the city of Riga was imminent.

Everywhere as Russians retreated they left a trail of utter devastation, causing the Teutons to march around burning cities, finding the country devoid of food or shelter. This destructive policy, however, resulted in saving the Czar's army and rendering futile the hope of the Kaiser that the military forces of Russia could be crushed.

With the Russian armies in full retreat and their double line of fortresses all fallen to the invader, the apparent calm on the Western front continued to be the marvel of the European campaign, as up to September 7 no development on the Western front indicated that any effort was being made to distract the Kaiser's attention from his victorious expedition into the territory of the Czar.

THE DARDANELLES CAMPAIGN.

The struggle of combined land and sea forces of the Allies to gain control of the Dardanelles, and thus open the way for the British and French fleets to Constantinople and the Black Sea, continued through the autumn of 1915 and furnished some of the most sanguinary battles of the war. From the day of the landing of British troops on the Gallipoli peninsula up to the end of November the fighting was continuous and bloody. The British losses were tremendous, while the Turkish defenders of the supposedly impregnable straits also suffered heavily, but with Mohammedan stoicism.

A terrible picture of the slaughter at Seddul-Bahr, where the British troops landed from transports under the guns of their fleet, in the face of an awful Turkish bombardment, was painted on his return to England in November by Lieutenant-Commander Josiah Wedgwood, a Liberal member of Parliament, who had received special mention for bravery at the front, and the coveted stripes of the Distinguished Service order.

"Our school books told us," said Commander Wedgwood, "that the bloodiest battle in history was that between the confederates and federals at Sharpsburg during the American civil war, when one-third of all the men engaged were left on the field. But Sharpsburg was a joy ride compared with Seddul-Bahr."

Paying a tribute to the enemy, he said: "The Turks are the finest fighters in the world, save only the Canadians and Australians. And they proved to be humane. They could easily have killed all those who went to succor the wounded, but I found them extraordinarily merciful as compared with the enemy in Flanders."

Commander Wedgwood's first view of fighting at the Dardanelles was at the so-called V beach, where a steamship, the

"River Clyde," was run aground to furnish cover for the landing of the British troops.

"This modern 'wooden horse of Troy,' " said Commander Wedgwood, "was run ashore on a beautiful Sunday morning, 400 yards from the medieval castle of Seddul-Bahr. I was on the vessel, but never noticed her grounding for the horrors ahead of us in the shallow waters on the beach. Five tows of five boats each, loaded with men, were going ashore alongside of us. One moment it had been early morning in a peaceful country, with rustic sights and sounds and smells; the next moment, while the boats were just twenty yards from shore, the blue sea around each boat was turning red. It was truly horrible. Of all those brave men two-thirds died, and hardly a dozen reached unwounded the shelter of the five-foot sand dune.

"About 9 o'clock a dash across the row of lighters from the Wooden Horse was led by Gen. Napier and his brigade major. Would they ever get to the end of the lighters and jump into the sheltering water? No; side by side they were seen to sit down. For one moment one thought they might be taking cover; then their legs slid out and they rolled over.

"It was the Munsters that charged first, with a sprig of shamrock on their caps; then the Dublins, the Worcesters, the Hampshires. Lying on the beach, on the rocks, on the lighters, they cried on the Mother of God. There, now, was Midshipman Drury swimming to a lighter which had broken loose, with a line in his mouth and a wound in his head. If ever a boy deserved his Victoria Cross, that lad did. And there was the captain of the River Clyde, now no longer a ship to be stuck to but a part forever of Gallipoli, alone with a boat by the spit of rock, trying to lift in the wounded under fire.

"All these things I saw as in a dream. Columns of smoke rose from the castle and town of Seddul-Bahr as the great shells from the fleet passed over our heads and burst, and in every lull we heard the wounded.

"At 1 o'clock the Lancashires were appearing over the ridge to the left from 'Lancashire landing.' We saw fifteen men in a window in the castle on the right by the water. They signaled that they were all that remained of the Dublins who had landed at the Camber at Seddul-Bahr. At 3 o'clock we got 150 men alive to shore. We watched our men working to the right and up into the castle ruins—at each corner the officer crouching in front with revolver in rest.

"When night came a house in Seddul-Bahr was burning brightly and there was a full moon. We disembarked men at once. All around the wounded cried for help and shelter against the bullets, but there was no room on boats or gang-way for anything but the men to come to shore.

"For two nights no one had slept and then another day dawned. We were firmly ashore at Lancashire landing, and at Du Toit's battery to the northeast, and the Australians were dug in at Anzac. An end had to be made of V beach. The whole fleet collected and all morning blew the ridge and castle and town to pieces.

"And all the time that wonderful infantry went forward up the hill and through the ruined town. The troops that went in that attack had already lost half their strength; the officers that led up those narrow streets were nearly all killed. Dead beat, at 1 o'clock, before the final rush, they hesitated. Then our last colonel, a staff man, Col. Doughty Wylie, ran ashore with a cane, ran right up the hill, ran through the last handful of men sheltering under the crest, took them with a rush into the Turkish trench, and fell with a bullet through his head. But the Turks ran and the ridge was ours."

Many weeks of bloody fighting followed and while there was talk early in November of a possible abandonment of the Dardanelles campaign, the end of the month found the struggle still in progress, with no end in sight.

Official figures made public October 15, show that the British casualties at the Dardanelles up to October 9 were 96,899, of whom 1,185 were officers. The casualties among the Australian troops on the Gallipoli peninsula up to the same date amounted to 29,121 officers and men.

THE ATTITUDE OF GREECE.

On September 23, acting upon the advice of Premier Venizelos, King Constantine of Greece ordered a general mobilization of the Greek army, "as a measure of elementary prudence in view of the mobilization of Bulgaria." Ten days later Premier Venizelos resigned upon official notice that the King could not support his war policy, which was believed to reflect the sentiments of the Greek people and to support the Allies. King Constantine then endeavored to form a coalition ministry. The great point at issue was whether Greece should support or oppose the passage of the Allies through Greek territory to the aid of Serbia. British and French troops to the number of 70,000 had meanwhile been landed at Saloniki, the great Greek seaport, and were being hurried to the support of the Serbians in their central territory, to oppose the incursion of the Austro-Germans and the Bulgarians. In November King Constantine and his military chiefs were visited by Field-Marshal Earl Kitchener, the British Secretary of War, who made such demands upon them in the interest of the Allies, backed by a temporary blockade of the Greek coasts by the British and French fleets, that on November 25 it was announced that cordial relations between Greece and the entente powers had been established. The Greek government gave assurances that no attempt would be made to interfere with the Allies' troops should they under any contingency be forced to cross the Greek frontier, but that railway and other facilities would be afforded them. It was understood that the Allies also promised Greece a mone-

tary indemnity after the war for any damage that might be done through the occupation of Greek territory.

With the question of Grecian intervention out of the way, the Allies then occupied themselves with the attitude of Rumania and the intervention of Russia in behalf of Serbia, in order that the latter country might be saved from the fate of Belgium. It was generally understood that Rumania could not afford to incur the enmity of Germany by active interference in behalf of Serbia, even though the Serbians and Rumanians were natural allies against Bulgaria.

On November 26, M. Pachitch, the Serbian premier, received a personal telegram from the Russian emperor, in which the latter promised the early appearance in Bulgaria of Russian troops and the Italian government also promised the Serbians to send to their aid an expeditionary force of 40,000 men. It was believed possible that the Russian forces might seek to advance through Rumania, instead of forcing a landing on the Black Sea coast of Bulgaria—in which case the crossing of Rumanian territory by Russian troops would bring Rumania into a serious situation both economically and politically, and render it difficult if not impossible for her to preserve her neutrality. At this time Russia had concentrated a great army near the Rumanian frontier, and it was understood that a large number of heavy guns had arrived at Odessa for its use. The direction in which this Russian army would move depended entirely upon the policy adopted by the Rumanian government.

AMERICAN LOAN TO THE ALLIES.

On September 28, formal announcement was made in New York of the terms of an American loan to Great Britain and France, arranged by a commission of British and French financial authorities after conferences with American bankers; a bond issue of \$500,000,000 was soon floated, drawing 5 per

cent interest and issued to the syndicate at 96; the money to remain in the United States and to be used only in payment for commodities.

Late in November the French people were called upon to subscribe to a "loan of victory." The response from the people of Paris alone in one day amounted to \$5,000,000,000, thus exceeding the records of all former popular war loans, including British and German issues, and typifying the patriotic ardor of the French people and their determination to continue the war to an issue successful to allied arms.

THE WESTERN CAMPAIGN

After a week's heavy bombardment of the German lines, an important offensive movement was undertaken on September 25 by the French and British against the German lines on the western front. The forward movement occurred simultaneously in the Champagne district, between Rheims and Verdun, by the French and in the Artois district, between Ypres and Arras, by combined British and French forces. While the Allies did not succeed in gaining much ground, and both sides suffered heavy losses, it was claimed by the French war office on September 29 that as a result of the four days' assaults of the Anglo-French forces the Germans suffered losses amounting to the effective strength of 120,000 men, while 23,000 men and 120 cannon were captured from the Teutonic enemy. This constituted the result of what was described as the great Anglo-French drive of the autumn, and the situation on the western front then settled down once more into a state of siege. The first-line trenches of the opposing forces along a wide-flung front were within a short distance of each other. A new method of warfare had been developed and the world began to realize that all historic conditions of war had been revolutionized by the use of scientific weapons of destruction like the machine gun, which mowed down men like hay, and the high explosive shell that destroyed protective works as if they were made of card-

board and filled the trenches with dead and dying bodies.

Such was the situation on the western front in the beginning of December. No let-up in the determination of either side; no advance seemingly possible, no attack that was not followed by a counter-attack; no gain of any consequence anywhere; no possibility seemingly of any decisive battle; nothing in sight but an absolute deadlock.

ON THE EASTERN FRONT.

Late in September the German campaign against Russia appeared to lose most of its force. Continued attempts were made by Field Marshal von Hindenburg to fight his way to Riga, but without avail, and Russian successes at various points along the eastern battle front were numerous in October and November. The Russians declared on November 15 that they deemed the city of Riga safe, and by November 26 it was apparent that the Germans were engaged in a general retirement all along the River Dvina. The Allies then became interested in the Kaiser's probable choice of a line of defense for the winter on the northern section of his Russian front. The breakdown of the German offensive was attributed by the Allies to three things—the increase in the Russian ammunition supply, a German shortage of munitions, and the weakening of the German line for the Balkan campaign.

BULGARIA ENTERS THE WAR.

On October 1, 1915, it was evident that Bulgarian forces would shortly be employed on the side of the central powers. Bulgarian troops from Sofia were moving on to the Serbian frontier. King Ferdinand had ordered the mobilization of all men under sixty-five years of age and martial law was proclaimed, no citizen under forty-five being allowed to leave the country. On October 4 Russia sent an ultimatum to Bulgaria and the Russian minister was ordered to leave Sofia if by 4 p. m., October 5, Bulgaria did not definitely break with Germany, Austria and Turkey. All the allied powers sup-

ported Russia in this demand. Bulgaria did not reply within the time specified and the Russian minister was reported too ill to move from Sofia, thus indicating that the diplomats of the great contending powers were still at work in an effort to secure the important support of Bulgaria in the Balkan campaign which was imminent.

On October 6, when Bulgaria was said to have sent an ultimatum to Serbia demanding the territory ceded after the recent Balkan wars, the envoys of the Allies at Sofia requested their passports, and Bulgaria became an active participant in the war. The Bulgarian minister at Nish, the Serbian capital, received his passports on October 8, and on the same day the Bulgarian minister at Paris was handed his passports. On the following day, October 9, Belgrade, the former Serbian capital, was occupied by Austro-German forces and the invasion of Serbia by Austria and Germany from the north and by Bulgaria from the east began in earnest. The Serbian capital was removed the same day to Ishtib, in the south.

THE SERBIAN CAMPAIGN.

When the great army of Germans and Austrians entered Serbia at Belgrade and other points along the Danube and began to drive the Serbian forces to the south, they met with immediate and continued successes. Bulgarian troops meanwhile pressed the Serbians on the west and by the end of November it seemed as if the entire territory of Serbia was doomed to the fate of Belgium. But on the south, allied troops, including a great body of French who had been landed at Saloniki in Greece and made their way northward, disputed the advance of the invaders and at several points drove back the Bulgarians, thus holding the southern territory of Serbia for their ally in the same manner that Flanders was being held by the Allies for Belgium.

CHAPTER XXV

SECOND WINTER OF WAR

In all the arenas of the great struggle, the winter campaign of 1915-16, the second winter of the war, was accompanied by unparalleled hardships and sufferings. It was, in fact, described by Major Moraht, military expert of the Berliner Tageblatt and the best known German military critic, as "the most terrific campaign in the world's history." Hundreds of thousands of men of all classes, in all the armies stretched along the battle fronts east and west, struggled against wind, weather, and winter amid conditions of the most extreme self-denial. Speaking for the Teutonic forces in January, Major Moraht said: "On our western and eastern fronts and along the lines held by our Austro-Hungarian allies, the conditions under which we must stubbornly hold out are such as never in the history of the world's most terrible campaign had to be endured before." The winter was exceptionally severe and men were invalided by the thousands, owing to frost-bites, despite ingenious precautions and the fact that their spells in the trenches were reduced considerably.

The conditions faced by the Austrians and Italians in the Alps and on the Isonzo were especially appalling. Thus a detachment of Austrian and Alpine troops, engaged in patrol duty, met its doom in an avalanche in southern Tyrol. Only one out of twelve was rescued alive, and he lay buried under snow for fourteen hours before he was rescued.

Added to the sufferings of the fighting men during the winter the sum total of human misery in Europe when 1916 dawned was vastly increased by the awful conditions prevailing in Poland and in Serbia. Poland, a land long recognized as given over to sorrows, had been crossed and recrossed by hostile armies. It had been harried, almost destroyed. Towns and food supplies, fields and granaries, were obliterated. The cattle had been driven off by the invaders and the people were left starving. The misery of Belgium a year before was as nothing compared with the misery of Poland amid the rigors of winter, and the unhappy country clamored for the help of happier peoples. It had become a land of graves and trenches, of ruin and destruction on a scale that had been wrought nowhere else by the war. Many of the abandoned trenches were the temporary "homes" of countless refugees, mostly women and children, who had been driven from their homes in the burned and ruined villages that dotted the land. And there was little or no relief in sight for the

stricken Poles, innocent victims of a ruthless war and pitiful playthings of Fate.

ON THE WESTERN FRONT

Artillery fighting with mortars and long-range cannon was a continuous performance during December and January in nearly every section of the western battle line. Every day tens of thousands of shells, both high explosive and shrapnel, were hurled at the trenches and men were killed or wounded by the score at a time. To the war-hardened men behind the guns on both sides this business of slaying and running the risk of being slain or crippled became so prolonged and monotonous that they thought no more of it than of cutting down a forest or building a pontoon bridge.

Early in January the city of Nancy, just behind the French lines, was bombarded for three days by German 15-inch guns. Much damage was done and a number of the inhabitants were killed and wounded. As a consequence there was an exodus from the city, safe conducts being issued to more than 30,000 persons.

Estimates made in Vienna of the total booty of the Teutonic allies during the first seventeen months of the war, up to January 1, 1916, were as follows: Nearly 3,000,000 prisoners, 10,000 guns, and 40,000 machine guns, while 470,000 square kilometers of enemy territory had been occupied.

About the same time the German losses, as compiled from official lists, were estimated at 2,588,000, including over 500,000 killed and 350,000 taken by the Allies as prisoners of war.

CONSCRIPTION IN ENGLAND

After every effort had been exhausted in the British Isles to raise troops by voluntary enlistment, first under Lord Kitchener and then under Lord Derby, the British government was finally compelled to resort to conscription, although nearly 3,000,000 men had voluntarily responded to the call to the colors. A bill was presented in the House of Commons by Premier Asquith on January 5, 1916, providing for compulsory service by "all men between the ages of 18 and 41 who are bachelors or widowers without children dependent on them." Ireland was excluded from the terms of the measure, which finally passed the Commons on January 20, the opposition having dwindled to a meager handful of votes. Four members of the Cabinet, however, resigned as a protest against conscription.

BRITISH BATTLESHIPS SUNK

On January 9 the British battleship King Edward VII foundered at sea as the result of striking a mine. Owing to a heavy sea it had to be abandoned and sank shortly afterward. The entire crew of

nearly 800 men were saved. The vessel was a pre-dreadnaught of 16,350 tons and cost nearly \$8,000,000. A week previously the British battleship Natal, a vessel of similar character, was sunk by an internal explosion.

The main battle fleets of both Britain and Germany remained "in statu quo" up to March 1, 1916. British cruisers and patrol ships maintained a constant watch upon the waters of the North Sea, and visitors permitted to see the battle fleet at its secret rendezvous reported efficiency and eternal vigilance as its watchwords. The German fleet lay in safety in the Kiel Canal, still awaiting orders to put to sea and enjoy "der Tag," after nineteen months of inactivity.

RUSSIA'S WINTER CAMPAIGN

After several months of comparative inactivity Russia launched a forward movement against the Austro-German forces late in December. This winter drive was not unexpected, as the Russian armies had had time to recover from their reverses of the summer and autumn of 1915 and had received much-needed supplies of guns and ammunition.

The fact that Russia was vigorously on the offensive again was soon demonstrated. The first week of 1916 was marked by a progressive development of a forward Russian movement extending along the Styre and Strypa rivers from the Pripet marshes to Besarabia. The main attack seemed to be directed against Bukowina and Eastern Galicia, and for some time the pressure of the Russian attacks forced back the lines of the Austro-German right along the eastern front.

During January the Russians were also actively engaged against the Turks in the Caucasus, where the battle front was over 100 miles long, and against the Turks, aided by Germans in Persia. They began a general offensive in the Caucasus on January 11 and made steady gains over the Turks, while similar successes attended their efforts in Persia, where revolutionists had entered the field against the Russians and British.

THE BALKAN CAMPAIGN

The month of December saw the end of the Austro-German and Bulgarian drives through Serbia. By the end of the year the remnants of the Serbian army had been driven across the frontiers and some 50,000 of them found refuge in January on the Greek island of Corfu, which was seized by the Allies for that purpose. King Peter found an asylum in Italy; Belgrade and Nish were occupied by Austrians and Germans, and the Bulgarians halted at the Greek border. The small British and French forces in Serbia, greatly outnumbered, retired before the enemy's advance from north and east,

but saved the Serbian army from total annihilation by protecting its retreat to the southern frontier. Then the British and French retreated across the Greek border to Saloniki, where they were largely reinforced and proceeded to fortify themselves against possible German or Bulgarian attacks. King Constantine of Greece, brother-in-law of the Kaiser, feebly protested against the proceedings of the Allies on Greek soil, saying that he wished his country to remain neutral—but his protest was offset by the facts that the great majority of the people of Greece were favorable to the Allies and that their landing at Saloniki was for the purpose of aiding Serbia, Greece's friend and ally, which Greece had notably failed to do. Frequent threats of the bombardment of Saloniki by the Germans or by the Bulgars were made during January, but up to February 10 the threatened attack had failed to materialize and the Allies were strongly intrenched in a 30-mile arc around the town, while the guns of a powerful fleet of British and French warships commanded the approaches and protected transports and landings.

SINKING OF THE PERSIA

On December 30 the Peninsular & Oriental liner *Persia* was torpedoed by a submarine, probably Austrian, in the Mediterranean about 300 miles northwest of Alexandria, and sank in five minutes. One hundred and fifty-five out of the 400 passengers and crew were landed at Alexandria on January 1, and eleven others were subsequently reported safe. Among those lost was Robert N. McNeely, who was on his way to take up his duties as American consul at Aden.

FROM BERLIN TO CONSTANTINOPLE

By the middle of January German engineers had succeeded in repairing the railroad bridges and roadbed destroyed during the Serbian campaign and thus reopened direct communication between Berlin and Constantinople.

CANADIAN PARLIAMENT BUILDING BURNED

On the night of February 3 the beautiful Gothic structure which housed the Canadian Parliament at Ottawa—the architectural pride of the Dominion—was wrecked by a fire which started in a reading room adjacent to the chamber of the House of Commons. Six persons, two of them women friends of the Speaker's family, lost their lives. The House was in session when the fire broke out, and many members and other occupants of the building escaped narrowly and with great difficulty. The money loss from the fire was enormous, and priceless paintings, books and national documents were destroyed.

Opinions differed as to the causes of the fire, but the occurrence about the same time of several highly suspicious fires in Canadian munition factories and the unexplained rapidity with which the

Parliament Building fire spread with mysterious volumes of suffocating smoke, caused widespread suspicion that the disaster was of incendiary and enemy origin. A tidal wave of resentment flooded the Dominion and deep feeling was aroused against men of German birth or extraction remaining in Canada, some of them occupying public positions of responsibility. A Commission was appointed by the Government to investigate the causes of the fire, and, pending its report, official denials were made that German spies had anything to do with the burning of the Houses of Parliament. These denials, however, failed to convince the Canadian people that German sympathizers were entirely innocent of any participation in the origin of the conflagration.

The ruined building was the central structure of the magnificent group of Government buildings at Ottawa, and one of the finest examples of Gothic architecture on the Continent. The Library of Parliament, occupying a separate structure in the rear of the building wrecked, was fortunately spared by the fire. It was announced by the Premier, Sir Robert Borden, that steps would be taken to replace the Parliament Building with a still finer structure, and the Houses of Parliament continued their sessions in temporary quarters. One immediate result of the fire and of the suspicions attached to its origin was to stimulate recruiting in the Dominion and stiffen the resolve of the Canadian people to do their utmost to aid the success of British arms at the European front. Canada became more than ever an armed camp of determined patriots. The general sentiment was expressed by the Toronto Globe, which said: "If German agents see a way to injure Canada, they will stop at nothing to compass their ends. Arson to them is a commonplace and murder an incident in the day's work. The destruction of the Parliament Building may have been the result of an accident, but the general belief at Ottawa is that it was the work of an incendiary."

RUSSIAN SUCCESSES IN ASIA MINOR

On February 15, following a five days' siege, Erzerum, the great Armenian fortress, where the main Turkish army of the Caucasus had taken refuge, fell into the hands of the Russians. The Turkish army numbered 160,000 men and was under the chief command of the German general, Field Marshal von der Goltz, formerly military governor of Belgium. The main body of the Turks managed to avoid capture at Erzerum, but the Russians took 15,000 prisoners there, besides hundreds of guns and immense quantities of munitions and supplies. Then began a determined and deadly pursuit of the Turkish army, with the object of driving it out of Armenia, and the efforts of the Russians met with continued successes. Turkish opposition in Asia Minor was swiftly broken down, and steps were taken by the Russians to relieve the British force which had been long

beleagured by the Turks at Kut-el-Amara, in Mesopotamia, 150 miles from Erzerum.

On February 27-28 the Turks hastily evacuated the important Black Sea port of Trebizond and neighboring cities before the victorious Russian advance. On March 1 two Russian armies were moving rapidly on Trebizond, one along the shores of the Black Sea through Rizeh, and the other in a northwesterly direction from Erzerum. The capture of Erzerum was effected in bitter wintry weather. During the assault on the fortress several Turkish regiments were annihilated or taken prisoners with all their officers. Many Turks perished from the cold.

GREAT BATTLE BEFORE VERDUN

One of the greatest and most sanguinary battles of the war began before Verdun on February 20, when the army of the Crown Prince of Germany, in the presence of the Kaiser, started a determined and desperate drive against the great French fortress. Ever since the battle of the Marne halted the German advance on Paris early in September, 1914, the forces of the Crown Prince had been striving unsuccessfully to break through the French lines north and east of Verdun, but the fortress had well maintained its reputation for impregnability and continued to bar the high road to Paris.

For ten days the battle raged on the plains, in the forests and on the hills before Verdun, and the loss of life was appalling on both sides. By February 26, after six days of continuous fighting, the Germans had penetrated the French lines along several miles of front, had occupied several villages a few miles north of Verdun, driven the French from the peninsula of the Meuse formed by a bend of the river about six miles from the city, and carried by storm the outlying fort of Douaumont, at the northeast corner of the Verdun fortifications. But their advance was then halted by the French in a series of the most brilliant counter-attacks, and the German offensive appeared to die down by March 1, when their losses in the ten days' battle were estimated at 175,000, including between 40,000 and 50,000 killed. The French losses were heavy, but the nature of the German attacks, in which huge masses of men were hurled against the French entrenchments, exposed the Teuton forces to the most withering and destructive fire from the French 75-centimeters and machine guns. The battle exceeded in violence and losses even the great battle of the Yser earlier in the war. Heavy reinforcements had been brought to the Verdun front by the Germans, and it was estimated that their forces engaged in the attack numbered at least 500,000 men, supported by numerous 15-inch and 17-inch Austrian mortars, with all the heavy German artillery used in the Serbian campaign and part of that formerly employed on the Russian front.

While the battle of Verdun was in progress, the Germans also made determined attacks in the Champagne region, gaining some ground;

but on March 1 the Allied lines were holding fast all along the western front.

Wounded soldiers returning from the front during the bloody struggle before Verdun told tragic tales of the fighting. "I watched the assault of the Germans upon the village of Milancourt, near the Meuse," said a wounded Frenchman. "They came in solid ranks, without a word, loading and reloading their rifles without cessation. Our seventy-fives fell among them, and then the mitrailleuses entered into action. It was no longer a battalion. It was a few scattered groups of men that one saw, torn by a rain of shells and bullets, squeezing close against each other as though for mutual protection.

"On the border of Montfaucon I saw one of these groups disappear at one blow, as if they had been swallowed into a marsh. Our shells! What frightful work they did. Never will I forget those fragments of human beings that fell just at my feet. Never can I forget that terrible picture.

"I followed the attack on Haumont and Samogneux. The field of battle was lighted as if in full day by star shells. Black masses of Germans advanced, protected by their artillery, while ours remained silent. Finally our artillery began, and then the enemy ranks wavered, halted and disappeared.

"Our guns had waited until the Germans were in a little hollow all arranged for the massacre. In a little while there lay the bodies of some 2,000 or 3,000 Germans. They occupied some villages, but their attack on Verdun has failed after terrible losses."

GERMAN SUBMARINE ACTIVITIES

The sinking of British and French ships, and sometimes neutral vessels, by German and Austrian submarines continued during the month of February. On February 27 the Peninsular & Oriental Line steamship *Maloja*, of 12,431 tons, was sunk by a torpedo or mine only two miles off the Admiralty pier at Dover, with a loss of 155 lives, including many passengers, men, women and children, en route to India. Dozens of craft went at once to the rescue, and one of them, the *Empress of Fort William*, a vessel of 2,181 tons, was also torpedoed or struck a mine and sank nearby. Of the *Maloja's* passengers and crew, 260 were rescued.

On February 28 the great French liner *La Provence* was sunk in the Mediterranean with a loss estimated at 900 lives. It had a displacement of 19,200 tons, length 602 feet, beam 65 feet, and had been in the service of the French Government as a troop transport.

Under new orders to their submarine commanders, in spite of protests by the United States Government, Germany and Austria inaugurated on March 1 the policy of sinking without warning all Allied merchant vessels believed to carry any armament for defensive purposes, and the world waited with bated breath for fresh developments of the Teutonic campaign of frightfulness.

CHAPTER XXVI

CLIMAX OF THE WAR.

*Prolonged Battle of Verdun the Most Terrible in History—
Enormous Losses on Both Sides—Submarine Activ-
ity Imperils Relations of America and Germany.*

Beginning with the first infantry attack by the Germans on Monday, February 21, after twenty-four hours of continuous bombardment, the battles incident to the siege of Verdun were fought at brief intervals during the next two months, down to the middle of April, and marked the climax of the War. The losses on both sides were enormous and extraordinary, and taken as a whole the struggle on the semicircular front north and east of the great French stronghold fully justified its description as "the most terrible battle in the world's history."

When spring of 1916, arrived, the struggle seemed to be a pretty even draw, but the end was not in sight. Both sides showed the greatest confidence in the outcome. In France the confidence of the nation found expression in the voice of M. Alexandre Ribot, the veteran minister of finance, who, having Verdun before his eyes, told the Chamber of Deputies: "We have reached the decisive hour. We can say without exaggeration, without illusion, and without vain optimism, that we now see the end of this horrible war."

But while the French were certain that victory would ultimately be theirs, the German papers and people were just as fully persuaded that this finest of the fortresses of France would finally fall before the determined assaults of the Kaiser's army, which no fort had, as yet, stopped.

Both sides recognized that this was the supreme moment of the War. The Germans had gained by April 15 from three to five miles along a front of about 15 miles, but had taken only two of the ring

of minor forts around Verdun. The French claimed that the configuration of the ground occupied by the contending forces at that time made their line impregnable. Although Verdun was said by the German military experts to be only an incident in the German offensive which was planned to secure the final "decision," they realized the importance of Verdun to their whole line on the Western front, and knew its value too well not to make the most desperate and exhaustive efforts for its conquest.

A TERRIFIC ARTILLERY DUEL.

For many weeks the battle for Verdun was signalized by the most terrific artillery fire in history. No words can tell of the ear-stunning roar of the guns, or depict the horror of the tons of steel daily crashing and splintering amid massed bodies of men, while the softly-falling snows of late winter covered, but could not conceal, the ensanguined landscape. Modern warfare was seen at Verdun in all its panoply of terror. Amid fire and fury, the rich and fertile countryside was transformed into a vast scene of ruin and desolation, while heroism and self-sacrifice abounded on both sides, men were maddened by the frenzy of the fight and the ghastly horrors of night and day, and Death stalked gloatingly and gluttled, but never surfeited, over the bloody field.

The German attacks followed one another so fast and so furiously that the weeks of fighting became one prolonged battle, and a description of one attack will almost serve for all. Thus, a wounded French officer said of the seven days of continuous fighting which opened the German offensive against Verdun: "The first symptom of the battle favorable to the French was the inability of the Germans to silence the French artillery. The attack opened with strong reconnoitering parties advancing, wherein was noted an unusually large proportion of officers. For the first time the German officers were seen to be leading their men into battle, instead of driving them, as had been the rule—and this was said to be at the behest of the watching Kaiser. Then came the infantry in great numbers. During the next two days the fighting waxed fiercer and fiercer.

"At first fourteen German divisions were engaged, then sixteen,

and finally seventeen divisions (340,000 men). The French command at this point carried out a maneuver which will be recorded as a masterpiece in military history.

"If the Germans had been only fifteen yards away, the French could have been submerged by the attack, providing the attacking forces were prepared to make any sacrifice, but the distance being 1,500 yards there was little chance for the Germans against the opposing artillery. The French troops were accordingly swung back to positions from which they could see the Germans approaching over exposed ground. The effect was that the immediate front of the attack, which was originally twenty-five miles in extent, was reduced to nine miles, but even this soon proved too wide. The German losses were so great that the attack could not be kept up at all points; and at the end of the seventh day the offensive dwindled to fragmentary attacks,—but only to be renewed with added vigor after a brief period of rest for the infantry on both sides, while the artillery kept up its daily and nightly duel without ceasing, until the entire terrain became an earthly inferno, thickly scattered over with the dead and the dying."

THE DEADLY MINE IN CAURES WOOD.

Frightful in result, too, was the tragic stratagem played on the Germans in Caures Wood, near the village of Beaumont. The whole wood had been mined by the French, and was connected electrically with a station in the village. When the Germans had advanced, fully a division strong, to attack the wood, the French regiment holding it ran, as if seized with panic, back toward the village. The Germans pursued them with shouts of victory. Soon the last Frenchman had emerged from the trees, but the French commander waited until the Germans were all in the mined area. They were just beginning to debouch on the other side when he pressed the button. There was a tremendous roar, drowning for a moment even the boom of the cannon. The wood was covered with a cloud of smoke, and even on the French trenches in Beaumont "there rained a ghastly dew." When the French re-entered the wood, unopposed, they found not a single German unwounded, and hardly a score alive.

GERMAN LOSSES AT VERDUN.

The German successes during the weeks of fighting in the vicinity of Verdun, consisting of a series of advances along the front, without any decisive result so far as the strength of the defense of the main fortress was concerned, were gained at the cost of enormous losses in killed and wounded. These losses were estimated on April 7 to have reached the huge total of 200,000—one of the greatest battle losses in the whole range of warfare. During the period from February 21, when the battle of Verdun began, to April 1, it was said that two German army corps had been withdrawn from the front, having lost in the first attacks at least one-third of their force. They subsequently reappeared and again suffered like losses, the German reinforcements being practically used up as fast as they were put in line.

Declarations gathered from prisoners and the observations of the French staff led the latter to estimate that at least one-third of the total number of men engaged were the minimum losses of the German infantry during the first forty days of the battle, or 150,000 men of the first fighting line alone.

Concerning the German losses before Verdun, Col. Feyler, a Swiss military expert, wrote on April 10 as follows: "It is certain that the first great attacks in February and March caused the German assailants very exceptional losses. The 18th army corps lost 17,000 men and the 3d corps lost 22,000. These are figures which in the history of wars will form a magnificent eulogy on the heroism of these troops. It will become a classic example, like that of the Prussian Guard at St. Privat, France, August 18, 1870. It is probable that before Verdun, as at St. Privat, the leaders underestimated the defenders' strength, especially in cannon and machine guns.

"There are other examples. In the unfruitful attack on Fort Vaux, the 7th reserve regiment was literally mowed down by machine guns, while the 60th regiment lost 60 per cent of its effectives. In the attack on the Malancourt and Avocourt woods, March 20, three regiments of the 11th Bavarian division, whose record in this war seems to have been particularly praiseworthy, lost about 50 per cent of their men."

LOSSES OF THE FRENCH.

While the greater bulk of the total losses in killed and wounded before Verdun was sustained by the Germans, however, it must not be imagined for an instant that the French defenders of the fortress escaped lightly. On the contrary, their losses were likewise enormous, being estimated by the German general staff at a total of

not less than 110,000 from February 20 to April 1. A considerable number of French troops, officers and men, were also captured by the Germans during the numerous attacks in February, March and April upon the French trenches and other positions before Verdun.

A MILLION MEN ENGAGED.

Some idea of the tremendous forces engaged on both sides in what will probably be called in history "the Siege of Verdun," may be gained from the brief summary made on April 1 by an observer present with the army of the Crown Prince of Germany on the north front of the Verdun battlefield, from which point of vantage he telegraphed as follows:

"Probably not far from a million men are battling on both sides around Verdun. Never in the history of the world have such enormous masses of military been engaged in battle at one point.

"On the forty-mile semicircular firing-line around the French fortress, from the River Meuse above St. Mihiel to Avocourt, the Germans probably have several thousand guns, at least 2,500, in action or reserve. Were each gun fired only once an hour, there would be a shot every second.

"As probably half the guns are of middle and heavy caliber, the average weight per shell is certain to be more than twenty-five pounds. It follows that even in desultory firing about 160,000 pounds of iron, or from four to five carloads, are raining on the French positions every hour. And this is magnified many times when the fire is increased to the intensity which the artillerymen call 'drumming' the positions of the enemy.

"To the German guns must be added the tremendous amount of artillery used by the French in their defense, estimated to be almost as large now as that of the Germans. The conclusion is that more than 6,000 cannon, varying from 3-inch field guns to 42-centimeter (16-inch) siege mortars, are engaged in hurling thousands of high explosive shells hourly in the never-ceasing, thunderous artillery duels of the mighty battle of Verdun."

FROM A GERMAN OFFICER'S VIEWPOINT.

The stories told by those who, on the German side, lay in trenches under shell-fire before Verdun for days at a time and week after week, freezing, thirsting, in mud and water, between the dead and the dying, thrilled the hearer with their pathos and devotion. These were the men who, like the waves of the sea, beat almost incessantly against the obstinate fortifications of Verdun, and there learned a new respect for the French enemy. Such a story was written from the front in April by a German officer named Ross—

a man of Scottish descent—who, before the war, was editor of a newspaper in Munich. In the Berlin Vossische Zeitung he said:

"It is a worthy, embittered foe against whom this last decisive struggle is aimed. France is fighting for her existence. She is no weaker than we are in men, guns, or munitions. Only one thing decides between us—will and nerves. Every doubting, belittling word is a creeping poison which kills joyful, strong hope and does more damage than a thousand foes. Only if we are convinced to our marrow that we shall win, shall we conquer.

"In this colossal combat, where numbers and mechanical weapons are so utterly alike, moral superiority is everything. We have more than once had the experience that the effective result of a battle has depended upon who considered himself the victor and acted accordingly. Often the merest remnant of will and nerves was the factor that influenced the decision.

"War, which only smoldered here and there during the endless trench fighting, like damp wood, burns here with such all-consuming fire that divisions have to be called up after days and hours in the trenches, and are ground to pieces and burned up into so many cinders and ashes.

"Such intensity of battle as is here before Verdun is unheard of. No picture, no comparison, can give the remotest conception of the concentration of guns and shells with which the two antagonists are raging against each other. I have seen troops who had held out in the fire for days and weeks, to whom in exposed positions food could hardly be brought, on whose bodies the clothes were not dry, who, yet reeking with dirt and dampness, had the nerve for new storming operations."

BATTLE OF CAILLETTE WOOD.

Among the fiercer struggles before Verdun, the battle of Caillette Wood, east of the fortress city, will have a place in history as one of the most bloody and thrilling.

The position of the wood, to the right of Douaumont, was important as part of the French line. It was carried by the Germans on Sunday morning, April 2, after a bombardment of twelve hours, which seemed to break even the record of Verdun for intensity. The French curtain of fire had checked their further advance, according to a special correspondent of the Chicago Herald, and a savage countercharge in the afternoon had gained for the defenders a corpse-strewn welter of splintered trees and shell-shattered ground that had been the southern corner of the wood. Further charges had broken against a massive barricade, the value of which as a defense paid good interest on the expenditure of German lives which its construction demanded.

A wonderful work had been accomplished that Sunday morning in the livid, London-like fog and twilight produced by the lowering clouds and battle smoke.

FORMED A HUMAN CHAIN UNDER FIRE.

While the German assaulting columns in the van fought the French hand to hand, picked corps of workers behind them formed an amazing human chain from the woods to the east over the shoulder of the center of the Douaumont slope to the crossroads of a network of communicating trenches 600 yards in the rear.

Four deep was this human chain, and along its line nearly 3,000 men passed an unending stream of wooden billets, sandbags, chevaux-de-frise, steel shelters, and light mitrailleuses—in a word, all the material for defensive fortifications passed from hand to hand, like buckets at a country fire.

Despite the hurricane of French artillery fire, the German commander had adopted the only possible means of rapid transport over the shell-torn ground covered with debris, over which neither horse nor cart could go. Every moment counted. Unless barriers rose swiftly, the French counter-attacks, already massing, would sweep the assailants back into the wood.

Cover was disdained. The workers stood at full height, and the chain stretched openly across the hillocks, a fair target for the French gunners. The latter missed no chance. Again and again great holes were torn in the line by the bursting melinite, but as coolly as at maneuvers the iron-disciplined soldiers of Germany sprang forward from shelters to take the places of the fallen, and the work went on apace.

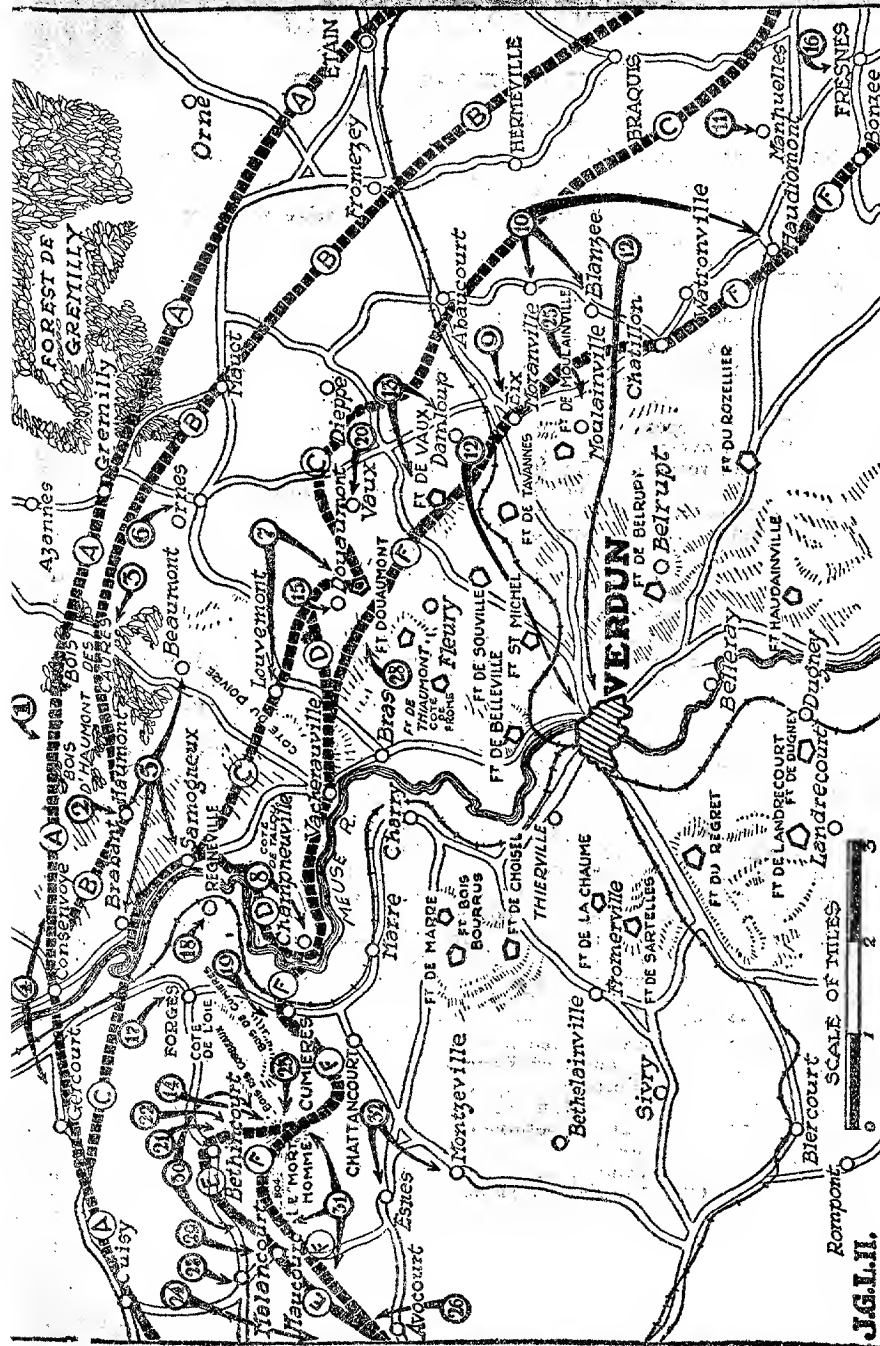

USE THE DEAD AS A SHELTER.

Gradually another line doubled the chain of the workers, as the upheaved corpses formed a continuous embankment, each additional dead man giving greater protection to his comrades, until the barrier began to form shape along the diameter of the wood. There others were digging and burying logs deep in the earth, installing shelters and mitrailleuses or feverishly building fortifications.

At last the work was ended at fearful cost; but as the vanguard sullenly withdrew behind it, from the whole length burst a havoc of flame upon the advancing Frenchmen. Vainly the latter dashed forward. They couldn't pass, and as the evening fell the barrier still held, covering the German working parties, burrowed like moles in the mass of trenches and boyeaux.

FRENCH PLAN TO BLAST BARRICADE.

So sound was the barricade, padded with sandbags and earth-

VERDUN--THE WORLD'S GREATEST BATTLEFIELD.

Approximate Positions of German Troops at Various Dates, and More Important Actions of the Verdun Campaign in Their Chronological Order.—See Key to Letters and Numbers on Opposite Page.

THE VERDUN BATTLEFIELD

Key to Map on Opposite Page

Battle lines showing the approximate positions of the German troops at Verdun at various dates are designated in the map as follows:

- A. Positions Feb. 21, 1916, when German offensive was begun.
- B. Positions on Feb. 23.
- C. Positions on Feb. 25.
- D. Positions on Feb. 27.
- E. Bethincourt salient, April 7, before French retired.
- F. Positions on April 18.

The more important actions of the Verdun campaign in their chronological order are indicated as follows:

- 1. Germans open offensive against Verdun, piercing French lines.
- 2. French evacuate Haumont, Feb. 22.
- 3. French recapture Forest of Caures, Feb. 22, but lose it again.
- 4. Germans pierce French line, taking 3,000 prisoners.
- 5. Germans capture Brabant, Haumont, Samogneux, etc., Feb. 23.
- 6. Berlin reports capture of four villages and 10,000 French prisoners, Feb. 23.
- 7. Germans capture Louvemont and fortified positions Feb. 25. Fort Douaumont stormed by Brandenburg corps, then surrounded by French, but relieved by Germans March 3.
- 8. Germans take Champneuville Feb. 27, with 5,000 prisoners.
- 9. Bloody encounters at village of Eix on Woevre plain, Feb. 27.
- 10. Germans occupy Moranville and Haudiomont, Feb. 27.
- 11. Champlon and Manheulles fall Feb. 28; 1,300 French prisoners.
- 12. Verdun battered and set on fire by 42-centimeter guns.
- 13. French evacuate Fort Vaux, after heavy bombardment, March 1.
- 14. Germans begin violent bombardment of Dead Man's Hill, March 1.
- 15. Germans capture village of Douaumont, March 2; 1,000 prisoners.
- 16. Fresnes captured by Germans, March 5.
- 17. Germans capture Forges, March 5; drive against French left wing.
- 18. Germans take Regneville, west of Meuse, March 6.
- 19. Germans capture heights of Cumieres, etc., March 7.
- 20. Village of Vaux taken and retaken by Germans, March 8-10.
- 21. Crown Prince brings up 100,000 reinforcements, March 10-12.
- 22. French recapture trenches March 14, with 1,000 German prisoners.
- 23. Struggle for heights of Le Mort Homme, March 16.
- 24. Germans capture positions north of Avocourt, March 20.
- 25. Artillery duels east of Verdun, March 25.
- 26. French recapture part of Avocourt Wood, March 28.
- 27. Germans capture Malancourt, March 29-31.
- 28. Heavy fighting south of Douaumont, April 2-5; French successes in battle of Caillette woods, etc.
- 29. Germans recapture Haucourt, April 6.
- 30. Germans close in on Bethincourt salient, April 7.
- 31. French withdraw from Bethincourt April 9, but hold lines south.
- 32. French lines bombarded continuously, April 10-15, with violent assaults but no decisive results.

works, that the artillery fire fell practically unavailing, and the French general realized that the barrier must be breached by explosives, as in Napoleon's battles.

It was 8 o'clock and already pitch dark in that blighted atmosphere when a special blasting corps, as devoted as the German chain workers, crept forward toward the German position. The rest of the French waited, sheltered in the ravine east of Douaumont, until an explosion should signal the assault.

In Indian file, to give the least possible sign of their presence to the hostile sentinels, the French blasters advanced in a long line, at first with comparative rapidity, only stiffening into the grotesque rigidity of simulated death when the searchlights played upon them, and resuming progress when the beam shifted. Then as they approached the barrier they moved slowly and more slowly. When they arrived within forty yards the movement of the crawling men became imperceptible.

The blasting corps lay at full length, like hundreds of other motionless forms about them, but all were working busily. With a short trowel, the file leader scuffed the earth from under his body, taking care not to raise his arms, and gradually making a shallow trench deep enough to hide him. The others followed his example until the whole line had sunk beneath the surface.

Then the leader began scooping his way forward, while his followers deepened the furrow already made. Thus literally inch by inch the files stole forward, sheltered in a narrow ditch from the gusts of German machine-gun fire that constantly swept the terrain. Here and there the sentinels' eyes caught a suspicious movement or an incautiously raised head sank down pierced by a bullet, but the stealthy, molelike advance continued. Hours passed. It was nearly dawn when the remnant of the blasting corps reached the barricade at last and hurriedly put their explosives in position. Back they wriggled breathlessly. An over-hasty movement meant death, yet they must hurry lest the imminent explosions overwhelm them.

Suddenly there was a roar that dwarfed the cannonade and all along the barrier fountains of fire rose skyward, hurling a rain of fragments upon what was left of the blasting party.

THREE OUT OF FOUR DIE.

The barricade was breached, but 75 per cent of the devoted corps had given their lives to do it.

As the survivors lay exhausted the attackers charged over them, cheering. In the melee that followed there was no room to shoot or wield the rifle. Some of the French fought with unfixed bayonets, like the stabbing swords of the Roman legions. Others

had knives or clubs. All were battle-frenzied, as only Frenchmen can be.

The Germans broke, and as the first rays of dawn streaked the sky only a small section of the wood was still in their hands. There a similar barrier stopped progress, and it was evident that the night's work must be repeated; but the hearts of the French soldiers were leaping with victory as they dug furiously to consolidate the ground they had gained, strewn with German bodies, thick as leaves. Over 6,000 Germans were counted in a section a quarter of a mile square, and the conquerors saw why their cannonade had been so ineffective. The Germans had piled a second barrier of corpses close behind the first, so that the soft human flesh would act as a buffer to neutralize the force of the shells.

FRENCH DEFENSE TRULY HEROIC.

While all the German attacks upon the French lines in front of Verdun were marked with the utmost valor and intensity of devotion, the continuous defense made by the French under General Petain was equally vigorous and often truly heroic. Volunteers frequently remained in the French trenches from which the rest of the French defenders had been compelled to retire, to telephone information about the advancing enemy to the French batteries, and some of the heaviest losses of the Germans occurred when they believed themselves successful in an attack.

The consequences of such devotion on the part of French volunteers were exemplified early in the morning of April 12, at a point called Caurettes Woods, along the northeastern slopes of the hill known as Le Mort Homme (Dead Man's Hill), where a French withdrawal had been carried out. Volunteers remained behind to signal information to the French batteries, and an eyewitness of the attack described what followed thus:

"The French seventy-fives immediately concentrated on the hostile trench line. The Germans suffered heavily, but persevered, and soon dense columns appeared amid the shell-torn brushwood on the southern fringe of the Corbeaux Wood, pouring down into the valley separating them from the former French position on the hillside.

"Thinking the French still held the latter, the Germans deployed with their latest trench-storming device in the form of liquid fire containers, with special groups of four installed, two men working the pump and two directing the fire jet.

"The grayness of the dawn was illuminated by sheets of green and red flame and black oily clouds rolled along the valley toward the river like smoke from a burning 'gusher.'

"Suddenly the air was filled with shrill whistling, as shells of the seventy-fives were hurled against the attackers. Thanks to the devoted sentinels dying at their posts in the sea of fire, the range was exact, and the exploding melinite shattered the charging columns.

"An appalling scene followed. The shells had burst or overthrown the fire containers and the Germans were seen running wildly amid the flames which overwhelmed hundreds of wounded and disabled.

FRENCH TROOPS CHARGE.

"In this scene of confusion the French charged with bayonet, despite the furnace heat and fumes produced by the red-hot containers flying in all directions. The enemy offered little resistance. It was like a slaughter of frenzied animals.

"The French mitrailleuse corps pressed close on their comrades' heels, placing weapons at vantage points that had escaped the fire and showering a leaden hail upon the main body of Germans retreating up Corbeaux Hill.

"Hundreds fought in a terror-stricken mob to hide in a hole that might have sheltered a score. Those beneath were stifled. Those above threw themselves screaming into the air as the bullets pierced them or fell dead in a wild dash toward a safer refuge. Flushed with success, the French charged again right to the entrance of the wood, and the slaughter recommenced.

"Five of the heroic sentinels, wonderful to say, returned with the French wave that ebbed when victory was won for that day."

CONDITIONS AT VERDUN ON APRIL 20.

Several determined attacks were delivered by the Germans on the French lines at Verdun between April 15 and 20, enormous masses of men, sometimes as many as 100,000, being hurled against points in the northeast sector of the battle front. But the French defense held firm, although some trenches were lost and a considerable number of French prisoners were taken. Up to this time the total number of prisoners taken by the Germans at Verdun, from the beginning of the offensive, February 21, was claimed to be 711 officers and 38,155 men.

Such were the conditions before Verdun on April 20, when, with spring well under way on the Western battle fronts, there was daily expectation of a vigorous drive by the Allies against the German lines between Verdun and the sea. While both sides expressed confidence in the outcome of the war, no man could foretell with any degree of certainty what the final result of the great struggle would be.

ZEPPELIN RAIDS ON ENGLAND.

During the month of March and early in April a number of Zeppelin raids upon various parts of England did more or less damage, though none of an important military character. The east coast of Scotland also suffered from a Zeppelin visit in April.

Reports and figures issued by the British War Office showed that during the fifteen months from Christmas, 1914, to April 1, 1916, no fewer than thirty-four separate aerial raids occurred in Great Britain, including those of aeroplanes and Zeppelins. The total casualties suffered, mainly by civilians, men, women, and children, were 303 killed and 713 injured. This record of results is interesting when it is remembered what they must have cost the Germans in money and men, in view of the comparatively small amount of damage that seems to have been done. Germany, however, insisted that her air raids had done more substantial harm to England than the War Office would admit.

RUSSIAN ACTIVITIES IN THE EAST.

With the approach of spring in 1916, new activities began on the Eastern front, and the Russians threatened a vigorous attack on the German lines in the north "after the thaw." By the middle of the summer the Russians expected, according to semi-official reports, to have twelve million men armed, drilled, and equipped for battle.

On April 1 the Berlin government declared that in the Russian offensive on the Eastern front, against Field Marshal von Hindenburg, which lasted from March 18 to March 30, the losses to the Russians were 140,000 out of the 500,000 men engaged. This campaign was carried on mostly in the frozen terrain of the Dvinsk marshes, and along the Dvina River, and the German losses were also heavy, although the Russian attacks were as a rule repulsed.

FALL OF TREBIZOND.

In Asia Minor, however, Russian successes of the winter were crowned in the early spring by the fall of the Baltic seaport of Trebizond, which was occupied on April 18. This city, the most important Turkish port on the Black Sea, was captured by the Russian army advancing from Erzerum. Aided by the Russian Black Sea fleet, the invaders pushed past the last series of natural obstacles along the Anatolian coast when, on Sunday, April 16, they occupied a strongly fortified Turkish position on the left bank of the Kara Dere River, twelve miles outside the fortified town. The official Russian report said:

"Our valiant troops, after a sanguinary battle on the Kara Dere River, pressed the Turks without respite, and surmounted incredible

obstacles, everywhere breaking the fierce resistance of the enemy. The well-combined action of the fleet permitted the execution of most hazardous landing operations, and lent the support of its artillery to the troops operating in the coastal region.

"Credit for this fresh victory also is partly due the assistance given our Caucasian army by the troops operating in other directions in Asia Minor. By their desperate fighting and heroic exploits, they did everything in their power to facilitate the task of the detachments on the coast."

GERMANY AND THE UNITED STATES.

The long-continued controversy between the United States and Germany over the methods and results of German submarine warfare came to a climax with the torpedoing of the British channel steamer *Sussex*, on March 24, 1916, in pursuance of the new German policy of attacking merchant vessels without warning. There was no pretense that the *Sussex* was an "armed merchantman," and no warning was given the passengers and crew, the former including a number of Americans on their way from Folkestone to the French port of Dieppe. The ship, though badly damaged, made port with assistance, but the loss of life from the explosion and drowning amounted to fifty, and several American passengers were injured. Germany disclaimed responsibility for the disaster, but the weight of evidence pointed to a German submarine as the cause, and in view of the repeated violations of German promises to the United States to give due warning to passenger vessels and insure safety to their occupants, President Wilson and his advisers, in April, seriously considered the advisability of breaking off diplomatic relations with the German Empire, by way of a protest in the name of humanity. On April 18 the President decided to lay the whole matter before Congress.

The record of German submarine attacks involving death or injury to American citizens up to this time included the sinking or damaging of the following vessels: British steamer *Falaba*, 160 lives lost, including one American; American steamer *Gulflight*, three Americans lost; British steamship *Lusitania*, 1,134 lives lost, including 115 Americans; American steamer *Leelanaw*, sunk; liner *Arabic* sunk, two Americans killed; liner *Hesperian* sunk mysteriously, three days after Germany had promised to sink no more liners; Italian liner *Ancona* sunk (by Austrian submarine), with loss of American lives; Japanese liner *Yanaka Maru* sunk in Mediterranean; British liner *Persia* sunk, United States Consul *McNeely* killed; steamer *Sussex* attacked, several Americans seriously injured; British steamers *Manchester Engineer*, *Eagle Point* and *Berwyn Dale* attacked, endangering American members of crews.

A FINAL NOTE TO GERMANY.

On Wednesday, April 19, President Wilson appeared before Congress, assembled in joint session for the purpose of hearing him, and announced that he had addressed a final note of warning to Germany, giving the Imperial German Government irrevocable notice that the United States would break off diplomatic relations if the illegal and inhuman submarine campaign was continued. The language used by the President, after recounting the course of events leading to his action, was as follows:

"I have deemed it my duty, therefore, to say to the Imperial German Government that if it is still its purpose to prosecute relentless and indiscriminate warfare against vessels of commerce by the use of submarines, the government of the United States is at least forced to the conclusion that there is but one course it can pursue; and that unless the Imperial German Government should now immediately declare and effect an abandonment of its present method of warfare against passenger and freight-carrying vessels this government can have no choice but to sever diplomatic relations with the government of the German Empire altogether."

THE GERMAN WAR CLOUD PASSES.

Germany replied to the President's note on May 4, denying the implication of intentional destruction of vessels regardless of their nature or nationality, and declaring that in future no merchant vessels should be sunk without warning or without saving human lives, "unless the ships attempt to escape or offer resistance."

On May 8, President Wilson dispatched a reply to Germany's note, accepting the German promises as to the future conduct of submarine warfare, but refusing to regard them as contingent on any action between the United States and any other country. Germany later admitted that a German submarine sank the *Sussex*, and promised that the commander would be punished and indemnities paid to the families of those who perished.

This was regarded at Washington as practically closing the submarine controversy, and the German war-cloud, which had assumed serious proportions, gradually passed away.

ABORTIVE REVOLT IN IRELAND.

An attempt at rebellion by Irish extremists, accompanied by bloody riots in Dublin and other cities in the south and west of Ireland, followed the sinking on April 21 of a German vessel which, convoyed by a submarine, endeavored to land arms and ammunition on the Irish coast. Sir Roger Casement, an anti-British Irishman of considerable note, who had been resident in Germany for some months, was taken prisoner upon landing from the submarine.

For several days, beginning April 25, the rebels, who formed an inconsiderable part of the Irish people and were strongly condemned by the Nationalist leaders and party, held possession of streets and public buildings in Dublin. Incendiary fires did damage estimated at over \$100,000,000, many peaceable citizens were killed, and the casualties among British troops and constabulary amounted to 521, including 124 killed, before the uprising was quelled and the "Irish Republic" overthrown, with the unconditional surrender of its deluded leaders, on April 30. Next day the remnants of the Sinn Fein rebels in Ireland surrendered, making over 1,000 prisoners, who were transported to English prisons. Military law had been proclaimed throughout Ireland and nearly a score of the leaders of the revolt, who were accused of murder, were tried by court-martial and summarily executed. The revolt was alleged to have been encouraged in Germany and also by Irish extremists in the United States, by whom the rebel leaders executed in Ireland were regarded as "martyrs."

BRITISH SURRENDER AT KUT-EL AMARA.

After holding out against the Turks at Kut-el-Amara, in Mesopotamia, for 143 days, General Townshend, the British commander, was compelled, through exhaustion of his supplies, to surrender his force of 9,000 officers and men, on April 28. This force included about 2,000 English and 7,000 Indian troops, many being on the sick list. The Turks recognized the gallantry of the defense and refused to accept General Townshend's sword. Many of the sick and wounded were exchanged, and it was planned to imprison the rest of the British force on an island in the Sea of Marmora.

ATTACKS ON VERDUN CONTINUE.

German attacks on the French lines at Verdun continued with the utmost vigor up to June 10. From time to time they resulted in small successes, gained at immense cost in human life. From May 27 to May 30 the battle raged with especial severity, this period marking the greatest effort made by the Germans during the whole of the prolonged operations at Verdun. The French stood firm under an avalanche of shot and shell, and drove back wave after wave of a tremendous flood of Teutonic infantry. The infantry fighting in this struggle was described as the fiercest of the war.

The total German casualties up to June 1 were estimated at nearly 3,000,000; the French at 2,500,000, and the British at 600,000, over 25,000 of the latter being commissioned officers.

General Joseph S. Gallieni, former minister of war of France, died at Versailles on May 27, universally mourned by the French, who regarded him as the saviour of Paris in the critical days of August-September, 1914, when he was military governor of Paris and commander of the intrenched camp.

CHAPTER XXVII

THE WORLD'S GREATEST SEA FIGHT.

British and German High-Sea Fleets Finally Clash in the North Sea—Huge Losses in Tonnage and Men on Both Sides—British Navy Remains in Control of the Sea.

After many months of unceasing sea patrol on the part of the British, and of diligent preparation in port on the German side, it came at last—the long-expected clash of mighty rival fleets in the North Sea.

It was on the misty afternoon of Wednesday, May 31, that Admiral David Beatty, in command of Britain's battle-cruiser squadron, sighted the vanguard of the German high-seas fleet steaming "on an enterprise to the north" from its long-accustomed anchorages in the placid waters of the Kiel Canal and under the guns of Helgoland.

The British battleship fleet was far away to the northwest, but the wireless promptly flashed the signal, "Enemy in sight," and as the battle-cruisers raced to close quarters with the tardy foe, and sacrificed themselves in the effort to hold him in the open sea, down from the north rushed the leviathans of the Mistress of the Seas, that were counted on to crush the enemy when the opportunity came.

But the early stages of the fight found the British battling against odds. Germany's mightiest warcraft were in the shadows of the mist, behind the cruiser scouts; destroyers swarmed around them, submarines appeared from the depths, and Zeppelins hovered overhead.

Gallantly did Admiral Beatty on his victorious Lion struggle to hold his own till the British battleships came up; but one after another his hard-pressed cruisers succumbed to weight of metal, until five of them had sunk beneath the sea, with all their devoted crews, before the near approach of Admiral Jellicoe and his dreadnaughts sent the enemy scuttling back to port, to claim a victory that startled the world for a day, only to disappear when the full extent of the German losses became known, and it was learned that the German high-seas fleet had lost some of its proudest units, that its losses, not only relatively but absolutely almost equaled those of the British fleet, and that the British remained in full control of the high seas, after scouring them in vain for further signs of the enemy.

THE BRITISH LOSSES.

The ships lost by the British in the battle included three battle-cruisers, the Queen Mary, Indefatigable, and Invincible; three light cruisers, the Defense, Black Prince, and Warrior, and eight destroyers, the Tipperary, Turbulent, Nestor, Alcaster, Fortune, Sparrowhawk, Ardent, and Shark. The Wariror, badly damaged, was taken in tow, but sank before reaching port. All but one of its crew were saved.

The British dreadnaught Marlborough was also damaged, but succeeded in making port for repairs.

Following are particulars of the British cruisers sunk:

QUEEN MARY—27,000 tons; 720 feet long. Eight 13.5 inch guns, sixteen 4 inch guns, three 21 inch torpedo tubes. Complement, 900. Cost, \$10,000,000.

INDEFATIGABLE—18,750 tons; 578 feet long. Eight 12 inch guns, sixteen 4 inch guns, three 21 inch torpedo tubes. Complement, 900. Cost, \$8,000,000.

INVINCIBLE—17,250 tons; 562 feet long. Eight 12 inch guns, sixteen 4 inch guns, three 21 inch torpedo tubes. Complement, 731. Cost, \$8,760,000.

DEFENSE—14,600 tons; 525 feet long. Four 9.2 inch guns, ten 7.5 inch guns, sixteen 12 pounders, five torpedo tubes. Complement, 755. Cost, \$6,810,000.

BLACK PRINCE—13,550 tons; 480 feet long. Six 9.2 inch guns, twenty 3 pounders, three torpedo tubes. Complement, 704. Cost, \$5,750,000.

WARRIOR—13,550 tons; 480 feet long. Six 9.2 inch guns, four 7.5 inch guns, twenty-four 3 pounders, three torpedo tubes. Complement, 704, all saved but one. Cost, \$5,900,000.

The destroyers sunk were each of about 950 tons, 266 feet long, and carried a complement of 100 men. Only a few survivors were picked up after the battle.

THE GERMAN LOSSES.

The German losses, as claimed by the British, included two dreadnaughts, believed to be the Hindenburgh and Westfalen, each of approximately 26,000 tons, with a compliment of 1,000 men; the battle-cruiser Derfflinger, 26,600 tons, complement, 900 men; the battleship Pommern, of 12,997 tons, complement, 729 men, cost, \$6,000,000; the new fast cruiser Elbing, of 5,000 tons, complement, 500 men; the cruisers Frauenlob, of 2,715 tons, complement, 264 men, and Wiesbaden, not registered; a number of destroyers, variously estimated at from six to sixteen, and one submarine rammed and sunk. Besides these, the battle-cruiser Lutzow, of 26,600 tons, was

reported badly damaged, and the battle-cruiser Seydlitz, of equal size, suffered heavily in the battle and was hotly pursued to the mine fields of Helgoland.

The total loss of life in the battle amounted to approximately 4,800 British, including 333 officers; and probably 4,000 or more Germans. Rear-Admiral Horace Hood, second in command of the battle-cruiser fleet, went down with the *Invincible*. Rear-Admiral Arbuthnot went down with the *Defense*.

STORY OF THE BATTLE.

The great naval battle, which may go down in history as the battle of the Skager Rack, was fought in the eastern waters of the North Sea, off the coast of Denmark. It lasted for many hours, fighting being continued through the night of May 31-June 1. In general, the battle area extended from the Skager Rack southward to Horn Reef off the Danish coast, the center of the fighting being about 100 miles north of Helgoland, the main German naval base in the North Sea.

Both in the number of lives and the tonnage lost, the battle was the greatest sea-fight in history, as well as the first in which modern dreadnaughts have been engaged. Never before have two naval forces of such magnitude as the British and German high-sea fleets engaged in combat.

The greatest previous tonnage loss was during the Japanese-Russian war. In the naval battle of Tsushima in May, 1905, the loss totaled 93,000 tons. Twenty-one Russian craft were sunk in this fight.

The text of the first British admiralty statement was in part as follows:

"On the afternoon of Wednesday, May 31, a naval engagement took place off the coast of Jutland. The British ships on which the brunt of the fighting fell were the battle-cruiser fleet and some cruisers and light cruisers, supported by four fast battleships. Among these the losses were heavy.

"The German battle fleet aided by low visibility avoided a prolonged action with our main forces. As soon as they appeared on the scene the enemy returned to port, though not before receiving severe damage from our battleships."

The battle was one in which no quarter was asked or even possible. There were no surrenders, and the ships lost went down and carried with them virtually the whole crews. Only the *Warrior*, which was towed part way from the scene of battle to a British port, was an exception.

Of the thousand men on the *Queen Mary*, only a corporal's guard was accounted for. The same was true of the *Invincible*, while there

were no survivors reported from the Indefatigable, the Defense or the Black Prince.

TELL OF BATTLE HORRORS.

After the battle there were many stories of ships sinking with a great explosion; of crews going down singing the national anthem; of merchant ships passing through a sea thick with floating bodies.

From survivors came thrilling stories of the horrors and humanities of the battle. The British destroyer Shark acted as a decoy to bring the German ships into the engagement. It was battered to pieces by gunfire, and a half dozen sailors, picked up clinging to a buoy by a Danish ship, told of its commander and two seamen serving its only remaining gun until the last minute, when the commander's leg was blown off.

A lifeboat with German survivors from the German cruiser Elbing rescued Surgeon Burton of the British destroyer Tipperary. He had sustained four wounds.

THE FIRST OFFICIAL STORY.

The first account in detail of the battle was given by a high official of the British Admiralty, who said on June 4:

"We were looking for a fight when our fleet went out. Stories that the fleet was decoyed by the Germans are sheerest nonsense. In a word, with an inferior fleet we engaged the entire German high sea fleet, interrupted their plans, and drove them back into their harbors.

"In carrying out the plan decided upon we sustained heavy losses, which we expected, but we also attained the expected result of forcing the enemy to abandon his plan and seek refuge after we had given battle in his own waters near his coast.

"With the exception of two divisions, part of which was only partly engaged, the brunt of battle was borne by the battle-cruiser fleet, and with one exception our battle fleet is ready for sea service. I must admit that we had exceptionally hard luck with our battle-cruisers, but the loss of three great ships does not in any measure cripple our control of the sea.

"The great battle had four phases. The first opened at 3:15 p. m., when our battle-cruisers, at a range of six miles, joined action with German battle-cruisers. Shortly afterward the second phase began with the arrival on both sides of battleships, the Germans arriving first. But before their arrival our three battle-cruisers had been blown up, supposedly the result of gunfire, although possibly they were victims of torpedoes.

"Such close range fighting with battle-cruisers might be criticized as bad tactics, but our fleet, following the traditions of the navy, went

out to engage the enemy, and on account of weather conditions could do so only at short range.

"The third phase was the engagement of battleships, which never was more than partial. This phase included a running fight, as the German dreadnaughts fled toward their bases. All the big ship fighting was over by 9:15 p. m.

ENEMY GONE BY DAWN.

"Then came one of the most weird features of the battle, as German destroyers made attack after attack, like infantry following artillery preparation, on our big ships. But these onslaughts were futile, not a single torpedo launched by them getting home.

"With the morning these attacks ended and the scene of battle was swept by Jellicoe's fleet. Not a single enemy vessel remained in sight.

"An incident of the great battle was the torpedoing of the super-dreadnaught Marlborough, which is now safely in harbor. It must have struck a veritable hornets' nest of submarines, as by skillful maneuvering it avoided three of these before it was finally hit.

"Early in the engagement, according to Admiral Beatty's report, a German battle-cruiser, after being hotly engaged, blew up and broke in two.

"Officers of the fleet also reported passing a closely engaged German battle-cruiser which was left behind while the British pursued the Germans. On their return this vessel was missing. Judging from its previous plight it must now be at the bottom of the sea. This accounts for two of the enemy's battle-cruisers, and we have their admission that they had lost two battleships.

"Zeppelins did not play the important part attributed to them. Only one appeared. It remained in action a brief time, retiring under heavy fire, evidently badly damaged. Weather conditions were such that it is doubtful whether any aircraft would have been of much service.

"The enemy sprang no surprises. We saw nothing of any 17-inch guns. No tricks were used which were not already known in naval warfare.

"From the standpoint of actual strength the navy's loss in personnel, while great, was not serious, as we have plenty of men to replace them. But the deaths of so many gallant officers and men have caused profound grief.

"Admiral Hood went down with his flagship *Invincible*, in the words of Admiral Beatty's report, 'leading his division into action with the most inspiring courage.' His flag captain, Cay, went down with him. Capt. Sowerby, former British naval attaché at Wash-

ington, perished with his ship, the Indefatigable, while Capt. Prowse died on the Queen Mary."

BODIES FLOATING IN THE SEA.

From Copenhagen it was reported on June 3 that hundreds of bodies, many of them horribly mutilated by explosions, and great quantities of debris were drifting about in the North Sea near the scene of the battle. All steamers arriving at Danish ports reported sighting floating bodies and bits of wreckage.

The steamer Para picked up a raft aboard which were three German survivors from the torpedo boat V-48. They had clung to the raft for forty-eight hours and were semi-conscious when rescued. They reported that ninety-nine of the V-48 crew perished and that in all about twenty German torpedo boats were destroyed.

Other German sailors, rescued by Scandinavian steamers, described the Teutonic losses in the Jutland battle as colossal. A number of the crew of the cruiser Wiesbaden and men from several German torpedo boats were rescued and brought to Copenhagen. They reported that many of their comrades, after floating for thirty-six hours on rafts without food or water, drank the sea water, became insane and jumped into the ocean.

The German survivors said that several of their torpedo boats and submarines were capsized by the British shells and sank instantly. Bodies of both British and German sailors were washed ashore on the coast of Jutland.

OFFICER'S STORY OF THE FIGHT.

Survivors who arrived at Edinburgh on June 5 from British destroyers which made a massed attack on a German battleship in the battle off Jutland, were convinced that they sent to the bottom the dreadnaught Hindenburg, the pride of the German navy. These sailors said that the Hindenburg was struck successively by four torpedoes while the destroyers dashed in alongside of its hull, tearing it to pieces until the mighty ship reeled and sank.

An officer from one of the British destroyers gave the following graphic account of the battle:

"The ships of the grand fleet went into action as if they were going into maneuvers. From every yardarm the white ensign flew, the flag which is to the sailor as the tattered colors were in days of old to a hard-pressed regiment. That it went hard with the battle-cruisers is apparent, but one ship cannot fight a dozen. They had fought a great fight, a fight to be proud of, a fight which will live longer than many a victory.

"We fought close into the foe, and if anything is certain in the uncertainties of naval battle it is that we gave at least as good as we

got. We passed along the line of German ships some miles away and let off broadside after broadside. The air was heavy with masses of smoke, black, yellow, green and every other color, which drifted slowly between the opposing lines, hiding sometimes friend and sometimes foe. The enemy ships were firing very fast, but watching the ships in front one came to the conclusion that the shooting was decidedly erratic. Again and again salvos of shells fell far short of the mark, to be followed immediately by others which screamed past high in the air.

ROAR OF THE GUNS TERRIFIC.

"I watched the Iron Duke swinging through the seas, letting off broadside after broadside, wicked tongues of flames leaping through clouds of smoke. The din of battle was stunning, stupendous, deafening, as hundreds of the heaviest guns in the world roared out at once. Great masses of water rose in the air like waterspouts, reaching as high as the masts, as the salvos of German shells fell short or went over their target. Now and then a shell found its mark, but it left us absolutely cold as to its effect on each man at a time like this. A dozen men may be knocked out at one's side. It makes no difference.

"It was impossible to see what was happening among the ships of the foe. The smoke obscured everything so effectually that one could only get a glimpse at intervals when a kindly wind blew a lane through the pall. It was apparent that the best ships of the enemy were engaged, but how many neither eye nor glass could make out. The number was certainly large. It was equally impossible to see what damage we were causing. Only the high command knew the progress of the battle. That the damage inflicted on the German ships was great does not admit of any doubt. At one time two vessels, red with fire, gleamed through the smoke.

FLAGSHIP LOSES ITS WIRELESS.

"It is a curious feeling to be in the midst of a battle and not to know to which side fortune leans. Where only a few ships are engaged it is different. Our own losses were known with some degree of exactness, but even that was uncertain. Thus at one time it was thought that the Lion had been lost as it did not answer any call. It transpired that its wireless had been destroyed.

"With the dusk came the great opportunity of the mosquito craft and both sides made use of it to the full. It was in this way that one of the saddest of many sad incidents occurred. A destroyer, true to its name, dashed for the big enemy ship. It soon got into effective range and loosed its torpedo and with deadly effect on a German battleship. The ship went down and the destroyer raced for safety,

the commander and officer standing on the bridge indulging in mutual congratulations at their success. At that moment a shell hit the bridge and wiped out the entire group.

"We fought what was in its way a great fight, although it was not a sailor's battle. Both the grand and the terrible were present to an almost overpowering degree. As a spectacle it was magnificent, awful. How awful, it was impossible to realize until the fever of action had subsided, until the guns were silent and the great ships, some battered, others absolutely untouched, were plowing home on the placid sea."

MEN THRILLED BY BATTLE FEVER.

After describing the battle itself, the officer reverted to incidents preceding it, saying:

"I shall never forget the thrill which passed through the men on the ships of the grand fleet when that inspiring message was received from the battle-cruiser squadron many leagues away: 'I am engaged with heavy forces of the enemy.' One looked on the faces of his fellows and saw that the effect was electrical. The great ships swung around into battle order and the responsive sea rocked and churned as the massive vessels raced for what were virtually enemy waters. As the grand fleet drew near the scene of action the smoke of battle and mutter of guns came down on the winds. The eagerness of the men became almost unbearably intense and it was a blessed relief when our own guns gave tongue."

RUSSIAN TROOPS LAND IN FRANCE.

Between April 20 and June 1, a large flotilla of transports arriving at Marseilles, France, brought Russian soldiers in large numbers to the support of the French line. The transports were understood to have made the voyage of 10,250 miles from Vladivostok under convoy by the British navy.

EARL KITCHENER KILLED AT SEA.

The British armored cruiser Hampshire, 10,850 tons, with Earl Kitchener, the British secretary of state for war, and his staff on board, was sunk shortly after nightfall on June 5, to the west of the Orkney Islands, either by a mine or a torpedo. Heavy seas were running and Admiral Jellicoe reported that there were no survivors. The crew numbered 300 officers and men. Earl Kitchener was on his way to Russia for a secret conference with the military authorities when the disaster occurred. His latest achievement was the creation, from England's untrained manhood, of an army approximating 5,000,000 men, of whom he was the military idol.

CANADIANS IN BATTLE.

After gallantly holding their own for many months against repeated German attacks, the Canadian troops holding that section of the western front southeast of Ypres, between Hooze and the Ypres-Menin railway, were engaged during the week ending June 3, 1916, in a battle scarcely less determined in its nature than that of St. Julien and other great encounters in which they distinguished themselves and added to Canadian military laurels earlier in the war.

On Friday, June 2, the Germans, after a concentrated bombardment with heavy artillery, pressed forward to the assault and succeeded in penetrating the British lines. During the night they pushed their attack and succeeded in cutting their way through the defenses to the depth of nearly a mile in the direction of Zillebeke. The hard-fighting Canadians then rallied and began counter-assaults at 7 o'clock on the following morning. By Sunday morning, June 4, they had succeeded in gradually driving the Germans from much of the ground they had gained, but the losses to the Canadians were severe.

In the British official report of the engagement, it was stated that "the Canadians behaved with the utmost gallantry, counter-attacking successfully after a heavy and continued bombardment." The German losses were very heavy and a large number of dead were abandoned on the recaptured ground. Frederick Palmer, the noted war correspondent, said that for a thousand yards in the center of the line where the Germans secured lodgment the Canadians fired from positions in the rear and filled the ruined trenches with German dead.

It was announced by the War Office that Generals Mercer and Williams, who were inspecting the front trenches on June 2, during the German bombardment, were among the missing. Soon after it was found that General Mercer was severely wounded during the fight, and was taken to hospital at Boulogne, while General Williams, who was wounded less severely, was captured by the enemy. General Mercer was the commander of the Third Division of Canadian troops, which in this action had its first real test in hand-to-hand fighting, and came out of the trial like veterans with glory undimmed.

The two-days' fighting occurred around the famous Hill No. 60 and Sanctuary Wood, names destined to live in Canadian history. It was entirely a Canadian battle, and while the losses of the devoted troops from the Dominion probably reached the regrettable total of over 6,000, including a number of men captured by the Germans during the first day's attack, when they overran the front trenches, they doggedly bombed and bayoneted their way back to the wrecked trenches next day and regained nearly all their front. The commanding officers were especially pleased that the newer Canadian battalions had kept up the traditions of the first contingent, established in 1915 at St.

Julien and elsewhere in France and Flanders, by immediately turning upon the Germans with a counter-attack which was carried out both coolly and skilfully.

The Ypres salient, thus successfully defended by the Canadians in one of the hottest of the minor battles of the war, was regarded by the British commander-in-chief as an important position which must be defended despite the heavy losses. General Gwatkin, Chief of Staff for Canada, stated that the German losses during the heavy fighting exceeded those of the Canadians.

Colonel Buller of the Princess Patricia Regiment was killed by shrapnel while leading his men at Sanctuary Wood.

The total enlistments in Canada up to June 10 exceeded 333,000 men.

GREAT DRIVE BY THE RUSSIANS.

The first week of June, 1916, saw the Russians successful in a great drive against the Austrian positions in Volhynia and Galicia, a movement that for awhile overshadowed the events on the western front. In the space of five days a new Russian commander, General Brusiloff, who had succeeded General Iyanhoff as Chief of the Russian South-western Armies, captured 1,143 Austrian officers and 64,714 men, recovered almost four thousand square miles of fertile Volhynian soil, and recaptured the fortified town of Lutsk. He had the advantage of a most efficient artillery preparation, which blew the Austrian entanglements, trenches and earthworks into such a chaos that the bewildered occupants surrendered in thousands when the Russian infantry charged.

German reinforcements from the trenches north of the Pripet River tried to stay the Russian rush, but in vain, and many Germans were among the prisoners taken. At several points the Russian cavalry led the attack after the artillery had done its work. A division of young Russians, by an impetuous attack, captured a bridge-head on the Styr and took 2,500 German and Austrian troops and much rich booty. In Galicia the Russian armies crossed the Stripa and by June 10 were once more too near Lemberg for the comfort of the Austrian garrison. At that time the total number of prisoners taken in this drive was considerably over 100,000, while the booty in guns, rifles, ammunition and supplies of all conceivable kinds was enormous. The Allies were greatly heartened by these Russian successes on the eastern front, and on June 15 Germany was preparing to meet them by troop movements from the north, where Field Marshal von Hindenburg was in command on Russian territory. The extent and rapidity of the Russian successes up to that time were without parallel in military history.

RUSSIA COMPELS AUSTRIAN RETREAT

During the following month the Russian advance toward the Carpathians, for the second time in the war, continued steadily. It was apparent that General Brusiloff, unlike his predecessors in command, was well supplied with effective artillery and ammunition in plenty, and that the vast resources of the Russian Empire had been at last successfully mobilized for attack. Guns and ammunition, in immense quantities, had been secured from Japan, among other sources, and this former enemy of Russia, now her strong and capable ally, aided materially in changing the aspect of affairs on the Eastern battle front.

On June 16, the Russian offensive had progressed to the Galician frontier, and terrific fighting marked the advance along the whole line south of Volhynia. Two German armies went to the aid of the Austrians in the region of the Stochod and Styr rivers, and German forces also made a stand before Kovel. The mortality on both sides was described as frightful, but the Russians continued to make headway and the capture of thousands of Teutonic prisoners was of almost daily occurrence, the total reaching 172,000 before June 18.

Czernowitz, the capital of Bukowina, fell into the hands of the Russians at midnight of June 17, after the bridgehead on the Pruth river had been stormed by the victorious troops of the Czar. One thousand Austrians were captured at the bridgehead, but the garrison succeeded in escaping. The invading troops swept on, crossed the Sereth river, and soon gained control of about one-half of Roumania's western frontier. By July 23 the Austrians were retreating into the foothills of the Carpathian mountains, hotly pressed by the Russian advance. The German army around Kovel continued to make a stubborn resistance, but could not prevent the Austrian rout, and as the Russians approached the Carpathian passes the Austrian prisoners taken by them during the drive reached a total of 200,000 officers and men. Immense quantities of munitions of war also fell into their hands.

On July 4 Russian cavalry patrols advanced over the passes into southern Hungary, and General Brusiloff's army neared Lemberg, which was defended by a combined Teutonic army under General von Bothmer, along the River Strypa. The losses of the Austrians and Germans, in killed and wounded up to this time, were placed at 500,000 men, the Russian offensive having lasted one month, with no evidence of slackening. General von Bothmer then began a retirement westward, while General Brusiloff advanced between the Pruth and Dniester rivers, and a concerted push toward Lemberg was begun.

"BIG PUSH" ON THE WESTERN FRONT

After many months of preparation by the British, during which "Kitchener's army" was being sedulously trained for active service, a new phase of the great war began on July 1, 1916, when a great offensive was started on the western front by the British and French simultaneously, after a seven-day bombardment of the German trenches. In this preliminary bombardment more than one million shells were fired daily, and the prolonged battle which ensued was the greatest of all time.

This offensive proved that the Allies had not been shaken from their determination to bide their time until they were thoroughly prepared and ready for the attack, and were able to co-ordinate their efforts in genuine teamwork against the powerful and strongly-entrenched enemy in the west, while the Russian offensive on the eastern front was also in progress. This long-awaited movement was no isolated attack, costly but ineffectual, like those of the English at Neuve Chapelle and Loos, but "a carefully studied and deliberately prepared campaign of severe pressure upon Germany at each of her battle fronts." It proved that the war-councils of the Allies held in Paris and London, in Petrograd and Rome, were no mere conventional affairs, but were at last to bear fruit in concerted action that might decide the issue of the war.

The "big push," as it was popularly called in England, was started by the British and French on both sides of the River Somme, sixty miles north of Paris, at 7:30 o'clock on the morning of July 1, and resulted on the same day in a great wedge being driven into the German lines along a front of twenty-five miles, with its sharp point penetrating nearly five miles. The French advance was made in the direction of Peronne, an important center of transportation and distribution long held by the Germans.

An eyewitness who watched the beginning of the battle from a hill said that overwhelming as was the power of the guns, yet as the gathering of human and mechanical material proceeded, "the grim and significant spectacle was the sight of detachments of infantry moving forward in field-fighting equipment, until finally the dugouts were hives of khaki ready to swarm out for battle."

As the days of the bombardment passed, the air of expectancy was noticeable everywhere through the British army, commanded by Sir Douglas Haig. Finally the word was passed that the infantry was to make the assault early the next morning. Then, "at 7:20 A. M. the rapid-fire trench mortars added their shells to the deluge pouring upon the first-line German trenches. After ten minutes of this, promptly at 7:30 o'clock, the guns lifted their fire to the second line

of German trenches, as if they were answering to the pressure of a single electric button, and the men of the new British army leaped over their parapets and rushed toward the wreckage the guns and mortars had wrought. Even close at hand, they were visible for only a moment before being hidden by the smoke of the German shell-curtain over what remained of the trenches."

Of the deadly work beneath that pall of smoke, as steel met steel and the new soldiers of Britain fleshed their bayonets for the first time, and fell by the thousand under the murderous fire of machine-guns, history will tell the tale long after the survivors have ceased to recount the deeds of the day to their grandchildren wherever the English tongue is spoken. Each side gives credit to the other for the utmost bravery and devotion during the battle. The new English regiments fought like veterans, and fully maintained the traditions of the British army for dogged bravery, while the Germans fought with desperate tenacity, valor and resourcefulness, this last quality being displayed in the devices which had been invented and were used to prevent or delay the Allied advance. It was indeed wonderful how well the Germans had protected their machine-guns from the devastating effects of the preliminary bombardment, which tore trenches to pieces and utterly demolished barbed-wire entanglements, but failed in many cases to destroy the deep bomb-proofs in which the Teuton machine-guns were protected and concealed.

CONTINUATION OF THE GREAT BATTLE

On July 2 and 3, the battle of the Somme continued without cessation of infantry fighting, while the big guns thundered on both sides. The British offensive took Fricourt on the 2nd, after a tremendous bombardment, and occupied several villages, while the French advanced to within three miles of Peronne. Ten thousand more prisoners fell into the hands of the Allies on these two days. On the 4th, German resistance temporarily halted the British, but the French offensive took German second-line positions south of the Somme on a six-mile front. Violent counter-attacks by the Germans on July 6 failed to wrest from the French the ground won by them during the previous five days, and the Allied troops resumed their advance, taking the German second-line trenches all along the front in the face of a heavy fire. Next day Contalmaison was won by the British, but recaptured by the Prussian Guard, who held the town for three days, when they were again driven out.

A desperate struggle for the possession of the Mametz woods marked the fighting from the 10th to the 12th, the British and the Germans alternating in its possession. Victory at this point finally lay with the British, who on July 12 gained possession of the whole

locality, together with the Trones wood, which had also been the scene of a bloody struggle. By this time some 30,000 German prisoners had been taken by the Allies during the offensive, while the losses in killed and wounded on both sides, in the absence of official reports, could only be estimated in appalling numbers.

TRAGIC TALE OF A GERMAN PRISONER

A typical description of some of the horrors of the battle, as it surged around Contalmaison, was given by a German prisoner on July 12 to the war correspondent of the London Chronicle. He spoke English, having been employed in London for some years prior to the war. With his regiment, the 122nd Bavarians, he went into Contalmaison five days before his capture. Soon the rations they took with them were exhausted, and owing to the ceaseless gunfire they were unable to get fresh supplies. They suffered agonies of thirst and the numbers of their dead and wounded increased day after day.

"There was a hole in the ground," said the German prisoner, whose head was bound with a bloody bandage and who was still dazed and troubled when the correspondent talked with him. "It was a dark hole which held twenty men, all lying in a heap together, and that was the only dugout for my company, so there was not room for more than a few. It was necessary to take turns in this shelter while outside the English shells were coming and bursting everywhere. Two or three men were dragged out to make room for two or three others; then those who went outside were killed or wounded.

"There was only one doctor, an unter officer,"—he pointed to a man who lay asleep on the ground face downward—"and he bandaged some of us till he had no more bandages; then last night we knew the end was coming. Your guns began to fire altogether, the dreadful *trommelfeuer*, as we call it, and the shells burst and smashed up the earth about us. We stayed down in the hole, waiting for the end. Then we heard your soldiers shouting. Presently two of them came down into our hole. They were two boys and had their pockets full of bombs; they had bombs in their hands also, and they seemed to wonder whether they should kill us, but we were all wounded—nearly all—and we cried 'Kamerade'! and now we are prisoners."

Other prisoners said in effect that the fire was terrible in Contalmaison and at least half their men holding it were killed or wounded, so that when the British entered they walked over the bodies of the dead. The men who escaped were in a pitiful condition. "They lay on the ground utterly exhausted, most of them, and, what was strange, with their faces to the earth. Perhaps it was to blot out the vision of the things they had seen."

Meanwhile, despite the threatening character of the Allied

offensive on the Somme, German assaults on the Verdun front continued unabated during July, and there was little evidence of the withdrawal of German troops from that point to reinforce the army opposed to the British. But except at Verdun, Germany was at bay everywhere, and the situation was recognized in the Fatherland as serious. Never before had the Allies been able to drive at Germany from all sides at once. Only at Verdun the German Crown Prince, long halted at that point, was keeping up a slow but strong offensive pressure.

GERMAN SUBMARINE REACHES BALTIMORE

On July 9, the German merchant submarine *Deutschland*, in command of Capt. Koenig, slipped into port at Baltimore, after eluding British warships in the North Sea, English Channel, and Atlantic. The *Deutschland* carried as cargo nearly a million dollars' worth of dyestuffs, as well as important mail. The owners announced that she was the first of a regular fleet to be placed in service between German and American ports, to thwart the British blockade. She made the 4,000-mile voyage in sixteen days, including nine hours during which, according to her captain, she lay at the bottom of the Channel to escape capture. On July 25 she was preparing for her return voyage with a cargo said to consist largely of crude rubber and nickel, having been accepted by the United States Government as an innocent merchantman and granted clearance papers on that basis. Outside the Virginia capes, beyond the three-mile limit, British and French cruisers awaited her possible appearance, with the hope of effecting her capture. But it was announced in Germany that the *Deutschland* reached her home port safely Aug. 23.

CANADIANS STRENGTHEN THEIR FRONTS

Along the portion of the western battle front held by Canadian troops, there were frequent heavy bombardments by the enemy during the month of July, but the gallant soldiers of the Dominion consolidated their positions won in battle at Loos and elsewhere, and fully held their own. In trench mortar fighting their batteries maintained the upper hand, often returning six shells for one thrown by the Germans. The Canadian patrols were very active; every night reconnaissances were made all along the Canadian front, and numerous hostile working parties engaged in strengthening German trenches and entanglements were dispersed by Canadian rifle fire.

On July 8, in the gardens of Kensington Palace, London, Princess Louise, Duchess of Argyll, presented to General Steele, for the Canadian forces, a silken Union Jack and a silver shield, given by the women and children of the British Isles in acknowledgment of Canada's good will and valuable co-operation. The Princess made

a short address expressing high admiration and enthusiastic appreciation of the eager readiness with which the officers and men of Canada had come forward to take their share in the cause of the Empire. General Steele, in receiving the gifts, returned thanks on behalf of the Canadian troops.

NEW RUSSIAN DRIVE NEAR RIGA

On July 24, General Kuropatkin began a new Russian drive in the battle sector south of Riga. After making a preliminary breach in the German lines, Kuropatkin drove in a wedge of fresh troops which swept Marshal von Hindenburg's German forces back along a front of 30 miles, and to a depth at one point of 12 miles. The attack was preceded by a bombardment lasting four days, which battered into ruins the German defense along the coast line from the Gulf of Riga to Uxhull. The Kaiser and his chief of staff recognized the importance of General Kuropatkin's advance by hastening to the Eastern battle front on July 25.

TWO YEARS' WAR CASUALTIES

	Killed.	Wounded.	Missing.	Total.
Russia	1,200,000	2,500,000	2,000,000	5,700,000
Germany	900,000	1,900,000	150,000	2,950,000
France	850,000	1,500,000	325,000	2,675,000
Austro-Hungary	475,000	1,000,000	900,000	2,375,000
Great Britain	160,000	450,000	70,000	680,000
Turkey	75,000	200,000	75,000	350,000
Serbia	60,000	125,000	75,000	260,000
Italy	50,000	100,000	30,000	180,000
Belgium	30,000	70,000	50,000	150,000
Bulgaria	5,000	25,000	5,000	35,000
Total	3,805,000	7,870,000	3,680,000	15,355,000

(For final lists of casualties see War Supplement to this book.)

The second phase of the great Anglo-French offensive on the western front began to develop late in July, and attacks were continuous throughout the month of August and up to September 15. At every point in the Somme region the giant British and French guns poured shell into the German works, destroying barbed wire entanglements and wrecking trenches, while Allied gains were reported almost daily, as the Germans were slowly but surely ousted from their original positions along a wide front.

An engagement typical of the prolonged fighting on the Somme occurred near Armentieres, where the Australians on a two-mile front

made the greatest trench raid ever undertaken in any war, inflicting heavy damage upon the enemy by bombing and hand-to-hand fighting. The German position at Longueval passed into British control on July 28, after what was called the most terrific fighting of the war, in Delville Wood.

Between August 6 and September 10 the British under Gen. Sir Douglas Haig and the French under Gen. Foch fought off many determined German counter-attacks in the Somme sector, and continued their advance, the French gaining Maurepas and the British moving closer to Guillemont and Ginchy, driving the Germans back along eleven miles of front and capturing Thiepval Ridge and other important positions near Pozieres.

On September 9 German official reports admitted considerable losses on the western line, both in the section south of the Somme and to the northeast of Verdun. Fierce attacks by the Germans at Verdun had been renewed during August, but the French, under the able command of Gen. Nivelle, more than held their own, recapturing a considerable portion of the terrain occupied by the enemy, including Fleury and the important Thiaumont Work.

ITALIANS CAPTURE GORITZ.

The greatest blow which the Italian army had struck against Austria since the beginning of the war was completed on August 9, when Italian troops captured the fortified city of Goritz, for which they had been struggling for months. The number of prisoners taken by the Italians was 21,750, and in the next few days nearly 20,000 more fell into their hands, with great stores of war munitions and many guns.

The taking of Goritz, one of the strongest fortresses in Europe, compelled the retirement of the Austrians at other points along the Isonzo River, and opened the road for the Italians, under Gen. Cadorna, to strike at the coveted city of Trieste, twenty-two miles to the southeast. With the capture of the "keystone" at Goritz, the Italian commander confidently expected the resistance of the Austrians to weaken and looked forward to the early occupation of the coveted provinces of the Trentino.

ITALY AT WAR WITH GERMANY

On August 27, Italy declared war on Germany, giving as a reason the fact that Germany had sent both land and sea forces to the aid of Austria. The declaration became inevitable when Italy sent troops to Saloniki to co-operate in the campaign of the Entente Allies on the Macedonian front. For more than a year Italy's position with

regard to Germany had been an anomalous one, for although she withdrew from the Triple Alliance on May 25, 1915, and declared war against Austria, she remained officially at peace with Germany until August 27, 1916.

RUMANIA ENTERS THE WAR

After many months of hesitation, Rumania finally decided to enter the war on the side of the Allies and declared war on Austria, August 27. The next day Germany declared war on Rumania, and the issue was squarely joined in the Balkans, which then became the scene of a mighty struggle for the possession of Germany's road to Constantinople and the East. Tremendous activity at once began on the Balkan front, with Rumania's endeavor to aid Russia in cutting off Bulgaria and Turkey from the Central Powers. In the event of the success of this move, it was expected that the Allies would start a gigantic drive toward Constantinople.

The most important gain for either side in the Balkans up to the middle of September was the capture by the Bulgarians and Germans, on September 7, of the great fortress of Turtukai, fifty miles to the southeast of Bucharest, the Rumanian capital, and chief defense of the capital on that side. Russian troops were rushed to the aid of the Rumanians, and the loss of Turtukai was offset by Rumanian successes across the Hungarian border, where they captured a number of towns, driving the Austrian defenders before them as their invasion of Hungary progressed.

RUSSIAN ARMIES ACTIVE

By September 10, Russian troops were massed in great force in southeastern Rumania, and engaged the Bulgarians on the whole seventy-mile front from the Danube to the Black Sea, fighting fiercely to wrest the offensive from the enemy invading Rumania. In Transylvania the Rumanians were advancing rapidly, having captured the important town of Orsova, on the Danube, which gave them a grip on the Austrian second line of defense behind the mountains dividing Transylvania from Hungary. The entrance of Rumania into the war had increased the Austro-Hungarian front by about 380 miles, which military men regarded as altogether too long for the Teutonic armies to hold with any hope of success.

The Russians were also on September 10 winning ground in their campaign against Lemberg, the capital of Galicia. They had advanced until they were within artillery range of Halicz, an important railway junction sixty miles south of Lemberg. They had cut the railway line between Lemberg and Halicz, and the latter town was in flames.

ALLIED PROGRESS ON THE WESTERN FRONT

British and French successes on the Western front continued during the month of September, and the gains were encouraging to the Allies. On September 15 the British took Flers, Martinpuich, the important position known as the High Wood, Courcellette, and almost all of the Bouleaux Wood, and also stormed the German positions from Combles north to the Pozieres-Bapaume road, arriving within four miles of Bapaume and capturing 2,300 prisoners. A prominent feature of the attack was the use by the British of armored automobile trucks of unusual size and power, so constructed that they were able to cross trenches and shell-holes. These "tanks," as they were called, proved a genuine surprise to the enemy. They were said to be developed from American tractors of the "caterpillar" variety, which lay their own tracks as they proceed.

A two-mile trench system, believed to be impregnable, was stormed by the Allied forces near Thiepval September 17, while south of the Somme the French took the German trenches along a front of three miles. Next day more ground was taken in the advance toward Bapaume and German prisoners continued to fall into the Allies' hands. The number of Teuton captives taken during the Somme fighting from July 1 to September 22 was placed at 55,800 men and officers.

The month of September was remarkable for the great number of aerial combats on the western front and the efficiency developed in this mode of fighting. Many airplanes were shot down on both sides, but the Allies seemed to be gaining the mastery of the air. On a single day, September 24, over a hundred air combats were reported, during which fifty-seven airplanes were destroyed. On the same day two French airmen, in flights of 500 miles, dropped bombs on the Krupp works at Essen in Germany.

In a forward sweep near the end of the month the British took a number of German positions northeast of Combles, while the French advanced south of that point, so that the two armies almost surrounding it were scarcely a mile apart. A day later British and French troops entered Combles from opposite sides and drove the Germans out. Continuing the drive from Thiepval, which had also been occupied, the British consolidated their positions and straightened their line a short distance from Bapaume, their objective point at this time. More than 5,000 German prisoners were taken September 26 and 27.

More Allied gains in the Somme sector were reported in the first week of October. German counter-attacks were frequent, but lacked

the vigor and success of former efforts on this front. In a joint attack on October 7 the village of Le Sars was taken and the Allies found themselves within two miles of Bapaume. General Foch with his French infantry took a number of German positions near Ablaincourt, south of the Somme, October 14, and held his gains against repeated German attacks. The fighting was extremely desperate and of a hand-to-hand character. Gas and liquid fire were used by the Germans, but the new Allied lines were firmly held. Liquid fire was also used against the British at Thiepval, but without success.

The Allied attacks on the Somme from October 9 to October 13 were reckoned in Berlin dispatches as amongst the greatest actions of the entire Somme battle, the enemy believing that the Allies themselves then attempted to reach a decision by breaking through the German lines on the largest possible scale. The losses on both sides during this period were admittedly very heavy.

On October 18 the town of Sailly-Saillisel fell to the French after hard fighting and commanding ridges on either side of it were also captured. Fresh progress brought the French troops to the outskirts of Peronne next day, and on the 21st the British advanced their lines along a front of three miles, capturing the Stuff and Regina redoubts and trenches and taking more than 1,000 prisoners, besides bringing down seventeen enemy airplanes.

Captain Boelke, Germany's greatest airman, was killed October 28 in a collision with another airplane during a battle on the western front. He was 25 years of age, had been wounded several times during the war, and is credited with having brought down forty Allied airplanes.

The October losses of the British in the Somme campaign were announced by the War Office to be 107,033, bringing the British total from the beginning of the campaign to 414,202 men and officers, killed, wounded and missing.

In the first days of November the principal activity was in the vicinity of Sailly. The Germans effected a successful counter-attack on November 6, recapturing some of the ground won by the Allies, with 400 prisoners, 300 of them French. Next day, however, a greater number of German prisoners was taken by the French in an advance along a two-and-a-half-mile front south of the Somme, and on the 9th the French strengthened their positions near Sailly, clearing out German trenches and taking more prisoners.

On November 13 the British took a five-mile front in the German line near the River Ancre, capturing two towns and 3,000 prisoners, the Germans being taken by surprise in the early morning mist.

Continuing their advantage the following day, the British took Beaucourt-sur-Ancre with more than 5,000 prisoners. On the 15th German troops took the offensive on both sides of the Somme and succeeded in forcing their way back into some of the trenches and advance positions held by the French, but the British continued their advance north of the Ancre. Next day the French recovered the lost ground and their airmen engaged in fifty-four air battles with German machines along the Somme front. On the 18th British and French airplanes again bombarded Ostend, dropping 180 bombs, and once more raided Zeebrugge. In an ensuing battle six German planes were brought down.

Infantry fighting in the Dixmude sector between Belgian and German troops occurred on four consecutive days, from November 17 to 20, with hand-grenade battles but no definite result. There was a general lull in operations after this, caused by heavy weather and fogs.

FRENCH ARE FINAL VICTORS AT VERDUN.

In a dramatic blow at Verdun, after a period of comparative quiet at that point, the French on October 24 took the village and fort of Douaumont, also Thiaumont, the Haudromont quarries, La Caillette Wood, Damloup battery and trenches along a four-mile front to a depth of two miles. The ground retaken was the same that the Germans under the Crown Prince took by two months' hard fighting. This was the quickest and most effective blow struck in the Verdun campaign and reflected the highest credit on the French general commanding, General Petain, and his devoted troops, who thus turned the tide of victory at Verdun in favor of the French and stamped with failure the efforts of the Crown Prince, continued for nine months, to wrest Verdun from French control and open a road to Paris. It was a campaign in which failure meant defeat for the Germans, and its cost in men, money and munitions was enormous.

Four thousand German prisoners were taken on the 24th and the next day the French began encircling Fort Vaux, the only one of the outer ring of forts at Verdun which remained in German hands. All attempts on the part of the Crown Prince to regain the lost ground were fruitless. Four German attacks were beaten back on the 26th, and the following day the French advanced south and west of Vaux and tightened their grip on the fortress. During violent artillery duels, many German attacks on the gained ground were repulsed, and by November 1 the prisoners in French hands numbered 7,000.

On November 4 the French began the attempt to take the village of Vaux, held by the Crown Prince, and gained a foothold in the vil-

lage. Next day they captured the whole of Vaux village and also the village of Damloup. The fort at Vaux had been evacuated by the Germans a few days previously. Thus the long and bloody struggle for the possession of Verdun apparently ended, although artillery duels of varying intensity continued at intervals, and the laurels of the prolonged campaign rested with the French.

BRILLIANT WORK OF CANADIAN TROOPS.

Brilliant work on the part of the Canadian troops on the Somme front aided materially to gain the British successes recorded on October 21. William Philips Simms, an eyewitness with the Canadian forces, gave a graphic account of the attack, which was typical of much of the fighting on the Somme. He said:

"Eight minutes of dashing across a sea of mud worse than the Slough of Despond, of methodically advanced barrage fire, of quick work in trench fight, sufficed for the Canadians to take Regina trench—one of the smoothest bits of trench-taking that has been witnessed in the Somme drive. I saw the Canadians, muddy to the eyebrows—but grinning—on the day after they had accomplished the feat.

"The assault was over in eight minutes. It was carried out in brilliant moonlight, and despite a terrific German counter barrage fire and a sea of mud. Every objective the Canadians sought was won.

"Though the Germans repeatedly counter-attacked, the Canadians not only kept every inch they had wrested from the enemy, but before dawn they had strongly reorganized their position and dug over 250 yards of connecting trenches."

ACTIVITIES OF THE RUSSIANS.

On the eastern front in the middle of September strong Russian attacks before Halicz were driving the Teutonic troops back toward Lemberg, and several thousand German and Turkish troops were captured. The Russian advance was checked, however, on September 18, after a total of 25,000 prisoners had been taken by the Russians near Halicz.

The Russian offensive was shifted September 21 from the Lemberg sector to the east of Kovel and a few days after a fresh offensive began along the entire eastern front, heavy fighting being reported west of Lutsk and in the Carpathians. Turkish troops at this time appeared on the Riga front, with German equipment and led by German and Austrian officers. The great 300-mile battle continued unabated to the end of October, with fighting all along the line from the Pinsk marshes on the north to the Roumanian frontier on the south.

By a sudden drive through the Russian front north of the Pinsk marshes on November 10, the Germans succeeded in cutting the Russian first line, taking nearly 4,000 prisoners and twenty-seven machine guns. The Russian lines were believed to have been weakened by the transfer of troops to Roumanian positions in the south. Following this there was terrific fighting in the Narayuvka, where the Russian trenches were carried by the Germans after they had been practically destroyed by high explosives; but the ground lost, located near Slaventin, was gallantly regained by the Russian troops on November 15.

The Russian dreadnought Imperatritsa Maria was sunk by a mine near Sulina, at the mouth of the Danube, November 11. It was launched in 1914 and had a displacement of 22,500 tons. On November 18 Russian troops near Sarny, southeast of Pinsk, brought down a Zeppelin airship, capturing the crew of sixteen and 600 pounds of bombs.

German casualties from the beginning of the war, as compiled in London from German official lists, were set November 10 at 3,755,693. Of this total 910,234 were killed. The total German casualties for the month of October, 1916, reached 199,675 officers and men, of whom 34,231 were killed.

GREAT CAMPAIGNS IN THE BALKANS.

For some time after Roumania entered the war her fighting forces were divided between two campaigns—in the Dobrudja and in Transylvania, the Austrian territory invaded by Roumania as soon as she declared war. On September 15 the Roumanians began a retreat in the Dobrudja, before advancing forces of Germans and Bulgarians led by General von Macksensen. The Russo-Roumanian center was driven back thirty miles, while the German and Bulgarian troops occupied several of the Roumanian Black Sea ports.

Then came a great six-day battle in the Dobrudja, with fighting along a forty-five mile line from ten miles south of Constanza to Cernavoda, on the Danube, and in this battle the Russo-Roumanians were successful, compelling the Teutonic forces to retreat southward toward the border. For a while Von Mackesen was on the defensive, but in a counter-attack on September 23 he gained a marked victory over the Roumanians. Gradually the latter were forced to retire, and although they made a desperate resistance to the forces under Von Mackensen the latter reached the coast by October 21, advancing on Constanza, Roumania's chief port on the Black Sea, which was captured October 23. Cernavoda fell on the 25th.

Meanwhile in Transylvania events of a similar character had been happening. At first successful in their invasion of Austrian territory, the Roumanians were unable to hold their advantage, and while the tide of battle was for several weeks in doubt, the German and Austrian troops under General von Falkenhayn at length drove the invaders back across the mountains. By October 8 a Teutonic invasion of Roumania from the northwest was imminent, and two days later the Roumanians were pursued through the passes by Austrian troops. By the 17th Teuton forces were five miles inside the frontier.

On October 25 Von Falkenhayn's army stormed the Vulcan Pass and pushed nearer the railroad at Kimpolung, seventy-five miles from Bucharest. These successes were not gained, however, without hard fighting, the Roumanians making a desperate stand to prevent the Teuton invasion which threatened their capital. They were aided by a French commander, General Bertholet, and struck back hard at Von Falkenhayn, gaining some signal successes in the last days of October and early in November and capturing several thousand prisoners and much war material. These successes, however, proved insufficient to do more than check the Teuton advance toward Bucharest.

In the Dobrudja, after the capture of Cernavoda by Von Mackensen, there were strenuous efforts by the Roumanians, aided by Russians, to regain their lost territory. In their early retreat they destroyed the great eleven-mile bridge over the Danube at Cernavoda and so cut off for the time being Von Mackesen's threatened drive a Bucharest from the south. The Roumanians that had been opposing him fell back northward to the Danube forts. They were hotly pursued by Bulgarians, who on October 29 were reported to be at Astrovo, fifty miles north of the Constanza-Cernavoda railway line. The possession of the latter was an immense advantage to Von Mackensen.

General von Falkenhayn continued his advance into Roumania during November and at the beginning of December the battle for Bucharest was ranging on three sides of the capital, with the Roumanians successful at some points, the invaders at others. West of Bucharest the defenders had been pressed back to the Argesu River, while to the northwest the Germanic forces had smashed through the Roumanian lines and were rapidly moving down the Argesu Valley from Pitesci and down the Dombovitzza from the Kompelung region.

To the south of the capital, King Ferdinand's troops delivered a powerful counter-attack on December 2 that forced the Teutons back from the Argesu line and reclaimed two villages.

The Russians meanwhile were making a determined effort to relieve the situation at Bucharest by a counter-demonstration in the

Carpathians, where on December 3 a great battle was developing in their favor. They had gained a foothold in Kirlibaba, the key to the Rodna Pass and the plains of Hungary, and were attacking successfully at other points on the 250-mile front. The Russians also had seized the western end of the Cernavoda bridge over the Danube, thus putting a check on any movement of General von Mackensen's troops across the river from Dobrudja. General Sakharoff's forces continued furious attacks along the entire line in the Dobrudja.

ITALIAN CAMPAIGN IN THE TRENTINO.

The Italian forces operating in the Trentino continued their activity during the fall and early winter of 1916, continual gains being made in their difficult undertaking. General Cadorna began a new drive on Trieste in October, transferring the weight of his attacks from the Carso sector to the Trentino front. The total number of Austrian prisoners taken on the Isonzo front from August 6 to October 12 was set by the Italian War Office at 30,880. No decided advantage was gained by either side up to December 5, although the Italians continued to take many prisoners and much Austrian war material in the course of their operations, and in November compelled the Austrian generals to transfer many troops from the Roumanian front in order to cope with the Italian attacks, delivered in the most difficult terrain of the entire war and often under weather conditions that tried the hardihood of troops trained to Alpine warfare.

DEATH OF THE AUSTRIAN EMPEROR.

Francis Joseph, Emperor of Austria and King of Hungary, died at Schonbrunn Castle, near Vienna, November 21, at the age of 86. He had ruled for sixty-eight years, his reign being marked by much turbulence in the empire, both political and social, and by a long series of domestic and personal disasters that culminated in the assassination of his nephew, the Archduke Francis Ferdinand, heir to the joint thrones of Austria and Hungary, which furnished the Teutonic excuse for the great war. Francis Joseph was succeeded by his grandnephew, Archduke Charles Francis Joseph, of whose personality little was known outside Austria.

ZEPPELIN RAIDERS BROUGHT DOWN.

Several German Zeppelins were brought to earth on English soil during the progress of aerial raids in September and November, 1916. Commander Robinson and Lieutenants Tempest and Sowery of the Flying Corps each accounted for one of the huge aircraft in the Lon-

don district. The former received the Victoria cross for his exploit. The crew of one of the Zeppelins was captured, but in the other cases the crews perished with the airships, which fell flaming to earth. Two more Zeppelins were brought down late in November on the eastern coast of England and fell into the sea. One of these was destroyed nine miles from the coast by naval seaplanes and a patrol boat.

DEPORTATION OF BELGIAN WORKMEN.

A wave of indignation swept over the civilized world, already outraged almost beyond endurance by the unprecedented German disregard of international law and the recognized customs of war, when it was announced on November 10 that 30,000 Belgians had been deported into exile by the German authorities in Belgium. It was alleged that all males between the ages of 17 and 30 were being sent in cattle-cars to Germany. Cardinal Mercier of Belgium protested in the name of humanity, the men being ruthlessly torn from their families, and said the Belgians were being reduced to a state of slavery. The Pope protested to the German government against the reported action, and the State Department at Washington made representations concerning it to Berlin. The total number of Belgian males to be deported to work in German industries was alleged to be 300,000. After investigation Viscount Bryce of England and many other statesmen and publicists denounced the German action as infamous.

POLAND PROCLAIMED A KINGDOM BY GERMANY.

By a joint manifesto, issued on November 4 by the Emperors of Germany and Austria, the ancient kingdom of Poland was revived and Polish autonomy ostensibly re-established. The kingdom was proclaimed with due ceremony in Lublin and Warsaw. The definite territorial limits of the new nation were not set, according to the proclamation, and would not be until the close of the war. Constitutional rule and a national army, however, were to be established at once. The joint opinion of other nations, neutrals and Allies of the Entente, was that Poland as captured territory could not be recognized as a new kingdom.

THE FALL OF BUCHAREST.

By December 2 the battle for Bucharest had reached the outskirts of the Roumanian capital and the guns of Von Mackensen's forces began a bombardment of the outer forts, and on December 6 the armies of the Central Powers took Bucharest, cutting off a large part of the defending army. Ploesci, the great oil center of Rou-

mania, and Sinaia, the summer capital, also fell. Many thousands of Roumanian troops were taken prisoners in the operations near Bucharest, the number being estimated at 38,500 for the first week of the month, and the Roumanians retired to new positions to the north and east of their fallen capital. General von Heinrich, governor of Lille during the deportation of Belgians from that city, was appointed military governor of Bucharest, on which the Germans imposed a levy amounting practically to \$400 a person, or a total of \$140,000,000.

Von Mackensen continued to press his advances in the Dobrudja and eastern Wallachia during the month, though retarded by sturdy Russian and Roumanian resistance. As Christmas approached the forces of the Central Powers were pressing the Russo-Roumanians close to the Danube where it runs east and west, forming the boundary between Roumania and Bessarabia.

CHANGE IN BRITISH GOVERNMENT.

On December 7 Mr. Henry Lloyd-George accepted the British premiership and formed a new Cabinet, which included an important representation of labor and other elements of strength pointing to a systematic and determined prosecution of the war from all angles. The Cabinet as announced December 12 included Sir Edward Carson, the Irish Unionist leader, as First Lord of the Admiralty, and Baron Devonport as food controller, a new position. The size of the war council was reduced to five, including the premier. Admiral Sir John Jellicoe was appointed First Sea Lord of the Admiralty, being succeeded in command of the grand fleet of Britain by Admiral Sir David Beatty, who commanded the British battle-cruiser fleet in the battle of Jutland.

France followed suit in reorganizing her war council under Premier Briand, also restricting the number of members to five, and General Joffre was succeeded in command of the armies of the north and the northeast by General Nivelle, commander of the French troops at Verdun, where notable victories were gained by the French in December, regaining almost all the ground lost during the previous operations of the year. General Joffre was promoted to the high honor of Marshal of France, the ancient rank being revived for him.

CENTRAL POWERS MOVE FOR PEACE.

On December 12 the Central Powers simultaneously presented notes to neutral powers for transmission to the nations of the Entente, containing a proposal for an armistice to discuss the possibilities of

peace. No terms of peace accompanied the German notes and after consultation with the allies of Great Britain Premier Lloyd-George delivered a speech in the House of Commons on December 19, declaring that the proposals of peace could not be entertained, and in which he said:

"I appear before the House of Commons today with the most terrible responsibility that can fall upon the shoulders of any living man as chief adviser of the Crown in the most gigantic war in which this country was ever engaged—a war upon the events of which its destiny depends.

"We accepted this war for an object, and a world object, and the war will end when the object is attained under God. I hope it will never end until that time.

MUST KNOW BERLIN PLANS.

"We feel that we ought to know, before we can give favorable consideration to such an invitation, that Germany is prepared to accede to the only terms on which it is possible peace can be obtained and maintained in Europe. Those terms have been repeatedly stated by all the leading statesmen of the Allies. They have been stated repeatedly here and outside. To quote the leader of the House last week:

"Reparation and guarantee against repetition, so there shall be no mistake, and it is important that there should be no mistake in a matter of life or death to millions."

"Let me repeat: Complete restitution, full reparation, and effectual guarantees.

NO HINT OF REPARATION.

"Did the German Chancellor use a single phrase to indicate that he was prepared to accept such a peace? Was there a hint of restitution? Was there a suggestion of reparation? Was there an implication of any security for the future that this outrage on civilization would not again be perpetrated at the first profitable opportunity?

"The very substance and style of the speech constitutes a denial of peace on the only terms on which peace is possible. He is not even conscious now that Germany has committed any offense against the rights of free nations.

"Listen to this from the note:

"Not for an instant have they [the Central Powers] swerved from the conviction that respect of the rights of other nations is not in any degree incompatible with their own rights and legitimate interests."

"The note and speech prove that they have not yet learned the alphabet of respect for the rights of others.

"The Allies entered this war to defend Europe against the aggression of Prussian military domination, and, having begun it, they must insist that the only end is the most complete effective guarantee against the possibility of that caste ever again disturbing the peace of Europe.

"You can't have absolute equality in sacrifice. In war that is impossible. But you can have equal readiness to sacrifice from all. There are hundreds of thousands who have given their lives; there are millions who have given up comfortable homes and exchanged them for daily communion with death. Multitudes have given up those whom they loved best.

FOR NATIONAL LENT.

"Let the nation as a whole place its comforts, its luxuries, its indulgences, its elegances on the national altar consecrated by such sacrifices as these men have made! Let us proclaim during the war a national Lent! The nation will be better and stronger for it, mentally and morally, as well as physically. It will strengthen its fiber and ennoble its spirit. Without it we shall not get the full benefit of this struggle.

"Our armies have driven the enemy out of the battered villages of France and across the devastated plains of Belgium. They might hurl him across the Rhine in battered disarray. But unless the nation as a whole shoulders part of the burden of victory it won't profit by the triumph, for it is not what a nation gains, but what it gives that makes it great."

PEACE MESSAGE BY PRESIDENT WILSON.

A bombshell was cast into the camps of the nations at war on December 20, when President Wilson unexpectedly addressed a message to the belligerents, urging them to state their terms of peace and end the war without further fighting.

An explanation of the President's message to the nations was made by Secretary of State Lansing on the morning of its publication. In the course of this he asserted that the United States had been brought to "the verge of war," which was generally understood to mean that a threatened resumption of submarine activities by Germany on a large scale might create an intolerable situation; also that the President desired to know the terms of peace contemplated by the powers at war, so as to be informed as to how they would affect the interests of the United States.

Germany replied to the President's note on December 26, giving no terms, but lauding the "high-minded suggestion" of Mr. Wilson and proposing "an immediate meeting of delegates of the belligerent states, at a neutral place," continuing as follows: "The imperial government is also of the opinion that the great work of preventing further wars can be begun only after the end of the present struggle of the nations. It will, when this moment shall have come, be ready with pleasure to collaborate entirely with the United States in this exalted task."

The reply of the Entente Allies to President Wilson's message was received January 11. While disclaiming any intention of exterminating the Teutonic peoples, the Allies in this reply stated terms of peace which would result in the humbling of Germany and Austria-Hungary and the expulsion of Turkey from Europe.

ENTENTE PEACE TERMS.

The Entente peace terms enumerated in the reply to the President were:

Restoration of Belgium, Serbia and Montenegro, with the payment of indemnities to each by Germany.

Evacuation of France, Russia and Roumania, with reparation to each by Germany.

Reorganization of Europe "guaranteed by a stable régime and founded as much upon respect of nationalities and full security and liberty of economic development, which all nations, great or small, possess, as upon territorial conventions and international agreements suitable to guarantee territorial and maritime frontiers again unjustified attacks."

ALSACE-LORRAINE TO FRANCE.

Restoration to France of Alsace and Lorraine by Germany and to Italy of the former northern provinces by Austria.

Liberation of Italians, Slavs, Roumanians and Tcheco Slovaques (Czech Slavs) from domination by the Central Powers, which would mean the cession of several outlying portions of Austria-Hungary to Russia, Roumania, Serbia and Italy.

Enfranchisement of the Armenians and other "populations subject to the bloody tyranny of the Turks."

Expulsion of the Turkish empire from Europe, thus giving Constantinople to Russia.

WOULD LIBERATE EUROPE.

"It goes without saying," concluded the note, "that, if the Allies wish to liberate Europe from the brutal covetousness of Prussian militarism, it never has been their design, as has been alleged, to encompass the extermination of the German peoples and their political disappearance.

"That which they desire above all is to insure a peace upon the principles of liberty and justice, upon the inviolable fidelity to international obligation with which the government of the United States has never ceased to be inspired.

WANT VICTORIOUS WAR.

"United in the pursuits of this supreme object, the Allies are determined, individually and collectively, to act with all their power and to consent to all sacrifices to bring to a victorious close a conflict upon which they are convinced not only their own safety and prosperity depend, but also the future of civilization itself."

Belgium, in addition to joining with her allies in the reply to the President, sent an individual note, in which the conquered kingdom made a stirring appeal for American sympathy in its purpose to fight on till it won freedom with reparation.

The Allies promised that in the event of peace on these terms Russia would carry out her announced intention of conferring autonomy on Poland.

THE PECULIAR SITUATION IN GREECE.

A curious situation developed in Greece during the fall and early winter of 1916. The German sympathies of King Constantine had brought him into conflict with the considerable portion of the Greek people led by the former premier, Venizelos, and the latter had proclaimed a Greek republic and placed troops in the field in active co-operation with the Allies. Diplomatic representatives of the Entente Powers who had remained in Athens were ordered to leave early in November, their presence being felt to be a menace to the interests of the Allies, whose warships commanded the Greek ports and whose troops were stationed at Saloniki in large numbers. The ostensible neutrality of King Constantine's government was regarded by the Allies as dangerous, the failure of Greece to respond to the call of Serbia, its treaty ally, having demonstrated the governmental inclination toward the cause of the Central Powers. In order to minimize the danger, therefore, the French admiral, Du Fournet, in command of the Allied

fleet, demanded the surrender to the Allies of certain guns and war material, and this demand being refused French and British marines were landed at the Piraeus on December 2, 1916, and took possession of the Acropolis. This led to their being fired upon by Greek reservists who had been called out, and some bloodshed resulted, there being about 200 casualties before a compromise was reached between King Constantine and the Allied commanders and the Greek crisis passed for the time being. The king submitted to part of the Allied demands, the others were waived, and the forces landed were withdrawn, after a day of fighting in which the Greek reservists engaged in many clashes with the armed followers of Venizelos.

On January 9 ministers of the Entente Powers handed to the Greek government an ultimatum giving Greece forty-eight hours to comply with the demands contained in the note drawn up by France, Great Britain and Russia on December 31.

Included in the ultimatum was a request by the Entente Powers that the Greek government fulfill at the earliest possible moment the agreement of December 14 regarding the transfer of Greek troops from Thessaly.

BRITISH ENTER GERMAN LINES.

During the night of January 14 a party of British troops entered the German lines east of Loos. Many casualties were inflicted on the enemy, his dug-outs were bombed and some prisoners were secured. North of the Ancre an enemy transport was successfully engaged.

In addition to the usual artillery activity the enemy's positions were effectually bombarded southeast of Loos and opposite the Bois Grenier.

GERMANS DRIVEN BACK.

The official communication of the French war office January 15, 1917, announced that reciprocal bombardments took place on both banks of the Somme, the right bank of the Meuse and in Lorraine.

After a bombardment the night before between the Aisne and the Argonne the Germans attacked the French advanced posts; they were driven back after a spirited combat with grenades.

On their side the French carried out several surprise attacks on the enemy lines, taking material and prisoners.

On January 16 a powerful offensive was started by the Russo-Roumanian forces in the Roumanian theatre of war, with strong attacks between the Casinu and Sushitza valleys and on both sides of Fundeni. In places the trenches of the German Allies were entered.

CHAPTER XXIX.

CONTINUATION OF WAR IN 1917.

German Sea Raider Busy—British Victory in Mesopotamia—Russia Dethrones the Czar—United States' Relations with Germany Severed—Germans Retreat on the West.

On January 10 the Greek government accepted the ultimatum of the Allies, providing satisfaction to them without interfering with the administration of the country or local communications. From this time on the situation in Greece ceased to be a source of serious trouble to the Allied commanders at Saloniki.

GERMAN SEA RAIDER BUSY.

It was learned on January 17 that a German sea raider, which had succeeded in slipping through the cordon of British ships, had been preying on commerce in the south Atlantic for six weeks. Twenty-one vessels were reported to have been sunk by the raider, with a total loss of approximately \$40,000,000. Victims of the raider who were landed at Pernambuco, Brazil, January 18 stated their belief that she was the steamship Moewe, notorious as a raider early in the war, but later reported docked in the Kiel Canal. It was said that she left the Canal disguised as a Danish hay-ship.

NAVAL BATTLE IN THE NORTH SEA.

In a sea battle off Zeebrugge, Holland, on January 23, fourteen German torpedo-boat destroyers, attempting to leave port, were attacked by a British flotilla and seven of them were reported sunk.

BRITISH VICTORY IN MESOPOTAMIA.

Victorious advances were made in Mesopotamia during the month of January by the British forces, who were determined to wipe out the reverse sustained in the surrender at Kut-el-Amara in 1916. On January 21 it was announced that the Turks had been driven out of positions on the right bank of the Tigris, near Kut, the British occupying their trenches on a wide front.

After a series of persistent attacks Kut-el-Amara fell before the British advance on February 26, opening the road to Bagdad. The Turkish garrison of the city took flight, hotly pursued by the British cavalry, and more than 2,000 prisoners were taken, with many guns and large quantities of war material. Next day the British defeated the Turks in a sanguinary battle 15 miles northwest of the captured town, and took many more prisoners. Bagdad soon fell into their hands, and as the month of April approached the British were on the eve of effecting a junction with the Russian army advancing through Mesopotamia.

ON THE EASTERN FRONT.

After many vicissitudes in the fighting on the Eastern front in January, the Russians struck a smashing blow at the Teuton line on January 28, tearing a mile-wide gap in Bukowina, close to the Roumanian frontier. Berlin admitted that the offensives on the Sereth and Riga fronts had been temporarily stopped, that many prisoners had been taken by the Russians, and that the German lines had been withdrawn because of superior pressure. The reorganized Roumanian army was reported ready for a new offensive in the spring.

The Russian successes were, however, only temporary and the remainder of the winter campaign was marked by repeated efforts on the part of the Germans to break down the Russian defenses of Riga on the north, and to push the Slavs still further back on the south. Late in February the Teuton forces entered Russian positions in Galicia and also re-took the offensive on the Roumanian front, raiding Russian trenches in the Carpathians and blocking all Russian attempts to force the mountain passes. On February 28 they recaptured most of the peaks in the Bukowina which were lost to the Russians earlier in the year, and took a large number of Russian prisoners.

Meanwhile the Russian advance in Persia and Mesopotamia against the Turks continued unchecked, and events of importance were shaping themselves in the Russian empire, calculated to have an immense effect on the conduct of the Russian armies in the field as well as on the fortunes of the Romanoff dynasty.

RUSSIA DETHRONES THE CZAR.

Early in March, after several days of ominous silence in regard to events in Petrograd, the news of a successful revolution in Russia astonished the world. From March 9 to March 15, it appeared, the Russian people, headed by Michael Rodzianko, President of the Duma, set about cleaning house with quiet but characteristic thoroughness. Beginning with minor food riots and labor strikes, the cry for food reached the hearts of the soldiers, and one by one, regiments rebelled until finally those troops which had for a time stood loyal to the government of the Czar and his bureaucratic advisers gathered up their arms and marched into the ranks of the revolutionists.

The change came with startling and dramatic rapidity. The Duma, ordered by Imperial rescript to dissolve, refused to obey and voted to continue its meetings. An Executive Committee was appointed, headed by the President of the Duma, which after arresting a number of pro-German ministers of the Czar, proclaimed itself a Provisional Government and announced its intention of creating a new representative form of government for the country. With the assistance of the army, it was soon in control.

Czar Nicholas was promptly compelled to abdicate the throne for himself and his young son. At first the crown was offered to his brother, the Grand Duke Michael, but inside of twenty-four hours

he declined it, also abdicating formally. The Czar and imperial family were confined, while the former pro-German ministers were thrown into prison. The new Provisional Government pledged itself to conduct the war against Germany vigorously, and promised the people complete religious liberty and freedom of speech, political amnesty, universal suffrage, and a constitutional assembly to determine the form of the permanent new government. Great Britain, France, and Italy were prompt to recognize the Duma committee and it was also given enthusiastic support by the Russian armies in the field.

By March 20 absolute quiet prevailed in Petrograd and throughout Russia. The Allies were officially notified of the abdication of Nicholas II and informed by Foreign Minister Milukoff that Russia would stay in the war with them to the end. Prince Lvoff, one of the most popular men in Russia, was placed at the head of the Government Constituent and general political amnesty was proclaimed in a ukase which brought numbers of political prisoners back to their homes from Siberia, and caused great rejoicing throughout the country, no longer an empire of the Romanoffs, who had ruled it for centuries with a rod of iron.

The United States recognized the new order of things in Russia on March 22. A few days later the grand dukes and royal princes of Russia jointly informed the Government Constituent that they formally associated themselves with the abdication of Grand Duke Michael and would turn over to the new Government the crown lands and other state grants in their possession, thus completing the total abdication of the Romanoff dynasty and placing the seal of complete success on the most remarkable revolution the world ever saw—accomplished almost without bloodshed, for the troops in Petrograd had refused to fire upon the revolutionists after the first few hours of disturbance in the streets of the capital, and most of the casualties were among the soldiers themselves.

The Russian revolution, produced in the crucible of war, meant the overthrow of Germanism in Russia, which had hampered the efforts of its armies by treasonable neglect, if not worse, and in the opinion of many neutral observers, destroyed the last chance of a German victory in the war. The effect of the revolution on Germany was twofold—it darkened her military outlook, and gave a tremendous impulse to the latent liberal forces within her empire. Its effect on the war was almost equivalent to bringing a new nation into the camp of the Allies. Its meaning to German democracy was thus stated:

“Germany has been taught to believe that the European war was inaugurated by Russia for aggressive purposes. Germany’s democratic leaders repeatedly pointed to Czarism as the evil spirit dominating the Entente. The object of the Central Powers was proclaimed to be the overthrow of the Russian autocratic menace. Therefore

the Russian revolution may profoundly move German democracy. This is probably its greatest disillusionment since the war began."

CAUSES OF THE REVOLUTION.

To get a clear picture of the conditions that produced the revolution, it is necessary to remember that from a very early period the German-born Czarina and the clique of pro-German reactionaries whom her influence made powerful with the Czar, were bent on ending the war prematurely in the interests of reaction. The Ministers set up under these auspices for over two years acted in defiance of public opinion. Their policy was not obscure; they hampered the army in respect of munitions, disorganized the country in respect of its distributive services, brought about artificial famine in a land which is one of the world's chief food-producers, and themselves, through police agents, sought to stir up abortive revolts in order that they might plead military failure and internal revolution as a reason for withdrawing from the war.

The Russian people foiled them for a long time by magnificent and much-enduring patriotism. When the government left the army without munitions, the local authorities—the zemstvos and unions of towns—stepped in and organized their supply. When police agents tried to bring about riots and strikes, the workmen's own leaders prevented their breaking out. When secret negotiations were opened up with Germany, the Duma blasted them by public exposure on the popular side.

The Duma's demand for sympathetic and really national government was enforced, first by the Council of the Empire, normally the stronghold of high officialdom, and then by the Congress of Nobles, which represents the landed aristocracy.

But with the nobility, much of the bureaucracy, the army, the navy, the Duma, the professional classes, and the working classes all ranged against them, the "dark forces" of the empire held obstinately on their way. The murder of the court favorite, the infamous monk Rasputin, only intensified the reaction, though its story and sequel showed significantly how far many members of the Imperial family were from supporting the reigning head and his consort in the policy which was jeopardizing the dynasty. But the Czar's political blindness was incurable. In a kind of panic he got rid of every remaining progressive minister; a nonentity of no importance from the Czar's personal circle was made prime minister, and the real power fell to Protopopoff, the strong man of the "dark forces," who was to see their designs through, but was the first victim of the popular uprising. As minister of the interior he defied all Russia, precipitated the revolution, and in his violent death the career of the "dark forces" in Russia was ended, no doubt for all time.

UNRESTRICTED SUBMARINE WARFARE.

On February 1 Germany entered upon unrestricted submarine warfare after warning had been given of this last resort of desperation.

Ten ships were reported sunk and eight lives lost that day. Neutral vessels and belligerents were destroyed without discrimination, and in the first six days the tonnage of the vessels sunk by German U-boats was 86,344 tons, including 45 ships of all nationalities. The British liner California, formerly of the Anchor Line, was torpedoed on the seventh day, and sank with a loss of 100 lives. Transatlantic ships were held in New York and other eastern ports, pending instructions from the Government as to sailing in the face of the German warning, against which President Wilson had strongly protested.

RELATIONS WITH GERMANY SEVERED.

Diplomatic relations were broken with Germany on February 2, 1917 when President Wilson appeared before a joint session of Congress and announced that the German Ambassador, Count von Bernstorff, had been given his passports, and that Ambassador Gerard had been recalled from Berlin. War with Germany was then believed to be only a matter of hours, awaiting the first German overt act. The reserve force of the Atlantic Fleet was ordered to make ready for immediate service. But the hour had not yet struck for war.

INTERNED SHIPS DAMAGED BY GERMANS.

Examination of a number of the German merchant vessels interned in United States ports showed that most of them had been seriously damaged by their crews to render them unseaworthy, and it was rumored that the partial wreckage of these ships had been ordered February 1 by the German government. Twenty-three German ships seized by the naval authorities at Manila were also found to have received willful damage.

On February 8 the State Department notified all American vessel-owners that merchant ships under the American flag might arm against submarines but that no naval convoys would be supplied by the Government. Sailings of American liners were still held up pending decision about their armament.

The United States Senate indorsed the stand of the President in the break with Germany, by a vote of 78 to 5.

On February 13 it was announced at Washington that an advance was made by the German government, through the Swiss legation, offering to reopen the discussion of submarine methods. The answer of the United States was to the effect that the Government refused to discuss the international situation with Germany until the U-boat warfare was abandoned and the pledges made in the case of the steamer Sussex were restored. The Spanish ambassador took over the deserted American embassy at Berlin. President Wilson, with his cabinet, prepared a bill of particulars containing the grievances against the German government, with special emphasis on the refusal of the latter to liberate seventy-two American seamen taken to Germany as prisoners on the steamer Yarrowdale, one of the vessels captured in the South Atlantic by the raider supposed to be the Moewe.

GERMAN PLOT IN MEXICO.

Intense feeling was aroused throughout the United States when it was learned on February 28 that Germany had suggested to Mexico an alliance by which war was to be made on the United States if it did not remain neutral. Mexico was to have German aid to regain the southwestern territory acquired from it, and to have a share in the ultimate peace conference. It was to induce Japan to leave the Allies and join in making war on America. Documentary proof of such plots was said to be in the hands of the President, but a few days later the German foreign secretary admitted the scheme as his own and sought to justify it as a necessary precaution against war. The discovery of the plot did more than anything else to arouse the American people to a sense of the danger impending from Germany.

GERMANS RETREAT ON THE WEST.

After numerous minor successes by the British and French on the Western front, the Germans effected a retreat late in February, which was the greatest retirement in two years, as they yielded on a front of several miles on the Aisne to the Allies, including important towns. The growing superiority of the Allies in artillery had begun to count, and the retirement, while announced from Berlin as strategic, was undoubtedly forced by the development of Allied strength. The capture of Bapaume soon followed. By March 2 the Germans had retreated on a front of 14 miles to a depth of from two to three miles, and the British were still pushing forward.

Another extended German retreat began on the West front March 17, the British and French advancing without resistance for from two to four miles on a front of 35 miles. Peronne was captured next day and it became evident that the Germans were falling back to a so-called Hindenburg line, 25 miles to the rear of their former positions. The Allied advance continued until more than 300 towns and villages were reoccupied and some 1,500 square miles of French territory regained by March 21. The German armies in their retreat devastated the country in the most wanton manner, even going so far as to destroy fruit trees, wells, churches, and buildings of every kind. They also drove before them many of the inhabitants, including women and girls, leaving only a remnant of the former populations, mostly old and feeble folk and children, these being left destitute and without food even for a day. The story of this devastating retreat aroused horror throughout the world.

On March 25 the French pressed an attack against the whole front between St. Quentin and Soissons and made progress everywhere. From this time on the French offensive was active for three weeks, culminating in a great victory on the Soissons front April 16, in which the German losses were placed at 100,000.

A GREAT BRITISH OFFENSIVE.

In the week of April 9 the British made great gains in the Arras sector, capturing German positions to a great depth and taking a total of some 15,000 prisoners and 190 guns of all calibers some of

which were turned against the Germans as they sought to stem the tide of British successes by desperate rearguard actions. Notable victories were won by the Canadian troops in the capture of the hotly contested Vimy Ridge and other positions during the battle of Arras, as this series of important engagements was called, even before it was concluded with all the honors in Allied hands.

For several days after the first dash on Monday morning, April 9, the British tore through the German defenses on an extended front north and south of Arras, from the north bank of the River Scarpe to the German trench system just south of Loos, and straddled the iron line of Hindenburg by April 13 as far as a point seven miles southeast of Arras.

But success did not stop here. To the south the British progressed on a front of about nine miles, between Metz-en-Coutre and a point to the north of Hargicourt. The French columns joining the British in this sector swept forward along with their allies. They attacked with tremendous vigor German positions south of St. Quentin and carried several lines of trenches between the Somme and the St. Quentin railway. These positions were held despite every effort of the Germans to retake them.

Throughout the length of interlinked chain of advances the fighting was of the utmost ferocity.

For the first time in the war the British were making sharp drives and smashes like a skillful pugilist, every one of which contained force enough to have been considered a major attack in the history of other wars. In places the attack has shaken loose from the trenches and was being delivered along the lines of the old Napoleonic strategy.

The British captures of Vimy and later of Givenchy were looked on as victories of the utmost importance, equal to the storming by the Canadians of the Vimy Ridge. When this line of hills was firmly in the hands of the Canadians, they hauled their heavy guns up to the summit with extraordinary speed and proceeded to batter to pieces the powerful defenses of Vimy, while they made continual thrusts down the eastern slopes.

In 1915 Vimy was for a time held by the French under Gen. Foch, but they were shouldered out with great slaughter by the Germans, who proceeded to lavish the last details of their military science upon the fortifications of the town.

Givenchy, too, before which many British dead lie buried, was a stronghold upon which the Germans counted to stem any advance.

On April 16 the extension of the British attack nearly to Loos threatened to pocket Lens, just as a loop had been thrown around St. Quentin, and the fall of this industrial city with its rich coal mines was considered inevitable. Indeed, credible reports had been received in Paris that the devastation of the rich city of Lille by the Germans was well under way, indicating that they contemplated a

reluctant evacuation of the most important center in northern France. At all events, an immediate ebb in the German tide was necessitated by the British successes of April 9 to 16. The momentum of Field Marshal Haig's advance and the successes of the French on their share of the western front appeared to make a further retirement of the whole German line imperative—and the great Allied drive had scarcely begun.

SCENE OF THE CANADIAN VICTORY.

An exploration on April 13 of Vimy Ridge, carried by the Canadian troops in a series of historic charges, showed that the British artillery virtually blew off the top of it, and the German stronghold which had resisted all efforts of the French and British during more than two years of war, was finally forced into such a position by high explosives that it could no longer resist infantry charges. Walking on the top of the ridge was a continuous climb from one shell crater to another. Two surmounting knobs, known only on military maps as numbered hills, had attracted the fire of the heaviest British guns and had been shattered into unrecognizable buttes on the landscape.

It was little wonder the Germans made such desperate efforts to hold the Vimy ridge and to retake certain portions of it by counter attacks which failed miserably. The ridge stood as a natural barrier between the Germans and their opponents and was a great protective chain of hills shielding invaluable coal, iron, and other mineral lands that Germany had wrested from France in the first onrush of the war in 1914. The city of Lens, within sight of the British lines, from the ridge, is a great mining center.

THE FRENCH VICTORY AT SOISSONS.

On April 16 the "big push" of the Allies in France flared into a continuous battle covering nearly every mile of the long line from the North Sea to the Swiss border. Between Soissons and Rheims the French engaged in a terrific struggle, driving forward in a solid mass against the German lines on a front of twenty-five miles. Their way paved by ten days of "drum fire," the troops of Gen. Nivelle swept forward, carrying all of the first line of German positions between Soissons and Craonne. They also took the second line positions, south of Juvincourt, east of Craonne, reached the outskirts of Bermericourt, and advanced up the Aisne canal at Loivre and Courcy.

During these operations the French captured 10,000 Germans and a vast amount of war material.

The British were continuing their pressure on both Lens and St. Quentin, but were temporarily held up by a great storm on the 16th. The night before they captured the village of Villaret, which straightened Field Marshal Haig's line northwest of St. Quentin, and made further progress to the northwest of Lens. The prison cages to the rear of Arras were filled with German prisoners, nearly

all of whom were captured in a dazed condition from the terrific British fire that won the great battle of Arras.

A TITANIC STRUGGLE FORESEEN.

"The struggle in the western theater of war promises to be a titanic one," said an eye-witness at British headquarters, April 16. "The Allies are prepared as never before, both in material and personnel, and are co-operating with a smoothness which comes from a complete understanding and thorough appreciation of the work in hand.

"The Germans have more divisions on the western front than would have been thought possible a year ago, but already a half score of Germany's best divisions have been smashed to pieces by the British onslaught and their own unsuccessful counter-attacks. The Bavarian divisions were sacrificed first, but the Prussian Guard divisions, thrown in to stem the British flood tide, have suffered such casualties in the last few days that they will have to be relieved."

The Canadians accounted for a large contingent of Prussian grenadiers in the fighting about "The Pimple" on Vimy ridge while an engagement at Lagnicourt April 15 took its heaviest toll both in dead and prisoners from five German guard regiments.

GERMAN ROUT AT LAGNICOURT.

The rout of the Germans at Lagnicourt, after what they believed to have been a successful attack, will ever be one of the striking pictures of the war. Repulsed and running for their own trenches, they were trapped by the barbed wire entanglements which had been built with such great strength and thickness in front of them. The boast of the Hindenburg line had been its belts of protective wire.

Caught within the meshes of this wire, the German guardsmen screamed madly for help and guidance. Some, like trapped rabbits, scurried up and down the outer barrier, searching in vain for openings. The British troops meantime had the greatest opportunity for open field rifle shooting since the battle of the Marne. Lying flat upon the ground, they poured bullets into the panic-stricken, gray-coated Germans until each man had fired a full 100 rounds.

While this was going on the British field guns came into play with a shrapnel barrage fire which completed the demolition of the entrapped enemy. It was little wonder that later 1,500 German dead could be counted, or that 400 guardsmen surrendered with upheld hands and emotional cries of "Kamerad!"

FRENCH CONTINUE ADVANCE IN APRIL, 1917

The French under General Nivelle continued their victorious advance on the Soissons-Craonne line April 18, crushing the German resistance along a front of thirty-five miles, and raising the total of German prisoners taken during the movement to 17,000. Seventy-five guns, including a number of heavy siege pieces, were captured.

CHAPTER XXX

GEN. PERSHING'S OWN STORY

American Operations in France Described by the Commander-in-Chief—Glowing Tribute to His Men.

A remarkable summary of the operations of the American Expeditionary Force in France from the date of its organization, May 26, 1917, to the signing of the armistice November 11, 1918, was cabled to the Secretary of War by General Pershing on November 20, 1918. His account of the active military operations was as follows:

COMBAT OPERATIONS

During our period of training in the trenches some of our divisions had engaged the enemy in local combats, the most important of which was Seicheprey by the 26th on April 20, 1918, in the Toul sector, but none had participated in action as a unit. The 1st Division, which had passed through the preliminary stages of training, had gone to the trenches for its first period of instruction at the end of October, and by March 21, when the German offensive in Picardy began, we had four divisions with experience in the trenches, all of which were equal to any demands of battle action. The crisis which this offensive developed was such that our occupation of an American sector must be postponed.

On March 28 I placed at the disposal of Marshal Foch, who had been agreed upon as Commander-in-Chief of the Allied Armies, all of our forces to be used as he might decide. At his request the 1st Division was transferred from the Toul sector to a position in reserve at Chaumont en Vexin. As German superiority in numbers required prompt action, an agreement was reached at the Abbeville conference of the allied Premiers and commanders and myself on May 2 by which British shipping was to transport ten American divisions to the British Army area, where they were to be trained and equipped and additional British shipping was to be provided for as many divisions as possible for use elsewhere.

On April 26 the 1st Division had gone into the line in the Montdidier salient on the Picardy battle-front. Tactics had been suddenly revolutionized to those of open warfare, and our men, confident of the results of their training, were eager for the test. On the morning of May 23 this division attacked the commanding German position in its front, taking with splendid dash the town of Cantigny and all other objectives, which were organized and held steadfastly against vicious counterattacks and galling artillery fire. Although local, this brilliant action had an electrical effect, as it demonstrated our fighting qualities under extreme battle conditions, and also that the enemy's troops were not altogether invincible.

The German Aisne offensive, which began on May 27, had advanced rapidly toward the River Marne and Paris, and the Allies faced a crisis equally as grave as that of the Picardy offensive in March. Again every available man was placed at Marshal Foch's disposal, and the 3d Division, which had just come from its preliminary training in the trenches, was hurried to the Marne. Its motorized

GEN. PERSHING'S OWN STORY

machine-gun battalion preceded the other units and successfully held the bridgehead at the Marne, opposite Château-Thierry. The 2d Division, in reserve near Montdidier, was sent by motor trucks and other available transport to check the progress of the enemy toward Paris. The division attacked and retook the town and railroad station at Bouresches and sturdily held its ground against the enemy's best guard divisions. In the battle of Belleau Wood, which followed, our men proved their superiority and gained a strong tactical position, with far greater loss to the enemy than to ourselves. On July 1, before the Second was relieved, it captured the village of Vaux with most splendid precision.

Meanwhile our 2d Corps, under Major-General George W. Read, had been organized for the command of our divisions with the British, which were held back in training areas or assigned to second-line defenses. Five of the ten divisions were withdrawn from the British area in June, three to relieve divisions in Lorraine and in the Vosges and two to the Paris area to join the group of American divisions which stood between the city and any further advance of the enemy in that direction.

AMERICAN DIVISIONS IN THE FIGHTING

The great June, July troop movement from the States was well under way, and, although these troops were to be given some preliminary training before being put into action, their very presence warranted the use of all the older divisions in the confidence that we did not lack reserves. Elements of the 42d Division were in the line east of Rheims against the German offensive of July 15, and held their ground unflinchingly. On the right flank of this offensive four companies of the 28th Division were in position in face of the advancing waves of the German infantry. The 3d Division was holding the bank of the Marne from the bend east of the mouth of the Surmésin to the west of Mézy, opposite Château-Thierry, where a large force of German infantry sought to force a passage under support of powerful artillery concentrations and under cover of smoke screens. A single regiment of the 3d wrote one of the most brilliant pages in our military annals on this occasion. It prevented the crossing at certain points on its front while, on either flank, the Germans, who had gained a footing, pressed forward. Our men, firing in three directions, met the German attacks with counterattacks at critical points and succeeded in throwing two German divisions into complete confusion, capturing 600 prisoners.

The great force of the German Château-Thierry offensive established the deep Marne salient, but the enemy was taking chances, and the vulnerability of this pocket to attack might be turned to his disadvantage. Seizing this opportunity to support my conviction, every division with any sort of training was made available for use in a counteroffensive. The place of honor in the thrust toward Soissons on July 18 was given to our 1st and 2d Divisions in company with chosen French divisions. Without the usual brief warning of a preliminary bombardment, the massed French and American artillery, firing by the map, laid down its rolling barrage at dawn while the infantry began its charge. The tactical handling of our troops under these trying conditions was excellent throughout the action. The enemy brought up large numbers of reserves and made a stubborn defense, both with machine guns and artillery, but through five days' fighting the 1st Division continued to advance until it had gained the heights above Soissons and captured the village of Berzy-le-Sec. The 2d Division took Beau Repaire farm and Vierzy in a very rapid advance and reached a position in front of Tigny at the end of its second day. These two divisions captured 7,000 prisoners and over 100 pieces of artillery.

The 26th Division, which, with a French division, was under command of our 1st Corps, acted as a pivot of the movement toward Soissons. On the 13th it took

GEN. PERSHING'S OWN STORY

the village of Torcy while the 3d Division was crossing the Marne in pursuit of the retiring enemy. The 26th attacked again on the 21st, and the enemy withdrew past the Château-Thierry-Soissons road. The 3d Division, continuing its progress, took the heights of Mont St. Père and the villages of Chartèves and Jaulgonne in the face of both machine gun and artillery fire.

On the 24th, after the Germans had fallen back from Trugny and Epiéds, our 42d Division, which had been brought over from the Champagne, relieved the Twenty-sixth, and fighting its way through the Forêt de Fère, overwhelmed the nest of machine guns in its path. By the 27th it had reached the Ourcq, whence the 3d and 4th Divisions were already advancing, while the French divisions with which we were cooperating were moving forward at other points.

The 3d Division had made its advance into Roncheres Wood on the 29th and was relieved for rest by a brigade of the Thirty-second. The Forty-second and Thirty-second undertook the task of conquering the heights beyond Clerges, the Forty-second capturing Sergy and the Thirty-second capturing Hill 230, both American divisions joining in the pursuit of the enemy to the Vesle, and thus the operation of reducing the salient was finished. Meanwhile the Forty-second was relieved by the Fourth at Chery-Chartreuve, and the Thirty-second by the Twenty-eighth, while the 77th Division took up a position on the Vesle. The operations of these divisions on the Vesle were under the 3d Corps, Maj.-Gen. Robert L. Bullard commanding.

BATTLE OF ST. MIHIEL.

With the reduction of the Marne salient, we could look forward to the concentration of our divisions in our own zone. In view of the forth-coming operation against the St. Mihiel salient, which had long been planned as our first offensive action on a large scale, the First Army was organized on August 10 under my personal command. While American units had held different divisional and corps sectors along the western front, there had not been up to this time, for obvious reasons, a distinct American sector; but, in view of the important parts the American forces were now to play, it was necessary to take over a permanent portion of the line. Accordingly, on August 30, the line beginning at Port sur Selle, east of the Moselle and extending to the west through St. Mihiel, thence north to a point opposite Verdun, was placed under my command. The American sector was afterward extended across the Meuse to the western edge of the Argonne Forest, and included the 2d Colonial French, which held the point of the salient, and the 17th French Corps, which occupied the heights above Verdun.

The preparation for a complicated operation against the formidable defenses in front of us included the assembling of divisions and of corps and army artillery, transport, aircraft, tanks, ambulances, the location of hospitals, and the molding together of all of the elements of a great modern army with its own railroads, supplied directly by our own Service of Supply. The concentration for this operation, which was to be a surprise, involved the movement, mostly at night, of approximately 600,000 troops, and required for its success the most careful attention to every detail.

The French were generous in giving us assistance in corps and army artillery, with its personnel, and we were confident from the start of our superiority over the enemy in guns of all calibers. Our heavy guns were able to reach Metz and to interfere seriously with German rail movements. The French Independent Air Force was placed under my command which, together with the British bombing squadrons and our air forces, gave us the largest assembly of aviation that had ever been engaged in one operation on the Western front.

From Les Eparges around the nose of the salient at St. Mihiel to the Moselle River the line was roughly forty miles long and situated on commanding ground

GEN. PERSHING'S OWN STORY

greatly strengthened by artificial defenses. Our 1st Corps (82d, 90th, 5th and 2d Divisions), under command of Major-Gen. Hunter Liggett, restrung its right on Pont-a-Mousson, with its left joining our 3d Corps (the 89th, 42d and 1st Divisions), under Major-Gen. Joseph T. Dickman, in line to Xivray, were to swing toward Vigneulles on the pivot of the Moselle River for the initial assault. From Xivray to Mouilly the 2d Colonial French Corps was in line in the center, and our 5th Corps, under command of Major-Gen. George H. Cameron, with our 26th Division and a French division at the western base of the salient, were to attack three different hills—Les Eparges, Combres and Amaramthe. Our 1st Corps had in reserve the 78th Division, our 4th Corps the 3d Division, and our First Army the 35th and 91st Divisions, with the 80th and 33d available. It should be understood that our corps organizations are very elastic, and that we have at no time had permanent assignments of divisions to corps.

After four hours' artillery preparations, the seven American divisions in the front line advanced at 5 a. m. on September 12, assisted by a limited number of tanks manned partly by Americans and partly by French. These divisions, accompanied by groups of wire cutters and others armed with bangalore torpedoes, went through the successive bands of barbed wire that protected the enemy's front line and support trenches, in irresistible waves on schedule time, breaking down all defense of an enemy demoralized by the great volume of our artillery fire and our sudden approach out of the fog.

Our 1st Corps advanced to Thiaucourt, while our 4th Corps curved back to the southwest through Nonsard. The 2d Colonial French Corps made the slight advance required of it on very difficult ground, and the 5th Corps took its three ridges and repulsed a counterattack. A rapid march brought reserve regiments of a division of the 5th Corps into Vigneulles in the early morning, where it linked up with patrols of our 4th Corps, closing the salient and forming a new line west of Thiaucourt to Vigneulles and beyond Fresnes-en-Woevre. At the cost of only 7,000 casualties, mostly light, we had taken 16,000 prisoners and 443 guns, a great quantity of material, released the inhabitants of many villages from enemy domination, and established our lines in a position to threaten Metz. This signal success of the American First Army in its first offensive was of prime importance. The Allies found they had a formidable army to aid them, and the enemy learned finally that he had one to reckon with.

MEUSE-ARGONNE OFFENSIVE, FIRST PHASE

On the day after we had taken the St. Mihiel salient, much of our corps and army artillery which had operated at St. Mihiel, and our divisions in reserve at other points, were already on the move toward the area back of the line between the Meuse River and the western edge of the forest of Argonne. With the exception of St. Mihiel, the old German front line from Switzerland to the east of Rheims was still intact. In the general attack all along the line, the operation assigned the American Army as the hinge of this allied offensive was directed toward the important railroad communications of the German armies through Mézières and Sedan. The enemy must hold fast to this part of his lines or the withdrawal of his forces with four years' accumulation of plants and material would be dangerously imperiled.

The German Army had as yet shown no demoralization, and, while the mass of its troops had suffered in morale, its first-class divisions, and notably its machine-gun defense, were exhibiting remarkable tactical efficiency as well as courage. The German General Staff was fully aware of the consequences of a success on the Meuse-Argonne line. Certain that he would do everything in his power to oppose us, the action was planned with as much secrecy as possible and was undertaken

GEN. PERSHING'S OWN STORY

with the determination to use all our divisions in forcing decision. We expected to draw the best German divisions to our front and to consume them while the enemy was held under grave apprehension lest our attack should break his line, which it was our firm purpose to do.

Our right flank was protected by the Meuse, while our left embraced the Argonne Forest, whose ravines, hills, and elaborate defense, screened by dense thickets, had been generally considered impregnable. Our order of battle from right to left was the 3d Corps from the Meuse to Malancourt, with the 33d, 80th and 4th Divisions in line, and the 3d Division as corps reserve; the 5th Corps from Malancourt to Vauquois, with 79th, 87th and 91st Divisions in line, and the 32d in corps reserve, and the 1st Corps, from Vauquois to Vienne le Chateau, with 35th, 28th and 77th Divisions in line, and the 92d in corps reserve. The army reserve consisted of the 1st, 29th and 32d Divisions.

On the night of September 25 our troops quietly took the place of the French, who thinly held the line of this sector, which had long been inactive. In the attack which began on the 26th we drove through the barbed wire entanglements and the sea of shell craters across No Man's Land, mastering all the first-line defenses. Continuing on the 27th and 28th, against machine guns and artillery of an increasing number of enemy reserve divisions, we penetrated to a depth of from three to seven miles and took the village of Montfaucon and its commanding hill and Exermont, Gercourt, Cuisy, Septsarges, Malancourt, Ivairy, Epinonville, Charpentry, Very and other villages. East of the Meuse one of our divisions, which was with the 2d Colonial French Corps, captured Marcheville and Rievville, giving further protection to the flank of our main body. We had taken 10,000 prisoners, we had gained our point of forcing the battle into the open, and were prepared for the enemy's reaction, which was bound to come, as he had good roads and ample railroad facilities for bringing up his artillery and reserves.

In the chill rain of dark nights our engineers had to build new roads across spongy shell-torn areas, repair broken roads beyond No Man's Land, and build bridges. Our gunners, with no thought of sleep, put their shoulders to wheels and drag-ropes to bring their guns through the mire in support of the infantry, now under the increasing fire of the enemy's artillery. Our attack had taken the enemy by surprise, but quickly recovering himself, he began to fire counterattacks in strong force, supported by heavy bombardments, with large quantities of gas. From September 28 until October 4 we maintained the offensive against patches of woods defended by snipers and continuous lines of machine guns, and pushed forward our guns and transport, seizing strategical points in preparation for further attacks.

OTHER UNITS WITH ALLIES

Other divisions attached to the allied armies were doing their part. It was the fortune of our 2d Corps, composed of the 27th and 30th Divisions, which had remained with the British, to have a place of honor in coöperation with the Australian Corps on September 29 and October 1 in the assault on the Hindenburg Line where the St. Quentin Canal passes through a tunnel under a ridge. The 30th Division speedily broke through the main line of defense for all its objectives, while the 27th pushed on impetuously through the main line until some of its elements reached Gouy. In the midst of the maze of trenches and shell craters and under crossfire from machine guns the other elements fought desperately against odds. In this and in later actions, from October 6 to October 19, our 2d Corps captured over 6,000 prisoners and advanced over thirteen miles. The spirit and aggressiveness of these divisions have been highly praised by the British Army commander under whom they served.

GEN. PERSHING'S OWN STORY

On October 2-9 our 2d and 36th Divisions were sent to assist the French in an important attack against the old German positions before Rheims. The 2d conquered the complicated defense works on their front against a persistent defense worthy of the grimmest period of trench warfare and attacked the strongly held wooded hill of Blanc Mont, which they captured in a second assault, sweeping over it with consummate dash and skill. This division then repulsed strong counterattacks before the village and cemetery of Ste. Etienne and took the town, forcing the Germans to fall back from before Rheims and yield positions they had held since September, 1914. On October 9 the 36th Division relieved the 2d, and in its first experience under fire withstood very severe artillery bombardment and rapidly took up the pursuit of the enemy, now retiring behind the Aisne.

MEUSE-ARGONNE OFFENSIVE, SECOND PHASE

The allied progress elsewhere cheered the efforts of our men in this crucial contest, as the German command threw in more and more first-class troops to stop our advance. We made steady headway in the almost impenetrable and strongly held Argonne Forest, for, despite this reinforcement, it was our army that was doing the driving. Our aircraft was increasing in skill and numbers and forcing the issue, and our infantry and artillery were improving rapidly with each new experience. The replacements fresh from home were put into exhausted divisions with little time for training, but they had the advantage of serving beside men who knew their business and who had almost become veterans overnight. The enemy had taken every advantage of the terrain, which especially favored the defense by a prodigal use of machine guns manned by highly trained veterans and by using his artillery at short ranges. In the face of such strong frontal positions we should have been unable to accomplish and progress according to previously accepted standards, but I had every confidence in our aggressive tactics and the courage of our troops.

On October 4 the attack was renewed all along our front. The 3d Corps, tilting to the left, followed the Brioules-Cunel Road; our 5th Corps took Gesnes, while the 1st Corps advanced for over two miles along the irregular valley of the Aire River and in the wooded hills of the Argonne that bordered the river, used by the enemy with all his art and weapons of defense. This sort of fighting continued against an enemy striving to hold every foot of ground and whose very strong counterattacks challenged us at every point. On the 7th the 1st Corps captured Châtel-Chénéry and continued along the river to Cornay. On the east of the Meuse sector one of the two divisions cooperating with the French, captured Consenvoye and the Haumont Woods. On the 9th the 5th Corps, in its progress up the Aire, took Fléville, and the 3d Corps, which had continuous fighting against odds, was working its way through Brioules and Cunel. On the 10th we had cleared the Argonne Forest of the enemy.

It was now necessary to constitute a second army, and on October 9 the immediate command of the First Army was turned over to Lieut.-Gen. Hunter Liggett. The command of the Second Army, whose divisions occupied a sector in the Woivre, was given to Lieut.-Gen. Robert L. Bullard, who had been commander of the 1st Division and then of the 3d Corps. Major-Gen. Dickman was transferred to the command of the 1st Corps, while the 5th Corps was placed under Major-Gen. Charles P. Summerall, who had recently commanded the 1st Division. Major-Gen. John L. Hines, who had gone rapidly up from regimental to division commander, was assigned to the 3d Corps. These four officers had been in France from the early days of the expedition and had learned their lessons in the school of practical warfare.

Our constant pressure against the enemy brought day by day more prisoners, mostly survivors from machine-gun nests captured in fighting at close quarters.

GEN. PERSHING'S OWN STORY

On October 18 there was very fierce fighting in the Caures Woods east of the Meuse and in the Ormont Woods. On the 14th 1st Corps took St. Juvin, and the 5th Corps, in hand-to-hand encounters, entered the formidable Kriemhilde line, where the enemy had hoped to check us indefinitely. Later the 5th Corps penetrated further the Kriemhilde line, and the 1st Corps took Champignuelles and the important town of Grandpre. Our dogged offensive was wearing down the enemy, who continued desperately to throw his best troops against us, thus weakening his line in front of our Allies and making their advance less difficult.

DIVISIONS IN BELGIUM

Meanwhile we were not only able to continue the battle, but our 37th and 91st Divisions were hastily withdrawn from our front and dispatched to help the French Army in Belgium. Detraining in the neighborhood of Ypres, these divisions advanced by rapid stages to the fighting line and were assigned to adjacent French corps. On October 31, in continuation of the Flanders offensive, they attacked and methodically broke down all enemy resistance. On Nov. 3 the 37th had completed its mission in dividing the enemy across the Escaut River and firmly established itself along the east bank included in the division zone of action. By a clever flanking movement troops of the 91st Division captured Spitaals Bosschen, a difficult wood extending across the central part of the division sector, reached the Escaut, and penetrated into the town of Audenarde. These divisions received high commendation from their corps commanders for their dash and energy.

MEUSE-ARGONNE—LAST PHASE

On the 23d the 3d and 5th Corps pushed northward to the level of Bantheville. While we continued to press forward and throw back the enemy's violent counter-attacks with great loss to him, a regrouping of our forces was under way for the final assault. Evidences of loss of morale by the enemy gave our men more confidence in attack and more fortitude in enduring the fatigue of incessant effort and the hardships of very inclement weather.

With comparatively well-rested divisions, the final advance in the Meuse-Argonne front was begun on November 1. Our increased artillery force acquitted itself magnificently in support of the advance, and the enemy broke before the determined infantry, which, by its persistent fighting of the past weeks and the dash of this attack, had overcome his will to resist. The 3d Corps took Ancreville, Douillon and Andevanne, and the 5th Corps took Landres et St. Georges and passed through successive lines of resistance to Bayonville and Chennery. On the 2d the 1st Corps joined in the movement, which now became an impetuous onslaught that could not be stayed.

On the 3d advance troops surged forward in pursuit, some by motor trucks, while the artillery pressed along the country roads close behind. The 1st Corps reached Authé and Châtillon-Sur-Bar, the 5th Corps, Fosse and Nouart, and the 3d Corps, Halles, penetrating the enemy's lines to a depth of twelve miles. Our large-caliber guns had advanced and were skilfully brought into position to fire upon the important lines at Montmedy, Longuyon and Conflans. Our 3d Corps crossed the Meuse on the 5th and the other corps, in the full confidence that the day was theirs, eagerly cleared the way of machine guns as they swept northward, maintaining complete coordination throughout. On the 6th, a division of the 1st Corps reached a point on the Meuse opposite Sedan, twenty-five miles from our line of departure. The strategical goal which was our highest hope was gained. We had cut the enemy's main line of communications, and nothing but surrender or an armistice could save his army from complete disaster.

In all forty enemy divisions had been used against us in the Meuse-Argonne battle. Between September 26 and November 6 we took 26,059 prisoners and 468 guns on this front. Our divisions engaged were the 1st, 2d, 3d, 4th, 5th, 26th, 28th, 29th, 32d, 33d, 35th, 37th, 42d, 77th, 78th, 79th, 80th, 82d, 89th, 90th and 91st. Many of our divisions remained in line for a length of time that requires nerves of steel, while others were sent in again after only a few days of rest. The 1st, 5th, 26th, 77th, 80th, 89th, and 90th were in the line twice. Although some of the divisions were fighting their first battle, they soon became equal to the best.

OPERATIONS EAST OF THE MEUSE

On the three days preceding November 10, the 3d, the 2d Colonial and the 17th French Corps fought a difficult struggle through the Meuse Hills south of Stenay and forced the enemy into the plain. Meanwhile my plans for further

GEN. PERSHING'S OWN STORY

use of the American forces contemplated an advance between the Meuse and the Moselle in the direction of Longwy by the First Army, while, at the same time, the Second Army should assure the offensive toward the rich coal fields of Briey. These operations were to be followed by an offensive toward Château-Salins east of the Moselle, thus isolating Metz. Accordingly, attacks on the American front had been ordered, and that of the Second Army was in progress on the morning of November 11, when instructions were received that hostilities should cease at 11 o'clock A. M.

At this moment the line of the American sector, from right to left, began at Port-sur-Seille, thence across the Moselle to Vandières and through the Woivre to Bezonvaux, in the foothills of the Meuse, thence along to the foothills and through the northern edge of the Woivre forests to the Meuse at Mouzay, thence along the Meuse connecting with the French under Sedan.

RELATIONS WITH THE ALLIES

Coöperation among the Allies has at all times been most cordial. A far greater effort has been put forth by the allied armies and staffs to assist us than could have been expected. The French Government and Army have always stood ready to furnish us with supplies, equipment and transportation and to aid us in every way. In the towns and hamlets wherever our troops have been stationed or billeted the French people have everywhere received them more as relatives and intimate friends than as soldiers of a foreign army. For these things words are quite inadequate to express our gratitude. There can be no doubt that the relations growing out of our associations here assure a permanent friendship between the two peoples. Although we have not been so intimately associated with the people of Great Britain, yet their troops and ours when thrown together have always warmly fraternized. The reception of those of our forces who have passed through England and of those who have been stationed there has always been enthusiastic. Altogether it has been deeply impressed upon us that the ties of language and blood bring the British and ourselves together completely and inseparably.

STRENGTH

There are in Europe altogether, including a regiment and some sanitary units with the Italian Army and the organizations at Murmansk, also including those en route from the States, approximately 2,053,347 men, less our losses. Of this total there are in France 1,338,169 combatant troops. Forty divisions have arrived of which the infantry personnel of ten have been used as replacements, leaving thirty divisions now in France organized into three armies of three corps each.

The losses of the Americans up to November 18 are: Killed and wounded, 36,145; died of disease, 14,811; deaths unclassified, 2,204; wounded, 179,625; prisoners, 2,163; missing, 1,160. We have captured about 44,000 prisoners and 1,400 guns, howitzers and trench mortars.

[General Pershing then highly praised the work of the General Staff, the Service of Supply, Medical Corps, Quartermaster Department, Ordnance Department, Signal Corps, Engineer Corps, and continued:]

Our aviators have no equals in daring or in fighting ability, and have left a record of courageous deeds that will ever remain a brilliant page in the annals of our army. While the Tank Corps has had limited opportunities, its personnel has responded gallantly on every possible occasion, and has shown courage of the highest order.

The navy in European waters has at all times most cordially aided the army, and it is most gratifying to report that there has never before been such perfect coöperation between these two branches of the service.

Finally, I pay supreme tribute to our officers and soldiers of the line. When I think of their heroism, their patience under hardships, their unflinching spirit of offensive action, I am filled with emotion which I am unable to express. Their deeds are immortal, and they have earned the eternal gratitude of our country.

I am, Mr. Secretary, very respectfully,

JOHN J. PERSHING,
General, Commander-in-Chief,
American Expeditionary Forces.

To the Secretary of War.

CHAPTER XXXI

WHEN THE DAYS OF RECKONING DAWNED

*American Troops on All Fronts—Changes Come Fast and Furious—
First Hun Cry for Peace—Virtue, Vice and Violence—Austria
Surrenders—Opens Up the Dardanelles—Closing Days of Hohen-
zollern Reign—Killing of Tisza—Terms Prepared for Germany—
Armistice Signed by Germany.*

AMERICAN TROOPS ON ALL FRONTS

The collapse of Russia in 1917 had released vast bodies of German troops for service in France, but the calamities that overtook them on the French front were so destructive that insufficient man power was left to take care of the southeastern fronts, so that Serbia was enabled to institute a new offensive, and with the aid of Greece, in a few days cut Bulgaria out of the German horde, pressed forward in Serbia, and pushed ahead through the Balkan regions. Meanwhile American strength was greatly augmented in the west and at the same time American troops appeared on the Murman coast in the north and Siberia on the Pacific east, on the Piave front in Italy, and at every other point where hostile strength was greatest or strategic advantage was to be gained by their presence.

Concurrently, the United States navy swept the western seas of Europe free of German submarines. Our naval forces were combined with those of Great Britain as the sea arm of a united command, under the joint name of the Grand Fleet; and American troop ships landed newly trained American soldiers in France at the average number of about 250,000 a month—over 2,200,000 in little more than a year; at the same time helping to reopen in safety the lanes of ocean commerce by which the trade of our European allies was fully restored, German ports corked tight, and Germany thereby thrown back absolutely upon her own interior resources. Out of this vigorous and abundant American action emerged the conditions that insured a "Peace of Justice."

These things were the quick work of the latter part of 1917 and the campaigns of 1918. The achievement was gigantic, but it had no effect in taking attention or diverting action from those movements that offered at once an advantage to our common cause, while disintegrating the hoary tyrannies of Central and Eastern Europe.

CHANGES COME FAST AND FURIOUS

Events in the field reacted with powerful effect upon autocratic Austria. The Austrian throne was built upon the backs of vassal states, all of which had yielded thousands of emigrants to this country: and these transplanted peoples, having found freedom, proceeded to

WHEN THE DAYS OF RECKONING DAWNED

incite the countries of their origin to throw off their burdens and like Americans, be free to govern themselves.

The moment had come for Bohemia, Poland, and all Czecho-Slav and Jugo-Slav peoples to rise. The United States Government, in full sympathy with their yearnings, had received their representatives at Washington, had furnished funds as well as moral support to their provisional governments, had supported an independent Czecho-Slav army in Russia with American reinforcements, with clothing, arms, munitions, and supplies, and now, at exactly the right juncture, in August, 1918, recognized the Czecho-Slav as a cobelligerent power lawfully at war against the central empires.

FERDINAND FALLS FROM THE WAR WAGON

This was the push that brought the break. Germany still had her armies intact on the soil of other countries, and was a consolidated force, tired though not beaten. But the fat and filthy "Czar" Ferdinand of Bulgaria sat in voluntary exile, eating like bread the ashes of repentance, and mingling his drink with weeping; so that his country, yellow at best, and frightened by the fear of being done to as it had done by Serbia, quit abruptly, without shame, almost without firing a shot. With that defection the last wisp of Germany's long cherished dream of a boche Middle-Europe and a boche empire stretching from Berlin to Bagdad, faded forever. In October, 1918, Austria consented to a reconstituted independent Bohemian state, and with apparent readiness granted self-government to Hungary.

Meantime, in September and October, 1918, the American and allied armies chased the Germans from the coast and far into the interior of Belgium, the Belgian army, financed by the United States, taking part in that operation. Town after town, city after city in Belgium and France fell to the American and allied forces, so that the German government (October 27) addressed a note to the President of the United States asking him to intercede with our allies for an armistice and a conference for discussion of terms of peace. This led to four exchanges of notes, in which Germany's expressions were specious, and assumed a right to negotiate. The last of these notes was submitted by President Wilson to the allied council at Paris; and the council answered by referring the whole question of armistice to Marshal Foch and the allied military chiefs.

THE "CROOKED KAMERAD"

In those same months of September and October, 1918, Austria and Turkey made proffers of separate surrender. This was the logical sequence of a "crooked kamerad" peace-offensive inaugurated by Germany as soon as she found herself being rolled, helplessly, toward the Rhine. It was at once the most vicious game that her genius for

WHEN THE DAYS OF RECKONING DAWNED

the vicious had ever prompted, and it was put forward at the very time when the fourth liberty loan was in course of being floated.

Our soldiers on all fronts had often suffered through a trick of false surrender by German soldiers. It is best described by one of our boys who was lying on a table in a base hospital, waiting his turn to be operated upon, when he heard another who was being wheeled out from the operating room and was muttering through the ether fumes:

"Fired at me ten feet away, he did, point blank, and then he dropped his rifle and stuck up his hands and called me 'Kamerad'! Kamerad, the dirty crook! Didn't I stick 'im pritty, Bill'!"

It had been a common thing on the western front for a group of boches to come running toward the American lines unarmed, with their hands in the air, crying "Kamerad! Kamerad!" And then, when our men went out to receive them, fall flat, to make way for a force of armed boches immediately behind them, who opened fire—plain murder as ever was done.

So it was a crooked Kamerad cry, a peace offensive intended to sing us to sleep, that Germany launched in September, 1918. Of a sudden, our newspapers were filled with what appeared to be straight news dispatches dated at Amsterdam, Copenhagen, Stockholm, London, Paris, Geneva, and even Berlin, telling tales (that were not so) of starvation and disaffection in Germany, or broken morale in the German armies, and riotous demonstrations demanding peace. The impression was immediate and came near to being disastrous.

Many urgent requests were being made just then for public help from America. The gigantic fourth loan, the needs of the Red Cross, the thousand and one things, big and little, that had to be taken care of, and the very earnest and pressing call for a sharper realization of war's awful facts, were being driven with might and main, all over the land; and all was going well.

Within three days, before even the Associated Press discovered the fraud, these outrageous German lies had taken effect. Subscriptions to the loan began to slacken, alarmingly. Interest in the battle news began to fade. People were telling each other the war was over.

PRINCE MAX WRITES A NOTE

Then on October 6th, 1918, came the note of the German Chancellor, Prince Maximilian of Baden, asking an armistice and a peace conference—in essence, an astounding request for time to consolidate the German armies and bring up fresh guns and munitions. America might have been fooled into a frightful error if the great war-organizations had not come forward with a roaring counterblast. The peace offensive failed. More than that, the people resented it in a prompt and highly practical way. They oversubscribed the six billion loan. Most of them, especially the smaller subscribers, doubled

WHEN THE DAYS OF RECKONING DAWNED

their subscriptions in the last two days of the time allotted for the flotation. October 7th, President Wilson answered Prince Max's request with a refusal.

But it was a fortunate thing for the allied cause that the peace offensive was made, for its one effect was to create a profound distrust of all war news coming out of Amsterdam or Copenhagen. It revealed the fact that Berlin had been closely censoring all news dispatches that assumed to disclose the state of affairs in the central empires; censoring them rigorously, and inventing most of them. Germany had not yet learned that lies would not win the war; but the rest of the world had learned that Germany, as a liar, was so supernally endowed that her feeblest efforts in that domain would have made Ananias, Baron Munchausen, and Joe Mulhatton look like a trio of supersaints, choking with truth.

FIRST HUN CRY FOR PEACE

Germany's definite turn toward peace came in October, 1918, in the form of further and very awkward notes written by Prince Maximilian of Baden, the German Chancellor, and Doctor Solf, German Minister of foreign affairs. While the first of these notes was coming along, the Leinster was sunk by a German submarine on the Irish coast. The Leinster was a passenger ship, employed in regular service on a long ferriage. She had a full passenger list, nearly 400 people, peaceable folk all, just about such as may be found any day aboard a Staten Island ferry boat. It was not in any sense an act of war, but mere and open piracy, killing for the love of killing. It was one of the most horrible acts in a long, long list of horrors for which Germany has learned she must account in the long reckoning she has been forced to face.

VIRTUE, VICE AND VIOLENCE

At the same time, strangely contrasting with the virtuous attitude assumed in the notes, towns and cities in France and Belgium were being blown up before evacuation by the Germans, their men were being marched away to slavery in Germany, their women and young girls assigned as "orderlies" in the service of German officers—such "orderlies" as Turkey buys and sells for its harems. The contrast between German professions of virtue and German bestiality of act was ghastly. It is hard to believe that such things could happen between earth and sky, and they who did them still live; yet the things, hypocritical on one side and sickeningly horrible on the other, were actually done.

RESULTS OF A FEW BUSY MONTHS

Between the day when that little group of Americans stopped the hordes of hell at Chateau Thierry, and Germany's acceptance of the American and allied armistice terms, these other and happier things had come to pass.

WHEN THE DAYS OF RECKONING DAWNED

Bulgaria had been forced to quit. Germany, Austria-Hungary, and Turkey sued for peace. Turkey's military power was broken in Asia Minor, Germany undertook the greatest retreat in history, and these countries and Austria-Hungary were suffering from serious internal dissensions.

The allies took about half a million prisoners and some 4,000 cannon. They destroyed more than 300 airplanes and 100 balloons. They recovered more than 7,000 square miles of territory in France and Belgium, 20,000 square miles in Serbia, Albania and Montenegro, and 15,000 square miles in Asia Minor.

In France, the cities of Lille, Turcoing, Roubaix, Douai, Lens, Cambrai, St. Quentin, Peronne, Laon, Soissons, Noyon, La Bassee, Bapaume, St. Mihiel, Chateau Thierry, Grand Pre, Soissons, Vouziers, LaFere, LeCateau, Juniville, Craonne, and Machault were reoccupied. Valenciennes fell to the British. Reims and Verdun were freed, after four years' artillery domination.

The St. Mihiel salient was wiped out by Pershing's American army, the great St. Gobain massif recovered, the Hindenburg line and lesser defensive systems shattered, and the Argonne massif won.

The Belgian Coast was cleared of the enemy and the Belgian cities of Bruges, Ostend, Zeebrugge, Roulers, Courtrai, Ghent, Audenarde, and Tournai were recaptured.

The allied advance in France was about fifty miles eastward from Villers-Bretonneaux, near Amiens, and nearly the same distance northward from Chateau Thierry. In Belgium, the allies had progressed about forty miles eastward from Nieuport.

Three-fourths of Serbia, four-fifths of Albania, and a large slice of Montenegro were repatriated.

The allied advance covered more than 200 miles northward to Negotin, on the Danube, within twenty-two miles of Hungarian Territory.

The British in Asia Minor advanced over 350 miles and took Aleppo, possession of which gave them the key to Constantinople from the south.

The British expedition in Mesopotamia began an operation designed to capture Mosul and open the way to the eastern terminus of the proposed Berlin-to-Bagdad railway, which ends at Nesibin.

In Russia the allies advanced 275 miles up the Dwina river and penetrated about 350 miles southward from the Murman coast. They also pushed 600 miles inland from Vladivostok.

OPENS UP THE DARDANELLES

On the very last day of October, 1918, Turkey surrendered to the British, opening the Dardanelles and through those waters giving the allied fleets access to the German-dominated Black Sea and the coast

WHEN THE DAYS OF RECKONING DAWNED

of southern Russia, and putting at the mercy of the allies the only active units of the German navy. The surrender included Palestine and the Mesopotamian fronts. General Allenby's farther drive at Constantinople became unnecessary, having served the purpose of hastening Turkey's decision; and Allenby himself was assigned to the occupancy of the Turk Capital.

The same day, October 31, 1918, the Austrian government ordered demobilization of the Austrian armies, and the Austrian forces began a hasty retreat from Italy. The retreat became a rout before evening of that day, the Italians pursuing and capturing over 50,000 men and 300 cannon, and cutting off some 200,000 Austrians in a trap between the Brenta and Piave rivers. General Diaz, the Italian commander, after considerable entreaty, consented to receive General Weber of the Austrian command, who brought a plea for armistice.

The result of their conference was an agreement for an armistice that should go into effect at 3 o'clock in the afternoon of November 4th—an allowance of time sufficient to get the acceptance signed at Vienna. Meanwhile there would be no cessation of fighting.

AUSTRIA SURRENDERS

The terms were thorough and severe. They amounted to Austria's unconditional surrender, disarmament, demobilization of armies, delivery of the major fleet and all submarines to the United States and allies, restoration to Italy of all the Italian provinces that Austria had taken in older wars, free passage to American and allied forces through Austrian territory, abandonment of land, sea and island fortifications to the Americans and allies, immediate release (without reciprocation) of all American and allied soldiers and sailors held prisoner in Austria, return of all allied merchant ships held at Austrian ports, freedom of navigation on the Danube by American and allied war and merchant ships, internment of all German troops remaining in Austria by November 18th, 1918, and immediate withdrawal of all Austrian troops serving with the German armies anywhere between the Swiss border and the North sea.

The terms were accepted in full by the Vienna government, but between the time it was delivered by General Diaz to General Weber and 3 o'clock of November 4th, the Austrian armies on Italian soil stampeded in a panic so complete that the pursuing Italians had taken 200,000 of them prisoner, making altogether nearly half a million taken since October 24th. In the same time about 7,000 guns, 12,000 auto cars and over 200,000 horses were captured, and Austrian fatalities ran into numbers almost equal to the largest army Napoleon ever had under command in any one of his great campaigns.

Austria had begun to yield during the last week of October, when Hungary abandoned the empire, released its civil and military officials

WHEN THE DAYS OF RECKONING DAWNED

from their oath of allegiance to the imperial crown, and formed arrangements for an independent government of its own. Count Tisza, formerly premier of Hungary, and the most reactionary of Hungarian statesmen, was assassinated toward the close of that week.

THE KILLING OF TISZA

An Amsterdam report dated November 3d quoted from the *Vossische Zeitung* of Berlin an account of that event, from which it appears that about 6 o'clock in the evening three soldiers invaded Count Tisza's residence and presented themselves in the drawing room. Count Tisza, with his wife and the Countess Almassy, advanced to meet the intruders, asking what they wanted. "What have you in your hand?" a soldier demanded of Tisza. Tisza replied that he held a revolver. The soldier told him to put it away, but Tisza replied: "I shall not, because you have not laid aside your rifles." The soldiers then requested the women to leave the room, but they declined to do so. A soldier then addressed Tisza as follows: "You are responsible for the destruction of millions of people, because you caused the war." Then raising their rifles, the soldiers shouted: "The hour of reckoning has come." The soldiers fired three shots and Tisza fell. His last words were: "I am dying. It had to be." The soldiers quitted the house, accompanied by gendarmes, who previously were employed to guard the door.

It was the removal of Count Tisza that really cleared the way for the new Hungarian state. Bohemia and the other Slavic vassal states of Austria had already broken away. President Wilson had recognized Poland as an independent and belligerent state. Austria's remaining dependence, after Hungary's defection, was upon the German population of its north and northwestern provinces, and the provinces wrenched from Italy forty years before. Austrian armies numbering more than half a million men had driven the Italians back from the territory they had won in 1917 under General Cadorna, and had been brought to a stand on the river Piave, where a deadlock somewhat resembling that in front of Verdun had been maintained many months. These armies were affected by the movement that was dissolving the empire, and gave way, with the result above stated.

The terms of the Austrian armistice were furnished to General Diaz through Marshal Foch, by the American and allied council sitting at Versailles.

During the interim between the delivery and the acceptance of the Austrian Armistice and the surrender of Austria, the Versailles Council prepared terms of an armistice that had been sued for by the German government.

WHEN THE DAYS OF RECKONING DAWNED

TERMS PREPARED FOR GERMANY

On November 4th, 1918, Berlin was notified by the Versailles council that Marshal Foch had in his hands the terms on which armistice would be granted. November 8th, a German commission of five were admitted to audience with Marshal Foch, who read and delivered the document, with notice that it must be accepted and signed within seventy-two hours. A request by Herr Erzberger, one of the German commissioners, that fighting be suspended during that time, was curtly refused; and the armistice terms were communicated by the commissioners to the German revolutionary government, which had come into power by voluntary transfer of the chancellorship from Prince Maximilian of Baden to Friedrich Ebert, Vice-president of the social democratic party.

The revolution began in the German fleet at Kiel, where the sailors mutinied and hoisted the red flag. It spread with great rapidity and very little disorder throughout all the German states.

November 9th the Kaiser was compelled by the revolutionists to abdicate, and the crown prince signed a renunciation of his right to the succession. The abdication of the Kings of Bavaria and Wurtemberg occurred at the same time. The ex-emperor and the crown prince, in an attempt to reach the British line and surrender themselves, were headed off by the revolutionary forces and took refuge in Holland.

ARMISTICE SIGNED BY GERMANY

November 11th, 1918, the armistice was signed by the German commissioners, upon orders from Berlin. On the morning of that day, at 11 o'clock Paris time, fighting ceased on all fronts.

The terms of the armistice were in substance as follows. They demanded:

Evacuation within thirty-one days of Belgium, France, Alsace-Lorraine, Luxemburg, Russia, Roumania and Turkey, all territory that had belonged to Austria-Hungary, and all territory held by German troops on the west bank of the Rhine.

Renunciation of the treaties of Brest-Litovsk and Bucharest.

Delivery to and occupation by American and allied troops within nineteen days, of Mayence, Coblenz and Cologne, together with their bridgeheads. The bridgeheads include all German territory within a radius of eighteen miles on the east (German) bank of the Rhine, at each of these points.

The surrender of 5,000 cannon, 25,000 machine guns, 5,000 motor lorries, 3,000 flame throwers, 1,700 airplanes, 5,000 locomotives, 150,000 wagons (railway cars) and all the railways of Alsace-Lorraine.

Establishment of a neutral strip twenty-four miles wide on the east (German) side of the Rhine, paralleling that river from the Holland border to the border of Switzerland.

WHEN THE DAYS OF RECKONING DAWNED

The return within fifteen days, of all inhabitants removed from invaded countries, including hostages and persons under trial or convicted.

Release of American and allied prisoners of war held by Germany—the American and allied powers to retain all Germans held by them as prisoners of war.

Surrender of half of the German fleet to America and the allies, together with all submarines, other miscellaneous German ships, and all American and allied merchant ships held by Germany. The other half of the German fleet to be disarmed and dismantled.

Notification to neutral countries by Germany that they are free to trade on the seas with America and the allied countries.

Access by way of Dantzic or the Vistula river, to all territory in the East evacuated by Germany.

Evacuation by all German forces in East Africa within a time to be fixed by the allies.

Restitution for all damage done by German forces.

Return of the funds taken by the Germans from the National Bank of Belgium, and the gold taken from Russia and Roumania.

These terms, which not only constitute Germany's unconditional surrender, but reduce Germany to a condition that absolutely prevents her resumption of war, form the base of the final treaty of peace.

CLOSING DAYS OF HOHENZOLLERN REIGN

Into the four months preceding November 11, 1918, were crammed events that drove the Germans back, deprived them of their allies, brought the utter collapse of Imperial government, drove the emperor into exile, saw a socialist republic set up with Berlin as its capital, brought the whole of what had been the empire to a state of seething unrest and change touched with the poison of bolshevism. November 4, a memorable date, found Germany alone and unsupported against a world triumphant in arms. All the laboriously built up structure of her military state was brought to a futile struggle for life, the whole vast fabric of her underground diplomacy, her intricate, world-penetrating spy system, her marvelously elaborate and totally unscrupulous propaganda, crumbled away; nothing remained of the earlier vigor but a memory—that shall be a stench forever.

November 11, 1918, will go down in history as the memorable day in which the last surviving medieval tyranny in Europe disappeared in blood and smoke; for its final act was filled with characteristic hate and brutality.

In the very last hours before armistice took effect, German batteries poured a deluge of high explosives and poison gas on Mezieres, where there were no allied soldiers at all, but only civilians, men, women and children, twenty thousand of them, penned like rats

WHEN THE DAYS OF RECKONING DAWNED

in a trap, without possibility of escape. Says one correspondent, describing that horror: "Words cannot depict the plight of the unhappy victims of this crowning German atrocity. Incendiary shells fired the hospital, and by the glare of a hundred fires the wounded were carried to a shelter of cellars where the whole population was crouching.

"That was not enough to appease the bitter blood lust of the Germans in defeat. Cellars may give protection from fire or melinite; but they are worse than death traps against the heavy fumes of poisonous gas. So the murderous order was given, and faithfully the boche gunners carried it out. There were no gas masks for the civilians and no chemicals that might permit them to save lives. Many succumbed."

FINAL ACT OF THE HUN AT SEA

The final act at sea was almost concurrent with this tragedy. The 16,000-ton battleship *Britannia* was torpedoed off the entrance to the straits of Gibraltar, November 9, and sank in three and one-half hours.

FOLLOWING THE DAYS OF RECKONING

And so, spewing murder in its last writhing, the monster died. It had begun by furiously ravaging Belgium in August, 1914; it ended with the awful, wanton murder of noncombatants at Mezieres in November, 1918. Throughout four years, three months and ten days, it had ramped and raged over the land, under the sea and in the air, slaughtering, poisoning, ravaging, without cessation, killing wherever it could, robbing with colossal greed, defiling what it could neither kill nor carry away, leaving across the pages of history a trail of blood and filth and slime that all the tears of all the angels cannot ever wash away.

But it left a world of nations free to work out their several destinies, self-determining, not subject any more to the threat of causeless war at the hands of a government steeled to barbarity. A world cemented by the blood the monster itself had caused to be shed; by the memory of brave sons fallen that others might live; by the tears of countless women and children made widows and orphans; by a new understanding between all the nations of men that dwell upon the face of the earth, because of mutual sacrifices in a common cause; by a knowledge that the long night of medieval tyranny had faded out and a new day had come, in which power shall arise from and be wielded by the peoples, never again by kings or emperors. And so our planet shall be ruled as long as man inhabits it. Out of bitter darkness, in the splendor of this new day the spirit of liberty has risen, with healing on its wings.

We who have lived through the struggle may say with gratitude, each of us, "I saw the light! I saw the morning break!"

WHEN THE DAYS OF RECKONING DAWNED

AMONG THE LAST SHOTS FIRED

While Berlin was trying to get into touch with Marshal Foch, and the end was coming into sight, the Americans along the Meuse put forth all the energy that was in them, in their eager desire to hand the enemy a final series of wallops. It was here one of the most brilliant exploits of the war occurred.

On the night of November 4, American troops, though under very heavy artillery and machine gun fire, succeeded in building four pontoon bridges across the Meuse, a little more than a mile east of Briulles. Early in the morning one of these was destroyed, but a strong force crossed over the other three, and swept forward with such rapidity, though in the face of superior numbers, that by noon the enemy was in disorderly retreat northward. By nightfall the Americans on that side of the river had captured Liny-Devant-Dun and Mille-Devant-Dun, on the east bank of the river, while a large American and French force pushed back the Germans on the west bank, capturing Beaumont, Pouilly and several less important places, and taking positions on three sides of Stenay, the pivot on which the whole German retirement had turned. American troops the 5th and 6th of November had advanced to within five miles of the main communication line of the Germans between Metz, Mezieres, Hirson and the north.

After destroying the bridge connecting Stenay with Laneuville, the Germans had opened the locks of the Ardennes canal and flooded the river to a width of about two-thirds of a mile.

It was here the Americans undertook and accomplished the impossible. They picked out the best of their swimmers, who crossed the stream carrying light lines attached to heavy cables, which were drawn after them, and by a hasty pontoon construction got the whole force across. Then, in the face of heavy firing, they pounded their way over a mud flat nearly a mile wide, and hit the canal, which by then, had been drained, forming a deep ditch that would have stopped any other soldiers. But the Americans rustled up some grappling irons and hooks, which they tied to the ends of ropes, and throwing them to the coping, then swarmed up and chased the disconcerted Germans out of their last position in that sector.

On November 7th American troops entered Sedan and cut the German line of communication between Metz and the north.

The same day, troops from Ohio, under command of General Farnsworth, took the Ecke salient sixteen miles southwest of Ghent in Belgium, and were advancing on the city when the Germans suddenly evacuated it, departing in haste toward the German frontier.

Stenay was the last town to fall into American hands. It was occupied without resistance, an hour before the armistice went into

WHEN THE DAYS OF RECKONING DAWNED

effect. While preparations for attack were in course, paroles came in reporting that the Germans had cleared out. The American troops at once poured in, and established occupation at 10:45 in the forenoon, just a quarter of an hour before word came that the armistice had taken effect.

In a few minutes flags of the allies were flying from housetops, and the church bells were ringing out the war. It was over.

AT THE ELEVENTH HOUR

The last morning on the fighting lines was busy wherever American troops were placed, from the Moselle to Sedan. All the batteries kept their guns going, and the Germans replied in kind. The American heavy guns fired their parting salvo at 11:00 o'clock, less two or three seconds. To this final crack the Germans tossed a few over, just after 11:00. There was a strong American infantry advance, northeast of Verdun, in the direction of Ornes, beginning at nine o'clock, after lively artillery preparation. The German artillery responded feebly, but the machine gun resistance was stubborn. Nevertheless, the Americans made progress. The Americans had received orders to hold the positions reached by 11:00 o'clock, and at those points they began to dig in, marking the advance positions of the American line when hostilities ceased.

Then the individual groups unfurled the Stars and Stripes, shook hands and cheered. Soon afterwards they were preparing for luncheon. All the boys were hungry, as they had breakfasted early in anticipation of what they considered the greatest day in American history.

THE ALL PULL TOGETHER SHOT

There was a regular celebration at Pepper hill, north of Verdun, where a battery of Rhode Island artillery rigged a twenty-foot rope to the lanyard of a .155 cannon, and every man in the company, from the captain to the cook, laid hold of it and waited. At the tick of eleven o'clock they gave that rope one mighty yank, all together, and the gun roared out the last shot of the war.

—*The Last Yank of the Yanks.*

AT THE END OF THE WORLD WAR

AT THE END OF THE WORLD WAR

The great drama is ended. For the first time in four years the sound of giant cannon cannot be heard anywhere along the long line from the channel to the Adriatic; the deadly rattle of machine guns is stilled. No gas fumes poison the winter air. No clouds of burning cities darken the sun. Better than all, no life blood flows; the fighting men rest in their lines, the bayonet is sheathed, the bullet sleeps harmless in its clip.

This at last is peace. In the great cities, the towns and hamlets of Europe and America, a vast wave of emotion inundates the hearts of men; in the allied lands there is exultation; in Germany there is at least relief, and perhaps the dawning of a new hope.

We have had our day of glorification. It is now time for our best thought, and the first of this thought will be for the men who have given their lives for our cause and for the men more fortunate, but not less willing to give all, who in France and Flanders have covered our flag once more with undying glory, the soldiers of the Marne, of Cantigny, of the great German repulse east of Reims, of Chateau Thierry, of St. Mihiel, the Argonne, and Sedan. The graves of our men have consecrated these immortal battlefields and our sacred dead will live on in the memory of the republic forever. As for those who return, crowned with victory, they shall now be first and foremost under the roof tree of the great motherland, who sent them forth with aching yet uplifted heart, confident that they would honor her even as they have done.

In this hour we salute our army and our navy, which have not failed us at any point, in any test, however arduous or fiery. Under commanders devoted, efficient, indefatigable, our regiments have met the most famous troops of the enemy and crushed their resistance, have set new records of sanguinary valor under punishment, and driven always and irresistibly on to victory. They have written a page in the annals of the republic and in the history of war which will shine down the ages with unsurpassed magnificence.

It has been terrible, yet glorious, to live through such a time, even for us who have not passed through the great experience of battle, who have not watched and taken part in the heroic charge of our infantry across death-swept meadows, or heard with our ears the thunder of the great guns or felt the earth shake under the tread of marching legions. We at home have had our own experiences, our deep anxieties, our doubts, our griefs, and always we have been conscious of the might of forces in grapple and the high issues that hung upon the fate of the armies. In the background of all our thoughts at all times has been the solemn consciousness that the destiny of

AT THE END OF THE WORLD WAR

mankind was at work in mighty throes toward an end hidden to our knowledge if not to our faith and hope. We have none of us passed through this experience without receiving its mark. Life can never be altogether what it was before for any of us. New generations will spring forth innocent of the memories which are ours and the unexpressible lessons of our day. But for us it has been, with all its tragedy and vast destruction, a day of illumination and inspiration.

Standing on the threshold of a peace restored, we must pray that out of the epic experience of the great conflict something more than the stern negative of our victory shall be preserved for the time to come, something positive of good, something of that divine light of men's heroic sacrifice which shone out in the darkest hour, something of new strength and understanding of life and of human potentialities.

We have before us now a tremendous task of restoration. America is in a more fortunate situation than the nations of Europe; yet to return our resources to the channels of peace, to free our institutions from the hasty improvisations of war emergency, and to protect them from the effects of forced and abnormal application, is a task which will test the wisdom and character of our leaders and our people.

If our war experience has proved anything of America, it has been the soundness and beneficence of American institutions and the life they make possible. Let us realize that truth, and resolve that these institutions shall be strengthened in peace and not weakened, and that the life which has grown up and flowered under their influence shall be jealously preserved for our children and our children's children, and for the sake of our heroic dead."

THE CROWNING HUMILIATION

The Crowning Humiliation, or Before and After Seeing Foch, might be the appropriate title for the latest story now added to the pages of world history.

Four years and four months ago the German leadership, fully confident of its strength, assured of its weapons, arrogant beyond anything in recorded history, challenged the organized and unorganized forces of the civilized world to mortal combat. They thrust the Imperial German sword through all the covenants and commands of civilization and of justice. Bursting out upon an unprepared and unsuspecting world, they were, despite their incredible strength, checked by France on the battlefield of the Marne, encircled by the British fleets, and like Napoleon after Leipzig, condemned to ultimate defeat. At the hour when the white flag was brought to the French lines, British armies were approaching the field of Waterloo, American armies stood victorious in Sedan, and French armies were sweeping forward from the Oise to the Meuse. The crowning humiliation came with the admission of defeat. Germany sought armistice at the hands of a Marshal of France!

FOCH—"THE GRAY MAN OF CHRIST"

In the closing days of the great war a striking contrast was drawn by the Los Angeles Times between William Hohenzollern and Marshal Foch, from the religious standpoint. The former German monarch coupled Gott with himself as an equal, while Ferdinand Foch was called, with apparent reason, "the gray man of Christ."

"This has been Christ's war," said the Times. "Christ on one side, and all that stood opposed to Christ on the other side. And the generalissimo, in supreme command of all the armies that fought on the side of Christ, is Christ's man. * * * It seems to be beyond all shadow of doubt that when the hour came in which all that Christ stood for was to either stand or fall, Christ raised up a man to lead the hosts that battled for him." And the Times continues:

"If you will look for Foch in some quiet church, it is there that he will be found, humbly giving God the glory and absolutely declining to attribute it to himself. Can that kind of a man win a war? Can a man who is a practical soldier be also a practical Christian? And is Foch that kind of a man? Let us see.

"A California boy, serving as a soldier in the American Expeditionary Forces in France, wrote a letter to his parents in San Bernardino recently, in which he gives, as well as anyone else could give, the answer to the question we ask. This American boy, Evans by name, tells of meeting Marshal Foch at close range in France.

"Evans had gone into an old church to have a look at it, and as he stood there with bared head satisfying his respectful curiosity, a gray man with the eagles of a general on the collar of his shabby uniform entered the church. Only one orderly accompanied the quiet, gray man. No glittering staff of officers, no entourage of gold-laced aides were with him; nobody but just the orderly.

"Evans paid small attention at first to the gray man, but was curious to see him kneel in the church, praying. The minutes passed until full three-quarters of an hour had gone by before the gray man arose from his knees.

"Then Evans followed him down the street and was surprised to see soldiers salute this man in great excitement, and women and children stopping in their tracks with awe-struck faces as he passed.

"It was Foch! And now Evans, of San Bernardino, counts the experience as the greatest in his life. During that three-quarters of an hour that the generalissimo of all the Allied armies was on his knees in humble supplication in that quiet church, 10,000 guns were roaring at his word on a hundred hills that rocked with death.

"Moreover, it is not a new thing with him. He has done it his whole life long."

CHAPTER XXXII

HOME FOLLOWS THE FLAG

Nearly 28,000,000 Red Cross Relief Workers Distributing Aid in Ten Countries—Two War Fund Drives in 1918 Raise \$291,000,000—Other Organizations Active—3,000 Buildings Necessary—Caring for the Boys—Boy Scouts Play Their Part Well.

From the hour of enlistment to the hour of return, the United States soldiers and sailors have had with them, throughout the war, the advantage of intelligent, sympathetic help from various civilian organizations, co-ordinating with the military.

First of all is the Red Cross, but that organization really is a non-combatant arm of the national service; and its work, generously financed by public subscription, is the greatest of its kind ever done in field or hospital, in any war.

Red Cross history would fill a big volume, no matter how meagrely told. There are 3,854 chapters of the organization. At the annual meeting of their war council, October 23, 1918, the chairman, Henry P. Davison, submitted a report that is literally astonishing, because the facts related had developed without publicity and were quite unknown to the people of the country at large. Here are a few of them, taken from Mr. Davison's official statement:

NEARLY 28,000,000 WORKERS

The Red Cross in America has a membership of 20,648,103, and in addition, 8,000,000 members in the Junior Red Cross—a total enrollment of more than one-fourth the population of the United States.

American Red Cross workers produced up to July 1st, 1918, a total of 221,282,838 articles of an estimated value of \$44,000,000. About 8,000,000 women are engaged in canteen work and the production of relief supplies.

The American Red Cross is distributing aid in ten countries—the United States, England, France, Italy, Belgium, Switzerland, Palestine, Greece, Russia and Siberia. Besides it has sent representatives to Serbia, Denmark and Madeira.

Two war fund "drives" in 1918 brought money contributions to the amount of \$291,000,000. Membership dues of \$24,500,000 brought the total up to \$315,500,000 for the fiscal year. All this money was expended for purposes of pure mercy.

It has been because of the spirit which has pervaded all American Red Cross effort in this war that the aged governor of one of the stricken and battered provinces of France stated not long since that, though France had long known of American's greatness, strength

HOME FOLLOWED THE FLAG

and enterprise, it remained for the American Red Cross in this war to reveal America's heart.

The home service of the Red Cross, with its now more than 40,000 workers, is extending its ministrations of sympathy and counsel each month to upward of 100,000 families left behind by soldiers at the front.

OTHER ORGANIZATIONS ACTIVE

Next to the Red Cross in importance comes the Young Men's Christian Association, affectionately known to the army as "the Y." Then the Young Women's Christian Association; the National Catholic War Council; the Salvation Army; the Knights of Columbus; The Jewish Welfare Board; the War Camp Community Service; and The American Library Association.

What might be called the field army of these seven great agencies comprises more than 15,000 uniformed workers on both sides of the Atlantic and in Siberia; and General Pershing, late in October of 1918, asked that additional workers be sent over at the rate of at least a thousand a month.

They represent every type of activity—secretaries, athletic directors, librarians, preachers, lecturers, entertainers, motion picture operators, truck drivers, hotel managers and caterers. Many of them pay their own expenses. Those who cannot do that are paid their actual living expenses if they are single; and if they have families, are allowed approximately the pay of a second lieutenant.

3,000 BUILDINGS NECESSARY

More than 3,000 separate buildings have been erected (or rented) to make possible this huge work. These are of various sorts, from the great resorts at Aix les Bains, where our soldiers can spend their furloughs, to the hostess houses at the cantonments on this side. In addition, there are scores of warehouses and garages, and hundreds of "huts" which consist of nothing more than ruined cellars and dug-outs in war-demolished towns or old-line trenches.

These figures do not include the buildings occupied by the organizations in times of peace, though all such buildings and quarters are at the disposal of soldiers and sailors. All are supported by their regular funds, supplemented by contributions entirely apart from those funds.

ALL PULL TOGETHER

The spirit of these seven organizations is uplifting in the broadest sense of the word. They depend upon people of ideals for support. Their purpose is to surround each boy, so far as possible, with the influences that were best in his life at home. Differences of creed or dogma are unknown. The W. M. C. A. and The Jewish Welfare

HOME FOLLOWED THE FLAG

Board work side by side with no thought of divergence in faith. They are as one, and their working creed is service, in the spirit of brotherhood to all men.

These are 842 libraries, with 1,547 branches, containing more than 3,600,000 books and 5,000,000 copies of periodicals. In the navy-branches are maintained 250 additional libraries aboard our war and mercantile ships.

Almost every family in the United States having a son in the service has received letters written on the stationery of one or other of the organizations, for together they supply abundant writing materials. They supply 125,000,000 sheets of writing paper a month, and keep on hand all the time about \$500,000 worth of postage stamps.

A soldier boy finds himself located in a little French village that before the war sheltered 500 people and now must accommodate as many soldiers besides. His sleeping place is a barn, which he must share with forty other boys. There is no store in the town, no theatre, no library, no place to write a letter or be warm and dry—until the hut comes.

ALL MODERN IDEAS

With it come books and writing paper and baseballs and bats and boxing gloves and chocolate and cigarettes and motion pictures and lectures and theatrical entertainments. Home comes with the hut, bringing all the love and care and cheer of the folks who have stayed behind.

The boy is called into the front line trenches. He is there through the long cold night, his feet wet, his whole body chilled to the bone. As the first rays of the sun announce the new day, a shout of welcome runs through the trench. He looks to see a secretary—Y, or K. of C., or Jewish Welfare Board or Salvation Army—it matters not. Down the trench comes this secretary with chocolates and cigarettes, doughnuts and hot coffee or cocoa—a reminder that even here, in front, the love and care of the folks back home still follow him.

CARING FOR THE BOYS

Is he wounded? Aiding the stretcher bearers, the secretaries work side by side, taking the wounded back to the dressing stations.

Is he taken prisoner? Even in the prison camp the long arm of these friendly organizations reaches out to aid him. In Switzerland both the Y and the K. of C. have established headquarters, and through such neutral agencies as the Danish Red Cross they carry on their program of help even in the enemy prison camps.

Does he wish to send money back to the folks at home? The Y M. C. A. and the K. of C., the Jewish Welfare Board and the Salvation Army transmit hundreds of thousands of dollars a month from the front to mothers and sisters and wives over here.

HOME FOLLOWED THE FLAG

If the Boy is allowed to visit the armies of our Allies he will find that they too have asked for the hut, and received it. More than a thousand Y huts under the name of "Foyers du Soldat" are helping to maintain morale in the French army—erected at the special request of the French Ministry of War. The King of Italy made a personal request for the extension of the "Y" work to his armies. The men who were charged with the task of winning this war believed that America could do nothing better to hasten victory than to extend the influence of these great creators and conservers of morale to the brave soldiers of our Allies.

The cheer, the comfort, the recuperative influence of these united services to our soldiers cannot be overestimated. They are incalculably valuable—and they are purely and originally American.

WOUNDED YANKS ARE CHEERFUL

A Paris correspondent just from the front says—The spirit of American soldiers passing through casualty stations is admirable. One "doughboy" from Kansas, hobbling up to an American Red Cross canteen on one leg and crutches, shouted, "Here I come. I'm only hitting on three cylinders, but still able to get about."

Another boasted of his luck because he had only three shrapnel wounds, one in his hand, one in his shoulder and one in the back.

An American Red Cross canteen at a receiving station often offers men their first chance to talk over their experiences. They stand round with a cup of chocolate in one hand, a doughnut in the other, and fight their fights over again until officers drive them to the dressing rooms.

BOY SCOUTS PLAY THEIR PART WELL

"Boys will be men," is a new version of an old saying. It is justified by the record of the Boy Scouts of America, for a better formation of upright, manly character never was achieved by any other means. That Scout training makes good men and fine soldiers has been amply proven on a broad scale.

November 1, 1918, The Boy Scouts of America had a registered membership of over 350,000, and applications for membership were coming in at the rate of a thousand a day. April 9, 1917, three days after this country entered the war, the National Council of the organization formally resolved "To co-operate with the Red Cross through its local chapters in meeting their responsibilities occasioned by the state of war." The members have nobly followed out that resolution.

HOME FOLLOWED THE FLAG

BOYS HELP MOST WONDERFUL

They have sold liberty bonds in the amount of \$206,179,150, to 1,349,165 individual subscribers. As "dispatch bearers of the government" they have distributed over 15,000,000 war pamphlets. They have been sedulous and invaluable in checking enemy propaganda. They have served on innumerable public occasions as police aids and as ushers at great meetings. They performed one feat that might to many have appeared impossible, in searching out for the war department enough black walnut trees to furnish 14,038,560 feet of board lumber that was urgently needed for gunstocks and plane propellers. They have been tireless in supplementing the service of other organizations. And they never make any display of their work—they just do it, and keep on doing it, without any talk. They are useful; and every man who was a boy scout is a better man for having been one.

THIRTY-THREE Y. M. C. A. WORKERS GIVE LIVES IN WAR

From the time the United States entered the war up to the signing of the armistice, thirty-three Y. M. C. A. workers, twenty-nine men and four women, have given up their lives in the service abroad.

British air forces kept pace with the German armies across the Rhine. In the last five months, in which occurred some of the heaviest air fighting in the war, Germany lost in aerial combats with the British alone 1,837 machines. It is estimated that something like 2,700 machines were accounted for by the British since June 1, and to this total may be added the heavy destruction wrought by French and American aviators.

GREATEST MAIL SERVICE IN THE WORLD

The mail service of the American armies in France and Belgium was one of the most remarkably original features of the war. Mail was handled by postal experts from home in such manner as sent millions of letters by the straightest course to every point in the United States, from the great cities down to the smallest hamlet.

"SAG" RELIEVED POISON GAS VICTIMS

American soldiers in the fighting lines were furnished with tubes of medicinal paste to cure mustard gas burns. It was simply smeared over the burned patches, or rubbed on the skin to prevent burning. It was called "sag," which is the reverse spelling of "gas."

GERMANS ABANDONED MUCH EQUIPMENT

While they were chasing the Germans after they had broken the Hindenburg line, American soldiers salvaged enormous quantities of equipment thrown away or abandoned by the boches in their haste to get out of the Americans' way.

TERMS OF ARMISTICE ON WHICH GERMANY SURRENDERS

TERMS OF GERMANY'S SURRENDER

On the memorable afternoon of Monday, November 11, 1918, President Wilson convened the Senate and the House of Representatives in the capitol at Washington, and there read out the terms of the armistice which Germany had accepted, and to the observance of which Germany was pledged with guaranties so strict that evasion was made impossible. The President is an unemotional man, but in that hour he must have felt deep satisfaction in the fact that the document in his hand had been made possible by the will and the action of the great nation whose chief magistrate he was, and is—the nation that with generous hand and prompt compliance had backed him at every step of the difficult road to triumph over the dark forces of evil that had plagued the whole earth and imperilled the very life of civilization.

His audience (the legislative arm of our government and the co-ordinate judiciary arm as represented by Justices of the Supreme Court; the members of the President's cabinet, the diplomatic corps; and high officers of the army and navy) was less repressed. As the strongest points were reached, all present joined in mighty applause.

THE NATION LISTENS AND APPLAUDS

The whole country was listening, for while the President's voice was being heard in that place, the wires were carrying the words to every city and hamlet in all the broad land.

The armistice had been signed by the German envoys in the very last hour of the seventy-two that Marshal Foch had granted them. Long before daylight, the news came by cable, the sirens and factory whistles were thrown wide open, and the whole population of the United States, men, women and children, roused out of bed, swarmed the streets and highways, and gave themselves over to such a jubilation as no country ever before had seen—nor any previous day in the story of the human race had called for. It is not to be forgotten; for by reason of the magnificent and final victory of right over might, another such day need never dawn.

PRESIDENT MAKES ARMISTICE PUBLIC

President Wilson in making public the armistice terms addressed the governing bodies of our country as follows:

"Gentlemen of the Congress: In these anxious times of rapid and stupendous change it will in some degree lighten my sense of responsibility to perform in person the duty of communicating to you some of the larger circumstances of the situation with which it is necessary to deal.

TERMS OF GERMANY'S SURRENDER

"The German authorities who have, at the invitation of the supreme war council, been in communication with Marshal Foch, have accepted and signed the terms of armistice which he was authorized and instructed to communicate to them.

TERMS OF THE ARMISTICE

One—Cessation of operations by land and in the air six hours after the signature of the armistice.

Two—Immediate evacuation of invaded countries; Belgium, France, Alsace-Lorraine, Luxemburg, so ordered as to be completed within fifteen days from the signature of the armistice. German troops which have not left the above mentioned territories within the period fixed will become prisoners of war. Occupation by the allied and United States forces jointly will keep pace with evacuation in these areas. All movements of evacuation and occupation will be regulated in accordance with a note annexed to the stated terms.

Three—Repatriation, beginning at once and to be completed within fifteen days, of all inhabitants of the countries above mentioned, including hostages and persons under trial or convicted.

MUST SURRENDER MILITARY SUPPLIES

Four—Surrender in good condition by the German armies of the following equipment: Five thousand guns (2,500 heavy, 2,500 field), 25,000 machine guns, 3,000 minenwerfer (mine throwers), 1,700 aeroplanes (fighters, bombers, firstly D-73's and night bombing machines). The above to be delivered in situ to the allies and the United States troops in accordance with the detailed conditions laid down in the annexed note.

Five—Evacuation by the German armies of the countries on the left bank of the Rhine. These countries on the left bank of the Rhine shall be administered by the local troops of occupation under the control of the allied and United States armies of occupation. The occupation of these territories will be carried out by allied and United States garrisons holding the principal crossings of the Rhine—Mayence, Coblenz, Cologne—together with bridgeheads at these points in thirty kilometer radius on the right bank and by garrisons similarly holding the strategic points of the regions. A neutral zone shall be reserved on the right of the Rhine between the stream and a line drawn parallel to it forty kilometers to the east from the frontier of Holland to the parallel of Gernsheim and as far as practicable a distance of thirty kilometers from the east of the stream from this parallel upon the Swiss frontier. Evacuation by the enemy of the Rhine lands shall be so ordered as to be completed within a further period of eleven days, in all nineteen days after the signature of the armistice. All movements of evacuation and occupation will be regulated according to the note annexed.

Six—In all territory evacuated by the enemy there shall be no evacuation of inhabitants; no damage or harm shall be done to the persons or property of the inhabitants; no person shall be prosecuted for participation in war measures prior to the signing of this armistice. No destruction of any kind to be committed. Military establishments of all kinds shall be delivered intact, as well as military stores of food, munitions, equipment not removed during the periods fixed for evacuation. Stores of food of all kinds for the civil population, cattle, etc., shall be left in situ. Industrial establishments shall not be impaired in any way and their personnel shall not be moved. Roads and means of communication of every kind, railroad, waterways, main roads, bridges, telegraphs, telephones, shall be in no manner impaired.

TERMS OF GERMANY'S SURRENDER

Seven—All civil and military personnel at present employed on them shall remain. Five thousand locomotives, 150,000 wagons and 5,000 motor lorries in good working order, with all necessary spare parts and fittings, shall be delivered to the associated powers within the period fixed for the evacuation of Belgium and Luxemburg. The railways of Alsace-Lorraine shall be handed over within the same period, together with all pre-war personnel and material. Further material necessary for the working of railways in the country on the left bank of the Rhine shall be left in situ. All stores of coal and material for upkeep of permanent ways, signals and repair shops left entire in situ and kept in an efficient state by Germany during the whole period of armistice. All barges taken from the allies shall be restored to them. A note appended regulates the details of these measures.

MUST REVEAL ALL MINES

Eight—The German command shall be responsible for revealing within forty-eight hours all mines or delay-acting fuses deposited on territory evacuated by the German troops, and shall assist in their discovery and destruction. The German command shall also reveal all destructive measures that may have been taken (such as poisoning or polluting of springs, wells, etc.), under penalty of reprisals.

Nine—The right of requisition shall be exercised by the allies and the United States armies in all occupied territory. The upkeep of the troops of occupation in the Rhineland (excluding Alsace-Lorraine) shall be charged to the German government, subject to the regulation of accounts with those whom it may concern.

Ten—An immediate repatriation without reciprocity according to detailed conditions, which shall be fixed, of all allied and United States prisoners of war. The allied powers and the United States shall be able to dispose of these prisoners as they wish. This condition annuls the previous conventions on the subject of the exchange of prisoners of war, including the one of July, 1918, in course of ratification. However, the repatriation of German prisoners of war interned in Holland and Switzerland shall continue as before. The repatriation of German prisoners of war shall be regulated at the conclusion of the preliminaries of peace.

Eleven—Sick and wounded who cannot be removed from evacuated territory will be cared for by German personnel, who will be left on the spot with the medical material required.

Twelve—All German troops at present in any territory which before the war belonged to Roumania or Turkey shall withdraw within the frontiers of Germany as they existed on August 1, 1914. Territory which belonged to Austria-Hungary is added to that from which the Germans must withdraw immediately, and as to territory which belonged to Russia it is provided that the German troops now there shall withdraw within the frontiers of Germany as soon as the allies, taking into account the internal situation of those territories, shall decide that the time for this has come.

Thirteen—Evacuation by German troops to begin at once and all German instructors, prisoners, and civilian, as well as military agents, now on the territory of Russia (as defined before 1914) to be recalled.

Fourteen—German troops to cease at once all requisitions and seizures and any other undertaking with a view to obtaining supplies intended for Germany in Roumania and Russia (as defined on August 1, 1914).

Fifteen—Denunciation of the treaties of Bucharest and Brest-Litovsk and of the supplementary treaties.

TERMS OF GERMANY'S SURRENDER

Sixteen—The allies shall have free access to the territories evacuated by the Germans on their eastern frontier, either through Danzig or by the Vistula, in order to convey supplies to the populations of those territories and for the purpose of maintaining order.

Seventeen—Evacuation by all German forces operating in East Africa within a period to be fixed by the allies.

REPATRIATION AND REPARATION

Eighteen—Repatriation, without reciprocity, within a maximum period of one month, in accordance with detailed conditions hereafter to be fixed, of all civilians interned or deported who may be citizens of other allied or associated states than those mentioned in clause three, paragraph nineteen, with the reservation that any future claims and demands of the allies and the United States of America remain unaffected.

Nineteen—The following financial conditions are required:

Reparation for damage done. While such armistice lasts no public securities shall be removed by the enemy which can serve as a pledge to the allies for the recovery or repatriation for war losses. Immediate restitution of the cash deposit in the National Bank of Belgium, and in general immediate return of all documents, specie, stocks, shares, paper money, together with plant for the issue thereof, touching public or private interests in the invaded countries. Restitution of the Russian and Roumanian gold yielded to Germany or taken by that power. This gold to be delivered in trust to the allies until the signature of peace.

Twenty—Immediate cessation of all hostilities at sea and definite information to be given as to the location and movements of all German ships. Notification to be given to neutrals that freedom of navigation in all territorial waters is given to the naval and mercantile marines of the allied and associated powers, all questions of neutrality being waived.

Twenty-one—All naval and mercantile marine prisoners of war of the allied and associated powers in German hands to be returned without reciprocity.

Twenty-two—Surrender to the allies and the United States of America of all German submarines now existing (including all submarine cruisers and mine-laying submarines), with their complete armament and equipment, in ports which will be specified by the allies and the United States of America. Those that cannot take the sea shall be disarmed of their material and personnel and shall remain under the supervision of the allies and the United States.

Twenty-three—The following German surface warships, which shall be designated by the allies and the United States of America, shall forthwith be disarmed and thereafter interned in neutral ports, or, for the want of them, in allied ports to be designated by the allies and the United States of America and placed under the surveillance of the allies and the United States of America, only caretakers being left on board—namely: Six battle cruisers, ten battleships, eight light cruisers (including two mine layers), fifty destroyers of the most modern type. All other surface warships (including river craft) are to be concentrated in German naval bases to be designated by the allies and the United States of America, and are to be paid off and completely disarmed and placed under the supervision of the allies and the United States of America. All vessels of the auxiliary fleet (trawlers, motor vessels, etc.) are to be disarmed. Vessels designated for internment shall be ready to leave German ports within seven days upon direction by wireless. The military armament of all vessels of the auxiliary fleet shall be put on shore.

Twenty-four—The allies and the United States of America shall have the

TERMS OF GERMANY'S SURRENDER

right to sweep up all mine fields and obstructions laid by Germany outside German territorial waters and the positions of these are to be indicated.

Twenty-five—Freedom of access to and from the Baltic to be given to the naval and mercantile marines of the allied and associated powers. To secure this, the allies and the United States of America shall be empowered to occupy all German forts, fortifications, batteries, and defense works of all kinds in all the entrances from the Cattegat into the Baltic, and to sweep up all mines and obstructions within and without German territorial waters without any question of neutrality being raised, and the positions of all such mines and obstructions are to be indicated.

Twenty-six—The existing blockade conditions set up by the allies and associated powers are to remain unchanged, and all German merchant ships found at sea are to remain liable to capture. The allies and the United States shall give consideration to the provisioning of Germany during the armistice to the extent recognized as necessary.

Twenty-seven—All naval aircraft are to be concentrated and immobilized in German bases to be specified by the allies and the United States of America.

Twenty-eight—In evacuating the Belgian coasts and ports, Germany shall abandon all merchant ships, tugs, lighters, cranes, and all other harbor materials, all materials for inland navigation, all aircraft and all materials and stores, all arms, and armaments, and all stores and apparatus of all kinds.

EVACUATED ALL BLACK SEA PORTS

Twenty-nine—All Black Sea ports are to be evacuated by Germany; all Russian war vessels of all descriptions seized by Germany in the Black Sea are to be handed over to the allies and the United States of America; all neutral merchant vessels seized are to be released; all warlike and other materials of all kinds seized in those ports are to be returned and German materials as specified in clause twenty-eight are to be abandoned.

Thirty—All merchant vessels in German hands belonging to the allied and associated powers are to be restored in ports to be specified by the allies and the United States of America without reciprocity.

Thirty-one—No destruction of ships or of materials to be permitted before evacuation, surrender, or restoration.

Thirty-two—The German government will notify the neutral governments of the world, and particularly the governments of Norway, Sweden, Denmark, and Holland, that all restrictions placed on the trading of their vessels with the allied and associated countries, whether by the German government or by private German interests, and whether in return for specific concessions, such as the export of shipbuilding materials or not, are immediately canceled.

Thirty-three—No transfers of German merchant shipping of any description to any neutral flag are to take place after signature of the armistice.

Thirty-four—The duration of the armistice is to be thirty days, with option to extend. During this period, on failure of execution of any of the above clauses, the armistice may be denounced by one of the contracting parties on forty-eight hours' previous notice.

It is understood that the execution of articles three and eighteen shall not warrant the denunciation of the armistice on the ground of insufficient execution within a period fixed except in the case of bad faith in carrying them into execution. In order to assure the execution of this convention under the best conditions the principle of a permanent international armistice commission is admitted. This commission shall act under the authority of the allied military and naval commanders-in-chief.

TERMS OF GERMANY'S SURRENDER

Thirty-five—This armistice to be accepted or refused by Germany within seventy-two hours of notification.

PRESIDENT'S COMMENT ON ARMISTICE

"The war thus comes to an end; for, having accepted these terms of armistice, it will be impossible for the German command to renew it.

"It is not now possible to assess the consequences of this great consummation. We know only that this tragical war, whose consuming flames swept from one nation to another until all the world was on fire, is at an end and that it was the privilege of our own people to enter it at its most critical juncture in such fashion and in such force as to contribute, in a way of which we are all deeply proud, to the great result.

"We know, too, that the object of the war is attained; the object upon which all free men had set their hearts; and attained with a sweeping completeness which even now we do not realize.

"Armed imperialism, such as the men conceived who were but yesterday the masters of Germany, is at an end, its illicit ambitions engulfed in black disaster. Who will now seek to revive it? The arbitrary power of the military caste of Germany, which once could secretly and of its own single choice disturb the peace of the world, is discredited and destroyed.

"And more than that—much more than that—has been accomplished. The great nations which associated themselves to destroy it had now definitely united in the common purpose to set up such a peace as will satisfy the longing of the whole world for disinterested justice, embodied in settlements which are based upon something much better and much more lasting than selfish competitive interests of powerful states.

"There is no longer conjecture as to the objects the victors have in mind. They have a mind in the matter, not only, but a heart also. Their avowed and concerted purpose is to satisfy and protect the weak as well as to accord their just rights to the strong.

"The humane temper and intention of the victorious governments has already been manifested in a very practical way. Their representatives in the supreme war council at Versailles have by unanimous resolution assured the people of the central empires that everything that is possible in the circumstances will be done to supply them with food and relieve the distressing want that is in so many places threatening their very lives; and steps are to be taken immediately to organize these efforts at relief in the same systematic manner that they were organized in the case of Belgium.

"For, with the fall of the ancient governments which rested like an incubus upon the people of the central empires, has come political change not merely, but revolution; and revolution which seems as yet to assume no final and ordered form.

TERMS OF GERMANY'S SURRENDER

"Excesses accomplish nothing. Unhappy Russia has furnished abundant recent proof of that. Disorder immediately defeats itself. If excesses should occur, if disorder should for a time raise its head, a sober second thought will follow and a day of constructive action, if we help and do not hinder.

"To conquer with arms is to make only a temporary conquest; to conquer the world by earning its esteem is to make permanent conquest. I am confident that the nations that have learned the discipline of freedom and that have settled with self-possession to its ordered practice are now about to make conquest of the world by the sheer power of example and of friendly helpfulness.

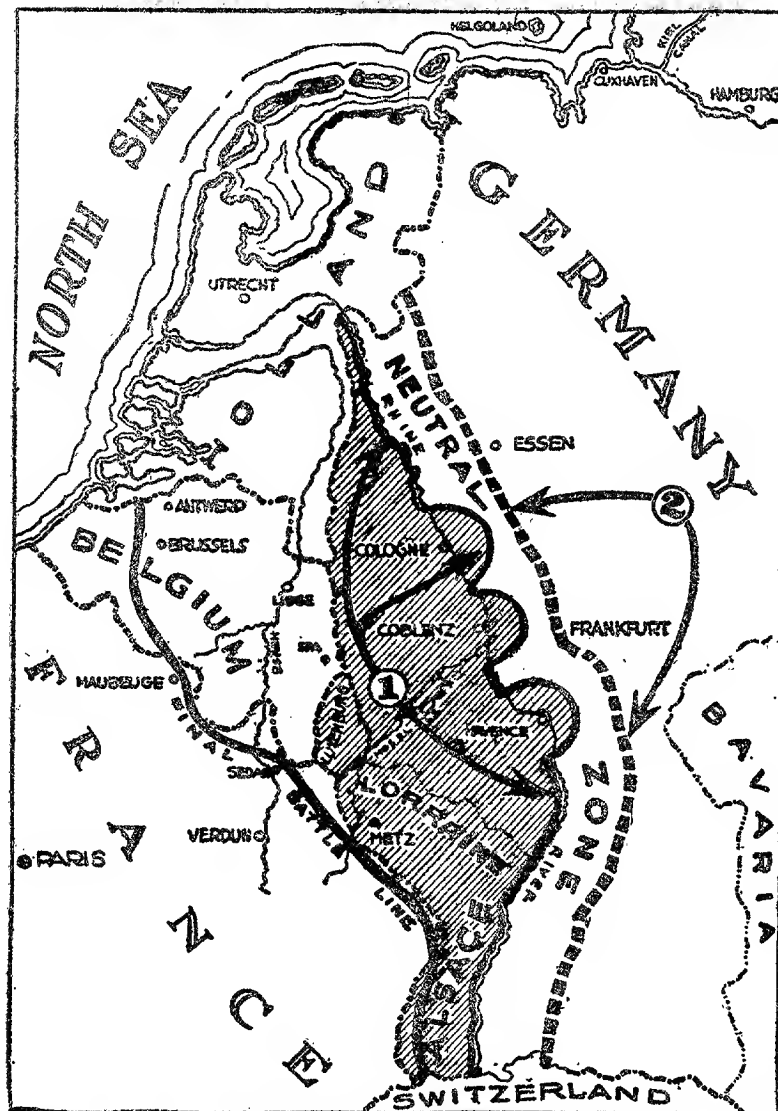

"The peoples who have but just come out from under the yoke of arbitrary government and who are now coming at last into their freedom will never find the treasures of liberty they are in search of if they look for them by the light of the torch. They will find that every pathway that is stained with the blood of their own brothers leads to the wilderness, not to the seat of their hope.

"They are now face to face with their initial tests. We must hold the light steady until they find themselves. And in the meantime, if it be possible, we must establish a peace that will justly define their place among the nations, remove all fear of their neighbors and of their former masters, and enable them to live in security and contentment when they have set their own affairs in order.

"If they do we shall put our aid at their disposal in every way that we can. If they do not we must await with patience and sympathy the awakening and recovery that will assuredly come at last."

GERMAN MALTREATMENT OF PRISONERS

Prisoners set free under terms of the armistice brought back tales of their almost unbelievably barbarous treatment in German prison camps. A correspondent, Philip Gibbs, describes some of them as living skeletons. Of one typical group he says "they were so thin and weak they could scarcely walk, and had dry skins, through which their cheekbones stood out, and the look of men who had been buried and come to life again. Many of them were covered with blotches. 'It was six months of starvation,' said one young man who was a mere wreck. They told me food was so scarce and they were tortured with hunger so vile that some of them had a sort of dropsy and swelled up horribly, and died. After they left their prison camp they were so weak and ill they could hardly hobble along; and some of them died on the way back, at the very threshold of new life on this side of the line."

HONORS TO PERSHING AND FOCH

HONOR TO THE VICTORS

November 16, 1918, the American Distinguished Service Medal was conferred upon General Pershing at his headquarters in the field by General Tasker H. Bliss, representing President Wilson. The ceremony was witnessed by the members of the allied missions, and was most impressive. Admiral Benson, representing the United States Navy, and William G. Sharp, American Ambassador to France, were also present.

SERVICE MEDAL TO GENERAL PERSHING

General Bliss, in presenting the decoration, read this order issued by Newton T. Baker, Secretary of War:

"The President directs you to say to Gen. Pershing that he awards the medal to the commander of our armies in the field as a token of the gratitude of the American people for his distinguished services and in appreciation of the successes which our armies have achieved under his leadership."

After reading the order General Bliss called to mind that when the first division went away many doubted if it would be followed by another for at least a year.

"But," he added, "you have created and organized and trained here on the soil of France an American army of between two and two and a half million men. You have created the agencies for its reception, its transportation and supply. To the delight of all of us you have consistently adhered to your ideal of an American army under American officers and American leadership.

"And I know that I speak for our president, when I say that, as to those who have died, the good God has given eternal rest, so may He give to us eternal peace."

At a previous date, and while hostilities were still in course, Marshal Foch had conferred upon General Pershing the grand cordon of the Legion of Honor. The names of these two great commanders, reflecting supreme honor upon their respective countries, have become imperishable in the records of civilization. Their careers present unusual analogy. They were bred to the art of war, and stand among the foremost in the roll of great soldiers who have fought for and established Peace, in many lands and many ages.

PERSHING'S SPLENDID RECORD

John Joseph Pershing was born September 30, 1860, in Linn county, Missouri, to John F. and Ann E. (Thompson) Pershing. He was given the degree of Bachelor of Arts by the Kirksville (Missouri) normal school in 1880; graduated at West Point in 1886; was made Bachelor of Laws by the University of Nebraska in 1893; married Francis H. Warren, daughter of Senator Warren of Wyoming, at Washington, January 28, 1905. (His wife and two daughters per-

HONORS TO PERSHING AND FOCH

ished in the fire at the Presidio, San Francisco, August 15, 1915.) He was commissioned a second lieutenant in the 6th cavalry July 1, 1886; became a captain in the 10th cavalry October 20, 1892. Passed through the other grades up to that of Brigadier General in 1913, after the battle of Bagsag, P. I., in June of that year. Had seen service in several Indian campaigns, in Cuba and the Phillipines, and was United States military attaché with the army of General Kuroko in the war between Japan and Russia. Later was officer commanding at the Presidio, going thence to the Mexican border in 1913. Was in command of the troops that went into Mexico in pursuit of Pancho Villa in 1916. When the United States entered the European war he was placed in command. Here was displayed in full not only his genius as a soldier, but as an organizer of the very highest skill. His home is in Cheyenne, Wyoming.

HONORS TO MARSHAL FOCH

At Senlis in France on Tuesday, November 12th, the day after the armistice was signed, General Pershing conferred upon Marshal Foch the American Distinguished Service Medal. The presentation was made in the name of President Wilson, at the villa where Marshal Foch had his headquarters, and was an impressive ceremony.

A guard of honor was drawn up and trumpeters blew a fanfare as Marshal Foch, with General Pershing on his right, took position a few paces in front of the guard. General Pershing said:

"The Congress of the United States has created this medal to be conferred upon those who have rendered distinguished service to our country. President Wilson has directed me to present to you the first of these medals in the name of the United States Government and the American army, as an expression of their admiration and their confidence. It is a token of the gratitude of the American people for your great achievements. I am very happy to have been given the honor of presenting this medal to you."

In accepting the decoration, Marshal Foch said:

"I will wear this medal with pleasure and pride. In days of triumph, as well as in dark and critical hours, I will never forget the tragical day last March when General Pershing put at my disposal, without restriction, all the resources of the American army. The success won in the hard fighting by the American army is the consequence of the excellent conception, command and organization of the American General Staff, and the irreducible will to win of the American troops. The name 'Meuse' may be inscribed proudly upon the American flag."

MARSHAL FOCH'S RECORD

Ferdinand Foch, Marshal of France, was born at Tarbes in the French Pyrenees, August 4th of 1851—a year during which all Europe was agitated by the approach of war. His earlier education,

UNITED STATES IN THE WAR

largely religious, was had at the schools of Saint Etienne, Rodez and Metz. In his twentieth year he entered the Ecole Polytechnique at Paris for a course of instruction in military science, after which he was commissioned a lieutenant in the artillery branch of the French army, rising to a captaincy in 1878.

In 1892, with the rank of major, he became an instructor in the war school, specializing in military history and theory. He returned to army service as a lieutenant colonel in 1901, and in 1907 was made a general of brigade. Shortly thereafter, at the close of a term in command of artillery in the Fifth Army Corps, he was put at the head of the war school.

When war broke out in August, 1914, General Foch was in charge of the military post at Nancy, a point commanding the way between the Vosges mountains and the Duchy of Luxemburg. When the Germans came down toward the Marne and the situation in the field became very critical, his controlling doctrine of attack was brought into brilliant play.

The part of the French line under his command being endangered, he reported to Marshal Joffre: "My right wing is suffering severe pressure. My left is suffering from heavy assaults. I am about to attack with my centre."

He did. That attack stopped the German advance, turned their forces from the road to Paris, and sent them suddenly southward.

Looking back over those days, it is seen now that this action marked the shock-point of the war. It disjoined the whole German plan, saved France, and gave France and England time to raise and equip their armies, and mobilize their industrial resources. The German high command had promised the German people to finish the war in six weeks. General Foch inaugurated their finish in less than four.

His operations since that time are well remembered. Down to the day when at President Wilson's earnest urging he was placed in supreme command of the allied armies on all fronts, March 29, 1918, he had been steadily victorious. The week before, the Germans had begun their last and most powerful "drive." The manner in which General Foch sold terrain to them for the highest price they could be made to pay in German lives is understood now, and admired. When he had teased them along and worn them down, he sharply altered his strategy and attacked with a force and continuity so terrific that it practically destroyed the German armies, and compelled Germany to beg for the armistice that ended the war. From July 18, 1918, down to November 11, he pounded and powdered the enemy without cessation.

It is a matter of which Americans may well be proud that Marshal

UNITED STATES IN THE WAR

Foch, with keen judgment and knowledge of military values, selected the first and second divisions of the United States regular army to strike the first blow in that tremendous assault. The only other troops participating were those of a French colonial division, from Morocco.

GENERAL PERSHING'S THANKSGIVING ADDRESS

Thanksgiving Day, 1918, was celebrated in the most befitting manner at the American Army headquarters in France. After Bishop Brent's benediction, a band concert was given. General Pershing then addressed his victorious army as follows:

"Fellow soldiers: Never in the history of our country have we as a people, come together with such full hearts as on this greatest of all Thanksgiving days. The moment throbs with emotion, seeking to find full expression. Representing the high ideals of our countrymen and cherishing the spirit of our forefathers who first celebrated this festival of Thanksgiving, we are proud to have repaid a debt of gratitude to the land of Lafayette and to have lent our aid in saving civilization from destruction.

"The unscrupulous invader has been driven from the devastated scenes of his unholy conquest. The tide of conflict which during the dark days of midsummer threatened to overwhelm the allied forces has been turned into glorious victory. As the sounds of battle die away and the beaten foe hurries from the field it is fitting that the conquering armies should pause to give thanks to the God of Battles, who has guided our cause aright.

"VICTORY OUR GOAL"

"Victory was our goal. It is a hard won gift of the soldier to his country.

"In this hour of thanksgiving our eternal gratitude goes out to those heroes who loved liberty better than life, who sleep yonder, where they fell; to the maimed, whose honorable scars testify stronger than words to their splendid valor, and to the brave fellows whose strong, relentless blows finally crushed the enemy's power.

"Nor in our prayer shall we forget the widow who freely gave the husband more precious than her life, nor those who, in hidden heroism, have impoverished themselves to enrich the cause, nor our comrades who in more obscure posts here and at home have furnished their toll to the soldiers at the front.

"Great cause, indeed, have we to thank God for trials successfully met and victories won. Still more should we thank Him for the golden future, with its wealth of opportunity and its hope of a permanent, universal peace."

UNITED STATES IN THE WAR

THE HOMECOMING OF KING ALBERT

The world rejoiced with Belgium when King Albert and the Queen returned in triumph to Brussels, November 21, 1918, just a little over four years after the bodeful day when they left it, in 1914. Belgium, the first martyr to German ferocity, had come back to its own—had justified the historic words of its King to the insolent Germans, "Belgium is a country, not a road," and stood firm, a David of the Nations, against the onslaught of the most awful and bloody hordes the world has seen since Attila, the other Hun, drove with his swarming savages over Europe, centuries ago, roaring that grass would never grow again where their horses trod.

Civilization had been justified. The "scrap of paper" had come to life. It was a great day, an hour of right and might, a soul-stirring climax to a most stupendous drama. The hero rode in triumph; and the villain, after ignominious flight, was hiding behind the skirts of a Dutchwoman, over the border.

No finer troops marched through Brussels on this gala day than the Yanks, who were given a conspicuous place in the celebration. A battalion of infantry from the Ninety-First American Division and a battery from the Fifty-Third Brigade, fresh from the beating they had given the Huns at Oudenark a few days before, were prominent in the lines, and shared in the plaudits a liberated people showered upon their own heroic troops. Troops that had held the last strip of Belgian soil through all those bitter years with a tenacity the Huns could never shake. These Belgian soldiers, had, of course, the place of honor. French and British troops, with bands playing and colors flying, shared in the glorious triumph.

The King and the royal family rode at the head of two Belgian divisions—a column of veterans stretching out fifteen miles. The day was like midsummer—bright and fair. All the roads leading to the Rue Royale and the Boulevard Anspach were packed hours before the King's arrival. At the Port de Flandre the throngs were so dense they were impassable. The whole city was gorgeously decorated. Aircraft were overhead, dropping confetti. The balconies all along the route were draped with flags and colored banners, and filled with people who, when the King and his family rode by, showered them with flowers and little flags. At one place a company of five hundred young women sang the Brabanconne, the Belgian national song, and the American, French and British national anthems.

The royal progress ended at the Palais de la Nation, where the King dismounted and entered, to address the parliament in its first assembly after the war—an historic session. Then he reviewed the troops in the great square, and thence went to the Hotel de Ville to receive the address of the Burgomaster Max, that sturdy figure, which the Germans at the height of their tyranny had not been able to budge.

UNITED STATES IN THE WAR

AMERICA'S TREMENDOUS ACHIEVEMENT BEHIND THE LINES

When the armistice was signed on November 11, 1918, the United States land forces in Europe numbered some 2,200,000 fighting men. Of these about 750,000 were in the Argonne section, on the French front. The others were in various units on the French, Belgian, Italian and other fronts. Additions were arriving from the States at the rate of 8,000 men each day.

Behind these combat forces was an immense support in men and supplies of every kind from home, and a transport system surpassing that of any other belligerent, perfectly equipped; and a great army of relief workers, in addition to one of the finest hospital systems the world has ever seen.

The American army had taken to France and had in operation 967 standard gauge locomotives and 13,174 standard gauge freight cars of American manufacture. In addition it had in service 350 locomotives and 973 cars of foreign origin. To meet demands which the existing French railways were unable to meet, 843 miles of standard gauge railway were constructed. Five hundred miles of this had been built since June, 1918.

The department of light railways had constructed 115 miles of road, and 140 miles of German light railways were repaired and put in operation. Two hundred and twenty-five miles of French railway were operated by the Americans.

But railways represent only a fraction of the transport effort. Modern warfare is motor warfare and it is virtually impossible to present in figures this phase of the work of the American army.

In building new roads as the exigencies of battle operations required, in keeping French roads repaired under the ceaseless tide of war transport and in constructing bridges in devastated battle regions, American engineers worked day and night. The whole region behind the American lines was full of typical American road machinery, much of it of a character never seen before in Europe.

To do this work the American expeditionary forces had in operation November 11, 1918, more than 53,000 motor vehicles of all descriptions.

The American forces were in no danger of being placed on short rations, had the war continued.

One ration represents the quantity of each article each man is entitled to daily. It is interesting to note the supply of some of the principal ration components on hand.

The Americans had 390,000,000 rations of beans alone, 183,000,000 rations of flour and flour substitutes, 267,000,000 rations of milk; 161,000,000 rations of butter or substitutes; 143,000,000 rations of sugar;

UNITED STATES IN THE WAR

89,000,000 rations of meat; 57,000,000 rations of coffee and 113,000,000 rations of rice, hominy and other foods, with requisites such as flavorings, fruits, candy and potatoes in proportion, while for smokers, there were 761,000,000 rations of cigarettes and tobacco in other forms.

It is difficult to describe in exact figures what the American expeditionary forces have done in the construction and improvement of dockage and warehouses since the first troops landed. This work has been proportionate to the whole effort in other directions. Ten steamer berths have been built at Bordeaux, having a total length of 4,100 feet. At Montoir, near St. Nazaire, eight berths were under construction with a total length of over 3,200 feet.

Great labor had been expended in dredging operations, repairing French docks and increasing railway terminal facilities. Warehouses having an aggregate floor area of almost 23,000,000 square feet had been constructed. This development of French ports increased facilities to such an extent that even if the Germans had captured Calais and other channel ports, as they had planned, the allies' loss would have been strategically unimportant.

So largely were facilities increased that the English armies could have had their bases at the lower French ports, if necessary. In other words, American work in port construction lessened to a material degree the value to the Germans of their proposed capture of the channel ports.

These figures serve in a measure to show the magnitude of American accomplishments, and the great machine is in operation today as the American Third army moves forward into German territory.

During the second stage of the Argonne operation a captured German major, while in casual conversation with an American officer said: "We know defeat is inevitable. We know your First and Second armies are operating and that your Third army is nearly ready to function. We know there are more and more armies to follow. We can measure your effort. The end must come soon."

AMERICAN FORCES AND CASUALTIES

At the opening of November, 1918, the United States armies on all fronts numbered about 2,200,000 men, and was being increased at an average rate of 250,000 a month. In transit from home ports to ports in Europe and Siberia, only one transport ship was lost, and of its complement of troops 126 men were drowned. The sinking was caused by collision with another ship in the same convoy, not by an enemy submarine. The United States has not lost one man in transport, by an act of a hostile ship or submarine.

Army and marine casualties reported by the commanders of overseas forces to the government at Washington up to November

UNITED STATES IN THE WAR

27th, 1918 (after the seventeenth month of our participation in the war), were as follows:

Killed in action, 28,363; died of wounds, 12,101; died of disease, 16,034; died of other causes, 1,980; wounded, 189,995 (of this number 92,036 only slightly wounded); missing in action and prisoners, 14,250; making a total numbering 262,723.

War Department reports show that over-seas Air Service Casualties to October 24th, 1918, were 128 battle fatalities and 224 killed in accidents.

TOTAL OF CIVIL WAR CASUALTIES COMPARED ARE AS FOLLOWS

Federal troops killed in action, 67,058; died of wounds, 43,012; died of disease, 224,586; making total Federal fatalities 334,656.

Confederates killed and died of wounds, 95,000; died of disease, 164,000; making the total Confederate fatalities 259,000.

According to the War Department records, total dead of the Civil War is 618,524.

BRITISH, FRENCH AND ITALIAN LOSSES

British losses are estimated at 1,000,000 killed and 2,049,991 wounded, missing and prisoners.

The French losses are over 1,500,000 in killed and over 3,000,000 in wounded and prisoners.

The Italian losses, including casualties and prisoners, are estimated at a total of 2,000,000, including 500,000 dead.

7,589 CASUALTIES IN ROYAL AIR FORCES

Casualties in the royal air forces from April, 1918, when the air forces were amalgamated, to Nov. 11, were: Killed, 2,680; wounded, missing and prisoners, 4,909, according to an official statement by the air ministry.

CANADA'S CASUALTIES

Canada's casualty list up to November 1, 1918 (eleven days before the armistice), totaled 211,358, classified as follows: Killed in action, 34,877; died of wounds or disease, 15,457; wounded, 152,779; presumed dead, missing in action and known prisoners of war, 8,245. Canada's total land forces numbered nearly a half million men; that is, over eighty per cent of the men of the Dominion of military age, who were physically fit. They constituted over forty per cent of the male population. It is a strange coincidence of figures that the losses above enumerated constitute just about the same per cent (forty) of the armed forces, that those forces bore to the young nation's total manhood. Canada's efforts and sacrifices in the war have not been fully understood. When they are, they will evoke the admiration of the world, and of history.

GERMAN LOSSES

Exact figures covering German losses since August 1st, 1914, when the war began with the German invasion of Belgium, cannot

UNITED STATES IN THE WAR

be had. The records are kept at Berlin and their figures have been withheld from even the people of Germany.

The only estimates available are those made by commanders opposing the German forces, and these were confessedly cautious, the allied policy being to minimize estimates of enemy reverses, so that no false encouragement might reach the public in any of the allied countries. On this basis, the estimates approximate a German loss of over 1,580,000 killed and 4,490,000 disabled, prisoners, and missing, a total of 6,070,000.

The Austrian losses in killed are estimated at 800,000 and 3,200,000 prisoners, wounded and missing.

TOTAL LOSSES

The world's actual loss of men in the war is estimated at not less than 10,000,000, counting those killed in action, died of wounds, or dead from other causes in prison camps or in the field.

These estimates do not include 800,000 Armenian Christians massacred by the Turks at the order of the German general staff, nor the Belgian and French civilians starved to death, infected with typhus and tuberculosis by hypodermic injection, or murdered outright by German soldiery under orders, nor the German wholesale slaughter of Serbians, of Greeks in Asia Minor, nor similar victims in Poland, Lithuania and southwest Russia, outnumbering no doubt the total loss of fighting men in all the armies. It is not likely these murders of noncombatants can ever be counted up.

GERMANY'S NAVAL SURRENDER

Surrender of the German navy and delivery of its ships to the Grand Fleet (consisting of the British and United States navies), began November 21, 1918, just ten days after the armistice was signed. Ninety German ships of all grades constituted the first delivery. Admiral Sims, of the American Navy, King George and the Prince of Wales, were aboard the Queen Elizabeth, the flagship of Admiral Beatty, commanding the Grand Fleet. Five hundred British and American war vessels were in the receiving lines, and convoyed the surrendered German ships to the Firth of Forth, just below Edinburgh, Scotland, where they will lie until their disposal is determined. Among the German vessels surrendered that day were sixty submarines.

Other deliveries of German war vessels were continued. On November 29th it was discovered that of the 360 submarines of all types built by the Germans, the Grand Fleet had destroyed or captured 200. Of the remaining 160 nearly all had been surrendered by that date. This being the exact number called to surrender by the terms of the armistice, it would appear the allied conference was fully informed to

UNITED STATES IN THE WAR

that effect, and thereby was enabled to strip Germany of the last of these vessels, whose record of murder and piracy at sea is without any precedent whatever in history.

FORMER KAISERIN WEEPS

The meeting of former Emperor William and the former empress at Amerongen is described by a Dutch correspondent as follows:

"The gates were thrown open, the drawbridge was lowered with a noise of chains and iron bars that sounded very medieval, and in the courtyard before the castle an elderly man in a gray military cloak was seen at a distance, walking slowly and leaning on his stick. It was the ex-kaiser. The ex-kaiserin's car was driven into the courtyard, the ex-kaiser threw down his stick and, before the valet was able, opened the door and handed out his wife.

"They shook hands and then threw themselves into each other's arms, the ex-kaiserin falling upon her husband's shoulder and crying like a child."

FORMER KAISER'S ACT OF RENUNCIATION

The text of the former German emperor's act of renunciation, which was issued by the New German government, "in order to reply to certain misunderstandings which have arisen with regard to the abdication," follows:

By the present document I renounce forever my rights to the crown of Prussia and the rights to the German imperial crown. I release, at the same time, all the officials of the German empire and Prussia, and also all officers, non-commissioned officers and soldiers of the Prussian navy and army and of contingents from confederate states from the oath of fidelity they have taken to me.

As their emperor, king and supreme chief, I expect from them, until a new organization of the German empire exists, that they will aid those who effectively hold the power in Germany to protect the German people against the menacing dangers of anarchy, famine and foreign domination.

Made and executed and signed by our own hand with the imperial seal at Amerongen Nov. 28.

WILLIAM.

PERSHING PAYS TRIBUTE TO HIS MEN

In closing his preliminary report to the Secretary of War, made public on December 4, 1918, General Pershing expresses his feeling for the men who served with him, as follows:

"I pay the supreme tribute to our officers and soldiers of the line. When I think of their heroism, their patience under hardships, their unflinching spirit of offensive action, I am filled with emotion which I am unable to express. Their deeds are immortal, and they have earned the eternal gratitude of our country."

CHAPTER XXXIII CHRONOLOGY OF WORLD WAR

Comprehensive Chronology of the Four Years of War—Dates of Important Battles and Naval Engagements—Ready Reference of Historical Events from June, 1914, to End of War in 1918.

1914

June 28—Archduke Ferdinand and wife assassinated in Sarajevo, Bosnia.

July 28—Austria-Hungary declares war on Serbia.

August 1—Germany declares war on Russia and general mobilization is under way in France and Austria-Hungary. Aug. 2—German troops enter France at Cirey; Russian troops enter Germany at Schwidden; German army enters Luxemburg over protest, and Germany asks Belgium for free passage of her troops. Aug. 3—British fleet mobilizes; Belgium appeals to Great Britain for diplomatic aid and German ambassador quits Paris.

Aug. 4—France declares war on Germany; Germany declares war on Belgium; Great Britain sends Belgium neutrality ultimatum to Germany; British army mobilized and state of war between Great Britain and Germany is declared. President Wilson issues neutrality proclamation. Aug. 5—Germans begin fighting on Belgium frontier; Germany asks for Italy's help. Aug. 6—Austria declares war on Russia. Aug. 7—Germans defeated by French at Altkirch. Aug. 9—Germans capture Liege. Portugal announces it will support Great Britain; British land troops in France. Aug. 10—France declares war on Austria-Hungary.

Aug. 12—Great Britain declares war on Austria-Hungary; Montenegro declares war on Germany. Aug. 15—Japan sends ultimatum to Germany to withdraw from Japanese and Chinese waters and evacuate Kiao-chow; Russia offers autonomy to Poland. Aug. 20—German army enters Brussels. Aug. 23—Japan declares war on Germany; Russia victorious in battles in East Prussia. Aug. 24—Japanese warships bombard Tsingtao. Aug. 25—Japan and Austria break off diplomatic relations. Aug. 28—English win naval battle over German fleet near Helgoland. Aug. 29—Germans defeat Russians at Allenstein; occupy Amiens; advance to La Fere, sixty-five miles from Paris.

September 1—Germans cross Marne; bombs dropped on Paris; Turkish army mobilized; Zeppelins drop bombs on Antwerp. Sept. 2—Government of France transferred to Bordeaux; Russians capture Lemberg. Sept. 4—Germans cross the Marne. Sept. 5—England, France, and Russia sign pact to make no separate peace. Sept. 6—French win battle of Marne; British cruiser Pathfinder sunk in North sea by a German submarine. Sept. 7—Germans retreat from the Marne. Sept. 14—Battle of Aisne starts; German retreat halted. Sept. 15—First battle of Soissons fought. Sept. 20—Russians capture Jaroslau and begin siege of Przemyśl.

October 9-10—Germans capture Antwerp. Oct. 12—Germans take Ghent. Oct. 20—Fighting along Yser river begins. Oct. 29—Turkey begins war on Russia.

November 7—Tsingtao falls before Japanese troops. Nov. 9—German cruiser Emden destroyed.

December 11—German advance on Warsaw checked. Dec. 14—Belgrade recaptured by Serbians. Dec. 16—German cruisers bombard Scarborough, Hartlepool, and Whitby, on English coast, killing fifty or more persons; Austrians said to have lost upwards of 100,000 men in Serbian defeat. Dec. 25—Italy occupies Avlona, Albania.

CHRONOLOGY OF THE WORLD WAR

1915

January 1—British battleship *Formidable* sunk. **Jan. 8**—Roumania mobilizes 750,000 men; violent fighting in the Argonne. **Jan. 11**—Germans cross the Rawka, thirty miles from Warsaw. **Jan. 24**—British win naval battle in North sea. **Jan. 29**—Russian army invades Hungary; German efforts to cross Aisne repulsed.

February 1—British repel strong German attack near La Bassee. **Feb. 2**—Turks are defeated in attack on Suez canal. **Feb. 4**—Russians capture Tarnow in Galicia. **Feb. 8**—Turks along Suez canal in full retreat; Turkish land defenses at the Dardanelles shelled by British torpedo boats. **Feb. 11**—Germans evacuate Lodz. **Feb. 12**—Germans drive Russians from positions in East Prussia, taking 26,000 prisoners. **Feb. 14**—Russians report capture of fortifications at Smolnik. **Feb. 16**—Germans capture Plock and Bielsk in Poland; French capture two miles of German trenches in Champagne district.

February 17—Germans report they have taken 50,000 Russian prisoners in Mazurian lake district. **Feb. 18**—German blockade of English and French coasts put into effect. **Feb. 19-20**—British and French fleets bombard Dardanelles forts. **Feb. 21**—American steamer *Evelyn* sunk by mine in North sea. **Feb. 22**—German war office announces capture of 100,000 Russian prisoners in engagements in Mazurian lake region; American steamer *Carib* sunk by mine in North sea. **Feb. 28**—Dardanelles entrance forts capitulate to English and French.

March 4—Landing of allied troops on both sides of Dardanelles straits reported; German U-4 sunk by French destroyers. **March 10**—Battle of Neuve Chapelle begins. **March 14**—German cruiser *Dresden* sunk in Pacific by English. **March 18**—British battleships *Irresistible* and *Ocean* and French battleship *Bouvet* sunk in Dardanelles strait. **March 22**—Fort of Przemyśl surrenders to Russians. **March 23**—Allies land troops on Gallipoli peninsula. **March 25**—Russians victorious over Austrians in Carpathians.

April 8—German auxiliary cruiser, *Prinz Eitel Friedrich*, interned at Newport News, Va. **April 16**—Italy has 1,200,000 men mobilized under arms; Austrians report complete defeat of Russians in Carpathian campaign. **April 23**—Germans force way across Ypres canal and take 1,600 prisoners. **April 25**—Allies stop German drive on Ypres line in Belgium. **April 29**—British report regaining of two-thirds of lost ground in Ypres battle.

May 7—Liner *Lusitania* torpedoed and sunk by German submarine off the coast of Ireland with the loss of more than 1,000 lives, 102 Americans. **May 9**—French advance two and one-half miles against German forces north of Arras, taking 2,000 prisoners. **May 23**—Italy declares war on Austria.

June 3—Germans recapture Przemyśl with Austrian help. **June 18**—British suffer defeat north of La Bassee canal. **June 28**—Italians enter Austrian territory south of Riva on western shore of Lake Garda.

July 3—Tolmino falls into Italian hands. **July 9**—British make gains north of Ypres and French retake trenches in the Vosges. **July 13**—Germans defeated in the Argonne. **July 29**—Warsaw evacuated; Lublin captured by Austrians.

August 4—Germans occupy Warsaw. **Aug. 14**—Austrians and Germans concentrate 400,000 soldiers on Serbian frontier. **Aug. 21**—Italy declares war on Turkey.

September 1—Ambassador Bernstorff announces Germans will sink no more liners without warning. **Sept. 4**—German submarine torpedoes liner *Hesperian*. **Sept. 9**—Germans make air raid on London, killing twenty persons and wounding 100 others; United States asks Austria to recall Ambassador

CHRONOLOGY OF THE WORLD WAR

Dumba. Sept. 20—Germans begin drive on Serbia to open route to Turkey. Sept. 22—Russian army retreating from Vilna, escapes German encircling movement. Sept. 25-30—Battle of Champagne, resulting in great advance for allied armies and causing Kaiser Wilhelm to rush to the west front; German counter attacks repulsed.

October 5—Russia and Bulgaria sever diplomatic relations; Russian, French, British, Italian, and Serbian diplomatic representatives ask for passports in Sofia. Oct. 10—Gen. Mackensen's forces take Belgrade. Oct. 12—Edith Cavell executed by Germans. Oct. 13—Bulgaria declares war on Serbia. Oct. 15—Great Britain declares war on Bulgaria. Oct. 16—France declares war on Bulgaria. Oct. 19—Russia and Italy declare war on Bulgaria. Oct. 27—Germans join Bulgarians in northeastern Serbia and open way to Constantinople. Oct. 30—Germans defeated at Mitau.

November 9—Italian liner Ancona torpedoed.

December 1—British retreat from near Bagdad. Dec. 4—Ford "peace party" sails for Europe. Dec. 8-9—Allies defeated in Macedonia. Dec. 15—Sir John Douglas Haig succeeds Sir John French as chief of English armies on west front.

1916

January 8—British troops at Kut-el-Amara surrounded. Jan. 9—British evacuate Gallipoli peninsula. Jan. 13—Austrians capture Cetinje, capital of Montenegro. Jan. 23—Scutari, capital of Albania, captured by Austrians.

February 22—Crown prince's army begins attack on Verdun.

March 8—Germany declares war on Portugal. March 15—Austria-Hungary declares war on Portugal. March 24—Steamer Sussex torpedoed and sunk.

April 18—President Wilson sends note to Germany. April 19—President Wilson speaks to congress, explaining diplomatic situation. April 24—Insurrection in Dublin. April 29—British troops at Kut-el-Amara surrender to Turks. April 30—Irish revolution suppressed.

May 3—Irish leaders of insurrection executed. May 4—Germany makes promise to change methods of submarine warfare. May 13—Austrians begin great offensive against Italians in Trentino. May 31—Great naval battle off Danish coast.

June 5—Lord Kitchener lost with cruiser Hampshire. June 11—Russians capture Dubno. June 29—Sir Roger Casement sentenced to be hanged for treason.

July 1—British and French begin great offensive on the Somme. July 6—David Lloyd George appointed secretary of war. July 9—German merchant submarine Deutschland arrives at Baltimore. July 23—Gen. Kuropatkin's army wins battle near Riga. July 27—English take Delville wood; Serbian forces begin attack on Bulgars in Macedonia.

August 2—French take Fleury. Aug. 3—Sir Roger Casement executed for treason. Aug. 4—French recapture Thiaumont for fourth time; British repulse Turkish attack on Suez canal. Aug. 7—Italians on Isonzo front capture Monte Sabotino and Monte San Michele. Aug. 8—Turks force Russian evacuation of Bitlis and Mush. Aug. 9—Italians cross Isonzo river and occupy Austrian city of Goeritz. Aug. 10—Austrians evacuate Stanislaw; allies take Doiran, near Saloniki, from Bulgarians.

August 19—German submarines sink British light cruisers Nottingham and Falmouth. Aug. 24—French occupy Maurepas, north of the Somme; Russians recapture Mush in Armenia. Aug. 27—Italy declares war on Germany; Roumania enters war on side of allies. Aug. 29—Field Marshal von Hinden-

CHRONOLOGY OF THE WORLD WAR

burg made chief of staff of German armies, succeeding Gen. von Falkenhayn. August 30—Russian armies seize all five passes in Carpathians into Hungary.

September 3—Allies renew offensive north of Somme; Bulgarian and German troops invade Dobrudja, in Roumania. Sept. 7—Germans and Bulgarians capture Roumanian fortress of Tutrakan; Roumanians take Orsova, Bulgarian city. Sept. 19—German-Bulgarian army captures Roumanian fortress of Silistria. Sept. 14—British for first time use "tanks." Sept. 15—Italians begin new offensive on Carso.

October 2—Roumanian army of invasion in Bulgaria defeated by Germans and Bulgarians under Von Mackensen. Oct. 4—German submarines sink French cruiser Gallia and Cunard liner Franconia. Oct. 8—German submarines sink six merchant steamships off Nantucket, Mass. Oct. 11—Greek seacoast forts dismantled and turned over to allies on demand of England and France. Oct. 23—German-Bulgar armies capture Constanza, Roumania. Oct. 24—French win back Douaumont, Thiaumont field work, Haudromont quarries, and Caillette wood near Verdun, in smash of two miles.

November 1—Italians, in new offensive on the Carso plateau, capture 5,000 Austrians. Nov. 2—Germans evacuate Fort Vaux at Verdun. Nov. 5—Germans and Austrians proclaim new kingdom of Poland, of territory captured from Russia. Nov. 6—Submarine sinks British passenger steamer Arabia. Nov. 7—Cardinal Mercier protests against German deportation of Belgians; submarine sinks American steamer Columbian. Nov. 8—Russian army invades Transylvania, Hungary. Nov. 9—Austro-German armies defeat Russians in Volhynia and take 4,000 prisoners.

November 13—British launch new offensive in Somme region on both sides of Ancre. Nov. 14—British capture fortified village of Beaucourt, near the Ancre. Nov. 19—Serbian, French, and Russian troops recapture Monastir; Germans cross Transylvania Alps and enter western Roumania. Nov. 21—British hospital ship Britannic sunk by mine in Aegean sea. Nov. 23—Roumanian army retreats ninety miles from Bucharest. Nov. 24—German-Bulgarian armies take Orsova and Turnu-Severin from Roumanians. Nov. 25—Greek provisional government declares war on Germany and Bulgaria. Nov. 28—Roumanian government abandons Bucharest and moves capital to Jassy.

December 5—Premier Herbert Asquith of England resigns. Dec. 7—David Lloyd George accepts British premiership. Dec. 8—Gen. von Mackensen captures big Roumanian army in Prohova valley. Dec. 12—Chancellor von Bethman-Hollweg announces in reichstag that Germany will propose peace; new cabinet in France under Aristide Briand as premier, and Gen. Robert Georges Nivelle given chief of command of French army. Dec. 15—French at Verdun win two miles of front and capture 11,000.

December 19—Lloyd George declines German peace proposals. Dec. 23—Baron Burian succeeded as minister of foreign affairs in Austria by Count Czernin. Dec. 26—Germany proposes to President Wilson "an immediate meeting of delegates of the belligerents." Dec. 27—Russians defeated in five-day battle in eastern Wallachia, Roumania.

1917

January 1—Submarine sinks British transport Ivernia. Jan. 9—Russian premier, Trepoff, resigns. Golitzin succeeds him. Jan. 31—Germany announces unrestricted submarine warfare.

February 3—President Wilson reviews submarine controversy before congress; United States severs diplomatic relations with Germany; American steamer Housatonic sunk without warning. Feb. 7—Senate indorses President's

CHRONOLOGY OF THE WORLD WAR

act of breaking off diplomatic relations. Feb. 12—United States refuses German request to discuss matters of difference unless Germany withdraws unrestricted submarine warfare order.

February 14—Von Bernstorff sails for Germany. Feb. 25—British under Gen. Maude capture Kut-el-Amara; submarine sinks liner Laconia without warning; many lost including two Americans. Feb. 26—President Wilson asks congress for authority to arm American merchantships. Feb. 28—Secretary Lansing makes public Zimmerman note to Mexico, proposing Mexican-Japanese-German alliance.

March 9—President Wilson calls extra session of congress for April 16. March 11—British under Gen. Maude capture Bagdad; revolution starts in Petrograd. March 15—Czar Nicholas of Russia abdicates. March 17—French and British capture Bapaume. March 18—New French ministry formed by Alexander Ribot.

March 21—Russian forces cross Persian border into Turkish territory; American oil steamer Healdton torpedoed without warning. March 22—United States recognizes new government of Russia. March 27—Gen. Murray's British expedition into the Holy Land defeats Turkish army near Gaza.

April 2—President Wilson asks congress to declare that acts of Germany constitute a state of war; submarine sinks American steamer Aztec without warning. April 4—United States senate passes resolution declaring a state of war exists with Germany. April 6—House passes war resolution and President Wilson signs joint resolution of congress. April 8—Austria declares severance of diplomatic relations with United States.

April 9—British defeat Germans at Vimy Ridge and take 6,000 prisoners; United States seizes fourteen Austrian interned ships. April 20—Turkey severs diplomatic relations with the U. S. April 28—Congress passes selective service act for raising of army of 500,000; Guatemala severs diplomatic relations with Germany.

May 7—War department orders raising of nine volunteer regiments of engineers to go to France. May 14—Espionage act becomes law by passing senate. May 18—President Wilson signs selective service act. Also directs expeditionary force of regulars under Gen. Pershing to go to France. May 19—Congress passes war appropriation bill of \$3,000,000,000.

June 5—Nearly 10,000,000 men in U. S. register for military service. June 12—King Constantine of Greece abdicates. June 13—Gen. Pershing and staff arrive in Paris. June 15—First Liberty loan closes with large over-subscription. June 26—First contingent American troops under Gen. Sibert arrives in France. June 29—Greece severs diplomatic relations with Teutonic allies.

July 9—President Wilson drafts state militia into federal service. Also places food and fuel under federal control. July 13—War department order drafts 678,000 men into military service. July 22—Siam declares war on Germany. July 23—Premier Kerensky given unlimited powers in Russia. July 28—United States war industries board created to supervise expenditures.

August 25—Italian Second army breaks through Austrian line on Isonzo front. Aug. 28—President Wilson rejects Pope Benedict's peace plea.

CHRONOLOGY OF THE WORLD WAR

September 10—Gen. Korniloff demands control of Russian government. **Sept. 11**—Russian deputies vote to support Kerensky. Korniloff's generals ordered arrested. **Sept. 16**—Russia proclaims new republic by order of Premier Kerensky. **Sept. 20**—Gen. Haig advances mile through German lines at Ypres. **Sept. 21**—Gen. Tasker H. Bliss named chief of staff, U. S. army.

October 16—Germans occupy islands of Runo and Adro in the Gulf of Riga. **Oct. 25**—French under Gen. Petain advance and take 12,000 prisoners on Aisne front. **Oct. 27**—Formal announcement made that American troops in France had fired their first shots in the war. **Oct. 29**—Italian Isonzo front collapses and Austro-German army reaches outposts of Udine.

November 1—Secretary Lansing makes public the Luxemburg "spurious versenkt" note. **Nov. 7**—Austro-German troops capture. **Nov. 9**—Permanent interallied military commission created. **Nov. 24**—Navy department announces capture of first German submarine by American destroyer. **Nov. 28**—Bolsheviki get absolute control of Russian assembly in Russian elections.

December 6—Submarine sinks the Jacob Jones, first regular warship of American navy destroyed. **Dec. 7**—Congress declares war on Austria-Hungary. **Dec. 8**—Jerusalem surrenders to Gen. Allenby's forces.

1918

January 5—President Wilson delivers speech to congress giving "fourteen points" necessary to peace. **Jan. 20**—British monitors win seafight with cruisers Goeben and Breslau, sinking latter. **Jan. 28**—Russia and Roumania sever diplomatic relations.

February 2—United States troops take over their first sector, near Toul. **Feb. 6**—United States troopship Tuscania sunk by submarine, 126 lost. **Feb. 11**—President Wilson, in address to congress, gives four additional peace principles, including self-determination of nations; Bolsheviki declare war with Germany over, but refuse to sign peace treaty. **Feb. 13**—Bolo Pasha sentenced to death in France for treason. **Feb. 25**—Germans take Reval, Russian naval base, and Pskov; Chancellor von Hertling agrees "in principle" with President Wilson's peace principles, in address to reichstag.

March 1—Americans repulse German attack on Toul sector. **March 2**—Treaty of peace with Germany signed by Bolsheviki at Brest-Litovsk. **March 4**—Germany and Roumania sign armistice on German terms. **March 13**—German troops occupy Odessa. **March 14**—All Russian congress of soviets ratifies peace treaty. **March 21**—German spring offensive starts on fifty mile front. **March 22**—Germans take 16,000 British prisoners and 200 guns.

March 23—German drive gains nine miles. "Mystery gun" shells Paris. **March 24**—Germans reach the Somme, gaining fifteen miles. American engineers rushed to aid British. **March 25**—Germans take Bapaume. **March 27**—Germans take Albert. **March 28**—British counter attack and gain; French take three towns; Germans advance toward Amiens. **March 29**—"Mystery gun" kills seventy-five churchgoers in Paris on Good Friday.

April 4—Germans start second phase of their spring drive on the Somme. **April 10**—Germans take 10,000 British prisoners in Flanders. **April 16**—Germans capture Messines ridge, near Ypres; Bolo Pasha executed. **April 23**—British and French navies "bottle up" Zeebrugge. **April 26**—Germans capture Mount Kemmel, taking 6,500 prisoners.

May 5—Austria starts drive on Italy. **May 10**—British navy bottles up Ostend. **May 24**—British ship Moldavia, carrying American troops, torpedoed; 56 lost. **May 27**—Germans begin third phase of drive on west front; gain five miles. **May 28**—Germans take 15,000 prisoners in drive. **May 29**—Germans take Soissons and menace Reims. American troops capture Cantigny. **May**

CHRONOLOGY OF THE WORLD WAR

30—Germans reach the Marne, fifty-five miles from Paris. May 31—Germans take 45,000 prisoners in drive.

June 1—Germans advance nine miles; are forty-six miles from Paris. June 3—Five German submarines attack U. S. coast and sink eleven ships. June 5—U. S. marines fight on the Marne near Chateau Thierry. June 9—Germans start fourth phase of their drive by advancing toward Noyon. June 10—Germans gain two miles. U. S. marines capture south end of Belleau wood.

June 12—French and Americans start counter attack. June 15—Austrians begin another drive on Italy and take 16,000 prisoners. June 17—Italians check Austrians on Piave river. June 19—Austrians cross the Piave. June 22—Italians defeat Austrians on the Piave. June 23—Austrians begin great retreat across the Piave.

July 18—Gen. Foch launches allied offensive, with French, American, British, Italian and Belgian troops. July 21—Americans and French capture Chateau Thierry. July 30—German crown prince flees from the Marne and withdraws army.

August 2—Soissons recaptured by Foch. Aug. 4—Americans take Fismes. Aug. 5—American troops landed at Archangel. Aug. 7—Americans cross the Vesle. Aug. 16—Bapaume recaptured. Aug. 28—French recross the Somme.

September 1—Foch retakes Peronne. Sept. 12—Americans launch successful attack in St. Mihiel salient. Sept. 28—Allies win on 250 mile line, from North sea to Verdun. Sept. 29—Allies cross Hindenburg line. Sept. 30—Bulgaria surrenders, after successful allied campaign in Balkans. October 1—French take St. Quentin. Oct. 4—Austria asks Holland to mediate with allies for peace. Oct. 5—Germans start abandonment of Lille and burn Douai. Oct. 6—Germany asks President Wilson for armistice. Oct. 7—Americans capture hills around Argonne. Oct. 8—President Wilson refuses armistice. Oct. 9—Allies capture Cambrai. Oct. 10—Allies capture Le Cateau. Oct. 11—American transport Otranto torpedoed and sunk; 500 lost. Oct. 13—Foch's troops take Laon and La Fere.

October 14—British and Belgians take Roulers; President Wilson demands surrender by Germany. Oct. 15—British and Belgians cross Lys river, take 12,000 prisoners and 100 guns. Oct. 16—Allies enter Lille outskirts. Oct. 17—Allies capture Lille, Bruges, Zeebrugge, Ostend, and Douai. Oct. 18—Czecho-Slovaks issue declaration of independence; Czechs rebel and seize Prague, capital of Bohemia; French take Thielt.

October 19—President Wilson refuses Austrian peace plea and says Czecho-Slovak state must be considered. Oct. 21—Allies cross the Oise and threaten Valenciennes. Oct. 22—Haig's forces cross the Scheldt. Oct. 23—President Wilson refuses latest German peace plea. Oct. 27—German government asks President Wilson to state terms. Oct. 28—Austria begs for separate peace.

October 29—Austria opens direct negotiations with Secretary Lansing. Oct. 30—Italians inflict great defeat on Austria; capture 33,000 Austrians evacuating Italian territory. Oct. 31—Turkey surrenders; Austrians utterly routed by Italians; lose 50,000; Austrian envoys, under white flag, enter Italian lines.

November 1—Italians pursue beaten Austrians across Tagliamento river; allied conference at Versailles fixes peace terms for Germany. Nov. 3—Austria signs armistice amounting virtually to unconditional surrender. Nov. 4—Allied terms are sent to Germany. Nov. 7—Germany's envoys enter allied lines by arrangement.

November 9—Kaiser Wilhelm abdicates and crown prince renounces throne. Nov. 10—Former Kaiser Wilhelm and his eldest son, Friedrich Wilhelm, flee to Holland to escape widespread revolution throughout Germany.

CHRONOLOGY OF THE WORLD WAR

November 9—Kaiser Wilhelm abdicates and crown prince renounces throne. British battleship *Britannia* torpedoed and sunk by German submarine off entrance to Straits of Gibraltar. **Nov. 10**—Former Kaiser Wilhelm and his eldest son, Frederick Wilhelm, flee to Holland to escape widespread revolution throughout Germany. King of Bavaria abdicates. **Nov. 11**—Armistice signed at 11 o'clock a. m., Paris time. Firing ceased on all fronts. An American battery from Providence, Rhode Island, fired last shot at exactly 11 o'clock on the front northwest of Verdun. Germans began evacuation of Belgium and Alsace-Lorraine.

November 12—German republic proclaimed at Berlin. Emperor Charles of Austria abdicates. Belgium demands complete independence instead of guaranteed neutrality. To secure status as a belligerent at the peace council, Roumania again declares war on Germany. United States decides to feed the German people. United States stops draft boards and lifts war restriction of industries. **Nov. 13**—American troops cross the German former frontier and enter Alsace-Lorraine.

November 14—Polish troops occupy the royal palaces in Warsaw and seize telegraph and telephone connections with Vienna. United States loans another hundred million dollars to Italy for food supplies. Dangerous bolshevik disorders in Germany and Austria. German crown prince interned in Holland.

November 15—Distinguished Service Medal conferred on General Pershing at his headquarters in France by General Tasker H. Bliss. United States Postoffice department takes control of all ocean cable lines, consent of other governments having been obtained. Prof. Thomas G. Masaryk proclaimed President of the new Czecho-Slav republic.

November 16—Copenhagen reported many German ships due for surrender under armistice conditions. Demobilization of United States troops ordered by the government, beginning with those in army camps at home. United States takes over express service. Belgian troops enter Brussels. German cruiser *Wiesbaden* torpedoed by German revolutionary sailors, with loss of 330 lives.

November 17—Two hundred and fifty thousand American troops advance nine miles in French territory evacuated by Germans. French armies advance across the west boundary of Alsace-Lorraine and occupy many towns. People of Luxemburg demand abdication of Grand Duchess.

November 18—President Wilson decides to attend the peace conference to be held in Europe. French occupy Metz. American troops reach the German border. British troops land at Gallipoli. American troops defeat bolshevik forces at Fulka, on the river Dvina. United States government takes over German insurance companies' agencies in America to be sold by the Custodian of alien property.

November 29—The President announced names of commissioners to represent the United States at peace conference. They are: Woodrow Wilson, President of the United States; Robert Lansing, Secretary of State; Col. Edward M. House; Henry White, former ambassador to Italy and to France, and Gen. Tasker H. Bliss, American adviser of the supreme war council.

December 4, 1918—President Wilson and a numerous staff sailed for Europe from New York aboard the *George Washington*, escorted by warships under command of Admiral Mayo, to attend the Peace Conference at Paris. See the Supplement to this book for further history of the Great War.

NOTE.—Including the pages of illustrations, this volume contains 576 pages.

ONE OF THE HUGE KRUPP SIEGE MORTARS, GERMANY'S MOST POWERFUL WEAPON AGAINST FORTS

THE FIRST NAVAL RESERVE UNIT TO LEAVE FOR SERVICE IN THE WAR
The First Battalion of the Naval Militia of New York passing in review of Mayor Mitchel and other officials on stand at Union League Club, 39th Street and Fifth Avenue. (Copyright by U. & U., N. Y.)

The United States battleship Pennsylvania, showing an unusual view of some of her heavy guns. This vessel is the pride of the Navy and was selected to escort President Wilson on his voyage to Europe to attend the Peace Conference. She led the way across the Atlantic, steaming ahead of the George Washington, on which the President and his party of 200 were passengers. She carries twelve 14-inch and twenty-two 5-inch guns.

The longest-range field gun in the world, produced by the Ordnance Department, U. S. Army, for service in France, though the hostilities ceased before they reached General Pershing. More than a hundred of these guns are said to have been prepared for shipping to France, and their range and power would probably have astonished the Germans, as did the great naval guns, mounted on railway cars and manned by American seamen, that did such effective work in the closing days of the conflict. (U. S. Official Photo.)

Canadians entering a wood just evacuated by the Germans and passing an enemy gun which has been rendered useless and abandoned by the Huns in their retreat. The Canadians are advancing in the face of machine-gun fire. (Canadian official photograph.)

French Artillery on the Firing Line—The Modern Field Guns of the French and the Krupp Guns of the
Germans Have Destroyed the French Artillery.

ONE OF THE GREAT GERMAN 16-INCH SIEGE GUNS USED AT ANTWERP

The above photograph shows the gun train complete, ready for transportation. The motive power is furnished by the powerful motor truck at the right, which also carries most of the artillerymen forming the gun crew. About thirty men are needed to manipulate the gun in action. The huge shells and ammunition are conveyed in separate trucks or caissons. As a fort-wrecker this powerful piece of ordnance is most effective. Its total weight is nearly 100 tons. The gun proper is at the left and its Krupp sliding breech can be plainly seen at the side. In the center is the gun carriage, with its very powerful recoil apparatus. When the gun is in action these two sections are joined, being so constructed as to fit together readily. The bursting projectiles were called by the British soldiers "Jack Johnsons," "Black Marias" and "Coal-boxes," from the thick black smoke they produced. These epithets ignored their awful death-dealing qualities. (Copyright, U. & U.)

Departure of President Wilson from New York, December 3, 1918, on the steamship George Washington, formerly a German liner, on his voyage to France to attend the Peace Conference. This event made a new record in American history, it being the first time a President has ever left the country for any length of time. A destroyer is seen escorting the President's ship down the harbor to Staten Island, where the battleship Pennsylvania assumed the chief escort duty. (Copyright, I. F. S.)

German prisoners captured by Canadians during a French raid, with one of their captors. The Canadians became noted for the success of their raids by day and night and seldom failed to bring back prisoners. (Canadian official photograph.)

Drafting the armistice terms by the Allied plenipotentiaries at Versailles. On the left side of the table from left to right are shown: Gen. du Robilant; next man unidentified; Italian Foreign Minister Sonnino; Italian Premier Orlando; Col. E. M. House; Gen. Tasker H. Bliss; next man unidentified; Greek Premier Venizelos; Serbian Minister Vesnitch. On the right side of the table from left to right. Admiral Wemyss, with back to camera; Gen. Sir Henry Wilson; Field Marshal Sir Douglas Haig; Gen. Sackville West; Andrew Bonar Law; Premier David Lloyd-George; French Premier Georges Clemenceau; and French Foreign Minister Stephen Pichon. (*French Official Photo, from I. F. S.*)

President Wilson and General Pershing receiving American troops at Humas, near the front, on Christmas day, 1918. The President is seen wearing the fur coat made from trophies of the hunt, presented by Southern friends. Mrs. Wilson stands at the right.

Homecoming of American soldiers from Europe. An upper deck of the steamship Mauretania, sister ship of the ill-fated Lusitania, as she steamed into New York harbor, bringing back the first batch of returning troops. These men were all of the aviation service who had been in training in England. Their faces show how glad they were to see the Goddess of Liberty once more. (Copyright, I. F. S.)

Canada's Premier on a visit to the Western front in Europe, with a notable group of Canadian officers. Sir Robert Borden is the central figure of the seated row, and the other civilian in the picture is Mr. Calder. Between them is seen General Currie, in command of the Canadian forces in Europe, who have earned undying fame for the great Dominion during the war. (*Canadian Official Photo, from W. N. U.*)

Part of the American army of occupation on its way to Germany. After celebrating for awhile the announcement that the armistice had been signed, the American troops at the front realized that there was still serious work, though of a different kind, ahead of them, and started for the cities across the Rhine with a firm determination to carry on till all the fruits of their victory were obtained. An American dispatch rider is seen at the right, fraternizing with a French soldier. (*French Official Photo, from U. & U.*)

How the news of the armistice of November 11, 1918, was received on the French front. The picture shows a scene along the French lines immediately after hostilities ceased. Myriads of men sprang into sight from the concealment of the trenches, exposing themselves to the view of the enemy for the first time in more than four years, without fear of consequences. Note the fleet of tanks ready in the foreground, also the wire entanglements and No Man's Land. (Copyright, I. F. S.)

Canadian and German wounded receiving first aid in a village which only a few hours before was in the hands of the Germans responsible for the scene of ruin and devastation which it presents. (Canadian official photograph)

French Cavalrymen Bivouacked in the Streets of Paris, Sleeping on the Fodder of Their Mounts, Standing
in the Background

England's Premier, Lloyd George, inspecting German Cannon.

Photographic Airplanes Mapping Territory. Photo Taken by a Third Plane Not Shown in Picture.

British cavalry engaged against German infantry driven out of shelter of the trees by fire and smoke near Chantilly. The charge down the grassy glade of the flaming forest. The woods had been set on fire by British infantry in order to smoke out a large force of Germans who had secreted themselves in the forest. As soon as they emerged they were charged with destructive effect by the British and sustained heavy losses.—*Drawn by Frederic de Haenen from a sketch by Frederic Villiers. (Sun Printing and Publishing Assn.)*

King Albert I of Belgium, the beloved sovereign who never lost the confidence of his stricken people during the four years of their intense suffering.

Marshal Petain of France, the hero of Verdun, who led the victorious French into Strassburg and heads the French army of occupation in Germany.

Canadian troops resting in a trench on the hard-won Wotan line of the Germans, which was captured on the previous day after a desperate struggle that resulted in the rout of the enemy. (Canadian official photograph.)

A divisional headquarters on the British front in France during the progress of a battle, showing troops in reserve, German prisoners, and stretcher-bearers at work. (Australian official photograph, by British and Colonial Press.)

Canadian and Imperial troops helping themselves to free coffee supplied by the Canadian Y. M. C. A. at a roadside stand made of biscuit boxes. The Helpful work of the "Y" was highly appreciated by the troops in France and Flanders. (Canadian official photograph.)

**CHARGE OF THE BRITISH 9TH LANCERS ON A GERMAN BATTERY DURING THE
BATTLE OF MONS**

The battery had inflicted heavy losses on the British troops. All the gunners were cut down and the guns put out of action.—Drawn by Dudley Tennant for The Graphic, from notes by a trooper.

Top—One of the fast "Whippets," or small British tanks, that created havoc and terror in the German ranks in 1918. They precede the infantry and completely destroy machine gun nests. (*British Official Photo from I. F. S.*)

Bottom—The first American-built tank, called the "America," biggest of all, weighing 45 tons and propelled by steam. (*Copyright, U. & U.*)

FOUNDERING OF THE BRITISH CRUISER ABOUKIR

A few minutes after the Aboukir was struck by a torpedo from the German submarine U-9 early on September 22, 1914, she listed to port at an angle of 45 degrees and the captain sang out from the bridge: "Every man for himself!" The drawing depicts the scene that followed, as described by a survivor. Two-thirds of the crew of 650 were drowned or killed by the explosion. The boats of the cruisers Hogue and Cressy, which were soon after also torpedoed and sunk, are seen coming to the rescue. The total loss was over 1,400 lives. Drawn by Charles Dixon, R. I., for *The Graphic*.

Above—American observation balloon being brought down to its anchorage. One of many similar balloons used to direct the fire of artillery and observe the movements of the enemy, a service of considerable danger as the balloonists are constantly exposed to airplane attack. Each observer is harnessed to a parachute and jumps when the balloon is attacked and in danger of destruction. (Copyright by C. P. I., from W. N. U.)

Below—Canadian officers of a Royal Air Squadron, lined up with their machines behind the front in France. It was the splendid work of these gallant fellows and thousands more like them—British, French, and Americans—that kept the supremacy of the air in the hands of the Allies. (Canadian Official Photo, copyright by U. & U.)

Above—American automatic rifle team making it hot for the Huns. Note the protective barricade of ammunition boxes and sandbags.
Below—How hand grenades are thrown at the enemy in the trenches. American soldiers soon became expert at this superlative kind of baseball. (*U. S. Official Photos.*)

Above—An American supply train in the town of Esnes, seen from the cemetery. In the background Hill 300, which was held by the Germans since early in the war and has been the scene of many attacks and great slaughter. Note the utter ruin of the town as it was found by the Americans.

Below—An American patrol arriving at the ruins of the house used as an observatory by the German Crown Prince during the famous battle of Verdun. It is said that he watched the operations in comfort while seated before the eyepiece of a periscope carried up through the roof. (U. S. Official Photos.)

Top: United States Warship North Dakota.

Bottom: New type of rapid-firing machine gun used by the United States Army

Above—Easing the pain of the wounded in an evacuation hospital in France. The Red Cross nurses in the photo (two girls from Aberdeen, S. D., are giving wounded Yank a newspaper from God's country and some chocolate, and he evidently appreciates their work.

Below—The first batch of American troops to return from France after the armistice. The photo shows the camouflage of S. S. Mauretania as she arrived in New York harbor, bearing 5,000 men, of whom 1,100 were wounded. (U. S. Official Photos.

Above—Surrender of the German high-seas fleet. A British warship, which towed an observation balloon, leading the line of seventy German vessels into the Firth of Forth. (Copyright, U. & U.)
Below—Surrendering the German submarines at the port of Harwich, England. Note the listless attitude of this particular German crew. (Copyright, I. F. S.)

Top—American fighters in France, just out of the trenches, are seen at a wayside station of the American Red Cross, receiving welcome refreshments within gunfire of the battle front. (Photo from I. F. S.)

Bottom—First aid given to a wounded German prisoner by American soldiers near the front. An example of American fair play in striking contrast to Boche methods. (Copyright, Committee on Public Information.)

Top—A great Australian howitzer in action in France under a camouflage screen. Note the size of shells, which require four men to handle. (Australian Official Photo; copyright, U. & U.)
 Bottom—American Army Postoffice in France on Mothers' Day, 1918. Letters and packages from the folks back home are the American soldiers' greatest comfort on the battle front. (Copyright, Committee on Public Information.)

Top—Inspection of Czecho-Slovaks at railroad station, Vladivostok, before leaving for interior of Siberia in campaign against the Bolsheviks; later aided by American troops. (Copyright, U. & U.)
Bottom—"Blue Devils of France"; battle-scarred veterans of the fighting lines leaving the White House after their reception. President Wilson shook hands with every one of these gallant soldiers. (Copyright, I. F. S.)

Above—Going over the top. Allied troops with full equipment are seen leaving their trench and advancing to attack. This is the moment that tried men's souls, and showed themselves and their comrades the stuff that was in them. (Photo from I. F. S.)

Below—Scene when Cambrai was captured by the British, showing large numbers of British troops moving forward across the battlefield. In the foreground the men are seen leaving a communication trench. (British Official Photo, from I. F. S.)

Above—Machine-gun team of an American balloon company at work on the French front, trying to get an enemy airplane. These anti-aircraft guns are known as "Archies."

Below—Men of the 313th U. S. Field Artillery cleaning and polishing 75-millimeter shells, to be sent over to the Hun at night. Dirty or rusted shells are dangerous to use. (U. S. Official Photos.)

Above—Scene in Chateau Thierry after the battle that brought undying glory to American arms, and especially to the Marine Corps. The effects of the heavy bombardment by the artillery of the Third Division are plainly to be seen. (Photo from I. F. S.)

Below—American and French soldiers looking over the town of Chateau Thierry after the battle. This was the scene of America's first great victory in the war. The town was stormed and the enemy routed by the troops the Germans had chosen to belittle. (Copyright by C. P. I.; Photo from W. N. U.)

Above—American negro infantrymen advancing toward the front in the Argonne along a screened highway. It can truly be said of these American soldiers and their ilk in the campaign in France that "the colored troops fought nobly."
Below—Men of the 132nd U. S. Infantry, 33rd Division, in a front line trench, looking toward the valley of the Meuse, where it is estimated 70,000 men lie buried.
 (U. S. Official Photos.)

Above—How a commanding general works while his troops are fast asleep. A night scene in the tent headquarters of Maj.-Gen. Adelbert Cronkhite, U. S. A., division commander on the front in France. The general stands at the right and his chief of staff, Col. Wm. H. Waldron, at the left.

Below—U. S. Secretary of War Newton D. Baker getting ready to try on an American infantryman's pack at a rest camp in England. (*U. S. Official Photos.*)
